I. *It is ordered,* That respondent Walgreen Co., a corporation, its successors or assigns, its officers, agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the advertising, offering for sale, sale or distribution of general merchandise, drug or cosmetic products, hereafter sometimes referred to as items, offered or sold in its retail drug stores, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from, directly or indirectly.

A. Disseminating, or causing the dissemination of any advertisement by any means which offers any item for sale at a stated price, unless during the effective period of the advertised offer at each retail store covered by the advertisement:

1. Each advertised item is readily available for sale to customers in the public area of the store, or if not readily available there, a clear and conspicuous notice is posted where the item is regularly displayed which states that the item is in stock and may be obtained upon request, and said item is furnished on request;

2. There is a sign or other conspicuous marking at the place where an item advertised below regular shelf price is displayed for sale, clearly disclosing that the item is "as advertised" or "on sale" or words of similar import as appropriate, and disclosing on such sign or marking, the advertised price;

3. Each advertised item which is usually and customarily individually marked with a price, is individually, clearly, and conspicuously marked with the advertised price;

4. Each advertised item is sold to customers at or below the advertised price.

The Commission recognizes that technical per se violations of Section I of this order are inevitable despite the honest best efforts of respondent to ensure availability and proper pricing of advertised items. Therefore,

in determining compliance with Section I of this order, the Commission will consider (a) all circumstances surrounding nondelivery of advertised products which were actually ordered in quantities sufficient to meet reasonably anticipated demands but were not delivered due to circumstances beyond respondent's control, and (b) all circumstances surrounding failure to make advertised items conspicuous and readily available for sale at or below the advertised prices due to circumstances beyond respondent's control.

Provided, It shall constitute a defense to a charge of unavailability under subparagraph I.A.1. if respondent maintains and furnishes or makes available for inspection and copying upon the request of the Federal Trade Commission, such records and affidavits as will show that (a) the advertised items were delivered to its stores in quantities sufficient to meet reasonably anticipated demand, or (b) the advertised items were ordered but not delivered due to circumstances beyond respondent's control, and that respondent, upon notice or knowledge of such nondelivery acted immediately to contact the media to correct the advertisement or proposed advertisement to reflect the limited availability or unavailability of each advertised item, and (c) respondent immediately offered to customers on inquiry a "rain check" for each unavailable item which entitled the holder to purchase the item in the near future at or below the advertised price or a similar product of equal or better quality at or below the advertised price of the unavailable product.

Provided, further, That it shall not be deemed a violation of subparagraphs I.A.I., I.A.2., I.A.3., or I.A.4., if respondent is complying with a specific exemption, limitation or restriction with respect to store, item or price which is clearly and conspicuously disclosed in all advertisements for the product in question.

Provided, further, That an advertised item which is usually and customarily individually marked with a price, need not be marked with the advertised price but may remain marked at its regular price if both (i) a conspicuous sign at the site of the display of such item clearly states that the cashiers know the sale price; and (ii) the cashiers do in fact have a written list containing such sale price, have been instructed to charge the sale price for said item, and do in fact charge the customer the sale price.

II. *It is further ordered*, That throughout each advertised sale period in each of its retail stores covered by an advertisement, respondent shall post conspicuously (1) at or near each doorway affording entrance to the public, and (2) at or near the place where customers pay for merchandise, notices which contain the following information:

A. A copy of the advertisement.

B. A statement that: "All items listed in the advertisement are required to be available for sale at or below the advertised price."

C. A clear and conspicuous statement of respondent's rain check program which will inform customers that:

1. A rain check will be promptly issued by any store employee when an advertised item is unavailable.

2. A rain check will enable customers to purchase an unavailable item at the advertised price when stocks are replenished or, if such replenishment is impossible, a similar item of equal or better quality will be substituted.

3. A rain check will be valid for a period of thirty (30) days.

III. *It is further ordered*, That respondent shall cause the following statement to be clearly and conspicuously set forth in each advertisement which represents that items are available for sale at a stated price at any of its stores: "Each of these advertised items is required to be readily available for sale at or below the advertised price in each Walgreen store, except as specifically noted in this ad".

IV. *It is further ordered*, That:

A. Respondent shall forthwith deliver a copy of this order to each of its operating divisions and to each of its present and future officers and other personnel in its organization down to the level of and including assistant store directors who, directly or indirectly, have any supervisory responsibilities as to individual retail stores of respondent, or who are engaged in any aspect of preparation, creation, or placing of advertising, and that respondent shall secure a signed statement acknowledging receipt of said order from each such person;

B. Respondent shall institute and maintain a program of continuing surveillance adequate to reveal whether the business practices of each of its retail stores conform to this order, and shall confer with any duly authorized representative of the Commission;

C. Respondent shall, for a period of three (3) years subsequent to the date of this order:

1. Maintain business records which show the efforts taken to insure continuing compliance with the terms and provisions of this order;

2. Grant any duly authorized representative of the Federal Trade Commission access to all such business records;

3. Furnish to the Federal Trade Commission copies of such records which are requested by any of its duly authorized representatives.

D. Respondent shall, all other provisions of this order notwithstanding, on or before each of the first three (3) anniversary dates of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order in the preceding year.

It is further ordered, That no provision of this order shall be construed in any way to annul, invalidate, repeal, terminate, modify or exempt respondents from complying with agreements, orders or directives of any kind obtained by any other agency or act as a defense to actions instituted by municipal or state regulatory agencies. No provision of this order shall be construed to imply that any past or future conduct of respondents complies with the rules and regulations of, or the statutes administered by, the Federal Trade Commission.

It is further ordered, That respondent shall notify the Commission at least thirty days prior to any proposed change in the corporate respondent, such as dissolution, assignment or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the respondent which may affect compliance obligations arising out of this order.

It is further ordered, That respondent shall, within sixty days after service upon it of this order, file with the Commission a written report setting forth in detail the manner and form of its compliance with this order.

[File No. 742-3256]

WALGREEN CO.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement to a proposed consent order from the Walgreen Co.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

Walgreen Co. is an Illinois corporation engaged in the operation of a large chain of retail drug stores throughout the United States. Its national distribution of products is broadened by the franchising of over 1800 independently owned "Walgreen Agency Stores". Its newspaper advertisements regularly list and depict general merchandise, drug and cosmetic products and state the prices at which such items will be offered for sale during a specific time period.

The complaint alleges that in a number of Walgreen retail drug stores a substantial number of items listed in its advertisements were not available, or were not conspicuously available for sale at or below the advertised prices, or were sold to customers at prices higher than the advertised prices during the effective period of the advertisement.

The consent order requires Walgreen to make advertised items readily available, to use shelf signs to indicate the location of items advertised below regular shelf price, to mark customarily price-marked items with their advertised prices, and to sell advertised items at the advertised price. Exceptions make provision for unanticipated demand, circumstances beyond Walgreen's control, and limitations clearly set forth in the advertising.

The order requires Walgreen to post in its stores: copies of advertisements, notices that all advertised items are required to be available at the advertised prices, and the availability of rain checks for them. Other provisions of the order are designed to ensure Walgreen's compliance with it.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

JOHN F. DUGAN,
Acting Secretary.

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Parts 231, 261, 291, 293]

PROHIBITIONS

Miscellaneous Changes

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Forest Service, Department of Agriculture is considering amending regulations in 36 CFR Parts 231, 261, 291, and 293. The previous such amendment appearing at page 2956 FEDERAL REGISTER dated Friday, January 14, 1977, is hereby being supplemented to make Part 261—Prohibitions the only part containing prohibitions as was the original intent.

DATES: Comments must be received on or before June 24, 1977.

ADDRESS: Submit comments to: William L. Rice, Director, Fiscal and Accounting Management, U.S. Department of Agriculture, Forest Service, P.O. Box 2417, Washington, D.C. 20013. All written submissions made pursuant to this notice will be available for public inspection in room 4017, South Building, Department of Agriculture, 14th and Independence Avenue, SW., Washington, D.C., during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Kenneth L. Evans, Fiscal and Accounting Management, 202-447-7850.

SUPPLEMENTARY INFORMATION: It is proposed to amend 36 CFR, Chapter II as follows:

PART 231—GRAZING

1. By revising § 231.11 (p) and (q) to read as follows:

§ 231.11 Wild free-roaming horses and burros.

* * * * *

(p) *Arrest.* Any employee designated by the Chief, Forest Service, shall have the power to arrest without warrant, any person committing in the presence of the employee a violation of the Act or of § 261.21 of this chapter and to take such person immediately for examination or trial before an officer or court of competent jurisdiction. Any employee so designated shall have power to execute any warrant or other process issued by an officer or court of competent jurisdiction to enforce the provisions of the Act and the regulations in § 261.21 of this chapter.

(q) *Penalties.* In accordance with Section 8 of the Act, any person who willfully violates a regulation issued pursuant to the Act shall be subject to a fine of not more than $2,000 or imprisonment for not more than 1 year, or both. Any person so charged with such violation by the authorized officer may be tried and sentenced by a United States commissioner or magistrate, designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions as provided in section 3401, Title 18, U.S.C.

(85 Stat. 649, as amended, (16 U.S.C. 1331-1340); sec. 1, 30 Stat. 35, as amended, (16 U.S.C. 551); sec. 32, 50 Stat. 525, as amended, (7 U.S.C. 1011); 74 Stat. 215 (16 U.S.C. 528-531).)

PART 261—PROHIBITIONS

AUTHORITY: 30 Stat. 35, as amended, (16 U.S.C. 551); sec. 1, 33 Stat. 628 (16 U.S.C. 472); 50 Stat. 526, as amended, (7 U.S.C. 1011(f)); 82 Stat. 916 (16 U.S.C. 1281(d)); 82 Stat. 922 (16 U.S.C. 1246(i)), unless otherwise noted.

§ 261.7 [Amended]

2. By revising § 261.7(a) by deleting the period following the word "System" and adding the words "or other lands under Forest Service control."

3. By revising § 261.7(b), by deleting the period following the "System" and adding the words "or other lands under Forest Service control."

4. By deleting paragraph (e) of § 261.7.

5. By amending § 261.10, adding paragraph (k) as follows:

§ 261.10 Occupancy and use.

* * * * *

(k) Violating the terms or conditions of a permit issued under § 261.50(f).

6. By amending § 261.13 to add the following new paragraphs (h) and (i):

§ 261.13 Use of vehicles off roads.

* * * * *

(h) In a manner which damages or disturbs the land, wildlife, or vegetative resources.

(i) In violation of applicable State or county laws and regulations established for vehicles used off roads.

8. By amending § 261.16 (c) and (d) to read as follows:

§ 261.16 National Forest wilderness.

* * * * *

The following are prohibited in a National Forest wilderness:

* * * * *

(c) Landing of aircraft, or the dropping or picking up of any material, supplies, or person by means of aircraft, including helicopter.

(d) Motels, summer homes, stores, resorts, organization camps, hunting and fishing lodges, and similar facilities and uses.

8. By amending § 261.19 to read as follows:

§ 261.19 National Forest Primitive Areas.

Except as may be authorized as necessary for prospecting, locating, and developing of mineral resources or for a statutory right of ingress or egress, the following are prohibited in any area classified as a National Forest Primitive Area on September 3, 1964:

(a) Roads or other provisions for motorized transportation.

(b) Commercial timber cutting.

(c) Motels, summer homes, stores, resorts, organization camps, hunting and fishing lodges, and similar facilities and uses.

(d) Landing of aircraft or the use of motor boats, unless such use had become well established.

(e) Possessing or using a motor vehicle.

(f) Possessing or using a motor or motorized equipment, except small battery powered, hand-held devices, such as cameras, shavers, flashlights, and geiger-counters.

9. By adding a new § 261.21, consisting of provisions presently in § 261.7(e) and § 231.11(q), to read as follows:

§ 261.21 Wild free-roaming horses and burros.

(a) The following are prohibited:

(1) Willfully removing of, or attempting to remove, a wild free-roaming horse or burro from the National Forest System.

(2) Converting a wild free-roaming horse or burro to private use, without authority from the Chief, Forest Service.

(3) Maliciously causing the death or harassment of any wild free-roaming horse or burro.

(4) Processing or permitting to be processed into commercial products, the remains of a wild free-roaming horse or burro.

(5) Selling, directly or indirectly, a wild horse or burro allowed on private or leased land pursuant to section 4 of the Wild Free-Roaming Horses and Burros Act.

(85 Stat. 649, as amended, 16 U.S.C. 1331-1340.)

10. By amending § 261.50(e)(1) and (f) to read as follows:

§ 261.50 Orders.

* * * * *

(e) * * *.

(1) Persons with a permit specifically authorizing the otherwise prohibited act or omission.

* * * * *

(f) The Chief, each Regional Forester, each Forest Supervisor, and each District Ranger or equivalent officer may issue permits to persons authorizing the occupancy or use of a road, trail, area, or other part of the National Forest System in accordance with authority which is delegated elsewhere in this chapter or in the Forest Service Manual. The issuing officer may authorize in the permit an act or omission which would otherwise be a violation of a Subpart A or C regulation or a Subpart B order. The issuing officer may include in any permit such conditions as he considers necessary for the protection and administration of the National Forest System, or for the promotion of public health, safety, or welfare.

11. By revising § 261.52, paragraphs (d), (h), and (j) to read as follows:

§ 261.52 Fire.

* * * * *

(d) Smoking, except within enclosed vehicles or buildings, developed recreation sites, or while stopped in an area at least three feet in diameter that is barren or cleared of all flammable materials.

* * * * *

(h) Operating an internal combustion engine.

* * * * *

(j) Operating or using any internal or external combustion engine on any timber, brush, or grass covered land, including trails traversing such land, without a spark arrester, maintained in effective working order, meeting either (1) Department of Agriculture, Forest Service Standard 5100-1a; or (2) appropriate Society of Automotive Engineers (SAE) recommended practices J335 and J350.

12. By adding paragraph (e) to § 261.55 as follows:

§ 261.55 Forest development trails.

* * * * *

(e) Operating any vehicle in violation of any applicable noise emission standard established by any Federal or State agency.

13. By adding paragraphs (w), (x), and (y) to § 261.58 as follows:

§ 261.58 Occupancy and use.

When provided by an order, the following are prohibited:

* * * * *

(w) Transporting, across National Forest System land, motors capable of propelling a water craft.

(x) Using wheels, rollers, or other mechanical devices for the overland transportation of any water craft.

(y) The land or water landing of aircraft, or the dropping or picking up of materials, supplies, or persons by means of an aircraft, including a helicopter.

PART 291—OCCUPANCY AND USE OF DEVELOPED SITES AND AREAS OF CONCENTRATED PUBLIC USE

§ 291.9 [Amended]

14. By deleting the last sentence each of paragraphs (a), (b), and (c) of § 291.9.

PART 293—WILDERNESS—PRIMITIVE AREAS

15. By adding alpha numeration to the existing paragraph (designate) and a new paragraph (b) to § 293.3 to read as follows:

§ 293.3 Control of uses.

(a) * * *

(b) For all prohibitions in National Forest wilderness, see Part 261 of this chapter.

§ 293.8 [Amended]

16. By deleting the first sentence of § 293.8, Permanent structures and commercial services. This subject is covered in Part 261.

§ 293.9 [Reserved]

17. By revoking and reserving § 293.9, *Poisons and herbicides*. This item is covered in Part 261.

§ 293.15 [Amended]

18. By revoking and reserving paragraph (b) of § 293.15, *Gathering information about resources other than minerals*.

19. By amending § 293.16(b) to read as follows:

§ 293.16 Special provisions governing the Boundary Waters Canoe Area, Superior National Forest.

* * * * *

(b) Except as provided in the Wilderness Act, in this section, and in § 294.2 (b), (c), and (e) of this chapter and subject to existing private rights, there shall be no prohibitions except as provided for in Part 261 of this chapter. For all prohibitions in the Boundary Waters Canoe Area, see Part 261 of this Chapter.

(1) The Chief, Forest Service, may permit temporary structures and commercial services within the Boundary Waters Canoe Area to the extent necessary for realizing the recreational and other wilderness purposes, which may include the public services generally offered by outfitters and guides.

(2) In the Portal Zone, temporary roads and the use of motorized equipment and mechanical transport for the authorized travel and removal of forest products will be permitted in accordance with special conditions established by the Chief, Forest Service. Such use of the roads for other purposes is not permitted.

(3) The overland transportation of any watercraft by mechanical transport and necessary attendant facilities may be permitted, in accordance with special conditions established by the Chief, Forest Service, over portages along the International Boundary, including the Loon River Portage, when acquired; Beatty Portage and Prairie Portage; the other major portages into Basswood Lake; namely, Four Mile and Fall-Newton-Pipestone Bay Portages; and the Vermilion-Trout Lake Portage. Mechanical transport over Four Mile and Fall-Newton-Pipestone Bay Portages may be suspended, modified, or revoked upon acquisition by the United States of all lands on Basswood Lake, and the expiration of rights reserved in connection with the acquisition of such lands.

(4) The Chief, Forest Service may designate special routes, for the transporting of motors or other mechanical device capable of propelling a water craft, across National Forest land. The Chief, Forest Service, shall cause a list and map of all routes so designated, and any special conditions governing their use, to be maintained for public reference in the offices of the Regional Forester, the Forest Supervisor, and the District Ranger having jurisdiction.

(5) The Chief, Forest Service, may permit the use of motor-driven ice and snow craft on routes over which motors may be transported, as authorized in subparagraph (4) of this paragraph; and over the Crane Lake-Little Vermilion Lake Winter Portage; and over the Saganaga Lake Winter Portage, in sections 18–19, T. 66N., R.4 W. The Chief shall cause a list and a map of routes over which use of ice and snow craft is permitted and any special conditions governing their use, to be maintained for public reference in the offices of the Regional Forester, the Forest Supervisor, and the District Ranger having jurisdiction.

(6) In order to permit customary use of the Boundary Waters Canoe Area to continue pending a permanent solution to the change of water levels resulting from the failure of Prairie Portage Dam and notwithstanding the provision of subparagraph (3) of this paragraph until December 31, 1969, use of portage wheels to transport boats across the temporary portage between Moose Lake and Newfound Lake may be permitted, and permits may be issued for the storage of boats and related equipment in the vicinity of this temporary portage to the extent consistent with the operating practices of the permittees prior to the failure of Prairie Portage Dam as determined by the Forest Supervisor; and notwithstanding the provisions of subparagraph (1) of this paragraph, a structure to maintain normal water levels in Moose Lake is authorized.

* * * * *

(78 Stat. 890, (16 U.S.C. 1131–1136); 74 Stat. 215, (16 U.S.C. 528–531); 46 Stat. 1020, (16 U.S.C. 577–577c).)

20. By revising § 293.17 as follows:

§ 293.1 National Forest Primitive Areas.

(a) All prohibitions for those areas of National Forest classified as "Primitive" on the effective date of the Wilderness Act, September 3, 1964, are established in or pursuant to Part 261 of this chapter.

(b) Existing roads over National Forest lands reserved from the public domain and roads necessary for the exercise of a statutory right of ingress and egress may be allowed under appropriate conditions determined by the Chief, Forest Service.

(c) The grazing of domestic livestock, development of water storage projects which do not involve road construction, and improvements necessary for the protection of the National Forests may be permitted, subject to such restrictions as the Chief, Forest Service, deems desirable.

(d) Within Primitive Areas the Chief, Forest Service, may authorize the landing of aircraft, the use of motor boats, motor vehicle, or motorized equipment for the administrative needs of the Forest Service, use by other Federal agencies, in emergencies, or where necessary for the exercise of a statutory right.

(78 Stat. 890 (16 U.S.C. 1131–1136); 74 Stat. 215 (16 U.S.C. 528–531).)

M. RUPERT CUTLER,
Assistant Secretary.

MAY 20, 1977.

[FR Doc.77-14853 Filed 5-24-77;8:45 am]

FEDERAL MARITIME COMMISSION

[46 CFR Part 502]

[Docket No. 77–14]

APPEARANCES AND PRACTICE BEFORE THE COMMISSION

Proposed Rulemaking

AGENCY: Federal Maritime Commission.

ACTION: Proposed rule.

SUMMARY: The Federal Maritime Commission proposes to amend its Rules of Practice and Procedure governing the appearance and practice before the Commission of former employees to prohibit any former Commission member, officer or employee from practicing, appearing, or representing anyone before the Commission within one year of the termination of their service with the Commission unless it is shown that the particular matter under consideration by the Commission was not under the official responsibility of such former member, officer or employee at any time within a period of one year prior to the termination of such responsibility. These changes are being made to conform this Commission's rule with 18 U.S.C. 207(b).

DATES: Comments on or before: June 23, 1977.

ADDRESSES: Comments to: Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT:

Joseph C. Polking, Acting Secretary, Federal Maritime Commission, 1100 L Street NW., Washington, D.C. 20573 (202–523–5725).

SUPPLEMENTARY INFORMATION: It has come to the attention of the Commission that Rule 32(b) of the Rules of Practice and Procedure (46 CFR 502.32 (b)), governing the practice before the Commission of former employees within one year of the termination of such employee's service with the Commission is inconsistent with the relevant criminal statute (18 U.S.C. § 207(b)) governing the same conduct for former government officers or employees. Rule 32(b) of the Commission's Rules of Practice and Procedure provides:

(b) *Matters pending; waiver.* (1) No former member, officer, or employee of the Commission shall practice, appear, or represent anyone before the Commission, within one year after the termination of his service with the Commission, in connection with any particular Commission matter involving a specific party or parties which was pending before the Commission at any time during the period of his service with the Commission, unless he shall first apply for and obtain written consent of the Commission. This consent will not be granted unless it appears that the applicant did not, as member, officer, or employee of the Commission *participate personally and substantially in the matter* through decision, approval, disapproval, recommendation, the rendering of service, investigation, or otherwise gain knowledge of the facts of the matter. (Emphasis added.)

However, 18 U.S.C. 207(b) is somewhat more strict. It provides that:

(b) Whoever, having been so employed, within one year after his employment has ceased, appears personally before any court or department or agency of the government as agent, or attorney for, anyone other than the United States in connection with any proceeding, application, requesting for a ruling or other determination, contract, claim, controversy, charge, accusation, arrest, or other particular matter involving a specific party or parties in which the United States is a party or directly and substantially interested, *and which was under his official responsibility as an officer or employee of the Government* at any time within a period of one year prior to the termination of such responsibility—

Shall be fined not more than $10,000 or imprisoned for not more than two years, or both: * * * (Emphasis added.)

A comparison of Rule 32(b) and 18 U.S.C. 207(b) shows that a former employee of the Commission could unwittingly violate the criminal provision even though he was in compliance with the Commission rule. Therefore, the Commission proposes to amend paragraph (b), § 502.32, Title 46 CFR as follows:

§ 502.32 Former employees.

* * * * *

(b) *Matters pending; waiver.* (1) No former member, officer, or employee of the Commission shall practice, appear, or represent anyone before the Commission, within one year after the termination of his or her service with the Commission, in connection with any particular Commission matter involving a specific party or parties which was pending before the Commission at any time during the period of his or her service with the Commission, unless prior written consent of the Commission is applied for and obtained. This consent will not be granted unless it appears that the particular matter was not under the applicant's official responsibility as a member, officer, or employee of the Federal Maritime Commission at any time within a period of one year prior to the termination of such responsibility.

(2) Such applicant shall be required to file an affidavit to the effect that the particular Commission matter was not under the applicant's official responsibility as a member, officer or employee of the Federal Maritime Commission at any time within a period of one year prior to the termination of such responsibility; that the applicant is not associated with, and will not in such matter be associated with, any former member, officer, or employee of the Commission who is either permanently or temporarily precluded from practicing, appearing or representing anyone before the Commission in connection with the particular matter; and that the applicant's employment is not prohibited by any law of the United States or by the regulations of the Commission. The statements contained in such affidavit shall not be sufficient if disproved by an examination of the files and records of the case.

(3) Applications for consent should be directed to the Commission, should state the former connection of the applicant with the Commission, and should identify the matter in which the applicant desires to appear. The applicant shall be promptly advised as to his privilege to appear in the particular matter, and the application, affidavit and consent, or refusal to consent, shall be filed by the Commission in its records relative thereto. Separate consents to appear must be obtained to appear in separate cases.

* * * * *

(18 U.S.C. § 207(b); E.O. 11222 of May 8, 1965 (30 F.R. 6169); section 43, Shipping Act, 1916 (46 U.S.C. 841a); (5 U.S.C. § 553).)

By Order of the Federal Maritime Commission.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.14789 Filed 5-24-77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21238; RM–2632]

FM BROADCAST STATION IN McRAE, GA.

Proposed Change in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Upon petition filed by John W. Davidson, this Notice proposes the assignment of a first FM channel to McRae, Georgia (1970 pop. 3,061).

DATES: Comments must be received on or before June 24, 1977, and reply comments must be received on or before July 14, 1977.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau (202–632–7792).

SUPPLEMENTARY INFORMATION:

Adopted: May 10, 1977.

Released: May 17, 1977.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations (McRae, Georgia), Docket No. 21238, RM–2632.

1. *Petitioner, proposal, and comments.* (a) Petition for rule making filed December 10, 1975, by John W. Davidson,[1] licensee of daytime-only AM Station WDAX, McRae, Georgia, proposing the assignment of Channel 237A or 232A to McRae, as a first FM assignment to that community. Public Notice of the filing of the petition was given on January 14, 1976.

(b) Channel 237A could be assigned in full conformity with the Commission's minimum distance separation requirements. Channel 232A is short-spaced to a new site granted to Station WTOC–FM (Channel 231) at Savannah, Georgia. Since there is an alternative, Channel 232A will not be proposed.

(c) Opposition was filed by Broadcast Good Music! Committee in connection with its own proposal to add a seventh FM assignment at Atlanta, Georgia, and to change seven other assignments in Georgia. However, this proposal was denied by the Commission in *Atlanta, Georgia*, 49 F.C.C. 2d 1270 (1974), and the denial was upheld by the U.S. Court of Appeals (D.C. Cir.), Case No. 75–1926, 543 F. 2d 416 (1976). Thus, this matter is no longer an obstacle to the McRae proposal.

(d) Davidson states that, if the channel is assigned, he will promptly file an application to construct a station.

2. *Community data.* (a) *Location.* McRae, county seat of Telfair, is located in south central Georgia some 113 kilometers (70 miles) southeast of Macon and 145 kilometers (90 miles) east of Savannah.

(b) *1970 U.S. Census population.* McRae—3,061; Telfair County—11,381.

(c) *Local broadcast service.* The only local broadcast service in McRae and

[1] Davidson is also the principal in Jesup Broadcasting Corporation, licensee of WLOP and WIFO(FM), in Jesup, Georgia; and Davidson Communications, Inc., licensee of WDKD and WDKD–FM, Kingstree, South Carolina.

Telfair County is petitioner's AM station (1 kilowatt, daytime-only).

3. *Economic data.* Davidson states that farming is the major industry of the area, and that pulpwood, corn and cattle are the basic products. Davidson states that manufacturers also employ some of the McRae residents.

4. In view of the apparent need for a first local FM service and first local nighttime aural service for McRae and Telfair County, we find that consideration of the proposed FM assignment in a rulemaking proceeding would be in the public interest.

5. Accordingly, it is proposed to amend the FM Table of Assignments (§ 73.202 (b) of the Commission's rules and regulations) as follows for the city listed below:

City	Channel No.	
	Present	Proposed
McRae, Ga.		237A

6. Authority to institute rulemaking proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated by reference herein.

7. Interested parties may file comments on or before June 24, 1977, and reply comments on or before July 14, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.28(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this notice of proposed rulemaking.

2. *Showings required.* Comments are invited on the proposal(s) discussed in this notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420 (d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in this notice of proposed rule making. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, D.C.

[47 CFR Part 73]

[Docket No. 21237; RM-2538]

FM BROADCAST STATION IN WRENS, GA.

Proposed Change in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: Upon petition filed by Mayor J. J. Raburn, this notice of proposed rule making proposes the assignment of a first FM channel to Wrens, Georgia.

DATES: Comments must be received on or before June 24, 1977, and reply comments must be received on or before July 14, 1977.

ADDRESSES: Send comments to: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau (202-632-7792).

SUPPLEMENTAL INFORMATION:

Adopted: May 10, 1977.

Released: May 17, 1977.

In the matter of amendment of § 73.202(b), *Table of Assignments*, FM Broadcast Stations (Wrens, Georgia), Docket No. 21237, RM-2538.

1. *Petitioner, proposal, and comments.* (a) Petition for rulemaking, filed March 28, 1975, by Mayor J. J. Rabun, proposing Channel 232A or 244A as a first FM assignment to Wrens, Georgia.[1]

(b) Channel 232A would be short-spaced to an assignment at Sandersville and to Station WTOC (Channel 231), Savannah, Georgia (conditionally granted a construction permit for a new transmitter site). Therefore, we shall not propose Channel 232A for Wrens.

(c) Channel 244A would meet the Commission's spacing requirements at Wrens if its transmitter site were located at least 8 kilometers (5 miles) northwest of the community.

(d) Rabun states that an application would be expeditiously filed for construction of a station at Wrens if the channel is made available.

2. *Community data.* (a) *Location.* Wrens is located in eastern Georgia in Jefferson County, some 48 kilometers (30 miles) southwest of Augusta, Georgia.

(b) *1970 Census population.* Wrens—2,204; Jefferson County—17,174.

(c) *Local aural service.* Wrens has no local broadcast stations. Louisville, Georgia (1970 pop. 2,691), is 24 kilometers (15 miles) south of Wrens and has AM Station WPEH (1 kW, daytime) and a Class A FM station, WPEH-FM.

3. *Economic data.* Demographic information shows that Wrens is a manufacturing and industrial community which is increasing in population (35 percent between 1960 and 1970). Petitioner presents a list of industries, raw materials, schools, health facilities, recreation, churches, banks, and public services to support the assertion of Wrens' need for the assignment.

4. Rabun claims that a first FM service and a first nighttime aural service would be provided to 2,364 persons. The assignment would be a first local aural service for Wrens itself.

5. In view of the apparent need for a local broadcast service, and the showing of the new service it would make possible in the area, we find that consideration of the proposed FM assignment in a rulemaking proceeding would be in the public interest.

6. Accordingly, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, for the community listed below:

City	Channel No.	
	Present	Proposed
Wrens, Ga.		244A

7. Proponents should show the availability of a transmitter site at least 8 kilometers (5 miles) northwest of Wrens which would be free of obstruction to the propagation of FM signals to the community. See § 73.208(a)(4) of the Commission's rules.

8. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained below.

9. Interested parties may file comments on or before June 24, 1977, and reply comments on or before July 14, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in this notice of proposed rulemaking.

2. *Showings required.* Comments are invited on the proposal(s) discussed in this notice of proposed rulemaking. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in this Notice of proposed rulemaking. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of Copies.* In accordance with the provisions of Section 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[Docket No. 20413; RM-2505]

FM BROADCAST STATIONS, COPPERAS COVE, TEXAS

Memorandum Opinion and Order Dismissing Further Proposal

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order.

SUMMARY: Action dismissing a proposal to assign a second FM channel to Copperas Cove, Texas, because the proponent (Kove Broadcasting Company) no longer has an interest in applying for the assignment. The proponent has entered into a buy-out agreement with the estate of a competing applicant (B. Rex Samford) for the existing FM assignment at Copperas Cove, Texas.

DATES: Non-Applicable.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

James J. Gross, Broadcast Bureau, (202-632-7792).

SUPPLEMENTARY INFORMATION:

Adopted: May 18, 1977.

Released: May 20, 1977.

In the matter of Amendment of § 73.202(b) Table of Assignments, FM Broadcast Stations. (Copperas Cove, Texas), Docket No. 20413, RM-2505.

1. On December 11, 1975, the Commission reopened this proceeding by Further Notice of Proposed Rule Making (41 FR 1088; Jan. 6, 1976), to consider the proposal of Kove Broadcasting Company to add Channel 288A to Copperas Cove, Texas, as a second FM assignment.[1] Since Kove was a competing applicant with B. Rex Samford for the first FM assignment at Copperas Cove (Channel 276A), the Commission asked for a statement of intention by Request for Further Information on July 29, 1976 (41 FR 34078).

2. The executrix of the Samford estate has informed the Commission that Mr. Samford is deceased, and she requests that his application for Channel 276A be withdrawn. Kove has entered into an agreement with the estate and has agreed to pay expenses incurred by the dismissing applicant. Kove intends to prosecute its application for Channel 276A, and requests dismissal of its proposal for a second assignment at Copperas Cove, Texas.

3. As a result and since no other party has expressed an interest in this assignment: *It is ordered*, That the proposed assignment of Channel 288A to Copperas Cove, Texas, is hereby dismissed.

4. *It is further ordered*, That this proceeding is terminated.

WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

INTERSTATE COMMERCE COMMISSION

[49 CFR Parts 1047, 1082]

[Nos. MC-C-3437, MC-C-4000]

MOTOR TRANSPORTATION OF PROPERTY INCIDENTAL AND PASSENGERS INCIDENTAL TO TRANSPORTATION BY AIRCRAFT

AGENCY: Interstate Commerce Commission.

ACTION: Proposed rule.

SUMMARY: The purpose of this document is to institute a proceeding to determine whether the area (the "air terminal area") within which motor transportation of property and passengers incidental to transportation by aircraft is exempt from economic regulation under the Interstate Commerce Act should be redefined and expanded.

DATES: Comments must be received on or before: August 8, 1977.

ADDRESSES: Send comments to: Interstate Commerce Commission, 12th and Constitution Avenue, Washington, D.C. 20423. All written submissions will be available for public inspection during regular business hours at the same address.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Section of Operating Rights, Office of Proceedings, 202-275-7292.

SUPPLEMENTARY INFORMATION: Section 203(b)(7a) of the Interstate Commerce Act (49 U.S.C. 303(b)(7a)) exempts from economic regulation "the transportation of persons or property by motor vehicle when incidental to transportation by aircraft". The statute fails to specify the circumstances in which a movement by motor vehicle is to be considered "incidental to transportation by aircraft". We have adopted regulations giving meaning to the broad statutory

[1] Channel 276A was assigned to Copperas Cove by Report and Order, 40 FR 49335; October 14, 1975. The proposal for a second channel was in the comments of Kove's principals.

[1] Conflicts with a proposal to assign Channel 233 to Baxley, Georgia, have been eliminated by our decision to deny that assignment and propose Channel 240A for Baxley instead, as had been suggested by Rabun.

language. In "Motor Transp. of Property Incidental to Air", 95 M.C.C. 71 (1964), 112 M.C.C. 1 (1970), we adopted regulations (a) specifying the circumstances in which the transportation of property by motor vehicle is to be considered incidental to transportation by aircraft, and (b) specifying the circumstances in which an air freight forwarder subject to economic regulation under the Federal Aviation Act might receive from or turn over to motor common carriers subject to economic regulation under Part II of the Interstate Commerce Act shipments the transportation of which is not within the scope of the incidental-to-aircraft exemption of Section 203(b)(7a) without being considered as conducting operations as a freight forwarder subject to Part IV of the Interstate Commerce Act. These regulations are codified as 49 CFR 1047.40 and 1082.1, respectively. In "Interpretation of Rights—Designated Airports", 110 M.C.C. 597 (1969), we adopted a regulation specifying the circumstances in which motor carriers holding certificates or permits authorizing service at named airports or at certain facilities at named airports could serve also air-freight terminals located beyond the physical boundaries of the named airports. This regulation is codified as 49 CFR 1041.23. "In Motor Transp. of Passengers Incidental to Air", 95 M.C.C. 526 (1964), we adopted a regulation specifying the circumstances in which the transportation of passengers by motor vehicle is to be considered incidental to transportation by aircraft. This regulation is codified as 49 CFR 1047.45.

We are instituting this rulemaking proceeding because we believe at this time that a redefinition of the term "air terminal area," and an expansion of existing air terminal areas, as defined in the regulations cited above, may be reasonable and in the public interest. Established airports have expanded enormously in the last decade and new airports have come into being. Large capacity aircraft can accommodate more freight than ever before and air freight tonnage has risen accordingly. Each year we receive a large number of applications for motor carrier operating authority to transport property between named airports, on the one hand, and, on the other, points in named counties located near the named airports but beyond the existing air terminal area. The traffic for which authority is thus sought seems to be "incidental" to transportation by aircraft as contemplated by the statute. In recent years we have received several petitions requesting expansion of the "air terminal areas" around named airports, including Philadelphia International Airport, Philadelphia, Pa., Miami International Airport, Miami, Fla., Fort Lauderdale International Airport, Fort Lauderdale, Fla., O'Hare International Airport, Chicago, Ill., and Savannah, Ga., Airport. These petitions have been filed pursuant to 49 CFR 1047.40(c) and 1047.45(c). The filing of these petitions would seem to evidence an increasing belief that the air terminal areas as currently defined ought to be expanded.

The Commission's Blue Ribbon Staff Study Panel recommended in 1975 (a) that the Commission's 25-mile "rule of thumb" standard exempting motor carrier transportation of property from economic regulation under Section 203(b)(7a) of the Interstate Commerce Act be dropped in favor of an exempt zone coextensive with the Civil Aeronautics Board-accepted terminal area of the air carrier, and (b) that the existing 25-mile limitation to the exempt zone covering transportation of passengers moving incidental to air transportation be removed. (See Internal Staff Study Recommendations, Commission release No. 187-75, released July 7, 1975, recommendations 29 and 30.) We believe at this time that the expansion of existing air terminal areas is worthy of further study.

We believe at this time that a redefinition of the term "air terminal area" (so as to define an air terminal area as a zone extending a fixed distance from the boundaries of an airport) and an expansion of air terminal areas (so as to set the fixed distance referred to above at 100 miles, and to include points located within commercial zones any part of which is within 100 miles of the airport) might be warranted. The definition of an air terminal area partly in terms of distances from cities does not seem to be entirely appropriate—air traffic moves to and from airports, not cities. We would note too that a single airport can serve more than one city. We, therefore, believe at this time that air terminal areas ought to be defined as zones surrounding airports. The present extent of air terminal areas (i.e., as generally limited by the so-called 25-mile "rule of thumb" in 49 CFR 1047.40, and the 25-mile standard in 49 CFR 1047.45) would seem to be too limited. Motor movement of air freight consists essentially of pickup and delivery within a broad area served by a particular airport. The fact that a motor movement is 100 miles instead of 25 miles would seem not to be the relevant criterion. The pertinent factor would seem to be that the motor movement is incidental to the air movement. The same observation would seem to be applicable to motor movement of passengers to or from airports. We, therefore, believe at this time that consideration should be given to whether the air terminal area of any particular airport ought to be expanded to embrace all points located within 100 miles of the said airport, and to include also points located within commercial zones any part of which is within 100 miles of the said airport. We would expect that the proposed expansion of air terminal areas would allow direct air carriers and air freight forwarders to operate with greater flexibility, and would thereby improve the climate for intermodalism and containerization. We would note too that adoption of a 100-mile standard would eliminate all the "special" definitions of air terminal areas now codified as 49 CFR 1047.40(d) and 1047.45(d), and would thereby simplify our regulations.

The particular changes in the wording of our regulations would be as follows. Regulation 1041.23, which incorporates by reference the provisions of Regulation 1047.40, would remain as is. Regulations 1047.40 and 1047.45 would be consolidated into a revised Regulation 1047.40, and the present Regulation 1047.45 would be eliminated. The revised Regulation 1047.40 would carry forward all the provisions of the present Regulations 1047.40 and 1047.45 (except subsection (d) of each), with these changes: In subsection (a), the term "air terminal area" would be defined as the area encompassed by a 100-mile radius of the boundary of the airport at which the shipments are received or delivered or the passengers arrive or depart and by the boundaries of the commercial zones (as defined by the Commission) of any municipalities any part of whose commercial zones falls within the 100-mile radius of the pertinent airport; and in subsection (c), the provisions for individual determination of air terminal areas would allow for individual determination of air terminal areas around airports, but not around cities. In regulation 1082.1, the reference to an air freight forwarder's "terminal area" would be changed to "the air terminal area (as described in § 1047.40 of this chapter) of the airport at which the actual air movement begins or ends." In summary, Regulation 1041.23 would remain as is, Regulation 1047.45 would be deleted, and Regulation 1047.40 and 1082.1 would be amended as set forth below.

We anticipate that there will be many questions at issue in this proceeding, including but not limited to the following: (1) Are the existing 25-mile "rule of thumb" standard in 49 CFR 1047.40, and the 25-mile standard in 49 CFR 1047.45, adequate? (2) Should air terminal areas be redefined as zones surrounding airports? (3) Would an expanded 100-mile standard better satisfy Section 203(b)(7a) of the Interstate Commerce Act and the needs of the shipping and travelling public? (4) Would an expanded mileage standard other than 100 miles better satisfy Section 203(b)(7a) and the public interest? (5) What impact will an expanded mileage standard have on regulated motor carriers, nonregulated motor carriers, surface freight fowarders, air freight forwarders, and direct air carriers? (6) How many operating rights applications have been filed within the past 2 calendar years for motor carrier operating authority to transport property between named airports, on the one hand, and, on the other, points in one or more counties located near the named airports? (7) What changes would adoption of an expanded mileage standard create in (a) competitive relations, (b) quality of transportation services, (c) rates, revenues, and financial results, (d) operating efficiency, (e) conservation of scarce resources, (f) impact on the environment, and (g) operating rights application activity? and (8) Would a standard based upon some factor other than mileage better satisfy section 203(b)(7a) and public interest?

Oral hearings do not appear necessary at this time and none is contemplated. Anyone wishing to present views and evidence concerning the matters involved in this notice may do so by the submission of written data, views, or arguments.

Parties will be expected to present economic data supporting their contentions to the extent feasible. An original (and 15 copies whenever possible) of such data, views, or arguments shall be filed with this Commission on or before 75 days after publication in the FEDERAL REGISTER.

This notice of proposed rulemaking is issued under the authority of sections 552, 553, and 559 of the Administrative Procedure Act (5 U.S.C. 552, 553, and 559) and sections 203, 204, 207, 208, 209, 403, 404, and 413 of the Interstate Commerce Act (49 U.S.C. 303, 304, 307, 308, 309, 1003, 1004, and 1013).

By the Commission.

ROBERT L. OSWALD,
Secretary.

Parts 1047 and 1082 of Chapter X of Title 49 of the Code of Federal Regulations would be amended by deleting § 1047.45 and by revising § 1047.40 and § 1082.1 as set forth below:

§ 1047.40 Motor transportation of property and passengers incidental to transportation by aircraft.

(a) *Definition*—(1) *Motor transportation of property incidental to transportation by aircraft.* The transportation of property by motor vehicle to or from points in the zone defined in subparagraph (3) of this paragraph, except as said zone may be individually determined as provided in paragraph (c) of this section, is transportation incidental to transportation by aircraft within the meaning of section 203(b)(7a) of the Interstate Commerce Act: *Provided*, (i) That it is confined to the transportation of shipments in bona fide collection, delivery, or transfer service, and (ii) that it is confined to the transportation of shipments which have been received from or will be delivered to a direct air carrier or air freight forwarder (indirect air carrier) as part of a continuous movement which, if provided by an air carrier subject to economic regulation under the Federal Aviation Act, shall be provided for in tariffs filed with and accepted by the Civil Aeronautics Board, and shall be performed on a through air bill of lading covering, in addition to the line-haul movement by air, the collection, delivery, or transfer service performed by the motor carrier.

(2) *Motor transportation of passengers incidental to transportation by aircraft.* The transportation of passengers by motor vehicle to or from points in the zone defined in subparagraph (3) of this paragraph, except as said zone may be individually determined as provided in paragraph (c) of this section, is transportation incidental to transportation by aircraft within the meaning of section 203(b)(7a) of the Interstate Commerce Act: *Provided*, That it is confined to the transportation of passengers who have had or will have an immediately prior or immediately subsequent movement by air.

(3) *Air terminal area.* The zone within which motor transportation is incidental to transportation by aircraft within the meaning of section 203(b)(7a) of the Interstate Commerce Act, except as it may be individually determined as provided in paragraph (c) of this section, is the area encompassed by a 100-mile radius of the boundary of the airport at which the shipments are received or delivered or the passengers arrive or depart and by the boundaries of the commercial zones (as defined by the Commission) or any municipalities any part of whose commercial zones falls within the 100-mile radius of the pertinent airport.

(b) *Substitution of motor-for-air transportation due to emergency conditions*—(1) *Motor transportation of property.* The transportation of property by motor vehicle is transportation incidental to transportation by aircraft if it constitutes substituted motor-for-air service, performed at the expense of the direct air carrier or air freight forwarder, on a through air bill of lading, in emergency situations arising from the inability of the direct air carrier to perform air transportation due to adverse weather conditions, equipment failure, or other causes beyond the control of the direct air carrier.

(2) *Motor transportation of passengers.* The transportation of passengers by motor vehicle is transportation incidental to transportation by aircraft if it constitutes substituted motor-for-air service, performed at the expense of the air carrier in emergency situations arising from the inability of the air carrier to perform air transportation due to adverse weather conditions, equipment failure, or other causes beyond the control of the air carrier.

(c) *Individual determination of exempt zones*—(1) *Motor transportation of property.* Upon its own motion or upon petition filed by any interested person, the Interstate Commerce Commission may, in an appropriate proceeding, determine whether the area within which the transportation of property by motor vehicle, in bona fide collection, delivery, or transfer service, must be performed, in order to come within the provisions of paragraph (a)(1) of this section, should be individually determined with respect to any particular airport authorized to be served by a direct air carrier or air freight forwarder holding authority from the Civil Aeronautics Board, and whether there should be established therefor appropriate boundaries, differing in extent from those defined in paragraph (a)(3) of this section.

(2) *Motor transportation of passengers.* Upon its own motion or upon petition filed by any interested person, the Interstate Commerce Commission may, in an appropriate proceeding, determine whether the area within which the transportation by motor vehicle of passengers having an immediately prior or immediately subsequent movement by air must be performed, in order to come within the provisions of paragraph (a)(2) of this section, should be individually determined with respect to any particular airport, and whether there should be established therefor appropriate boundaries differing in extent from those defined in paragraph (a)(3) of this section.

§ 1047.45 [Deleted]

§ 1082.1 Use by air freight forwarders of regulated motor common carrier service.

An air freight forwarder (indirect air carrier) subject to economic regulation under the Federal Aviation Act may receive from or turn over to motor common carriers subject to economic regulation under part II of the Interstate Commerce Act shipments the transportation of which is not within the scope of the incidental-to-air exemption of section 203(b)(7a) of the Interstate Commerce Act without being considered as conducting operations as a freight forwarder subject to part IV of the Interstate Commerce Act: *Provided*:

(a) That the air freight forwarder shall not hold out to assume responsibility for, nor make any claim in its advertising, solicitation of freight, or tariff publications that it will assume responsibility for, any shipment prior to its receipt from or after it is turned over to an authorized motor common carrier for movement beyond the air terminal area (as described in §1047.40 of this chapter) of the airport at which the actual air movement begins or ends.

(b) That all shipment documents issued by the air freight forwarder shall state clearly that its responsibility for the shipment does not extend beyond its actual air movement and the territorial extent of the air terminal area (as described in § 1047.40 of this chapter) of the airport at which the actual air movement begins or ends.

(c) That the air freight forwarder shall receive no compensation from any shipper or motor carrier for services rendered in connection with the receipt of shipments from or the delivery of shipments to a motor carrier for movement beyond the air terminal area (as described in § 1047.40 of this chapter) of the airport at which the actual air movement begins or ends.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 20]

MIGRATORY BIRD HUNTING

Supplemental Proposed Rulemaking

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Supplemental proposed rulemaking.

SUMMARY: This document supplements FEDERAL REGISTER Document 77-6969, published on March 10, 1977.

which notified the public that the U.S. Fish and Wildlife Service proposes to establish hunting season regulations for certain migratory game birds during 1977–78, and provided information on certain proposed regulations. Further information, clarification or correction is provided relative to certain regulatory items for which information was not complete when FR Doc. 77–6969 was published. The more important of those relate to zoning in Illinois, Indiana, Maine, Michigan, Missouri, and Ohio for duck seasons; changes in daily bag and possession limits and season lengths for Canada geese in a portion of the Atlantic Flyway; regulatory relaxations for wood ducks in southeastern States in early October; and modifications of lesser sandhill crane seasons in portions of the Central Flyway.

DATES: Initial comments: May 18, 1977; comments on this supplemental proposed rulemaking will be accepted until July 14, 1977.

ADDRESS: Comments to: Director (FWS/MBM), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202–343–8827), who is also the originator of this supplemental proposed rulemaking.

SUPPLEMENTARY INFORMATION: On March 10, 1977, the Fish and Wildlife Service published for comment in the FEDERAL REGISTER (42 FR 13311) a proposal to amend 50 CFR Part 20. That document dealt with minor modifications in § 20.11 of Subpart B and the addition of a new § 20.40 in Subpart D of 50 CFR Part 20, and with establishment of seasons, limits and shooting hours for migratory game birds under §§ 20.101 through 20.107 of Subpart K of 50 CFR Part 20. In that document, the Service indicated that a supplemental proposed rulemaking containing proposals and other considerations was scheduled for publication on May 16, 1977. Consequently, this supplemental proposed rulemaking is the second in a series of proposed and final rulemaking documents for migratory bird hunting regulations and deals specifically with a number of supplemental or modified proposals and clarification or correction of minor portions of the earlier document. Included is further information relative to zoning in Illinois, Indiana, Maine, Michigan, Missouri, and Ohio for duck seasons; regulatory relaxation for wood ducks in southeastern States in early October; changes in daily bag and possession limits and season lengths for Canada geese in a portion of the Atlantic Flyway; and modifications of lesser sandhill crane seasons in portions of the Central Flyway.

CLARIFICATIONS AND CORRECTIONS

In the definitions of the four flyways, the biological-ecological units frequently used for references in setting hunting regulations for many migratory birds, the New Mexico portion of the Central Flyway given in FR Doc. 77–6969 appearing on page 13313 in the FEDERAL REGISTER of March 10, 1977, needs further clarification. In New Mexico, the Central Flyway is confined to that portion of the State east of the Continental Divide and outside the Jicarilla Apache Indian Reservation. In the March 10, 1977, FEDERAL REGISTER the Central Flyway portion was described as being "east of the Continental Divide and the Jicarilla Apache Indian Reservation."

In Item 23, Woodcock, there was a typographical omission of the daily bag limit. The second sentence should read, "States in the Atlantic, Mississippi, and Central Flyways may select hunting seasons between September 1, 1977, and February 28, 1978, of not more than 65 days, with daily bag and possession limits of 5 and 10, respectively: * * *."

ZONING PROPOSALS AND OTHER CONSIDERATIONS

The following zoning proposals and other considerations are numbered to correspond with topics or items published in the FEDERAL REGISTER of March 10, 1977.

2. *Frameworks dates for ducks and geese in the continental United States.* The FEDERAL REGISTER dated March 10, 1977, identified the general hunting season framework for geese in the Mississippi Flyway as being from October 1, 1977, through January 20, 1978; however, it did not note the exception in Louisiana where later framework closing dates have been allowed in recent years in recognition of crop depredations caused by geese. Therefore, the following additional exception to the general Mississippi Flyway goose season framework is proposed:

(f) Louisiana goose season framework: October 1, 1977, through February 14, 1978.

4. *Wood duck.* The FEDERAL REGISTER dated March 10, 1977, noted that the increased population of this species and an analysis of population and banding data suggests that the wood duck population in the southeastern United States could sustain additional harvests, provided that such liberalizations did not increase the harvest of wood ducks from breeding populations in the north. For purposes of this discussion the southeastern United States is defined as Virginia, Kentucky, Tennessee, Arkansas, and Louisiana and all States of the Atlantic and Mississippi Flyways south and east thereof. Various means of providing for additional harvest opportunities on southeastern wood ducks on a trial basis and evaluating its effects were considered and discussed this spring. Accordingly, the Service proposes to consider regulations aimed at additional wood duck harvest in the southeastern States only within the following guidelines:

(a) In 1977 States in the southeastern United States may split their regular duck hunting season in such a way that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15.

(b) During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway in 1977 shall apply to wood ducks, and under the point system, the point value for wood ducks shall be reduced from the high to the mid-point category. For other species of ducks daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations.

(c) In addition, the extra blue-winged teal option available to States in the Atlantic and Mississippi Flyways that select conventional regulations and do not have a September teal season may be applied during this period.

(d) This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

(e) This special provision for wood ducks shall be regarded as experimental, and subject to annual and final evaluations by participating States of population, harvest, banding, and other available information.

(f) The experiment shall be conducted for a specified time period to be agreed upon between the Service and participating States.

13. *Zoning.* Five States in the Mississippi Flyway and one in the Atlantic Flyway have submitted proposals to the Service to establish within-State zones, in each of which the season for hunting waterfowl would be set separately rather than Statewide beginning in the 1977–78 waterfowl hunting season. According to these proposals, season length, daily bag limits and possession limits would conform to the general framework for the respective Flyway. Only the season dates would differ between zones. The purpose is to provide a more equitable distribution of harvest opportunity within the States. The zones proposed by these States are as follows:

ATLANTIC FLYWAY

MAINE

North Zone—Game Management Zones 1, 2, and 3.
South Zone—Game Management Zones 4 through 8.

MISSISSIPPI FLYWAY

ILLINOIS

North Zone—St. Clair, Clinton, Marion, Clay, Richland, and Lawrence Counties and all counties to the north.
South Zone—All counties south of St. Clair, Clinton, Marion, Clay, Richland, and Lawrence Counties.

INDIANA

North Zone—That portion of Indiana north of State Highway 18.
South Zone—That portion of Indiana south of State Highway 18.

MICHIGAN

North Zone—The Upper Peninsula.
South Zone—The Lower Peninsula.

MISSOURI

North Zone (entitled Upper Zone in proposal)—That portion of Missouri lying north of a line running easterly from the Kansas-Missouri border along U.S. Highway 160 to the junction of U.S. Highway 60 in Springfield, along U.S. Highway 60 to the junction of State Highway 34, and along State Highway 34 to the Illinois-Missouri border along the Mississippi River at Cape Girardeau.
South Zone—The remainder of Missouri.

OHIO

North Zone—That portion of Ohio north of U.S. Highway 30 North.
South Zone—That portion of Ohio south of U.S. Highway 30 North.

The Service will consider the establishment of the proposed zones based on an evaluation of each of the State proposals according to the following criteria:

1. The establishment of any of these zones shall be considered experimental until the effects of the zoning are more clearly defined and understood.

2. The primary purpose of the zoning shall be to provide more equitable distribution of harvest opportunity for hunters throughout a State.

3. Proposed zones and season dates shall not substantially change the pattern of harvest distribution among States within a flyway.

4. Zoning shall not detrimentally change the harvest distribution pattern among species or populations at either the State or flyway level.

5. Each zoning proposal shall include a detailed evaluation plan describing how changes in harvest will be measured, and what steps will be taken to compensate for any significant changes that might occur.

6. Each zoning proposal shall include an evaluation of anticipated changes due to zoning. If on the basis of this evaluation the Service and the State agree that no significant increase in harvest is likely, the zoning experiment may be conducted without a reduction in season length for each zone, pending further evaluation. If the evaluation indicates that a significant increase in harvest is likely, an appropriate reduction in season length compared to what would be permitted without zoning shall be made for each zone.

7. Where two or more adjoining States in a flyway may be involved simultaneously in zoning experiments, consideration shall be given to the possibility of consolidating zones.

14. *Goose and brant seasons.—Atlantic Flyway.* Notice was given in the FEDERAL REGISTER dated March 10, 1977, that a lengthening of snow goose season from 30 to 50 days would be considered in view of the expanding population of greater snow geese. The greater snow goose population has increased in recent years. Surveys of the main wintering areas in the United States, which do not account for all of the population, indicate an increase in recent years from 63,000 birds in 1971 to 109,000 in 1977. Spring surveys of the St. Lawrence River of Canada indicate a May 1976 population of 185,000 birds. Concurrent with the growth of this population, there is evidence of increasing damage to marsh habitat caused by feeding geese, and increasing crop depredations. After reviewing this situation, the Atlantic Flyway Council recommended at its meeting of March 6, 1977, a snow goose season length of 60 days with a bag limit of 3 birds daily and 6 in possession, regardless of production rates in 1977. The Council further recommended establishing minimum population levels for the conduct of hunting seasons for the greater snow goose. The Service hereby provides notice of the Atlantic Flyway Council recommendation which will be considered along with other recommendations and comments during the regulations process. The March 10, 1977, FEDERAL REGISTER identified the sources of information which will be considered regarding the proposed regulatory changes for snow geese.

In recent years, the Canada goose population in the Atlantic Flyway has increased significantly, now numbering well over one million birds in the fall flight. The upward trend is continuing. In 1975, 819,000 birds were counted in the January surveys, and 924,000 in 1977. When harvest data are considered, the Flyway population objective of one million geese in the fall flight has been exceeded in recent years. The Service is of the view that concentration of these geese in the main portions of their wintering range is now excessive. Excessive winter concentrations of Canada geese pose a risk of disease outbreaks which could result in large-scale mortality. States in the main wintering area have recommended and the Service proposes that the Canada goose season length in this area be extended from 70 to 90 days with increases in the daily bag limit from 3 to 4 birds, and the possession limit from 6 to 8 birds. The area in which the proposed changes would apply comprises Delaware, the Delmarva Peninsula portion of Maryland, and that portion of Pennsylvania lying east and south of a boundary beginning at the Maryland border or Interstate Highway 83 and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border.

The Service is of the view that this regulatory change will not result in excessive harvests of these geese nor adversely affect their status insofar as population management objectives are concerned.

Mississippi Flyway. For Canada geese in portions of the Mississippi Flyway, Statewide harvest quotas are proposed as follows: Illinois, 35,000 birds; Kentucky, 15,000 birds; and Wisconsin, 35,000 birds. These harvest quotas support efforts to manage the segment of Mississippi Valley Population Canada geese that concentrates in excessive numbers near Horicon National Wildlife Refuge in Wisconsin, and concurrent efforts to achieve a more satisfactory distribution of these geese throughout the Mississippi Flyway. The quotas are consistent with recommendations of the Ad Hoc Committee assigned by the Mississippi Flyway Council to develop a management plan for Mississippi Valley Population Canada geese. This is the first harvest quota for Kentucky where a sizable portion of the harvest of this population now occurs. The 1977 winter count of Mississippi Valley Population Canada geese was well above the management objective of 300,000 wintering birds. The distribution and regulation of the harvest quota for Wisconsin will be described by State regulations.

Pacific Flyway. In the March 10, 1977, FEDERAL REGISTER, changes were proposed in closure dates for Canada goose hunting in the Sacramento and San Joaquin areas of California to provide added protection of the endangered Aleution Canada goose. The Service now proposes that Canada goose hunting in the Sacramento area be closed from the beginning of the regular waterfowl hunting season to December 15 instead of December 20 as originally proposed. This modification is based on a re-analysis of band recovery data and field observations of Aleutian Canada geese. The original proposal to extend the beginning of the closed period in the San Joaquin closed area from December 15 to December 1 is reaffirmed. To date, only one Aleutian Canada goose band has been reported from the Sacramento and San Joaquin areas outside the proposed closure periods. No plans are contemplated at this time to change the boundaries or numbers of closed areas.

In the Pacific Flyway, Nevada has requested that it be allowed to select a single Statewide waterfowl season. Presently, the seasons for Clark and Lincoln Counties, along the Colorado River, coincide with seasons selected by California and Arizona. This proposal is made pending further review and evaluation by the Pacific Flyway Council which has not yet had an opportunity to consider it.

17. *Migratory game bird seasons for falconers.* In the March 10, 1977, FEDERAL REGISTER the Service indicated it would consider proposals from States to establish extended seasons for taking migratory game birds by falconry under certain conditions. The Service now proposes to establish a new Section, if the proposals are accepted, for setting hunting seasons, limits, and hours for taking migratory game birds by falconry and the heading of this new section would read as follows:

§ 20.109 Extended seasons, limits, and hours for taking migratory game birds by falconry.

18. *Lesser sandhill (little brown) cranes.* The FEDERAL REGISTER dated March 10, 1977, indicated that no changes in sandhill crane hunting regulations were contemplated at that time but that additional data would be examined. Discussions with the Central Flyway Council and a review of additional data indicate that a modification in the crane season framework for North Dakota and South Dakota is warranted. Specifically, the Service now proposes that lesser sandhill crane hunting in designated portions of these States be

permitted during the period of September 1 through 11, 1977, in lieu of the 30-day seasons from November 6 to December 5 offered in 1976. The earlier but shorter seasons would better coincide with the period when huntable numbers of sandhill cranes are present, and reduce the period when endangered whooping cranes might be present during the sandhill crane season. A review of observation records indicates that whooping cranes seldom arrive in the two hunting areas prior to mid-September. No change is proposed in the area where hunting would be allowed in North Dakota. It is proposed that South Dakota be offered the option of defining its hunting area by county boundaries rather than by highways. The Service proposes that the hunting season length in Colorado be increased one day to 37 days, to provide full weekends at the beginning and ending of the season as its generally provided in many Central Flyway areas for other migratory game birds. The impact of these changes is expected to be a small increase in sandhill crane harvests and better protection for whooping cranes.

25. *Mourning doves.* Eastern Management Unit: Four States (Alabama, Georgia, Mississippi, and Louisiana) have been allowed for several years to select differential mourning dove hunting seasons by north and south zones. Two States have asked that minor changes be made in zone boundaries. Alabama requests that its boundary of the South Zone be changed to run from the Mississippi line via U.S. Highway 84 to the Covington County line, and include the counties of Coffee, Covington, Dale, Geneva, Henry, and Houston. This change would shift a relatively small area of southwestern Alabama from the south zone into the north zone. Georgia requests that the zone boundary be changed to run from the Alabama line via U.S. Highway 280 to Abbeville, thence east along the Ocmulgee and Altamaha Rivers to the Atlantic Ocean. This change would shift a relatively small portion of southeastern Georgia from the south zone to the north zone. The proposed boundary changes are expected to result in no significant change in mourning dove harvests.

Central Management Unit: Except for Texas, all States in the Central Management Unit which choose mourning dove hunting seasons permit shooting hours to extend from ½ hour before sunrise to sunset. It is proposed that these shooting hours be allowed in Texas for all days when mourning dove hunting is allowed. This would bring all shooting hours frameworks for mourning doves in the management unit into uniformity. Shooting hour restrictions within this time frame may be set by State regulation. Also, it is proposed that the closing date for mourning dove season framework be changed from January 20 to January 22, 1978. The effect of this change is expected to have an insignificant impact upon the State's mourning dove harvest.

26. *White-winged doves.* It is proposed that shooting hours for white-winged doves be changed from noon until sunset to ½ hour before sunrise to sunset. This would bring the shooting hours in Texas for white-winged doves into conformance with those proposed for Arizona, California, Nevada, and New Mexico. This change is expected to have no significant impact upon the Texas whitewinged dove harvest.

Texas requests that the white-winged dove frameworks in Texas be modified by deleting mention at this time of the specific counties in which hunting would be allowed. The proposed change gives Texas greater flexibility following the completion of breeding population surveys in defining areas where hunting will be allowed. The occurrence and distribution of breeding white-winged doves in south Texas and along the Rio Grande River appear to be expanding northward and it may be desirable to modify the permitted hunting area. Consequently, the last two paragraphs in Item 26 of the March 10, 1977, FEDERAL REGISTER are modified to read as follows:

The number of hunting days allowed in Texas, and areas where hunting will be allowed, will depend upon results of breeding population surveys conducted there. The daily bag and possession limits may not exceed 10 and 20 white-winged doves, respectively. The season may be split within the overall time frame.

These changes have been endorsed by the Central Flyway Council. The areas open to hunting will be described in frameworks scheduled for FEDERAL REGISTER publication on July 22, 1977

The March 10, 1977, FEDERAL REGISTER contained an extensive discussion of shooting hours for migratory game birds, and advised that the Service was examining and will make available additional information on the subject. This plan complies with the U.S. District Court, District of Columbia, ruling of March 11, 1977, that the Service should in the future provide greater information regarding migratory game bird shooting hours.

STEEL SHOT REGULATIONS

On April 28, 1977, the Service published in the FEDERAL REGISTER (42 FR 21614) final regulations regarding areas in the Atlantic and Mississippi Flyways in which shotshells loaded with steel shot will be required for waterfowl hunting in seasons commencing in 1977. The intended effect of establishing these steel shot zones is to reduce the number of deaths of waterfowl caused by ingesting spent lead pellets. The regulations appear under § 20.108 and will also be summarized in the Service's waterfowl regulations leaflets to be published late this summer.

HEARINGS

Two public hearings are scheduled pertaining to migratory bird hunting regulations being considered for the 1977–78 hunting seasons. Both will be conducted in accordance with Part 455 of the Departmental Manual (Hearings). On June 21, 1977, a public hearing will be held at 9 a.m. in the Auditorium of the General Services Building, 18th and F Streets NW., Washington, D.C., to review proposed hunting regulations of species for which early (prior to October 1) seasons are set. This hearing is for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, and common snipe. Proposed hunting regulations for these species will be discussed, plus regulations governing migratory game birds in Alaska, Puerto Rico, the Virgin Islands; mourning doves in Hawaii; September teal seasons; and special sea duck seasons in the Atlantic Flyway. On August 2, 1977, a public hearing will be held at 9 a.m. in the Auditorium of the General Services Building, 13th and F Streets NW., Washington, D.C., to review the status of other waterfowl and consider proposed regulations for migratory game birds that were not previously set. These deliberations will pertain to seasons commencing October 1 or later. The public is invited to participate in both hearings.

Persons wishing to participate in these hearings should notify the Director (FWS/MBM), United States Fish and Wildlife Service, Washington, D.C. 20240, or call 202–343–8827. Those wishing to have statements included in the record should file them in writing in duplicate with the Director before or at each hearing.

PUBLIC COMMENT INVITED

Based on the results of migratory game bird studies now in progress and having due consideration for any data or views submitted by interested parties, the amendments resulting from these supplemental proposals will specify open seasons, shooting hours, and bag and possession limits for doves, pigeons, rails, gallinules, woodcock, common (Wilson's) snipe, coots, cranes, swans, and certain waterfowl in the contiguous United States; coots, cranes, common (Wilson's) snipe and waterfowl in Alaska; sea ducks in coastal waters of certain eastern States; migratory game birds in Puerto Rico and the Virgin Islands; and mourning doves in Hawaii; and would further clarify existing tagging requirements.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals and will take into consideration the comments received. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals.

COMMENT PROCEDURE

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may participate in this rulemaking by submitting

written comments to the Director (FWS/MBM), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 2243, Department of the Interior, C Street between 18th and 19th Streets NW., Washington, D.C.

All relevant comments received no later than July 14, 1977, will be considered. The Service will attempt to acknowledge received comments, but substantive response to individual comments may not be provided.

ENVIRONMENTAL REVIEW

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the FEDERAL REGISTER on June 13, 1975 (40 FR 25241).

NOTE.—The U.S. Fish and Wildlife Service, Department of the Interior, has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

AUTHORITY: This notice of proposed rulemaking is issued under the authority of the Migratory Bird Treaty Act (40 Stat. 755; 16 U.S.C. 703–711).

Issued in Washington, D.C., May 19, 1977.

LYNN A. GREENWALT,
Director,
U.S. Fish and Wildlife Service.

[FR Doc.77–14821 Filed 5–24–77;8:45 am]

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATOR EMERGENCY NATURAL GAS ACT OF 1977

[Docket No. E77-104]

TENNESSEE GAS PIPELINE CO.

Emergency Order Pursuant to Section 6 of Pub. L. 95-2

On May 13, 1977, Tennessee Gas Pipeline Company (Tennessee) filed, pursuant to Section 6 of the Emergency Natural Gas Act of 1977 (Act), Pub. L. 95-2 (91 Stat. 4 (1977)), an application to make certain emergency purchases of natural gas from the Louisiana Land and Exploration Company and General Crude Oil Company (Seller). For the reasons set forth below, I authorize the purchase of this emergency natural gas.

By agreement dated May 10, 1977, Tennessee agreed to purchase up to 1000 Mcfd of natural gas from Seller's No. 1 C. L. Cruse Well, Tyler County, Texas with the gas to be made available at a mutually agreeable point in Tyler County, Texas. The contract between Tennessee and Seller is to begin on issuance of Administrator's order and terminate on July 31, 1977.

Tennessee will purchase these supplies at a price of $1.5738 per MMBtu inclusive of all state and local taxes and other adjustments. I find this price to be fair and equitable in accordance with Order No. 2. In addition, Seller advised that an estimated 17,000 feet of pipeline facilities were installed in order to deliver the gas to Tennessee. Tennessee will install a hot tap and side valve at an estimated cost of $7,700.

The sale of gas for which Tennessee seeks approval may result in a commingling of interstate natural gas with Seller's normal intrastate system gas supply and with volumes of gas owned by other parties. The contractual provisions between Seller and its producers, transporters and other suppliers of gas prohibit the sale of natural gas in interstate commerce and the commingling of their intrastate pipeline system gas supplies with gas moving in interstate commerce. The sale of gas for which Tennessee seeks approval may result in some commingling of interstate natural gas with Seller's normal intrastate gas supplies and with gas owned by other third parties. This order shall be considered as applying to all such commingled gas.

Under the provisions of section 9 (b), (c) of Pub. L. 95-2 (91 Stat. 4.9), the suppliers of such gas, which is so commingled, may not terminate existing contracts with Seller or such other parties or require a redetermination of the prices provided in such contracts by reason of this transaction. Contractual termination, prohibition or redetermination provisions in any such contracts refererd to above are not enforceable by reason of Section 9 of Pub. L. 95-2 since Seller is selling gas to Tennessee pursuant to Section 6(a) of that Act. Seller and any third person whose gas is commingled with Tennessee's gas shall refer all relevant information concerning any attempt to terminate existing contracts or require a redetermination of prices to the Administrator for appropriate action.

According to the official files of the Federal Power Commission, Seller is not classified as a natural gas company within the meaning of the Natural Gas Act. Section 6(b)(1)(A) of the Act provides in part that "(t)he provisions of the Natural Gas Act shall not apply * * * to any sale to an interstate pipeline * * * under the authority of subsection (a) or to any transportation by an intrastate pipeline in connection with such sale * * *" 91 Stat. at 8. In addition 6(c)(2) provides:

Compliance by any pipeline with any order under this subsection shall not subject such pipeline to regulation under the Natural Gas Act or to regulation as a common carrier under any provisions of state law.

Tennessee shall submit weekly reports as required by Order No. 4.

Pursuant to Section 6(a) of the Act, I hereby authorize Seller to sell Tennessee up to 1000 Mcfd of natural gas from No. 1 C. L. Cruse Well, Tyler County, Texas with the subject gas to be made available at a mutually agreeable point on Tennessee's pipeline in Tyler County, Texas, in accordance with the terms and conditions set forth in Tennessee's filing in this proceeding.

This order is issued pursuant to the authority delegated to me by the President in Executive Order No. 11969 (February 2, 1977), and shall be served upon Tennessee and Seller. This order shall also be published in the FEDERAL REGISTER.

This order and authorization granted herein are subject to the continuing authority of the Administrator under Pub. L. 95-2 and the rules and regulations which may be issued thereunder.

RICHARD L. DUNHAM,
Administrator.

MAY 19, 1977.

CIVIL AERONAUTICS BOARD

[Order 77-5-97; Docket 29123, Agreement C.A.B. 26574]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreement Adopted Relating to North/Central Pacific Passenger Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 18th day of May 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement, adopted by mail vote at the request of the IATA North/Central Pacific Policy Group, has been assigned the above C.A.B. agreement number.

The agreement would establish an IATA North/Central Pacific fare structure for effect from June 1977 through March 1978, and is consistent with the Board's earlier disposition of an IATA Pacific fare proposal (Order 77-3-163, March 29, 1977). As set forth in the attached appendix, the agreement would establish fares, including those for normal economy service and the 14/21-day excursion fares, at levels which have been approved by the Board on earlier occasions. The agreement would also bring forward unchanged most of the applicable rules and amendments thereto. However, the 30/120-day excursion fare applicable westbound from U.S. points, which was previously disapproved by the Board, has been excluded from the new structure, while the affinity group-100 fares from Alaska to Japan would be reinstated.

We will approve the agreement as proposed, subject to conditions which have been imposed earlier upon individual resolutions, with specific reference to a condition set forth in Order 77-1-60 which precludes individual return-travel on the 14/35-day group inclusive-tour fare. The proposed fare levels have all been approved by the Board on prior occasions,[1] and we anticipate that the formal closing of fares in this area will have a beneficial impact of fostering greater stability in this market.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find that special readopting and amending resolution JT31(Mail 126)002u, incorporated in Agreement C.A.B. 26574, to be adverse to the public interest or in violation of the Act provided that approval of the individual resolutions readopted therein are subject, where applicable, to conditions previously imposed by the Board.

Accordingly, *IT IS ORDERED* That:

1. Agreement C.A.B. 26574 be and hereby is approved, subject, where applicable, to conditions previously imposed by the Board; and

2. Tariffs implementing Agreement C.A.B. 26574 may be filed on not less than one day's notice for effectiveness not earlier than June 1, 1977 and shall be marked to expire March 31, 1978. The short notice authority in this paragraph expires July 1, 1977.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[1] See Order 77-3-163, Mar. 29, 1977, for most fares; Order 77-1-60, Jan. 11, 1977, for 14/21-day excursion fares; Order 76-5-158, May 28, 1976, for normal economy fares except to/from Japan; and Order 74-10-88, Oct. 17, 1974, for normal economy fares to/from Japan.

[Order 77-5-91; Docket 29123]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding North Atlantic Passenger Fares

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 18th day of May 1977.

Agreements adopted by the Joint Traffic Conferences of the International Air Transport Association relating to North Atlantic passenger fares; Agreement C.A.B. 26555, R-1 through R-19; Agreement C.A.B. 26556, R-1 through R-14; Agreement C.A.B. 26557, R-1 through R-8.

By Order 77-3-54, March 9, 1977, the Board generally approved an agreement among the carrier members of the International Air Transport Association (IATA) to establish North Atlantic passenger fares from April 1, 1977, through March 31, 1978. We did, however, disapprove the proposed increases in normal economy fares as well as all increases proposed in fares between Florida and London; and placed a condition on our approval of amendments to the seasonality pattern on several fares, to provide that such changes not become effective before June 1, 1977.

The IATA carriers have now submitted new agreements to the Board for approval which are intended to satisfy the Board's objections to the previous IATA package. Generally the agreements would retain normal economy fares at status quo levels; reduce the magnitude of increases proposed in Miami-London first-class and promotional fares; and amend the proposed seasonality changes in line with the Board's condition. The agreements would also amend Resolution 001vv, disapproved by the Board in Order 77-3-54. The resolution would, inter alia, permit carriers to reduce fares from the United States, by individual tariff filings, in response to changes in non-IATA-agreed transatlantic fares from Canada. The proposed amendment clarifies the tariff filing requirement as an addition to the provision for cable notice from the carrier to the IATA Secretariat.

Justification in support of the agreement has been submitted by National Airlines, Inc. (National) and Trans World Airlines, Inc. (TWA).

National, whose earnings position was the basis of the Board's disapproval of Florida/London fare increases, states that the new proposal would retain normal economy fares at status quo; and that other fares would be held at present levels during April and May, increased by about half the amount originally proposed for the peak season (June 1-September 14), and increased the full amount originally proposed during the remainder of the basic season (September 15-March 31).[1] In support of the

[1] See app. A.

agreement, National alleges that these revisions have already resulted in Mexico-Europe fares being removed from the overall IATA transatlantic package due to undercuts and would probably cause the negation of the Mid-Atlantic fare package as well if not approved; that even under the revised increases in Miami-London fares substantial undercuts of fares from points such as Atlanta and Washington would occur; and that Miami-originating passengers will experience extremely low fares per mile compared with transatlantic fares from other U.S. cities. The carrier has also submitted a revised forecast of financial results in Miami-London combination service for the year ending March 31, 1978, showing returns on investment (ROI) of 10.45 and 11.44 percent under present and proposed fares, respectively.

National's forecast reflects a 53.78-percent load factor rather than the 51.06 percent it had projected in support of the previous agreement; National states it has accepted the Board's capacity adjustment but has estimated traffic at 15 percent above that for calendar year 1976.[2] National alleges that its revised traffic and load factor projections are reasonable since British Airways will enjoy a 40-percent capacity advantage over National during the forecast period due to different equipment types;[3] and avers that any comparison with previous load factors is invalid since the historical figures for 1975 did not reflect results in the normally "softer" months of September through December when operations were suspended due to a strike.

TWA supports the approval of revised Resolution 001vv and incorporates by reference its petition for reconsideration of the Board's disapproval of the resolution in Order 77–3–54.

The Board has concluded to approve the bulk of the agreement, which is consistent with our actions in Order 77–3–54, with certain exceptions.

First, increases in Miami-London fares have not been shown to be warranted and they will, therefore, be disapproved. National's economic justification reflects a forecast load factor of 53.78 percent which is better than the 51.06 percent previously forecast, but which still falls considerably below the 58.37 percent attained during the historical period. In view of National's contention that the historical results for the years ended September 30, 1976, or December 31, 1975, are invalid because the low traffic months of September–December were excluded by a strike, we have reviewed the carrier's reported results for the year ending December 31, 1976. During that period National's international load factor was 57.34 percent, a modest decline from the earlier periods but hardly the drastic decline National now forecasts. Therefore, we have adjusted National's forecast load factor to reflect its calendar 1976 experience. This increases the carrier's ROI to 12.36 percent under present fares and to 13.39 percent under proposed fares. Thus, it is clear that National's earnings will be adequate under existing fares and that no increase is needed.

We are not unmindful of the alleged fare undercuts, for routings via Miami, of other transatlantic fares to/from U.S., Caribbean and Mexican points. However, National has made no showing that this problem, to the extent it exists, is so serious as to justify approval of otherwise unwarranted increases in transatlantic fares to/from Miami. In the case of U.S. points, National cites only a sampling of fares to London which are lower from Miami than from Atlanta or Washington. We have examined the fares from these points, as well as from New Orleans, and are not convinced that the carriers would suffer unduly from this situation since in but a few cases does combination of the New Orleans, Atlanta, or Washington domestic fares with the present Miami-London fare undercut the constructed IATA fares from New Orleans, Atlanta, or Washington to London. Only in the case of the 22/45-day excursion fares from New Orleans and Atlanta could the passenger achieve a saving by connecting over Miami, and then a saving of only $13–$34. Indeed, since Miami may, in many cases, be a more convenient departure gateway for travelers originating at these cities anyway, and thus the Miami routings reduce congestion at New York, the Board cannot fault such combinations of fares which have been established at reasonable levels on each sector.[4]

As to undercuts of transatlantic fares for Mexico and Caribbean points, National has provided no figures whatsoever.[5] Our review of the fares in the Caribbean area shows a very limited number of potential undercuts, and no evidence has ever been presented concerning the extent to which such undercuts are actually used or whether there has been any discernible diversion of traffic via Miami.[6]

Second, we will condition our approval of the 7/8-day group inclusive tour (GIT) fares to provide for continued application of the spring shoulder period through May 22, 1977. Order 77–3–54 stipulated that proposed seasonality changes not become effective before June 1, which in the case of the 7/8-day GIT would retain last year's seasons this spring. The current application of the shoulder period on this fare extends through May 22, yet the agreement before us still proposes a cutoff date of May 14 In order to prevent an unexpected impact on passengers who have already booked on this fare we will maintain our prior condition.

Finally, we will condition amended Resolution 001vv to require such changes to be filed with the Board as an agreement, and approved prior to filing in tariffs. The amendment merely clarifies the necessity to file tariffs implementing the contemplated changes which is a requirement of section 403 of the Federal Aviation Act in any event. As more fully discussed in concurrent Order 77–5–92, denying TWA's petition for reconsideration, the Board is not prepared to permit such wholesale changes in fares without the benefit of an agreement filed with the Board, justified by the carriers, and approved under section 412 of the Act.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, makes the following findings:

1. It is not found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act provided that approval is subject, where applicable, to conditions previously imposed by the Board:

[2] In Order 77–3–54, the Board adjusted National's capacity downward in order to maintain the 58.4-percent load factor experienced during the historical period, stating that there was no reason to anticipate such a precipitous decline in load factor—to 51.06 percent—as that forecast by National.

[3] National operates DC–10–30 aircraft on the Miami-London route while British Airways operates a B–747. During most of 1976, the capacity advantage of the larger B–747 was checked due to the roped-off provision of the capacity agreement then in force.

[4] Consistently with our action in Orders 73–7–55, 73–9–58, and 73–11–30, we will condition our approval of the applicable resolutions to require that all travelers qualifying for these fares on routings over Miami be quoted and charged the lower combination of fares over Miami rather than the IATA through fare constructed over New York, so that this benefit will not be discriminatorily limited to those sophisticated travelers who know how to obtain the combination of local fares, by double-ticketing if necessary. See also Order 72–10–1.

[5] For instance, National states that the revised fares for Miami have already resulted in negation of the Mexico/Europe IATA fares agreement. Yet that agreement, as submitted to the Board, covered only first-class and normal economy fares. The normal economy fares to/from Miami are not proposed to be increased in any event, and moreover our examination of London-Mexico fares discloses no undercuts using a combination of fares via Miami.

[6] We would also point out that combinations of transatlantic promotional fares from London to Miami with Miami-Mexico or Miami-Caribbean fares cannot be through ticketed, and may necessitate an overnight layover in Miami. Potential undercuts of transatlantic fares between Mexico or the Caribbean and Europe are further limited by the required matchings of fare seasonalities and ticket validities.

Agreement CAB	IATA No.	Title	Application

4. It is found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest and in violation of the Act:

Agreement CAB	IATA No.	Title	Application
26556: R-1	015	North Atlantic Proportional Fares North American (Readopting and Amending) Note 3.	1/2 (North Atlantic.—Europe).
26555: R-3	015	do	1/2 (North Atlantic.—Middle East).
26557: R-3	015	do	1/2 (North Atlantic.—Africa).

5. It is not found that the following resolution, incorporated in Agreement C.A.B. 26556 as indicated, is adverse to the public interest or in violation of the Act except insofar as increased New York-London fares would be used to construct fares to and from points in Florida, provided that approval is subject to conditions previously imposed by the Board as well as the additional condition hereinafter stated:

Agreement CAB	IATA No.	Title	Application
26556: R-12	084p	North Atlantic 7/8, 7/10, and 7/13 Day Group Inclusive-Tour Fares—Europe (Readopting and Amending).	1/2 (North Atlantic-Europe).

NOTE.—Provided that the 1977 shoulder season fares from the United States set forth in subpar. (4)(a)(ii) shall be applicable through May 22, 1977, and from Sept. 15 through Oct. 31, 1977.

6. It is not found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act provided that approval is subject to the condition hereinafter stated:

Agreement C.A.B.	IATA No.	Title	Application
26556: R-2	001vv	JT12 (North Atlantic) Special Escape Resolution (Readopting and Amending).	1/2 (North Atlantic-Europe).
26555: R-1	001vv	do	1/2 (North Atlantic-Middle East).
26557: R-1	001vv	do	1/2 (North Atlantic Africa).

NOTE.—Provided that: No changes in fares to/from U.S. points pursuant to the resolutions shall be filed in tariffs unless previously filed with and approved by the Board as an agreement under sec. 412 of the Act.

7. It is not found that the following resolutions, incorporated in the agreements indicated, affect air transportation within the meaning of the Act:

Agreement CAB	IATA No.	Title	Application
26556: R-13	092f	North Atlantic Individual Youth Fares (Readopting and Amending)	1/2 North Atlantic-Europe).
26555: R-16	092f	do	1/2 (North Atlantic-Middle East).
R-18	092g	North Atlantic Group Youth Fares Canada/Mexico-Israel (Readopting and Amending).	Do.

Accordingly, *It is ordered*, That:

1. Those portions of Agreements C.A.B. 26556, C.A.B. 26555, and C.A.B. 26557 set forth in finding paragraph 1 above be and hereby are approved subject, where applicable, to conditions previously imposed by the Board:

2. Those portions of Agreements C.A.B. 26556, C.A.B. 26555, and C.A.B. 26557 set forth in finding paragraph 2 above be and hereby are approved subject, where applicable, to conditions previously imposed by the Board, provided further that, for transportation between points in the United States and Traffic Conference 2 involving an actual routing via Miami, tariffs shall provide a through fare not in excess of the sum of the local sector fares over Miami;

3. That portion of Agreement C.A.B. 26556 set forth in finding paragraph 5 above be and hereby is approved subject to conditions previously imposed by the Board and, in addition, to the condition stated therein, provided further that, for transportation between points in the United States and Traffic Conference 2 involving an actual routing via Miami, tariffs shall provide a through fare not in excess of the same of the local sector fares over Miami;

4. Those portions of Agreements C.A.B. 26556, C.A.B. 26555, and C.A.B. 26557 set forth in finding paragraph 6 above be and hereby are approved subject to the condition stated herein;

5. Those portions of Agreements C.A.B. 26556, C.A.B. 26555, and C.A.B. 26557 set forth in finding paragraphs 3 and 4 above be and hereby are disapproved;

6. Jurisdiction be and hereby is disclaimed with respect to those portions of Agreements C.A.B. 26556 and C.A.B. 26555 set forth in finding paragraph 7 above; and

7. Tariffs implementing the resolutions approved herein shall be marked to expire March 31, 1978.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

APPENDIX A.—*Miami-London roundtrip air fares*

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

UNIVERSITY OF IDAHO ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00086. Applicant: University of Idaho, Electron Microscopy Center, Department of Veterinary Science, Moscow, Idaho 83843. Article: Electron Miscroscope, Model EM 10a with Goniometer Stage and 70 mm Camera. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to study a wide variety of materials or phenomena including (1) cells from diseased and normal animals and plants; (2) microorganisms, mycoplasma, etc.; (3) crystal structures; (4) synthetic fibers and particles; (5) nucleic acid strands extracted from viral agents; (6) morphogenesis of subcellular elements in eukaryotic and prokaryotic cells; (7) ingestion and digestion of infectious agents and inert particles by phagocytic and nonphagocytic cells; and (8) replication or growth and binary division of infectious agents in parasitized host cells. The experiments that will be conducted include the following: (1) Morphologic characterization of infectious agents, (2) Ultrastructural Studies of Abnormal Leukocytes, and (3) Origin of Ascospore—Delimiting Membranes.

In addition, the article will be used in a laboratory course in electron microscopy which is designed to develop proficiency in the use of the transmission electron microscope and selected preparation techniques used for electron microscopy. Application received by Commissioner of Customs: January 10, 1977. Advice submitted by the Department of Health, Education, and Welfare on: April 22, 1977. Article ordered: December 22, 1976.

Docket Number: 77-00095. Applicant: University of Rochester School of Medicine & Dentistry, Department of Anatomy, Box 603, 601 Elmwood Ave., Rochester, New York 14642. Article: Electron Microscope, Model EM 10A and High Goniometer Stage. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for the investigation of junctional complexes and cell to cell communication in normal and malignant tissues. DNA-RNA configurations in normal and malignant brain tissues will also be studied. Experiments will involve growing normal and tumor cell lines in vitro. At various time periods of growth, the spheroids will be prepared for electron microscopy to determine the type, development and duration of attachment of cell junctions in an attempt to elucidate the role of cell to cell communication in cancer cells which afford greater resistance to irradiation and/or chemotherapeutic agents. These cell lines will also be grown in laboratory animals to determine the in vivo effects of the drugs and/or irradiation on cell junctions and cell to cell communication. The article will also be used to train graduate students, medical students and post-doctoral fellows in the use of the microscope and ancillary techniques. Application received by Commissioner of Customs: January 10, 1977. Advice submitted by the Department of Health, Education, and Welfare on: April 22, 1977. Article ordered: December 21, 1976.

Comments: No comments have been received in regard to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, was being manfactured in the United States at the time the articles were ordered.

Reasons: Each foreign article has a specified resolving capability of 3.5 Angstroms. The Department of Health, Education, and Welfare (HEW) advises in the respectively cited memoranda, that the additional resolving capability of the foreign articles is pertinent to the purposes for which each of the foreign articles to which the foregoing applications relate is intended to be used. HEW also advises that it knows of no domestic instrument which provided the pertinent features of each article at the time of order. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing application relate, for such purposes as these articles are intended to be used, which was being manfactured in the United States at the time the articles were ordered.

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.77-14808 Filed 5-24-77;8:45 am]

UNIVERSITY OF ROCHESTER ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes

The following is a consolidated decision on applications for duty-free entry of electron microscopes pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301). (See especially § 301.11(e).)

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00078. Applicant: University of Rochester, 601 Elmwood Avenue, Rochester, NY 14642. Article: Electron Microscope, Model EM 10-A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studies of materials and phenomena related directly to the analysis of the mammalian central nervous system and specifically to the ultrastructural correlates of neuroendocrine mechanisms and the fine structural localization of brain hormones. The properties of the material to be investigated for the phenomena relates to the capability of localizing radio-labelled neurohormones releasing factors and neurotransmitters with transmission electron microscopy in the primate central nervous system, that has been embedded in plastic and thin sectioned. Relevant regions of the primate brain including the hypothalamus, brain stem, and other circumventricular organs will be analyzed as to their capacity to sequester various radioactive bioactive peptide molecules. The article will also be used for educational purposes in the courses: Anatomy 595, Ph.D. Research; Anatomy 395, Research in Anatomy; Anatomy 500, Techniques in Neuroendocrine Morphology; and Anatomy 596, Ultrastructural Correlates of Neuroendocrine Mechanisms. The objectives of these courses are to instill in students basic fundamental ultrastructural techniques to determine the fine anatomy of the central nervous system and provide advanced training for senior graduate students, post-doctoral fellows and research associates. Application received by Commissioner of Customs: January 7, 1977. Advice submitted by the Department of Health, Education, and Welfare on: April 22, 1977. Article ordered: December 23, 1976.

Docket Number: 77-00080. Applicant: The Regents of the University of California, San Diego, Department of Pathology, M-012, La Jolla, CA 92093. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studying mechanisms of disease affecting brain, nerve, heart, and liver in human and experimental animals. Specific investigations will include the following:

(1) Studies on the alteration of brain tissue concerned with the interaction of plasma membranes and virus with particular reference to changes seen in transmissible spongiform encephalopathy,

(2) Studies on peripheral nerves concentrated on the ultrastructural localization of heavy metals in demyelinating enuropathies such as lead, mercury, thallium, arsenic and calcium,

(3) Studies on the heart concerned with early changes in mitochondrial and plasma membranes as well as myofilaments in heart muscle and the deposition of minerals in mitochrondria during cardiac ischemia, and

(4) Studies on the liver that eluciaate the localization of bile salts in the liver after their precipitation by alkali metals. In addition, the article will be used for the training of interns, residents and medical students in course 208L (Pathology, Microbiology, Pathophysiology, Epidermiology, and Clinical Pharmacology) and 199 (Independent Studies). Ph. D. candidates in Pathology will also use the article. Application received by Commissioner of Customs: January 7, 1977. Advice submitted by the Department of Health, Education, and Welfare on: April 23, 1977. Article ordered: November 30, 1976.

Comments: No comments have been received in regard to any of the foregoing applications.

Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, was being manufactured in the United States at the time the articles are ordered.

Reasons: Each foreign article provides a wide magnification range of 100 to 200,000X and a guaranteed resolution of 3.5 angstroms point to point. The Department of Health, Education, and Welfare (HEW) advises in its respectively cited memoranda that the capabilities of each article described above are pertinent to each applicant's intended purposes. HEW further advises that it knows of no domestic instrument which provided the pertinent features of the articles at the time each article was ordered.

The Department of Commerce knows of no other insetrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States at the time the articles were ordered.

[FR Doc. 77-14807 Filed 5-24-77;8:45 am]

SEMICONDUCTOR MANUFACTURING AND TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee will be held on Wedesday, June 22, 1977, at 9:30 a.m. in Room 4833, Main Commerce Building, 14th and Constittuion Avenue, N.W. Washington, D.C. The meeting will continue June 23 in Room 3817, Main Commerce Building, to the conclusion of the agenda.

The Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) (Supp. V, 1975) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor manufacturing and test equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has four parts:

GENERAL SESSION

1. Opening remarks by the Chairman, Mr. Larry L. Hansen.

2. Presentation of papers or comments by the public.

3. Review of assignments made at last meeting.

EXECUTIVE SESSION

4. Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (4), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 27, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Room 3012, Domestic and International Business Administration, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestc and Internatonal Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close portions of the series of meetings of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee and of any subcommittees thereof is hereby published.

Dated: May 20, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, Department of Commerce.

SEMICONDUCTOR MANUFACTURING AND TEST EQUIPMENT TECHNICAL ADVISORY COMMITTEE

NOTICE OF DETERMINATION

In response to written requests of representatives of a substantial segment of the semiconductor manufacturing and test equipment industry, the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee was established by the Secretary of Commerce pursuant to Section 5(c)(1) of the Export Administration Act of 1969, 50 U.S.C. App. 2404(c)(1) (Supp. V, 1975), to advise the Department

[1] Published at 42 FR 25517 5-18-77.

of Commerce with respect to questions involving technical matters, worldwide availability, and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to semiconductor manufacturing and test equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee, which currently has twelve members representing industry and six members representing government agencies, will terminate no later than August 29, 1978, unless extended by the Secretary of Commerce or his designee. All members of the Committee have the appropriate security clearances.

The Committee's activities are conducted pursuant to 50 U.S.C. App. 2404(c)(1), P.L. 94-362, 50 U.S.C. App. 5(b), Executive Order No. 11940, 15 C.F.R. § 390.1, the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), and Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act provides, among other things, that the meetings of advisory committees are to be open to the public, and to public participation, unless the head of the agency (or his delegate) to which the committee reports determines in writing that all, or some portion, of the agenda of the meeting of the Committee is concerned with matters listed in Section 552(b) of Title 5 of the United States Code. Section 5(c) of the Government in the Sunshine Act P.L. 94-409, effective March 12, 1977, provides that advisory committee meetings or portions thereof may be exempt from the open meeting and public participation requirements of the Federal Advisory Committee Act if the President, or the head of the agency to which the Advisory Committee reports, determines that such portion of such meeting may be closed to the public in accordance with 5 U.S.C. 552b(c).

Section 552(b)(1) of Title 5, United States Code, provides that information may be withheld from the public if it concerns matters specifically required by Executive Order to be kept secret in the interest of national defense or foreign policy, and is in fact properly classified pursuant to such Executive Order.

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose matters that are specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order.

Notices of Determination authorizing the closing of meetings, or portions thereof, of the Semiconductor Manufacturing and Test Equipment Technical Advisory Committee and its formal subcommittees, dealing with security classified matters, were approved on March 6, 1973 for the meeting of March 27, 1973; on June 18, 1973 for the meeting of June 29, 1973; on August 21, 1973 for a series of meetings from August 21, 1973 through December 31, 1973; on December 26, 1973 for a series of meetings for the period January 1, 1974 through April 30, 1974; on May 16, 1974, covering a series of meetings from May 1, 1974 through January 3, 1975; on December 16, 1974, covering a series of meetings from January 4, 1975 to January 3, 1976; and on November 25, 1975, covering a series of meetings from January 4, 1976 through January 3, 1977.

In order to provide advice to the Department under the terms of its charter, the Committee and formal subcommittees thereof will continue to hold a series of meetings dealing with the matters set forth in the first paragraph of this Determination. These meetings will include discussions of the COCOM control list as it relates to the commodities and technical data under its purview, and with the foreign availability of these commodities and technical data. In addition, the Committee and its formal subcommittees will be preparing recommendations for the Department's consideration relating to the U.S. Government's negotiating position on COCOM-related matters. Much of the information relating to the COCOM control list, as well as proposed changes, is now or will be security classified for national defense or foreign policy reasons, pursuant to Executive Order No. 11652, 3 CFR 339 (1974). In order for the Committee and its formal subcommittees to provide required advice to the U.S. Government, it will be necessary to provide the Committee and its formal subcommittees with such classified material. Therefore, the portions of the series of meetings of the Committee and of subcommittees thereof that will involve discussions of matters specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order, must be closed to the public. The remaining portions of the series of meetings will be open to the public.

Accordingly, I hereby determine, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government in the Sunshine Act, Pub. L. 94-409, that those portions of the series of meetings of the Committee and of any subcommittees thereof, dealing with the aforementioned classified materials shall be exempt, for the period from the date of the signing of this determination, to August 29, 1978, from the provisions of Section 10(a)(1) and (a)(3), relating to open meetings and public participation therein, because the Committee and subcommittee discussions will be concerned with matters listed in 5 U.S.C. 552(b)(1) and 5 U.S.C. 552b(c)(1). The remaining portions of the meetings will be open to the public.

GUY W. CHAMBERLIN, Jr.,
Acting Assistant Secretary for Administration.

JANUARY 29, 1977.

ALFRED MEISNER, Jr.,
General Counsel.

JANUARY 27, 1977.

[FR Doc.77-14884 Filed 5-24-77;8:45 am]

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Telecommunications Equipment Technical Advisory Committee will be held on Thursday, June 30, 1977, at 10 a.m., in Room 3817, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Telecommunications Equipment Technical Advisory Committee was initially established on April 5, 1973. On March 12, 1975, and March 16, 1977, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving technical matters, worldwide availability, and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to telecommunications equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee meeting agenda has five parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.

(2) Presentation of papers or comments by the public.

(3) Nomination and election of a new Chairman.

(4) Discussion on draft sections of Findings—Volume I of the annual report.

EXECUTIVE SESSION

(5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on April 22, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In the Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriate security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone A/C 202-377-4196.

The complete Notice of Determination to close portions of the meetings of the Telecommunications Equipment Technical Advisory Committee and of any subcommittees thereof is hereby published.

Dated: May 20, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, U.S. Department of Commerce.

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

NOTICE OF DETERMINATION

In response to written requests of representatives of a substantial segment of the telecommunications industry, the Telecommunications Equipment Technical Advisory Committee was established by the Secretary of Commerce pursuant to Section 5(c)(1) of the Export Administration Act of 1969, 50 U.S.C. App. 2404(c)(1) (Supp. V, 1975), to advise the Department of Commerce with respect to questions involving technical matters, worldwide availability, and actual utilization of production and technology, and licensing procedures which may affect the level of export controls applicable to telecommunications equipment, including technical data related thereto, and including those whose export is subject to multilateral (COCOM) controls.

The Committee, which currently has four members representing industry and six members representing government agencies, will terminate no later than August 29, 1978, unless extended by the Secretary of Commerce. All members of the Committee have the appropriate security clearances.

The Committee's activities are conducted pursuant to 50 U.S.C. App. 2404(c)(1), Pub. L. 94-362, 50 U.S.C. App. 5(b), Executive Order No. 11940, 15 CFR § 390.1, the provisions of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975, and Office of Management and Budget Circular A-63 (Revised), Advisory Committee Management, effective May 1, 1974. Section 10 of the Federal Advisory Committee Act as amended by Section 5(c) of the Government In the Sunshine Act, Pub. L. 94-409, provides that advisory committee meetings or portions thereof may be exempt from the open meeting and public participation requirements of the Federal Advisory Committee Act if the President, or the head of the agency to which the Advisory Committee reports, determines that such meetings or portions thereof may be closed to the public in accordance with 5 U.S.C. 552b(c).

5 U.S.C. 552b(c)(1) provides that agency meetings or portions thereof may be closed to the public where they are likely to disclose matters that are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order.

Seven Notices of Determination authorizing the closing of meetings, or portions thereof, of the Telecommunications Equipment Technical Advisory Committee and its formal subcommittees, dealing with security classified matters, have been approved in the past.

In order to provide advice to the Department under the terms of its charter, the Committee and formal subcommittees thereof will continue to hold a series of meetings dealing with the matters set forth in the first paragraph of this Determination. These meetings will include discussions of the COCOM control list as it relates to the commodities and technical data under its purview, and with the foreign availability of these commodities and technical data. In addition, the Committee and its formal subcommittees will be preparing recommendations for the Department's consideration relating to the U.S. Government's negotiating position on COCOM-related matters. Much of the information relating to the COCOM control list, as well as proposed changes, is now or will be security classified for national defense or foreign policy reasons, pursuant to Executive Order No. 11652, 3 CFR 339 (1974). In order for the Committee and its formal subcommittees to provide required advice to the U.S. Government, it will be necessary to provide the Committee and its formal subcommittees with such classified material. Therefore, the series of meetings or portions of meetings of the Committee and of subcommittees thereof that will involve discussions of matters specifically authorized under criteria established by an Executive Order to be kept secret in the interest of national defense or foreign policy and are in fact properly classified pursuant to such Executive Order, must be closed to the public. The remaining portions of the series of meetings will be open to the public.

Accordingly, I hereby determine, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In the Sunshine Act, Pub. L. 94-409, that the series of meetings or portions of meetings of the Committee and of any subcommittees thereof, dealing with the aforementioned classified materials shall be exempt, for the period from the date of the signing of this determination, to August 29, 1978, from the provisions of Section 10(a)(1) and (a)(3), relating to open meetings and public participation therein, because the Committee and subcommittee discussions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). The remaining meetings or portions thereof will be open to the public.

GUY W. CHAMBERLAIN, Jr.,
Acting Assistant Secretary for Administration.

APRIL 22, 1977.

ALFRED MEISNER, Jr.,
General Counsel.

APRIL 19, 1977.

HOKUYO LONGLINE—GILLNET ASSOCIATION, ET AL.

Issuance of General Permits

On May 11, 1977, General Permits were issued to the following associations, to take marine mammals incidental to commercial fishing operations, pursuant to 50 CFR 216.24 (39 FR 32117-32124), as amended:

Hokuyo Longline—Gillnet Association, Zenkeiren Building, 7, Hirakawa-cho 2, Chiyoda-ku, Tokyo, Japan, has been issued a General Permit, Category 5, "Other Gear;"

Japan Deep Sea Trawlers Association, Daito Building, 6/F, Ogawa-che, 3-6, Kanda, Chiyoda-ku, Tokyo, Japan, has been issued a General Permit, Category 1, "Towed or Dragged Gear;"

The National Federation of Medium Trawlers, Showa Kaikan, 3-2, Kasumigaseki 3, Chiyoda-ku, Tokyo, Japan, has been issued a General Permit, Category 1, "Towed or Dragged Gear;"

North Pacific Fisheries Development Association, Seoul, Korea, has been issued a General Permit, Category 1, "Towed and Dragged Gear;"

North Pacific Fisheries Development Association, Seoul, Korea, has been issued a General Permit, Category 4, "Stationary Gear;" and

North Pacific Fisheries Development Association, Seoul, Korea, has been issued a General Permit, Category 5, "Other Gear."

The Permits are available for public inspection in the office of the Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.

Dated: May 11, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

OFFICE OF PARKS AND RECREATION

Issuance of Permit To Take Marine Mammals

On January 12, 1977, notice was published in the FEDERAL REGISTER (42 FR 2520), that an application had been filed with the National Marine Fisheries Service by the Office of Parks and Recreation, Lake Merritt, 1520 Lakeside Drive, Oakland, California 94612, for a Permit to take three (3) California sea lions (*Zalophus californianus*) for the purpose of public display.

Notice is hereby given that on May 9, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit for the above taking to the Office of Parks and Recreation subject to certain conditions set forth therein. The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 9, 1977.

JACK W. GEHRINGER,
Deputy Director,
National Marine Fisheries Service.

PACIFIC FISHERY MANAGEMENT COUNCIL, SCIENTIFIC AND STATISTICAL COMMITTEE, AND THE SUBCOMMITTEE ON FOREIGN OWNERSHIP OF U.S. FISHING VESSELS

Public Meetings

Notice is hereby given of meetings of (1) the Pacific Fishery Management Council, established under Section 302 of the Fishery Conservation and Management Act of 1976 (Public Law 94–265), (2) the Council's Scientific and Statistical Committee, and (3) the Council's Subcommittee on Foreign Ownership of U.S. Fishing Vessels, both established under Section 302(g) of the Act.

The Pacific Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the States of California, Oregon, and Washington. The Council will, among other things, prepare and submit to the Secretary of Commerce, fishery management plans with respect to the fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Scientific and Statistical Committee assists the Council in the development, collection, and evaluation of such statistical, biological, economic, social, and other scientific information as is relevant to the Council's development and amendment of any fishery management plan.

The Subcommittee on Foreign Ownership of U.S. Fishing Vessels was appointed to consider problems associated with foreign ownership of U.S. fishing vessels.

All meetings will be held at the Sheraton-Los Angeles Airport Hotel, 9750 Airport Boulevard, Los Angeles, California 90045.

The Pacific Fishery Management Council will convene in Dickens A and D Room at 1 p.m. and adjourn about 5 p.m. on June 13, 1977, and reconvene at 8 a.m. and adjourn about 5 p.m. on June 14, 1977. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

1. Organization of the Council, including its staff, advisory panels, and committees, and operational and procedural matters.
2. Consideration of development of fishery management plans, including anchovy, ground fish, and comprehensive salmon management plans.
3. Consideration of a report from the Council's Subcommittee on Foreign Ownership of U.S. Fishing Vessels.
4. Development of Council recommendation with regards to Soviet permit application to receive Pacific hake from U.S. fishermen within the 200-mile zone.
5. Consideration of report from Council's Subcommittee on Scheduling of Management Plans and Their Implementation.
6. Review of communications from other agencies and organizations.
7. Budget and administrative matters.
8. Other business.

This meeting is open to the public and there will be seating for approximately 150 public members available on a first-come, first-served basis.

The Scientific and Statistical Committee will meet in the San Diego Room at 10:30 a.m. on June 13, 1977 and adjourn about 5 p.m. The Committee will tentatively reconvene, dependent upon Council developments, at 8 a.m. and adjourn about 5 p.m. on June 14, 1977.

The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

1. Consideration of development of fishery management plans, including anchovy, groundfish, and comprehensive salmon management plans.
2. Organization of the Council, including fishery advisory panels and management development teams, and operational and procedural matters.
3. Other business.

This meeting is open to the public and there will be seating for approximately 25 public members available on a first-come, first served basis.

The Subcommittee on Foreign Ownership of U.S. Fishing Vessels will convene in the Tokyo Room at 9 a.m. and adjourn about 12 noon on June 13, 1977. The meeting may be extended or shortened depending on progress on the agenda.

PROPOSED AGENDA

1. Review of permit application for Soviet vessel to receive and process hake from U.S. fishermen within 200-mile zone and implications of approval of such application.
2. Review of the issue of citizenship requirements for captains and crews of U.S. fishing vessels to determine whether loopholes exist which would enable foreign captains and crews to operate U.S. fishing vessels within U.S. fishery zone.
3. Development of recommendations to the Council on items listed above.
4. Other business.

This meeting is open to the public and there will be seating for approximately 50 public members available on a first-some, first-served basis.

Members of the public having an interest in specific items for discussion are also advised that agenda changes are, at times, made prior to the meetings. To receive information on changes, if any, made to the agendas, interested members of the public should contact on or about June 3, 1977:

Lorry M. Nakatsu, Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Portland, Oregon 97201 (503–229–5769).

At the discretion of the Council and its Committees, interested members of the public may be permitted to speak at times which will allow the orderly conduct of business. Interested members of the public who wish to submit written statements should do so by addressing Lorry Nakatsu at the above address. To receive due consideration and facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the meetings.

Dated: May 20, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

ENDANGERED SPECIES AND MARINE MAMMALS

Issuance of Permit

On January 12, 1977, notice was published in the FEDERAL REGISTER (42 FR 2520) that an application had been filed with the National Marine Fisheries Service by Dr. Roger S. Payne, Weston Road, Lincoln, Massachusetts 01773, for a Permit to take, by potential harassment, an unspecified number of humpback whales in various waters for the purpose of scientific research.

Notice is hereby given that on May 11, 1977, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service issued a Permit to Dr. Roger S. Payne, for the above taking, subject to certain conditions therein.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on a finding that such Permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which are the subject of the Permit; and (3) will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was also issued in accordance with, and is subject to, Parts 220 and 222 of Title 50 CFR, the National Marine Fisheries Service regulations governing endangered species Permits (39 FR 14357, November 27, 1974).

The Permit is available for review by interested persons in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;
Regional Director, National Marine Fisheries Service, Northeast Region, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930;
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St. Petersburg, Florida 33702;
Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue North, Seattle, Washington 98109;
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731; and
Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, Alaska 99802.

Dated: May 11, 1977.

JACK W. GEHRINGER,
Deputy Director,
National Marine Fisheries Service.

[FR Doc.77–14928 Filed 5–24–77;8:45 am]

CARIBBEAN FISHERY MANAGEMENT COUNCIL AND ITS ADVISORY PANEL

Public Meeting

Notice is hereby given of a meeting of the Caribbean Fishery Management Council and its Advisory Panel.

The Council was established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265). The Council has authority over fisheries within the fishery conservation zone adjacent to Puerto Rico and the Virgin Islands. The Councils will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on applications for foreign fishing, and conduct public hearings.

This is one of a series of organizational meetings of the Council. The meeting will be held Monday through Thursday, June 20 to June 23, 1977, at the Caneel Bay Plantation, St. John, Virgin Islands. The meeting will convene at 1 p.m. on June 20 and adjourn at about noon on June 23. Daily sessions will normally start at 9 a.m. and adjourn at 5 p.m., except as otherwise noted. The meeting may be extended or shortened depending upon progress on the agenda.

Proposed Agenda

1. Council Organization and Administrative Procedures.
2. Technical Organization and Procedures.
3. The Advisory Panel may meet in conjunction with the Council.
4. Review of foreign fishing applications, if any.
5. Domestic fishery in foreign zones.
6. Other management business.

Meeting concurrently with the Council will be the Council's Advisory Panel. This is established pursuant to section 302(g) of the Act. The Advisory Panel contains broad representation from interests affected by Council activities in order to assist the Council in carrying out its functions under the Act.

Proposed Agenda

1. Consideration of internal program matters.
2. Review of fishery management plan issues.
3. Appropriate recommendations to the Council.
4. Other management business.

All of these meetings will be open to the public, and there will be seating for a limited number of public members available on a first-come, first-served basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meetings. To receive information on changes, if any, made to the agendas, interested members of the public should contact, on or about June.10, 1977:

Mr. Omar Munoz-Roure, Executive Director, Caribbean Fishery Management Council, Banco de Ponce Building, Suite 806, Munoz Rivera Avenue, Halo Rey, Puerto Rico 00936.

At the discretion of the Council or the Panel, as appropriate, interested members of the public may be permitted to speak at times which will allow the orderly conduct of official business. Interested members of the public who wish to submit written comments should do so by addressing the Executive Director at the above address. To receive due consideration and to facilitate inclusion of these comments in the record of the meetings, typewritten statements should be received within 10 days after the close of the meetings.

Dated: May 20, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL

Public Meeting

Notice is hereby given of a meeting of the Mid-Atlantic Fishery Management Council established by section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265).

The Mid-Atlantic Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the States of New York, New Jersey, Delaware, Pennsylvania, Maryland and Virginia. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on applications for foreign fishing, and conduct public hearings.

This meeting of the Council will be held on June 15 and 16, 1977, 9 a.m. to 3 p.m., at the Southampton Inn, Southampton, Long Island, New York, 11968.

The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda

1. Surf Clam/Ocean Quahog Management Plan.
2. Report of foreign fishing activity.
3. Status of fishery management plans.
4. Other management business.

This meeting is open to the public and there will be seating for approximately 30 public members available on a first-come, first-served basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meetings. To receive information on changes, if any, made to the agenda, interested members of the public should contact, on or about June 3, 1977:

Mr. John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Federal Building, Room 2115, North and New Streets, Dover, Delaware 19901.

At the discretion of the Council, interested members of the public may be permitted to speak at times which will allow the orderly conduct of official business. Interested members of the public who wish to provide written comments should do so by submitting them to Mr. Bryson at the above address. To receive due consideration and facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the Council meeting.

Dated: May 20, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

MID-ATLANTIC FISHERY MANAGEMENT COUNCIL'S SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting

Notice is hereby given of a meeting of the Scientific and Statistical Committee of the Mid-Atlantic Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265).

The Mid-Atlantic Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the States of New York, New Jersey, Delaware, Pennsylvania, Maryland and Virginia. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to fisheries within its area of authority, prepare comments on applications for foreign fishing, and conduct public hearings. The Scientific and Statistical Committee assists the Council in the development, collection and evaluation of such statistical, biological, economic, social and other scientific information as is relevant to the Council's development and amendment of fishery management plans.

The meeting of the Scientific and Statistical Committee will be held on June 13 and 14, 1977, from 9:30 a.m. to 4:00

p.m., and 9:00 a.m. to 3:00 p.m. respectively, at the Southampton Inn, 91 Hill Street, Southampton, Long Island, New York 11968. The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda

1. Mackerel Management Plan.
2. Administrative Matters.
3. Other Business.

This meeting is open to the public and there will be seating for approximately twenty public members available on a first-come, first-served basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meeting. To receive information on changes, if any, made to the agenda, interested members of the public should contact on or about June 3, 1977:

Mr. John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, Dover, Delaware 19901.

At the discretion of the Committee, interested members of the public may be permitted to speak at times which will allow the orderly conduct of Committee business. Interested members of the public who wish to provide written comments should do so by submitting them to Mr. Bryson at the above address. To receive due consideration and facilitate inclusion of these comments in the record of the meeting, typewritten statements should be received within 10 days after the close of the meeting.

Dated: May 20, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

TEXTILE CATEGORY SYSTEM

MAY 19, 1977.

The Committee for the Implementation of Textile Agreements is planning to revise the textile category system used in the bilateral textile agreements negotiated with other countries under the Arrangement Regarding International Trade in Textiles. The new system, published below, is based on the existing system but would streamline and consolidate that system. Such revisions are designed to improve the implementation of bilateral agreements by strengthening category uniformity among fibers and reducing the incidence of category classification problems. The number of categories under the revised system would be reduced from 137 to 106. The new system will be effective on January 1, 1978.

Interested parties are invited to submit their written views and comments concerning the revised textile category system to Mr. Robert E. Shepherd, Chairman of the Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Room 3826, Washington, D.C. 20230. All submissions should be made in ten copies. Because of pending bilateral negotiations with countries which will involve the use of the revised textile category system, such submissions should be received no later than June 15, 1977.

Copies of all written comments received will be available for public inspection between the hours of 8:30 a.m. and 5:30 p.m., Monday through Friday, in the Office of Textiles, Room 2815, Department of Commerce, Washington, D.C.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, Department of Commerce.

COMMISSION ON FEDERAL PAPERWORK

PUBLIC MEETING

Notice is hereby given of the eleventh regular meeting of the Commission on Federal Paperwork to be held on June 10, 1977, in Room 2154, Rayburn House Office Building, Washington, D.C.

The meeting will begin at 9:00 a.m. and will continue until approximately 12:30 p.m. The meeting is open to the public. The Commission will review progress on approved projects, staff proposals for future projects, and proposed Commission positions on specific paperwork problems. Among the topics to be considered are welfare reform, Title XX, housing, procurement, public works, and ombudsmen.

Anyone wishing to attend the meeting is invited. For further details, contact the Commission on Federal Paperwork, Room 2000, 1111 20th Street NW., Washington, D.C. 20582, telephone (202) 654–5400.

FRANK HORTON,
Chairman.

[FR Doc. 77–14830 Filed 5–24–77;8:45 am]

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

MAY 16, 1977.

The USAF Scientific Advisory Board ad hoc Committee on Defensive Chemical Systems will hold a meeting on June 15 at the Life Support Program Office, Wright-Patterson Air Force Base, Ohio, from 8 a.m. to 4 p.m.

The purpose of the meeting is to hold classified discussions on the ability of USAF Tactical Air Forces to operate in a chemically hostile environment.

The meeting will be open to the public upon verification of appropriate security clearances.

For those not having clearances the meeting will be closed to the public in accordance with Section 552b(c) of Title 5, United States Code, specifically subparagraph (1).

For further information, contact the Scientific Advisory Board at (202–697–4648).

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

[FR Doc.77–14857 Filed 5–24–77;8:45 am]

USAF SCIENTIFIC ADVISORY BOARD

Meeting

MAY 17, 1977.

Members of the USAF Scientific Advisory Board Aerospace Vehicles Panel Committee on B–1 Structures will hold a meeting at Rockwell International, Los Angeles, California, on June 30 and July 1, 1977, from 8 a.m. to 5 p.m.

The members of the Committee will receive classified briefings and hold classified discussions on the structural aspects of the B–1 aircraft development program.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly the meeting will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at 202–697–8845.

FRANKIE S. ESTEP,
Air Force Federal Register, Liaison Officer, Directorate of Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 732–7; (OPP–42013B)]

PUERTO RICO

Extension of Contingent Approval of State Plan for Certification of Pesticide Applicators

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136b), and the implementing regulations of 40 CFR Part 171, require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On November 6, 1975, the Honorable Rafael Hernandez-Colon, then Governor of the Commonwealth of Puerto Rico, submitted a Commonwealth of Puerto Rico Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to EPA.

A summary of the Commonwealth of Puerto Rico Plan was published in the FEDERAL REGISTER on March 10, 1976 (41 FR 10255). On April 30, 1976, the Regional Administrator, EPA Region II, approved the plan on a contingent basis for a twelve-month period. Contingent approval was based upon EPA approval of implementing regulations to be promulgated by the Puerto Rico Department of Agriculture (PRDA). Notice of contingent approval was published in the FEDERAL REGISTER June 3, 1976 (41 FR 22410).

The Puerto Rico Pesticide Control Act was passed by the Puerto Rico Legislature on October 30, 1975. Proposed regulations for the enforcement of the Act have been drafted, submitted to concerned agencies for comment and are expected to be published by June 30, 1977. As a result, on April 18, 1977, the Commonwealth of Puerto Rico requested an extension of the Commonwealth of Puerto Rico contingent approval pending final promulgation of regulations.

The Regional Administrator, EPA Region II, finds that there is good cause for approving the request and hereby gives notice that an extension has been granted until September 30, 1977.

Dated: May 13, 1977.

HERBERT BARRACK,
Acting Regional Administrator, U.S. Environmental Protection Agency, Region II.

[FR Doc.77–14788 Filed 5–24–77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[FCC 77–321; RM–2698]

BUSINESS RADIO SERVICE; SPECIAL EMERGENCY RADIO SERVICE

Memorandum Opinion and Order; Denying Petition for Rule Making

Adopted: May 11, 1977.

Released: May 20, 1977.

In the Matter of Amendment of Parts 89 and 91 of the Commission's Rules to transfer central station electrical protection industry licensees and certain frequencies allocated for their use from the Business Radio Service to the Special Emergency Radio Service.

By the Commission.

1. The Central Station Electrical Protection Association has petitioned the Commission to amend Part 89 (Public Safety Radio Services) and Part 91 (Industrial Radio Services) of the Commission's Rules to recognize central station electrical protection companies as a class of eligible in the Commission's Special Emergency Radio Service (Part 89, Subpart P) and to transfer 5 pairs of frequencies[1] in the Business Radio Service designated for use by this industry's members to the Special Emergency Radio Service.

2. Additionally, petitioner requests, upon transfer to the Special Emergency Radio Service, that central station electrical protection industry licensees be permitted to use their presently assigned mobile service frequencies above 25 MHz for fixed point-to-point tone or impulse signalling, subject to the condition that harmful interference not be caused to the primary mobile service operations of other licensees.

3. The International Municipal Signal Association (IMSA) and the associated Public-Safety Communications Officers, Inc. (APCO) have filed comments opposing CSEPA's petition on the grounds that the petition does not demonstrate a need for the proposed change, and because the service CSEPA members provide differs fundamentally from the public safety functions of the entities and personnel now eligible for licensing in the Special Emergency Radio Service.

4. We have carefully considered the petitioner's proposals and the arguments made in support of them, but we have not been able to conclude that it would be in the public interest to grant the petition. Our reasons for this conclusion are stated briefly below.

5. First, we do not believe that the petitioner has made an adequate case for its proposals, and has not shown how its members and, more importantly, how the public would benefit from their adoption. For example, CSEPA has not shown (nor indeed alleged) that the five pairs of frequencies designated for the industry's use in the Business Radio Service are not adequate. In this connection, it is noted that the petition, although not entirely clear on this point, does not propose that central station protection companies be made eligible to use the frequencies allocated in the Special Emergency Radio Services.[2] It would seem, therefore, that continued eligibility in the Business Radio Service would be advantageous for the central station protection industry because it would continue to have access to all Business Radio frequencies, not only in the 460–470 MHz band but also in the lower and in the higher bands as well.

6. Additionally, as we have indicated above, one immediate objective of the petitioner is to qualify its members to use their designated mobile service frequencies for fixed point-to-point operations. This, however, is not allowed in the Special Emergency Radio Service under existing rules, although it is permitted in other public safety radio services, see Section 89.126. Such a fixed use has been previously proposed by the petitioners in the Business Radio Service in an earlier petition, RM–1513, and was considered and denied by the Commission, see *Memorandum Opinion and Order*, RM–1513, 34 FCC 2d 350 (1972). Nothing presented here requires or warrants a different conclusion on that proposal now.

7. Finally, we agree with APCO and IMSA that commercial central station protection companies do not belong in the Special Emergency Radio Service. That service was established principally to accommodate activities oriented towards life protection, such as hospitals, ambulances, rescue and disaster organizations, and physicians, additionally, our extensive regulatory program for authorizing emergency medical service communication systems has been incorporated into the Special Emergency Radio Service. The activities of the petitioner's members, although important, are profoundly different from these types of activities. Thus, while we want to emphasize that we are aware of the importance of the protection services being provided by the central station protection industry[3], we simply do not believe that its radio communications operations should be accommodated in the Special Emergency Radio Service.

8. Accordingly, it is ORDERED, That the petition filed by the Central Station Electrical Protection Association (RM–2698) is denied.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.77–14888 Filed 5–24–77;8:45 am]

[1] 460.900 MHz/465.900 MHz; 460.925 MHz/465.925 MHz; 460.950 MHz/465.950 MHz; 460.975 MHz/465.975 MHz; and 461.000 MHz/466.000 MHz.

[2] If full eligibility in the Special Emergency Radio Service were proposed, other public interest issues would be raised.

[3] It was in recognition of the important functions performed by the central station protection industry that we designated five pairs of frequencies for its use in Docket 13847 and provide for the use of frequencies in the 952–960 MHz band for operation of central station alarm systems.

PURAC TASK ON THE GENERAL MOBILE RADIO SERVICE

Meeting

In preparation for the next meeting of the Personal Use Radio Advisory Committee (PURAC), the PURAC task investigating the personal uses of the General Mobile Radio Service will meet June 10, 1977 at 9 A.M. in Room 7317 of the offices of the Federal Communications Commission at 2025 "M" Street NW., Washington, D.C. 20554. The agenda for this meeting will be to report on progress made in identifying the uses of the General Mobile Radio Service and to review the work schedule for the task area for 1977.

Members of the public, especially those interested in personal use two-way radio, are invited to attend. For more information, contact Mr. Corwin Moore, Jr., Highway Safety Research Institute, University of Michigan, Huron Parkway and Baxter Road, Ann Arbor, Michigan 48109 (313–763–3232).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

GUAM OIL AND REFINING CO.

Proposed Consent Order

I. INTRODUCTION

Pursuant to 10 CFR § 205.197(c), the Federal Energy Administration (FEA) hereby gives notice of a Consent Order, which was executed between Guam Oil and Refining Company (GORCO) and the FEA on April 22, 1977. In accordance with that Section, FEA will receive comments with respect to this Consent Order. Although this Consent Order has been signed and tentatively accepted by FEA, the FEA may, after consideration of comments received, withdraw its acceptance and, if appropriate, attempt to negotiate an alternative Consent Order.

II. THE CONSENT ORDER

Guam Oil and Refining Company, with its executive office located in Dallas, Texas, is a firm engaged in the refining and marketing of petroleum products subject to FEA regulations.

As a result of an audit conducted by FEA of GORCO's costs and recovery of costs reflected in its Forms FEO–96 for the period between January 1974 through March 1975, FEA advised GORCO that GORCO had (1) understated its recoveries of increased crude oil costs in sales of "other covered products" by $2,277,417 by failing to consider certain sales in calculating its cost recoveries and (2) understated its increased costs of crude oil by $101,030 by improperly calculating its "crude oil cost differential." The net result of GORCO's miscalculations is that GORCO overstated on its Forms FEO–96 its "Net Increased Costs Attributable to Other Covered Products" by $2,176,387 between January 1974 through March 1975.

In resolution of the issues raised by the audit results, FEA and GORCO executed a Consent Order on April 22, 1977, the significant terms of which are as follows:

(1) In an effort to resolve its dispute with FEA, GORCO agrees to make adjustments to Line 18, Part V of its March 1975 FEO–96 to reflect adjustments resulting from its understatement of costs and understatment of cost recoveries, and to resubmit Forms FEO–96 filed for the period March 1975 to the present, reflecting all necessary adjustments based on the above-described March 1975 adjustment. (Based on the available information, GORCO had unrecovered increased product costs in each month of measurement, January 1974 through March 1975, after applying the corrected amounts determined in this Consent Order).

(2) In submitting revised Forms FEO–96, GORCO agrees that amounts removed in one month shall be carried forward and deducted from GORCO's Forms FEO–96 for all subsequent months, including the most recently filed Form FEO–96 and FEA–P110–M–1 filed for all future months.

(3) The provisions of 10 CFR 205.197, including the publication of this Notice, are applicable to the Consent Order.

III. SUBMISSION OF WRITTEN COMMENTS

Interested persons are invited to comment on this Consent Order by submitting such comments in writing to Mr. D. M. Fowler, Regional Administrator, Region VI, Federal Energy Administration, P.O. Box 35228, Dallas, Texas 75235.

Copies of this Consent Order may be received free of charge by written request to this same address or by calling 214–749–7626.

Comments should be identified on the outside of the envelope and on documents submitted with the designation "Comments on GORCO Consent Order." All comments received on or before ---------, 1977, will be considered by the FEA in evaluating the Consent Order.

Any information or data which, in the opinion of the person furnishing it, is confidential, must be identified as such and submitted in accordance with the procedures outlined in 10 CFR 205.9(f).

Issued in Washington, D.C., May 19, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77-14814 Filed 5-20-77;11:15 am]

REFINERS' CRUDE OIL ALLOCATION PROGRAM

Allocation Quarter of June 1 Through August 31, 1977

The notice specified in § 211.65(e) of the refiners' crude oil allocation program is hereby published for the allocation quarter of June 1, 1977, through August 31, 1977.

The buy-sell list for refiners is set forth as an appendix to this notice. The provisions of 10 CFR 211.65 apply to all transactions made under the buy-sell list. Included as part of the list, as required by § 211.65(e), are: The quantity of crude oil each refiner-buyer is eligible to purchase; the total allocation obligation for all refiner-sellers; the fixed percentage share for each refiner-seller; and the quantity of crude oil each that refiner-seller is obligated to offer for sale to refiner-buyers, with a specification as to the portions thereof that constitute the primary and secondary sales obligations for each refiner-seller, in accordance with 10 CFR 211.65(d).

The allocations shown on the buy-sell list for refiner-buyers that own and operate Canadian Crude Oil Allocation Program second priority refineries (as defined in Part 214 of 10 CFR) reflect two types of adjustments resulting from reductions in Canadian crude oil exports to the United States. Adjustments have been made for the June 1977–August 1977 allocation quarter based on FEA's estimate of Canadian crude oil exports during that allocation quarter. In addition, a further adjustment has been made for certain refiner-buyers that operate second priority refineries and that purchased their entire allocation for the March 1977–May 1977 allocation quarter. This adjustment reflects the difference between FEA's estimates of Canadian crude oil available for March 1977 through May 1977, which were used to adjust allocations during the March 1977–May 1977 allocation quarter, and the actual export level subsequently announced by the Canadian government.

Adjustments have also been made pursuant to 10 CFR 211.65(a)(4) for refiner-buyers that have recently experienced losses of Federal royalty oil. Additionally, FEA made corresponding adjustments for refiner-buyers that are gaining Federal royalty oil for this allocation quarter. Similar adjustments have been made in the last three allocation quarters.

The buy-sell list reflects a reduction in the sale obligation of Continental Oil Company (Conoco) to account for domestic crude oil directed away from Conoco to another refiner under FEA's Decision and Order in "Continental Oil Company," 2 FEA ¶80,503 (January 7, 1975). As has been the case for buy-sell lists since the effectiveness of primary and secondary sales obligations for refiner-sellers in the allocation quarter commencing September 1, 1975, Conoco's primary sales obligation is reduced by the amount of the redirected domestic crude oil under "Farmariss Oil and Refining Company and Navajo Refining Company," CCH Fed. Energy Guidelines, ¶20,629 (July 22, 1974). However, with the issuance of the Decision and Order in "Exxon Company," U.S.A., 5 FEA ¶____ (April 25, 1977), the relief under which is reflected for the first time in this notice, it appears that Conoco's adjustment reducing its sales obligation should have been applied proportionately to both its primary and secondary obligations, as is specified for Exxon in this recent decision involving similar facts. Accordingly, FEA hereby gives notice that, for future allocation quarters for which the buy-sell program continues in its present form, the reduction of Conoco's sale obligation will be calculated in the same manner as is Exxon's adjustment under the "Exxon" decision.

The buy-sell list covers PAD Districts I through V, and amounts shown are in barrels of 42 gallons each, for the specified period. Pursuant to § 211.65(d), each refiner-seller shall offer for sale, directly or through exchange, to refiner-buyers during an allocation quarter a quantity of crude oil equal to that refiner-seller's primary sales obligation plus any portion of that refiner-seller's secondary sales obligation as to which FEA directs a sale pursuant to 10 CFR 211.65(h). No refiner-seller shall be required to offer for sale to refiner-buyers, whether by directed sale or otherwise, any portion of its secondary sales obligation until each other refiner-seller (except refiner-sellers with minimal primary sales obligations) has sold at least 80% of its primary obligation.

The procedures of 10 CFR 211.65(h) provide that if a sale is not agreed upon within 15 days of the date of publication of this notice, a refiner-buyer that has not been able to negotiate a contract to purchase crude oil may request FEA to direct one or more refiner-sellers to sell a suitable type of crude oil to such refiner-buyer. Such a request must not be made earlier than 15 days nor later than 30 days after the publication of this notice. Upon such request, FEA may direct one or more refiner-sellers that have not completed their required sales to sell crude oil to the refiner-buyer. If the refiner-buyer declines to purchase the crude oil specified by FEA, the rights of that refiner-buyer to purchase that volume of crude oil are forfeited during this allocation quarter, providing that the refiner-seller or refiner-sellers in question have fully complied with provisions of 10 CFR 211.65. Refiner-buyers making such requests must provide FEA with the following information:

1. Name of the refiner-buyer and of the person authorized to act for the refiner-buyer in buy-sell list transactions.

2. Names and locations of the refineries for which crude oil is sought, the amount of crude oil sought for each refinery, and the technical specifications of crude oil that have historically been processed in each refinery.

3. Statement of any restrictions, limitations or constraints on the refiner-buyer's purchases of crude oil, particularly concerning the manner or time of deliveries.

4. Names and locations of all refiner-sellers from which crude oil has been sought under the buy-sell list and the volume and specifications of the crude oil sought from each.

5. The response of each refiner-seller to which a request to purchase crude oil has been made, and the name and telephone number of the individual contacted at each such refiner-seller.

6. Such other pertinent information as FEA may request.

Each refiner-buyer and refiner-seller will report the details of each transaction under the buy-sell list to FEA on Form FEA P–118–Q–1 within 15 days of the completion of arrangements for the transaction. Each refiner-buyer and refiner-seller is requested to report as promptly as practicable every such transaction to which it is a party.

Refiner-buyers wishing to receive an allocation in the allocation quarter commencing September 1, 1977, with respect to future refining capacity (as defined in 10 CFR 211.62) that is not presently taken into account in determining their respective purchase opportunities, must apply to the FEA for certification of that capacity and provide all necessary information required to enable FEA to evaluate the factors set forth in 10 CFR 211.65(b)(1) no later than July 1, 1977.

All reports and applications made under this notice should be addressed to:

Manager, Crude Oil Allocation Programs, Crude Oil Buy-Sell Program, 20th Street Postal Station, P.O. Box 19028, Washington, D.C. 20036.

This notice is issued pursuant to Subpart G of FEA's regulations governing its administrative procedures and sanctions, 10 CFR Part 205. Any person aggrieved hereby may file an appeal with FEA's Office of Exceptions and Appeals in accordance with Subpart H of 10 CFR Part 205. Any such appeal shall be filed on or before June 27, 1977.

Issued in Washington, D.C. May 19, 1977.

ERIC J. FYGI,
Acting General Counsel.

APPENDIX

The list of refiner-sellers and refiner-buyers for the period June 1, 1977, through August 31, 1977, is as follows. The list sets forth the identity of each refiner-seller and refiner-buyer, the fixed percentage share of each refiner-seller and the volumes of crude oil (reflecting all adjustments required under § 211.65), that each such refiner-seller is obligated to offer for sale (with a specification as to primary and secondary sales obligations) or that each such refiner-buyer is eligible to purchase, as the case may be.

FEDERAL MARITIME COMMISSION

LYKES BROS. STEAMSHIP CO., INC. AND PANAMERICANA INSURGENTES (BERMUDA) LTD.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before June 14, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by R. J. Finnan
Pricing Analyst, Lykes Bros. Steamship Co., Inc., 300 Poydras Street, New Orleans, Louisiana 70130.

Agreement No. 10296, between the above named parties, is an equipment lending arrangement whereby Panamericana Insurgentes will allow Lykes to use its equipment, i.e., dry or reefer containers mounted on chassis, according to the terms, conditions and to the extent set forth in the agreement.

By Order of the Federal Maritime Commission.

Dated: May 19, 1977.

JOSEPH C. POLKING,
Acting Secretary.

FEDERAL POWER COMMISSION

ARKANSAS LOUISIANA GAS CO.

[Docket No. RP77-55]

Notice of Revised Tariff Sheet

MAY 17, 1977.

Take notice that on April 29, 1977, Arkansas Louisiana Gas Company (Arkla)

tendered for filing "Revised Sheet No. 4 issued on May 1, 1977" to its Rate Schedule No. G–2 FPC Gas Tariff First Revised Volume No. 1, which Arkla states represents the rates as filed in the captioned docket adjusted to reflect its currently effective purchased gas cost of 52.29¢ per Mcf at 14.73 psia and surcharge rate of 23.27¢ per Mcf at 14.73 psia.

Arkla requests the above described tariff sheet be substituted for the "Revised Sheet No. 4 issued on April 18, 1977" in its Notice of Rate Change filed on April 18, 1977 in Docket No. RP77–55 to be effective June 1, 1977.

Arkla also states that copies of its filing were mailed to the jurisdictional customer affected and other interested parties.

Any person desiring to be heard or to protest said filing should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77–14870 Filed 5–24–77;8:45 am]

[Docket No. CP77–372]

CONSOLIDATED GAS SUPPLY CORP.

Notice of Application

MAY 18, 1977.

Take notice that on May 5, 1977, Consolidated Gas Supply Corporation (Applicant), 445 West Main Street, Clarksburg, West Virginia 26301, filed in Docket No. CP77–372 an application pursuant to Section 7 of the Natural Gas Act and § 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission for and approval of the abandonment, during the twelve-month period ending June 30, 1978, and operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment would not exceed $2,000,000 and that the cost of any single project would not exceed $500,000. These costs would be financed from funds on hand and funds to be obtained from its parent corporation, Consolidated Natural Gas Company, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–14873 Filed 5–24–77;8:45 am]

[Docket No. G–10122, et al.]

CONTINENTAL OIL CO.

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

MAY 13, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

LOIS D. CASHELL,
Secretary.

[Docket No. CP77–367]

FLORIDA GAS TRANSMISSION CO. AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Notice of Application

MAY 18, 1977.

Take notice that on May 4, 1977, Florida Gas Transmission Company (Florida Gas), P.O. Box 44, Winter Park, Florida, and Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, (Applicants) filed in Docket No. CP77–367 a joint application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of 3,000,000,000 Btu's of natural gas per day at a new and additional delivery point located in Jones County, Mississippi, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to exchange 3,000,000,000 Btu's of natural gas per day pursuant to a letter agreement dated April 11, 1977 between the two parties. It is stated that Florida Gas has contracted for a supply of natural gas from Florida Gas Exploration Company (Exploration), a producing affiliate, to be produced from the Calhoun Field, Jones County, Mississippi, and that Florida would deliver the gas, or cause the gas to be delivered to Transco for the account of Florida Gas at the existing valve located on Transco's pipeline facilities in Jones County, Mississippi. It is further stated that Transco would redeliver equivalent volumes of natural gas to Florida at any mutually agreeable existing authorized interconnection between Applicants' systems.

Applicants state that it would not be necessary to construct any new facilities to render the instant service; however, if additional facilities are required to ensure the proper measurement of the quantities of natural gas proposed to be exchanged, such facilities would be installed and operated or caused to be installed and operated by Florida Gas at no expense to Transco.

Applicants indicate that the proposed exchange of natural gas could provide additional and immediate volumes to the interstate market and that it would assist Florida Gas in maintaining adequate supplies of gas to its customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77–14876 Filed 5–24–77;8:45 am]

[Docket No. CP75-283]

GREAT LAKES GAS TRANSMISSION CO.

Notice of Amendment to Application

MAY 18, 1977.

Take notice that on May 6, 1977, Great Lakes Gas Transmission Company (Applicant), 2100 Buhl Building, Detroit, Michigan 48226, filed in Docket No. CP75-283 an amendment to its application filed in said docket pursuant to Section 7 of the Natural Gas Act so as to authorize the construction and operation of a total of approximately 217 miles of 36-inch diameter pipeline loop and related facilities, of which approximately 125 miles of the loop would be constructed for transportation of commingled gas during Phase I, and modification and utilization of existing facilities, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

In its initial application filed in the instant docket, Applicant proposed (1) to transport for the account of ANG Coal Gasification Company (Gasification Company), commingled synthetic and natural gas (commingled gas) from Thief River Falls, Minnesota to Crystal Falls, Michigan and (2) to construct, modify and operate facilities to enable it to receive and transport such gas. The synthetic gas which would be commingled with natural gas flowing through Applicant's existing facilities would be produced in a coal gasification plant to be built in Mercer County, North Dakota, it is said. Applicant states that at the time it filed its original application, such plant was proposed to be built and owned solely by the Gasification Company and the plant output was anticipated to be 275,000 Mcf of natural gas per day.

Applicant states that the following changes have occurred since the filing of its original application:

(1) In April 1976, the Gasification Company decided to construct the plant in two phases with Phase I to be completed by 1981; the plant output after completion of the first phase is anticipated to be 137,500 Mcf of natural gas per day which is half of the total projected output of 275,000 Mcf of natural gas per day after completion of Phase II; (2) In April, 1977, the Gasification Company advised Great Lakes that an interim agreement had been reached between the Gasification Company and PGC Coal Gasification Company (PGC), wholly-owned subsidiary of The Peoples Gas Company of Chicago, Illinois, which provided for the sharing of front end costs and which outlined the basis of co-ownership of Phase I of the gasification plant. ANR Gasification Properties Company (ANP) a newly formed wholly-owned subsidiary of American Natural Resources Company and PGC would be the co-owners as tenants in common of Phase I; additionally, these two companies would equally share in the output of the proposed plant. Such change of ownership would not change the construction or operation of the facilities to be installed by Applicant, it is said.

Applicant proposes to construct during Phase I 365 miles of 20-inch diameter synthetic natural gas (SNG) pipeline which would be used for transportation of the SNG from the outlet of the gasification plant to the interconnection of SNG line with the existing facilities of Applicant at Thief River Falls, Minnesota (Thief River Falls interconnection).

Applicant states that the transportation of commingled gas from the Thief River Falls interconnection to the interconnection of Applicant's facilities with those of Mchigan Wisconsin Pipe Line Company (Michigan Wisconsin) near Crystal Falls, Michigan (Crystal Falls interconnection) during Phase I would require construction of approximately 125 miles of 36-inch diameter looping in seven segments and utilization of 35.8 miles of Applicant's existing 36-inch diameter loop which is presently being used to render a transportation service for Northern Natural Gas Company.

It is indicated that Applicant has now updated the costs of Phase I facilities to constant mid-1976 dollars, and that the total estimated cost of Applicant's Phase I SNG facilities in mid-1976 constant dollars is $70,567,200 and the total estimated cost of the jurisdictional facilities is $55,680,700. Applicant states that the financing plan for this undated cost is not different in any material respect from the financing plan originally proposed.

It is stated that in the event that PGC does not become a co-owner of Phase I of the gasification plant and output, renegotiation of Applicant's transportation contracts for both the non-jurisdictional SNG transportation service and the jurisdictional commingled gas transportation service would be necessary. It is further stated that both these transportation services are expected to be performed under the terms and conditions similar to those of the contracts which are already on file with the Commission except for the following changes: (1) Applicant would have separate transportation contracts with the coowners; (2) the new contracts would pertain to half of the anticipated gasification plant out-put; and (3) each of these contracts would reflect the two-phase construction of the facilities.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedures (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervent in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-359]

LOUISVILLE GAS AND ELECTRIC CO.

Notice of Tariff Change

MAY 18, 1977.

Take notice that Louisville Gas and Electric Company (LG&E) on May 4. 1977, tendered for filing proposed changes in its Interconnection Agreement between LG&E and East Kentucky Power Cooperative (East Ky.), formerly East Kentucky Rural Electric Cooperative Corporation, designated Louisville Gas and Electric Company FPC Rate Schedule No. 25.

LG&E indicates that the purpose of this filing is to increase the demand charge as set forth under Article VI of the Interconnection Agreement from $0.075 per kilowatt per weekday (Monday through Saturday) to $0.10 per kilowatt per weekday (Monday through Saturday). LG&E further indicates that this proposed revision reflects a desire on the part of both parties to attain the optimum benefit from the interconnection of their systems.

According to LG&E copies of the filing were served upon East Kentucky Power Cooperative.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ES77-39]

IOWA POWER & LIGHT CO.

Notice of Application

MAY 18, 1977.

Take notice that on May 12, 1977, Iowa Power & Light Company (Applicant) of Des Moines, Iowa, filed an application seeking an order pursuant to Section 204 of the Federal Power Act authorizing the issuance of not more than 450,000 shares of Common Stock, par value $10 per share.

Applicant proposes to issue and sell for cash the aforesaid 450,000 shares of Common Stock, par value $10 per share, under an Automatic Dividend Reinvestment and Stock Purchase Plan.

The purpose for which the Common Stock is to be issued is to obtain funds to pay a portion of short-term borrowings outstanding from commercial banking institutions and commercial paper from time to time and for general corporate purposes.

Any person desiring to be heard or to make any protest with reference to the application should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestant a party to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14878 Filed 5-24-77;8:45 am]

[Docket No. CP77-373]

MICHIGAN WISCONSIN PIPE LINE CO.

Notice of Application

MAY 18, 1977.

Take notice that on May 9, 1977, Michigan Wisconsin Pipe Line Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CP77-373 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction during the 12-month period commencing July 13, 1977, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers and other similar sellers thereof, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the system of other pipeline companies which may be authorized to transport gas for the account of or exchange with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $12,000,000 with no single offshore project to exceed a cost of $2,500,000 and no single onshore project to exceed a cost of $1,500,000. These costs would be financed with cash on hand, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14874 Filed 5-24-77;8:45 am]

[Docket No. CP77-371]

MOUNTAIN FUEL SUPPLY CO.

Notice of Application

MAY 18, 1977.

Take notice that on May 5, 1977, Mountain Fuel Supply Company (Applicant), 180 East First South Street, Salt Lake City, Utah 84139, filed in Docket No. CP77-371 an application pursuant to Section 7(c) of the Natural Gas Act and § 157.7(b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the 12-month period commencing on the date of the order granting the requested authorization, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased or received from producers and other similar sellers thereof, or produced by Applicant, from time to time, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $6,000,000, with no single project to exceed a cost of $1,500,000. These costs would be financed out of funds obtained from internal sources and from short-term bank borrowings as may be required.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 6, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14875 Filed 5-24-77;8:45 am]

[Docket No. ES77-36]

PACIFIC POWER & LIGHT CO.

Notice of Application

MAY 18, 1977.

Take notice that on May 5, 1977, the Pacific Power & Light Company (Applicant), a corporation organized under the laws of the state of Maine and quali-

fied to transact business in the states of Oregon, Wyoming, Washington, California, Montana and Idaho, with its principal business office at Portland, Oregon, filed an application with the Federal Power Commission, pursuant to Section 204 of the Federal Power Act, seeking an order authorizing the issuance of not exceeding $160,000,000 in an aggregate principal amount at any one time outstanding of unsecured promissory notes (1) pursuant to Lines of Credit ($85,000,000), and (2) in the form of Commercial Paper ($75,000,000).

(1) Unsecured promissory notes in an aggregate principal amount not exceeding $85,000,000 at any one time outstanding would be issued by Applicant to evidence borrowings from commercial banks under Lines of Credit. Each note so issued would be dated the day of issuance and would have a maturity of up to three months from the date thereof. All notes issued pursuant to the Lines of Credit would mature not later than June 30, 1979.

(2) Unsecured promissory notes in an aggregate principal amount not exceeding $75,000,000 at any one time outstanding would be issued and sold by Applicant to one or more commercial paper dealers. Each note issued as Commercial Paper would be dated the day of issuance, would have a maturity of not more than 270 days from the date thereof, but not later than June 30, 1979, and would be discounted at the rate prevailing at the time of issuance for Commercial Paper of comparable quality and maturity.

Proceeds from the borrowings to be made under the Lines of Credit and in the form of Commercial Paper would be used to temporarily finance current transactions, including Applicant's construction expenditures, which for 1977 and 1978 are presently estimated at $602,141,000. The balance of funds required to meet estimated construction expenditures is expected to come, in part, from funds to be generated internally, from borrowings pursuant to a Letter Agreement dated March 10, 1977, not exceeding $50,000,000 at any one time outstanding, and from permanent financing of types and magnitudes not yet finally determined.

Any person desiring to be heard or to make any protest with reference to this application should, on or before May 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14871 Filed 5-24-77;8:45 am]

[Docket No. CP77-374]

UNITED GAS PIPE LINE CO.

Notice of Application

MAY 17, 1977.

Take notice that on May 11, 1977, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP77-374 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 5,000 Mcf of natural gas per day for Mississippi River Transmission Corporation (Mississippi River) and the construction and operation of a tap or taps at the proposed delivery point in order to receive such gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant proposes to transport up to 5,000 Mcf of natural gas per day for Mississippi River for 10 years pursuant to a transportation agreement dated April 6, 1977, between Applicant and Mississippi River. It is stated that Mississippi River would deliver or cause to be delivered to Applicant the proposed volumes of gas at the tap or taps to be installed by Applicant at Mississippi River's expense on Applicant's 24-inch line located in Desoto Parish, Louisiana, and Applicant would redeliver such gas to Mississippi River at the outlet side of its existing measuring and regulating stations located at Mississippi River's Perryville Compressor site located in the Monroe Field, Quachita Parish, Louisiana. Applicant states that it is currently selling gas to Mississippi River under a service agreement dated September 11, 1970, at this point.

It is stated that Mississippi River would pay Applicant for gas transported under the instant agreement an amount per Mcf equal to Applicant's average jurisdictional transmission cost of service in effect from time to time in Applicant's northern rate zone as such may be determined by Applicant based on rate filings made from time to time, less any amount included in such average jurisdictional cost of service which is attributable to gas consumer in the operation of Applicant's pipeline system. The current average jurisdictional transmission cost of service, exclusive of the cost of gas consumed in Applicant's operation, is 20.04 cents per Mcf, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14879 Filed 5-24-77;8:45 am]

FEDERAL RESERVE SYSTEM

CHEMICAL NEW YORK CORP.

Proposed Performance of Industrial Bank Activities

Chemical New York Corporation, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to convert the Boulder, Colorado office of its subsidiary, Sun Finance and Loan Company, into an industrial bank to be known as Depositors Industrial Bank. Notice of the application was published on April 19, 1977, in "The Boulder Daily Camera," a newspaper circulated in Boulder, Colorado.

Applicant states that the proposed subsidiary would engage in the activities of an industrial bank, including making direct loans and purchasing sales finance contracts and other extensions of credit as would be made or acquired by an industrial bank; providing group credit life and group credit accident and health insurance directly related to such extensions of credit; receiving time savings deposits. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than June 16, 1977.

Board of Governors of the Federal Reserve System, May 19, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-14809 Filed 5-24-77;8:45 am]

TEXAS COMMERCE BANCSHARES, INC.

Acquisition of Bank

Texas Commerce Bancshares, Inc., Houston, Texas, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of Main Street National Bank of Dallas, Dallas, Texas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than June 16, 1977.

Board of Governors of the Federal Reserve System, May 19, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FEDERAL OPEN MARKET COMMITTEE

Domestic Policy Directive of April 19, 1977

In accordance with § 271.5 of its rules regarding availability of information, there is set forth below the Committee's Domestic Policy Directive issued at its meeting held on April 19, 1977.[1]

The information reviewed at this meeting suggests that growth in real output of goods and services increased in the first quarter from the reduced pace in the fourth quarter of 1976. In March industrial output, retail sales, and employment expanded substantially further. Although the labor force also increased sharply, the unemployment rate declined from 7.5 to 7.3 percent. The wholesale price index for all commodities again rose substantially; increases were particularly sharp among farm products and foods, and there were sizable advances for many industrial commodities. The index of average wage rates rose in the first quarter of 1977 at a somewhat faster pace than it had on the average during 1976, reflecting largely an increase in the minimum wage.

The average value of the dollar against leading foreign currencies has declined somewhat over the past month, returning to about the level at the beginning of the year. Demand for the Japanese yen and the U.K pound intensified. The U.S. foreign trade deficit continued large in February.

M–1 grew at a moderate pace in March but increased substantially in early April At banks and thrift institutions, inflows of time and savings deposits other than large-denoimination CD's continued to slacken in March. Market interest rates declined considerably in mid-April, after having changed little since mid-March.

In light of the foregoing developments, it is the policy of the Federal Open Market Committee to foster bank reserve and other financial conditions that will encourage continued economic expansion, while resisting inflationary pressures and contributing to a sustainable pattern of international transactions.

Growth in M–1, M–2, and M–3 within ranges of 4½ to 8½ percent, 7 to 9½ percent, and 8½ to 11 percent, respectively, from the first quarter of 1977 to the first quarter of 1978 appears to be consistent with these objectives. These ranges are subject to reconsideration at any time as conditions warrant.

The Committee seeks to encourage near-term rates of growth in M–1 and M–2 on a path believed to be reasonably consistent with the longer-run ranges for monetary aggregates cited in the preceding paragraph Specifically, at present, it expects the annual growth rates over the April–May period to be within the ranges of 6 to 10 percent for M–1 and 8 to 12 percent for M–2. In the judgment of the Committee such growth rates are likely to be associated with a weekly average Federal funds rate of about 4¾ percent. If, giving approximately equal weight to M–1 and M–2, it appears that growth rates over the 2-month period will deviate significantly from the midpoints of the indicated ranges, the operational objective for the Federal funds rate shall be modified in an orderly fashion within a range of 4½ to 5¼ percent.

If it appears during the period before the next meeting that the operating constraints specified above are proving to be significantly inconsistent, the Manager is promptly to notify the Chairman who will then decide whether the situation calls for supplementary instructions from the Committee.

NOTE.—On May 6, 1977, the Committee modified the inter-meeting range for the Federal funds rate specified in the next-to-last paragraph of the domestic policy directive issued on April 19, 1977, by increasing the upper limit for 5¼ to 5½ percent.

By order of the Federal Open Market Committee, May 20, 1977.

ARTHUR L. BROIDA,
Secretary.

PRESIDENT'S CANCER PANEL ET AL.

Open Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be entirely open to the public to discuss issues relating to committee business as indicated in the notices. Attendance by the public will be limited to space available. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20014, unless otherwise stated.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20014 (301/496–5708) will furnish summaries of the meetings and rosters of committee members, upon request.

Other information pertaining to the meeting can be obtained from the Executive Secretary indicated.

PRESIDENT'S CANCER PANEL

Dates and time: July 12, 1977; 9:30 a.m., adjournment.
Place: Building 31A, Conference Room 4, National Institutes of Health.
Type of meeting: Open for the entire meeting.
Agenda: To hear reports of the Chairman, President's Cancer Panel and the Director, National Cancer Program, NCI.
Executive Secretary: Richard A. Tjalma, Building 31A, Room 11A46, National Institutes of Health, Phone: 301–496–5854.

CARCINOGENESIS SCIENTIFIC ADVISORY COMMITTEE

Date and time: July 18–19, 1977; 8:30 a.m., adjournment.
Place: Building 31C, Conference Room 9, National Institutes of Health.
Type of meeting: Open for the entire meeting.
Agenda: To review the scientific research program of the Carcinogenesis Program, Division of Cancer Cause and Prevention, NCI.
Executive Secretary: Dr. Glo B. Gori, Building 31, Room 11A05, National Institutes of Health, Phone: 301–496–6616.
Name of committee: Data Evaluation and Risk Assessment Subgroup of the Clearinghouse on Environmental Carcinogens.
Dates: July 25, 1977; 8:30 a.m., adjournment.
Place: Building 31C, Conference Room 6, National Institutes of Health.
Type of meeting: Open for the entire meeting.
Agenda: To review available bioassay reports and other matters relevant to data evalution and risk assessment.
Executive Secretary:
Dr. James M. Sontag, Building 31A, Room 3A16, National Institutes of Health. Phone: 301–496–5108.

Dated: May 18, 1977.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA, OUTER CONTINENTAL SHELF IN THE WESTERN GULF

Postponement of Public Hearings Regarding Proposed Oil and Gas Lease Sale

The location and date of the public hearings scheduled for June 1–4, 1977, in Kodiak and Anchorage, Alaska were announced in the FEDERAL REGISTER on May 11, 1977, (42 FR 23885) Volume 42, No. 91. These hearings concerning the proposed oil and gas lease sale in the Western Gulf of Alaska have been postponed. The Secretary of the Interior announced an 18 month planning schedule for Outer Continental Shelf oil and gas leasing on May 17, 1977. This schedule does not include the proposed Kodiak sale, but it will be considered for inclusion in the schedule being developed for 1979–1978).

We are still soliciting comments from the public on the draft environmental impact statement which was made available to the public on April 12, 1977. Comments should be sent to the Manager, Alaska Outer Continental Shelf Office, P.O. Box 1159, Anchorage, Alaska 99510, by June 24, 1977.

Dated: May 19, 1977.

CURT BERKLUND,
Director, Bureau of Land Management.

Approved: May 20, 1977.

CALIFORNIA

Termination of Proposed Withdrawal and Reservation of Land

MAY 17, 1977.

Notice of a Bureau of Reclamation, U.S. Department of the Interior, application Sacramento 062886, for withdrawal and reservation of lands for the planned facilities of the Trinity River Division, Central Valley Project, California, was published as FR Doc. 60–5809 on page 5848 of the issue of June 24, 1960. The applicant agency has cancelled its application.

MOUNT DIABLO MERIDIAN

T. 32 N., R. 6 W.,
Sec. 19, SE¼NE¼.

The area described aggregates 40 acres.

Therefore, pursuant to the regulations contained in 43 CFR Part 2350, such lands at 10 a.m. on June 27, 1977, will be relieved of the segregative effect of the above mentioned application.

JOAN B. RUSSELL,
Chief, Lands Section, Branch of Lands and Minerals Operations.

[Wyoming 59407]

WYOMING

Application

MAY 16, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Panhandle Pipe Line Company of Kansas City, Missouri filed an application for a right-of-way to construct a 4" natural gas pipeline for the purpose of transporting natural gas across the following described national resource lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 44 N., R. 77 W.
Sec. 3, lot 4, SW¼NW¼;
Sec. 4, lot 1.
T. 45 N., R. 77 W.
Sec. 1, SE¼SE¼;
Sec. 11, E½SE¼, SW¼SE¼;
Sec. 12, NW¼NE¼, E½NW¼, SW¼NW¼;
Sec. 14, NE¼NW¼, S½NW¼;
Sec. 15, SE¼SW¼, SE¼NE¼, NE¼SE¼, SW¼SE¼;
Sec. 21, E½SE¼;
Sec. 22, N½NW¼, SW¼NW¼, NW¼SW¼;
Sec. 28, E½E½;
Sec. 33, E½E½.

The pipeline is to transport natural gas from wells located in Johnson County, Wyoming, and will connect the wells with an existing gas transmission line in Johnson County.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Union & Overland Blvd., P.O. Box 2834, Casper, Wyoming 82601.

WILLIAM S. GILMER,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77–14865 Filed 5–24–77;8:45 am]

[Wyoming 59189]

WYOMING

Application

MAY 17, 1977.

Notice is hereby given that pursuant to section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Marathon Pipe Line Company of Casper, Wyoming filed an application for the purpose of authorizing existing 3", 4", 6" and 8" pipelines and related facilities which have been constructed for the transportation of oil and other synthetic liquid fuels across the following described national resource lands:

SIXTH PRINCIPAL MERIDIAN, WASHAKIE COUNTY, WYOMING

T. 47 N., R. 90 W.
Secs. 7, 8, and 18.
T. 45 N., R. 91 W.
Secs. 19 and 30.
T. 46 N., R. 91 W.
Sec 6
T. 47 N., R. 91 W.
Secs. 5, 7, 8, 9, 10, 11, 13, 14, 22, 23, 24, 27, 28, 29, 31, 32, and 33.
T. 48 N., R. 91 W.
Secs. 29 and 32.
T. 45 N., R. 92 W.
Secs 6, 7, 8, 17, 20, 21, 22, 25, 26, and 27.
T. 46 N., R. 92 W.
Sec. 1.
T. 47 N., R. 92 W.
Secs 1, 2, 3, 11, 12, 13, 33, and 34.

The pipeline for which this right-of-way application is made is utilized as a gathering system comprised of five basic components, each an integral part of the whole. Utilization of the component parts of the right-of-way was commenced between 1957 and 1972, and has continued since that time as the only practicable

way of gathering and transporting crude oil produced from the wells served.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1700 Robertson Avenue, P.O. Box 119, Worland, Wyoming 82401.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

OUTER CONTINENTAL SHELF OFF LOUISIANA AND TEXAS

Oil and Gas Lease Sale No. 47, June 23, 1977

Correction

In FR Doc. 77–14474 appearing at page 26250 in the issue of Monday, May 23, 1977, make the following changes:

1. In the last three lines of paragraph 5, first column, page 26251, "Affirmative Representation Form" should read "Affirmative Action Representation Form."
2. In the title of the tract listing for Green Canyon, first column, page 26253, "protection" should read "protraction."
3. In the tract listig for Mississippi Canyon, first column, page 26253, the "Block" entry for Tract 47–230, which now reads "380," should read "280."
4. In the form on page 26254, there should be a gap in the dotted line following "N.O. misc No," to indicate that two entries are to be placed there.

Bureau of Reclamation

[INT FES 77–15]

COLORADO RIVER WATER QUALITY IMPROVEMENT PROGRAM

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior and Department of Agriculture have prepared a final environmental statement for the Colorado River Water Quality Improvement Program.

The environmental statement concerns a basinwide salinity control program to reduce the salinity of the Colorado River in order to provide water quality benefits to agricultural and municipal and industrial water users in the basin states.

Copies are available for inspection at the following locations:

Office of Communications, Room 7220, Department of the Interior, Washington, D.C. 20240, telephone (202) 343–9247

Office of Assistant to the Commission, Ecology, Room 7620, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, telephone 202–343–4991.

Chief, Colorado River Water Quality Office, Office, Bureau of Reclamation, Engineering and Research Center, Denver Federal Center, P.O. Box 25007, Denver, Colorado, telephone 303–234–3828.

Regional Director, Upper Colorado Region, Bureau of Reclamation, Federal Building, 125 South State Street, Salt Lake City, Utah 84111, telephone 801–588–5592.

Regional Director, Lower Colorado Region, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, telephone 702–598–7411.

Single copies of the final environmental statement may be obtained on request to the Commissioner of Reclamation, Engineering and Research Center, or the Regional Directors. In addition, copies may be purchased from the National Technical Information Service, Department of Commerce, Springfield, Virginia 22151. Please refer to the statement number above.

Dated: May 19, 1977.

HEATHER L. ROSS,
Acting Deputy Assistant Secretary.

Fish and Wildlife Service

THREATENED SPECIES PERMIT

Notice of Receipt of Application

Notice is hereby given that the following application for a permit is deemed to have been received under section 4(d), 16 U.S.C. 1533(d), of the Endangered Species Act of 1973 (Pub. L. 93–205).

Applicant: Charles Kamm, Route 1, Box 87, Courtland, Minnesota 56021.

OMB NO. 42-R1670

DEPARTMENT OF THE INTERIOR
U.S. FISH AND WILDLIFE SERVICE
FEDERAL FISH AND WILDLIFE LICENSE/PERMIT APPLICATION

1. APPLICATION FOR (Indicate only one)
☐ IMPORT OR EXPORT LICENSE ☒ PERMIT

2. BRIEF DESCRIPTION OF ACTIVITY FOR WHICH REQUESTED LICENSE OR PERMIT IS NEEDED:
Propagating certain species of Avian wild life classified as endangered or Threatened Wildlife - and To Sell, or Trade and also buy such birds and wildlife for the purpose of enhancing The Survival of These Species

3. APPLICANT: (Show complete address and phone number of individual, business, agency, or institution for which permit is requested)
Charles Kamm
Rt1 Box 87
Courtland Minn
56021

4. IF "APPLICANT" IS AN INDIVIDUAL, COMPLETE THE FOLLOWING:
SEX: ☒ MALE ☐ FEMALE ☐ MULTIPLE | HEIGHT: 5'6" | WEIGHT: 150
DATE OF BIRTH: 12-6-36 | COLOR HAIR: Black | COLOR EYES: Blue
PHONE NUMBER WHERE EMPLOYED: 359-2602 (507) | SOCIAL SECURITY NUMBER: 468-40-6956
OCCUPATION: Disabled
ANY BUSINESS, AGENCY, OR INSTITUTIONAL AFFILIATION HAVING TO DO WITH THE WILDLIFE TO BE COVERED BY THIS LICENSE/PERMIT: Propagator of Avian wildlife

5. IF "APPLICANT" IS A BUSINESS, CORPORATION, PUBLIC AGENCY, OR INSTITUTION, COMPLETE THE FOLLOWING:
EXPLAIN TYPE OR KIND OF BUSINESS, AGENCY, OR INSTITUTION: NOT Applicable
NAME, TITLE, AND PHONE NUMBER OF PRESIDENT, PRINCIPAL OFFICER, DIRECTOR, ETC.: N/A
IF "APPLICANT" IS A CORPORATION, INDICATE STATE IN WHICH INCORPORATED: N/A

6. LOCATION WHERE PROPOSED ACTIVITY IS TO BE CONDUCTED:
Rt1 Box 87
Courtland Minn 56021

7. DO YOU HOLD ANY CURRENTLY VALID FEDERAL FISH AND WILDLIFE LICENSE OR PERMIT? ☒ YES ☐ NO
(If yes, list license or permit number(s)): PRT 2-1847-TW

8. IF REQUIRED BY ANY STATE OR FOREIGN GOVERNMENT, DO YOU HAVE THEIR APPROVAL TO CONDUCT THE ACTIVITY YOU PROPOSE? ☐ YES ☐ NO
(If yes, list jurisdictions and type of documents): NOT Applicable

9. CERTIFIED CHECK OR MONEY ORDER (if applicable) PAYABLE TO THE U.S. FISH AND WILDLIFE SERVICE ENCLOSED IN AMOUNT OF: N/A

10a. DESIRED EFFECTIVE DATE: immediately | 10b. DURATION NEEDED: Continuing

12. ATTACHMENTS: THE SPECIFIC INFORMATION REQUIRED FOR THE TYPE OF LICENSE/PERMIT REQUESTED (See 50 CFR 13.12) IS/IS NOT BEING ATTACHED. IT CONSTITUTES AN INTEGRAL PART OF THIS APPLICATION. LIST SECTIONS OF 50 CFR UNDER WHICH ATTACHMENTS ARE PROVIDED.
50 CFR 17.33(a)(1)(2)(3)(4)(5)(6)(7)

CERTIFICATION
I HEREBY CERTIFY THAT I HAVE READ AND AM FAMILIAR WITH THE REGULATIONS CONTAINED IN TITLE 50, PART 13, OF THE CODE OF FEDERAL REGULATIONS AND THE OTHER APPLICABLE PARTS IN SUBCHAPTER B OF CHAPTER I OF TITLE 50, AND I FURTHER CERTIFY THAT THE INFORMATION SUBMITTED IN THIS APPLICATION FOR A LICENSE/PERMIT IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE AND BELIEF. I UNDERSTAND, THAT ANY FALSE STATEMENT HEREIN MAY SUBJECT ME TO THE CRIMINAL PENALTIES OF 18 U.S.C. 1001.

Pheasant, White-eared, *Crossoptilon crossoptilon.*
√Pheasant, Elliot, *Syrmaticus ellioti.*
√Pheasant: Impeyan, *Lophophorus impeyanus.*
√Prairie Chicken, Attwater's Greater, *Tympanuchus cupido attwateri.*

2. These birds were raised in captivity.

3. Any birds can be obtained from captive-reared stock within the U.S. under permits issued by your department.

4. The birds to be covered will be raised in Minnesota at my residence at Route 1, Box 87, Courtland, MN, U.S.A. 56021.

5. The facilities available for maintaining these birds are as follows: The 18 breeding pens are 6 ft. high and 12X12. These pens house 1 pair of birds, then they also have a pen within a winterized building approximately 6X8 floor space. We maintain an outer fence with electric wire around it to protect the birds from predators. The one in poultry netting is used on the sides of pens and tops are covered with either poultry netting or toprite plastic netting. All birds are fed a commercially prepared feed and those needing heat during the winter are provided heat. The young birds are raised in free standing brooders and are started on a good quality commercial starter, switching later to grower, then flyer, etc. According to recommendations of producers and researchers, this is fed throughout their lives. I have large 50 x 50 pens, plus some individual pens for these young birds.

(ii) I have bred and maintained and raised over 30 species of birds, some of them prior to them being placed on the endangered list, and many that are considered to be delicate and difficult to maintain or breed in captivity. I have been raising game birds as a hobby for around 10 years, because we love the birds, and we're proud of the care we give them and the condition they are in. I make every effort to stay up on the latest publications and research related to my interest in captive propagation and feel that I'm well aware of the needs of the endangered birds and meet this need.

(iii) I am always willing to cooperate in the expansion of the populations of these birds and will give any data and knowledge I might have to further the populations of those species.

(iv) Any transporting is done in standard, roomy, well-ventilated cardboard or wood containers with food and water supplied. However, I don't ship any of these birds or plan to have birds shipped to me at this time. I have in the past shipped these birds (before the 1973 Endangered Species law became effective) and these containers were very adequate and no loss resulted.

(v) I have had to destroy 1 male Edwards because of a broken leg. We checked with the veterinarian and it was impossible to set. This was two years ago. Since then I have had no mortalities in birds to be covered by this permit.

7. I have no pending contracts or agreements pertaining to these birds.

8. (i) The activities include keeping and breeding of the endangered species listed in this application. I want to either sell or trade young birds I raise in captivity and to be able to obtain either by buying or trading for new birds from other breeders so that strong blood lines are kept going, and perhaps some day some of these birds can be restored to the wild from captive stock.

(ii) The activity will be carried out through proper routine care and maintenance of the birds involved so that through proper care, they will reproduce and help to increase the numbers of these dwindling species.

(iii) I don't need to restate the plight of these birds that are endangered, but it is my belief that through sound management of the captive strains of these birds they can at least keep extinction at bay in captivity, if not in the wild. I believe that I have the expertise and experience to propagate these birds as I have in the past and plan to indefinitely.

(iv) Any birds that are raised will either be paired up for breeding or distributed to other breeders interested in the captive propagation and preservation of these birds and considered qualified by State and Federal agencies, but I would also like to see these agencies granting permission and permits to the young people with the desire and love of these birds, not only to those with the expertise. Many of these young persons hold the key to the future and they can't learn if we don't let them. I for one will give all the advice needed to successfully breed any of these species—so long as they have the love and desire, that generally makes the difference between success and failure.

(v) Should the Impeyan pheasant (*Lophophorus impeyanus*) be put on the Endangered or Threatened list at a later date, I would like this permit to cover this bird as well even though at present it is not on the list or considered endangered or threatened.

Thank you.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512 1717 H Street NW., Washington, D.C.

GPO 895-042

17.22 Permit Application for Scientific Purposes.

(1) Snow leopard, *Panthera uncia*, one male, born Woodland Park Zoological Gardens, on May 2, 1975, to be sent to Marwell Zoological Park, England, for breeding purposes.

(2) Snow leopard was born in captivity at Woodland Park Zoological Gardens on May 2, 1975.

(3) Not applicable.

(4) The subject animal was born in captivity at Woodland Park Zoological Gardens, Seattle, Washington, U.S.A.

(5) Marwell Zoological Park is a large reputable zoo which has considerable success in breeding endangered species. The address is: Colden Common, Nr. Winchester, Hampshire, SO211JH, England.

6. (i) A copy of the enclosure plans where the snow leopards will be housed is enclosed. It has the considerable advantage which does not show from the plan, of being placed on a wooded slope with the woodland to the south of the enclosure, so that it is always shaded and secluded and does not become too hot even when it has temperatures as high as it did last year, of 90 degrees F. The inside enclosures are not open to the public and the dens are arranged to give complete seclusion to the inhabitants. The complex was in fact designed for snow leopards, although to date it has been occupied by European lynx who have bred regularly therein.

(ii) Marwell Zoological Park has bred the following felines since 1972: 11 Siberian tigers, 8 jaguars, 7 lynx, 12 leopards and 3 servals. In addition, they are presently involved in a comprehensive program for the breeding of cheetahs. They have a close connection with the Zoological Society of London and conduct many reciprocal breeding agreements with them. They have a qualified animal keeper staff and their curator, before coming there, was for six years a veterinary aide in the Animal Hospital of the Zoological Society of London. They have an extensive program of monitoring the health of all of their animals by routine visits of their own veterinary surgeon, and a complete laboratory monitoring of health by the local Ministry of Agriculture diagnostic laboratories.

(iii) Both Woodland Park Zoological Gardens and Marwell Zoological Park have a reputable history and intensive interest in the breeding and propogation of endangered species.

(iv) The animal will be shipped in a container that will comply with guidelines used by zoological parks and in a manner that is humane.

(v) They have had no mortalities in snow leopards.

7. Copy of breeding loan agreement is attached.

8. The sending of a snow leopard to Marwell Zoological Park will help the zoo to establish a breeding population.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street, NW, Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2-49-C07; please refer to this number when submitting comments. All relevant comments received on or before June 24, 1977 will be considered.

Dated: May 20, 1977.

SIGNATURE (In ink) [signature] | DATE 3-25-77

3-200
10/76

ATTACHMENT I—APPLICATION FOR PERMIT
SECTION 17.22(A)

(1) We seek a permit to cover 4 Scarlet-chested Parakeets (*Neophema splendida*); 1 male, 2¼ year of age; 1 female, 2¼ years; 2 females, about 4 weeks at this date. The activity sought to be authorized is the purchase of these birds in Ohio and transporting them back to Wisconsin.

(2) All birds were born in captivity.

(3) We have attempted unsuccessfully to locate these birds within our state of Wisconsin. We have since found the birds in question from a breeder in Ohio.

(4) The birds that we wish to be covered by the permit were bred in confinement by Dr. William K. Lindsay, 288 N. Virginia Lee Rd., Columbus, Ohio 43209.

(5) and (6) (i) The birds will be housed during winter months (Sept.–May) in a separate indoor flight measuring 3' x 7' x 8' long. A sufficient number of natural perches are always provided. The concrete floor is covered with cedar shavings which is changed as necessary. Temperature is maintained at 62–65° F. The flights are artificially illuminated by fluorescent lights. All birds are given every opportunity to propagate during this time (next boxes, nesting material and other pertinent stimulae).

During the summer months (May–Sept.), all birds are housed in outdoor aviaries (see Attachment II) measuring a minimum of 4' wide x 6' high x 8' long. A 6' high chain link fence protects the entire premises from intruders, animal and otherwise. Natural perches are again used. A dry, protective shelter (4' x 4' x 6') adjoins each flight for use at night and during severe weather. All flights are built on natural turf with wire netting buried underground around the perimeter to minimize rodent intrusion. Natural plantings are used where possible. Additionally, for further enhancement of our birds, we put a maximum effort into providing the highest quality and most complete diet at all times.

(ii) We presently maintain a very large group of exotic birds, all housed individually to reduce stress and increase potential for breeding. To further encourage breeding, all birds are put into outside aviaries during the summer, providing as natural of an environment as possible. I have been keeping and raising foreign birds for the past 13 years, breeding primarily Cockatiels and Lovebirds.

We put every conceivable effort into successfully maintaining and propagating all our birds, as can be attested to by our veterinarian, Dr. B. J. Roningen (see Attachment III) and Special Agent Dan Pooler, FWS from Oshkosh, WI, who has inspected our facilities.

(iii) We fully and sincerely intend to carry on a cooperative breeding program with the birds we seek to be covered by the permit. Additionally, we will maintain pertinent written data concerning all activities involving these birds.

(iv) The birds in question will be transported via automobile from Ohio to Wisconsin. While in transit, they will be kept in a small wire cage (approx. 20" x 12" x 12") with suitable perches, food and water. They will be covered and kept from extremes in temperature.

(v) We have had few mortalities that involved related birds—in particular, Lovebirds: one bird as a result of a crop tumor; surgery was attempted unsuccessfully by Dr. Roningen; another died of a ruptured uterus while attempting to breed. Finches have died for undetermined reasons, though senility was perhaps a contributing factor (6 years of age). In the event of any mortalities of our birds, post-mortems are performed by Dr. Roningen to attempt to find the causes of death, thus reducing the chances for further casualties.

(7) There is only a verbal agreement between us and Dr. Lindsay of Columbus, Ohio, from whom we are intending to purchase the 4 Scarlet-chested Parakeets. The purchase and subsequent transportation will take place immediately following the issuance of the necessary permits.

(8) (i) We wish to establish a successful captive breeding colony of the Scarlet-chested Parakeets in Wisconsin. As far as we know, there are no other birds of this species present or propagating in Wisconsin. By expanding their captive territory, we hope to increase the species' total population.

(ii) The birds in question have proven to be free and highly successful breeders in confinement, particularly in California. There seems to be no set season for breeding and, in fact, nest boxes must be removed frequently to avoid over-breeding!

The past, present and future success in captive breeding of these endangered birds may probably be the only means in which they may be saved from extinction. This has been proven not only by their very prolific nature in captivity, but also by the existence of a fair and increasing number of these birds already in confinement.

We have the sincere desire to participate in the enhancement and, indeed, the saving of this extremely lovely species of bird. We are and will continue to endeavor to continue to take any pains, expense and effort to successfully achieve this goal.

Documents and other information submitted in connection with this application are available for public inspection during normal business hours at the Service's office in Room 512, 1717 H Street NW., Washington, D.C.

Interested persons may comment on this application by submitting written data, views, or arguments, preferably in triplicate, to the Director (FWS/WPO), U.S. Fish and Wildlife Service, Washington, D.C. 20240. This application has been assigned File Number PRT 2–746–07; please refer to this number when submitting comments. All relevant comments received on or before June 24, 1977 will be considered.

Dated: May 20, 1977.

DONALD G. DONAHOO,

MIGRATORY GAME BIRD REGULATIONS

Public Hearing

Notice is hereby given that a public hearing will be held in accordance with Part 455 of the Departmental Manual (Hearings) to review proposed hunting regulations of migratory birds for which early (prior to October 1) seasons are set, as follows:

PUBLIC HEARING ON EARLY SEASON MIGRATORY BIRD HUNTING REGULATIONS

Date and time: June 21, 1977, at 9 a.m.

Place: Auditorium, General Services Building, 18th and F Streets, NW., Washington, D.C.

Purpose of hearing: This hearing is for the purpose of reviewing the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, rails, gallinules, and common snipe. Proposed hunting regulations for these species will be discussed plus regulations governing migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons in the Mississippi and Central Flyways; and special sea duck seasons in the Atlantic Flyway.

Persons wishing to participate in this public hearing should notify the Director (FWS/MBM), U.S. Fish and Wildlife Service, Department of the Interior, C Street between 18th and 19th Streets, NW., Washington, D.C. 20240, or call 202/343–8827. Statements from interested persons should be presented in writing in duplicate to the Hearing Officer at the meeting or forwarded to the U.S. Fish and Wildlife Service (FWS/MBM) at the above address prior to the meeting.

Minutes of the hearing will be available for purchase from a public stenographic services company.

Dated: May 18, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

[FR Doc.77–14813 Filed 5–24–77;8:45 am]

DEPARTMENT OF JUSTICE

UNITED STATES v. CORNING FIBERS, INC.

Proposed Consent Decree in Action To Enjoin Discharge of Water Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on May 5, 1977, a proposed consent decree in *United States v. Corning Fibers, Inc.*, was lodged with the District Court for the District of Vermont. The proposed decree would require Corning Fibers, Inc., to complete installation of a wastewater treatment facility by May 1, 1978, and to attain operational level with that wastewater treatment facility by June 1, 1978.

The Department of Justice will receive until June 24, 1977, written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States v. Corning Fibers, Inc.*, D.J. Ref. 90–5–1–1–699.

The proposed consent decree may be examined at the office of the United States Attorney, P.O. Box 10, Rutland, Vermont, at the Region I Office of the Environmental Protection Agency, Enforcement Division, John F. Kennedy Federal Building, Boston, Massachusetts 02203, and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice Building, Ninth Street and Pennsylvania Avenue, Northwest, Washington, D.C. 20530. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

PETER R. TAFT,
Assistant Attorney General, Land and Natural Resources Division.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

MEETING

Notice is hereby given, pursuant to Pub. L. 92–463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, June 10 and on Saturday, June 11, 1977. Friday will be set aside for site visits in the Appalachian states (Tennessee, Southern Ohio, Kentucky, Georgia, Alabama and Mississippi) and will start at 8:30 a.m. and end at 5:30 p.m. The Saturday meeting will be held in Atlanta, Georgia (meeting room and place to be announced at a later date) from 9 a.m. until 2 p.m.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The main purpose of the two-day activities is to study rural issues in compensatory education in the various Appalachian States and to examine the role of the Appalachian Regional Commission.

Because of limited space, all persons wishing to attend should call for reservations by June 3, 1977, area code 202–382–6945.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children, located at 425 Thirteenth Street NW., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C., on May 23, 1977.

ROBERTA LOVENHEIM,
Executive Director.

NATIONAL SCIENCE FOUNDATION

INTERNATIONAL DECADE OF OCEAN EXPLORATION PROPOSAL REVIEW PANEL

Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

NAME: Proposal Review Panel of the Office for the International Decade of Ocean Exploration, Ad Hoc Subpanel for the BIOTRANS Project.

DATE AND TIME: June 10, 1977; 9 a.m. to 5 p.m.

PLACE: National Science Foundation, 1800 G Street NW., Washington, D.C 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Mr. Feenan D. Jennings, Head, Office for the International Decade of Ocean Exploration, Room 605, National Science Foundation, Washington, D.C. 20550, telephone 202–632–7356.

PURPOSE OF PANEL: To provide the IDOE Proposal Review Panel members with additional expertise in the review and evaluation of proposals relating to oceanographic research related to Biological Transport (BIOTRANS).

AGENDA: Detailed review and evaluation of proposals for support of the BIO TRANS Project.

REASON FOR CLOSING: The proposals being reviewed included information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

MAY 20, 1977.

[FR Doc.77–14904 Filed 5–24–77;8:45 am]

SOCIOLOGY ADVISORY PANEL

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

NAME: Advisory Panel for Sociology.

DATE AND TIME: June 10 and 11, 1977; 9 a.m. each day.

PLACE: Room 628, National Science Foundation, 1800 G Street NW., Washington, D.C.

TYPE OF MEETING: Closed.

CONTACT PERSON:

Mr. Garry Wallace, Assistant Program Director for Sociology, Room 312, National Science Foundation, Washington, D.C. 20550, telephone 202–632–4204.

PURPOSE OF PANEL: To provide advice and recommendations concerning support research in sociology.

AGENDA, CLOSED SESSION: To review and evaluate research proposals and projects as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information: financial data, such as salaries: and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee Management Officer.

ROBERT L. OSWALD,
Secretary.

[FR Doc.77-14931 Filed 5-24-77;8:45 am]

[Rule 19; Ex Parte No. 241; Exemption No. 139]

BURLINGTON NORTHERN INC.

Exemption Under Mandatory Car Service Rules

It appearing that the railroads named herein own numerous 40-ft., narrow door, plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.–R.E.R. No. 403, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44-ft. 6 in. or less, equipped with doors less than 9 ft. wide; and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

BURLINGTON NORTHERN INC.

Reporting Marks: BN–CBQ–GN–NP–SPS

Effective 11:30 a.m., May 13, 1977, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., May 13, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[Notice No. 65]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 20, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 78118 (Sub-No. 33TA), filed April 22, 1977. Applicant: W. H. JONES, INC., 35 Witmer Road, Lancaster, Pa. 17602. Applicant's representative: Christian V. Graf, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from the plantsite and shipping facilities of Container Corporation of America in Hanover Township, Lehigh County, Pa., to points in that portion of New Jersey on and north of U.S. Highway 40. Restricted to traffic originating at and destined to the above origin and destination territory, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Container Corporation of America, Philadelphia, Pa. Send protests to: Robert P. Amerine, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 278 Federal Building, P.O. Box 869, Harrisburg, Pa. 17108.

No. MC 107460 (Sub-No. 67TA), filed April 26, 1977. Applicant: WILLIAM Z. GETZ, INC., 3055 Yellow Goose Road, Lancaster, Pa. 17601. Applicant's representative: Donald D. Shipley (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter*, from the plantsite of R. R. Donnelley Corporation located at or near Crawfordsville, Ind., to the plantsite of Random House, Inc., located at or near Westminster, Md., under a continuing contract or contracts with R. R. Donnnelley Corporation, for 180 days. Supporting shipper(s): R. R. Donnelley Corporation, 2223 King Drive, Chicago, Ill. 60616. Send protests to: Robert P. Amerine, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 278 Federal Building, P.O. Box 869, Harrisburg, Pa. 17108.

No. MC 108393 (Sub-No. 119TA), filed May 2, 1977. Applicant: SIGNAL DELIVERY SERVICE, INC., 201 E. Ogden Avenue, Hinsdale, Ill. 60521. Applicant's representative: Thomas B. Hill (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Parts of electrical and gas appliances, equipment, materials and supplies* used in the manufacture, distribution and repair of electrical and gas appliances, between Lowell, Mich. and Clyde, Ohio, under continuing contract or contracts with Whirlpool Corporation, for 180 days. Supporting shipper: Whirlpool Corporation, Carl R. Anderson, Director of Corporate Traffic, Administrative Center, Benton Harbor, Mich. 49022. Send protests to: Transportation Assistant Patricia A. Roscoe, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 S. Dearborn Street, Room 1386, Chicago, Ill. 60604.

No. MC 110525 (Sub-No. 1191TA), filed April 22, 1977. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520

East Lancaster Avenue, P.O. Box 200, Downingtown, Pa. 19335. Applicant's representative: Thomas J. O'Brien (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Phenols*, in bulk, in tank vehicles, from Rotterdam Junction, N.Y., to points of entry on the International Boundary between the United States and Canada located on the St. Lawrence River at Alexandria Bay, N.Y., and Rooseveltown, N.Y., for furtherance of Belleville, Ontario, Canada, for 180 days. Supporting shipper(s): Schenectady Chemicals, Inc., Congress Street, Schenectady, N.Y. 12301. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch Street, Room 3238, Philadelphia, Pa. 19106.

No. MC 111812 (Sub-No. 533TA), filed April 26, 1977. Applicant: MIDWEST COAST TRANSPORT, INC., 900 West Delaware, P.O. Box 1233, Sioux Falls, S. Dak. 57101. Applicant's representative: David Peterson (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Confectionery and confectionery products*, except in bulk, in vehicles equipped with mechanical refrigeration from the storage facilities utilized by M&M/MARS, located at or near Hampden Township, Cumberland County, Pa., to Arizona, California, Colorado, Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oregon, South Dakota, Utah, Washington and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): M&M/MARS, High Street, Hackettstown, N.J. 07840, Daniel B. Craver, Traffic Manager. Send protests to: J. L. Hammond, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Room 369, Federal Building, Pierre, S. Dak. 57501.

No. MC 117940 (Sub-No. 219TA), filed April 26, 1977. Applicant: NATIONWIDE CARRIERS, INC., P.O. Box 104, Maple Plain, Minn. 55359. Applicant's representative: Allan L. Timmerman (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by retail and wholesale department and hardware stores (except foodstuffs, articles of unusual value, commodities in bulk, and household goods as defined by the Commission) (1) from the Los Angeles, California Harbor Commercial Zone to Brookings, S. Dak. and Minneapolis, Minn., (2) from the facilities of the Port of Tacoma, Wash. and the Port of Seattle, Wash., to Brookings and Sioux Falls, S. Dak., and to points in the Minneapolis-St. Paul, Minnesota Commercial Zone, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): There are approximately four (4) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Mrs. Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Court House, 110 S. 4th St., Minneapolis, Minn. 55401.

No. MC 119789 (Sub-No. 345TA), filed April 25, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative: James K. Newbold, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Los Angeles, Calif., to points in New York—Representative destinations New York City, Westbury, Mt. Kisco and Waterford, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Ward Foods Company, Inc., Gold Ring Meat Division, 3461 E. Vernon Avenue, Los Angeles, Calif. 90058. Send protests to: Opal M. Jones, Transportation Assistant, Interstate Commerce Commission, 1100 Commerce Street, Room 13C12, Dallas, Tex. 75242.

No. MC 139520 (Sub-No. 2TA) (Correction), filed March 25, 1977, published in the FEDERAL REGISTER issue of April 13, 1977, and republished this issue. Applicant: DEAN MCCARY, doing business as FLYING "S" FEED EXPRESS, Route 4, Box 84, Clovis, N. Mex. 88101. Applicant's representative: James E. Sneed, P.O. Box 2228, Santa Fe, N. Mex 87501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transportating: (a) *Livestock feed*, between points in California, on the one hand, and, on the other, points in Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas and California, (b) *livestock feed ingredients*, between points in the states of Arizona, Colorado, Kansas, New Mexico, Oklahoma, Texas and California, under a continuing contract with Wilbur-Ellis Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Wilbur-Ellis Company, P.O. Box 427, Clovis, N. Mex. Send protests to: District Supervisor, John H. Kirkemo, Interstate Commerce Commission, Bureau of Operations, 1106 Federal Office Bldg., 517 Gold Ave., S.W., Albuquerque, N. Mex. 87101. The purpose of this republication is to include part (b) to the requested authority.

No. MC 139824 (Sub-No. 3TA), filed April 27, 1977. Applicant: BITTER-SWEET ENTERPRISES, INC., Rural Route 1, Manhatten, Kans. 66502. Applicant's representative: Clyde N. Christey, 514 Capitol Federal Building, Topeka, Kans. 66603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Complete buildings, except prefabricated* building when transported in wheeled undercarriages equipped with hitchball connectors, between Marshall County, Kans., on the one hand, and points in Nebraska, on the other hand, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Meyer Lumber and Hardware, Inc., Box 8, Summerfield, Kans. 66541. Send protests to: Thomas P. O'Hara, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 147 Federal Building and U.S. Courthouse, 444 S. E. Quincy, Topeka, Kans. 66683.

No. MC 143013 (Sub-No. 1TA), (Partial correction), filed March 21, 1977, published in the FEDERAL REGISTER issue of April 20, 1977, republished as a partial correction this issue. Applicant: ROGER CHILTON, doing business as CHILTON TRUCKING COMPANY P.O. Box 841, Beaumont, Tex. 77704. Applicant's representative: John W. Carlisle, 4100 Greenbriar, Suite 215, Houston, Tex. 77098. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Engine or motor parts and equipment and parts thereof*, used on ships and ocean going vessels for the operation, maintenance and safety of such ships and vessels; (5) between the following airport: Bates Field, Mobile, Ala.; Ferguson Regional Airport, Pensacola, Fla.; Clearwater Airport and Albert Whitted Airport, St. Peterburg, Fla.; Tampa International Airport, Peter O. Knoght Airport and Vandenberg Airport, Tampa, Fla.; Page Field, Ft. Myers, Fla.; Executive Airport and Hollywood International Airport, Ft. Lauderdale, Fla.; Key West International Airport, Key West, Fla.; Miami International Airport, Miami, Fla.; Palm Beach International Airport, West Palm Beach, Fla.; Harry W. Nelson Airport, Ft. Pierce, Fla.; Daytona Beach Regional Airport, Daytona Beach, Fla.; St. Augustine Municipal Airport, St. Augustine Fla.; Golden Isles Municipal Airport and Malcom McKinnon Airport, Brunswich, Ga.; Savannah Municipal Airport.

No. MC 143118 (Sub-No. 1TA) (Correction) filed April 8, 1977, published in the FEDERAL REGISTER issue of April 28, 1977, republished as corrected this issue. Applicant: ALFRED SWINFORD, doing business as SWINFORD TRUCKING, Route 8, Hendron Road, Paducah, Ky. 42001. Applicant's representative: H. S. Melton, Jr., P.O. Box 1407, Paducah, Ky. 42001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wire coat hangers*, from the plantsite of Laidlaw Corporation, Metropolis, Ill., to Miami, Fla., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting

shipper: Laidlaw Corporation, 1212 5th St., Metropolis, Ill. 62960. Send protests to: Floyd A. Johnson, District Supervisor, Interstate Commerce Commission, 100 N. Main Bldg., 100 B. Main St., Suite 2006, Memphis, Tenn. 38103. The purpose of this republication is to correct the applicant's name.

No. MC 143161 (Sub-No. 1TA), filed April 26, 1977. Applicant: BEVERAGE TRANSPORT, INC., Box 13515, 1210 Bluff Road, Columbia, S.C. 29201. Applicant's representative: Harry S. Dent, Drawer 175, West Columbia, S.C. 29169. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Non-alcoholic beverages and soft drinks and materials, supplies, and equipment* used in the manufacture, mixing, distribution, and sale of non-alcoholic beverages and soft drinks, between Cheraw, S.C., on the one hand, and, on the other, North Carolina; Georgia; Virginia; West Virginia; Kentucky; Gainesville and Jacksonville, Fla.; Johnson City and Knoxville, Tenn.; Philadelphia and Allentown, Pa.; Mt. Vernon, N.Y.; Cheverly, Forestville, Salisbury and Silver Spring, Md.; Teterboro, Caldwell, Kearny, and Brunswick, N.J.; and Washington, D.C., under a continuing contract, or contracts, with Carolina Canners, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Carolina Canners, Inc., P.O. Box 965, Cheraw, S.C. 29520. Send protests to: E. E. Strotheid, District Supervisor, Interstate Commerce Commission, Room 302, 1400 Building, 1400 Pickens St., Columbia, S.C. 29201.

[Notice No. 66]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

MAY 20, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmited.

MOTOR CARRIERS OF PROPERTY

No. MC 35807 (Sub-No. 74TA), filed May 13, 1977. Applicant: WELLS FARGO ARMORED SERVICE CORPORATION, P.O. Box 4313, 210 Baker St. NW., Atlanta, Ga. 30302. Applicant's representative: Steven J. Thatcher (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting:

Coin, currency and securities, between Denver, Colo., and all points and places in Jewell, Mitchell, Lincoln, Ellsworth, Rice, Reno, Kingman, and Harper Counties, Kans., and all points and places in Kansas west thereof, under a continuing contract or contracts with Federal Reserve Bank of Kansas City, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Federal Reserve Bank of Kansas City, 925 Grand, Kansas City, Mo. 64198. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St. NW., Rm. 546, Atlanta, Ga. 30309.

No. MC 40494 (Sub-No. 12TA), filed April 18, 1977. Applicant: HILBURN TRUCKING, INC., Sixth and Locust, Wellsville, Kans. 66092. Applicant's representative: S. Harrison Kahn, Suite 733 Investment Building, Washington, D.C. 20005. Supporting shipper(s): Redken Laboratories, Inc., 14721 Califa Street, Van Nuys, Calif. 91411. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Court House, 801 Broadway, Nashville, Tenn. 37203.

No. MC 141804 (Sub-No. 58TA), filed May 11, 1977. Applicant: WESTERN EXPRESS, division of Interstate Rental, Inc., P.O. Box 422, 847 Springfield Highway, Goodlettsville, Tenn. 37072. Applicant's representative: Frederick J. Coffman, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic beverages* (except commodities in bulk), from Frankfort, Louisville, Owensboro, and Lawrenceburg, Ky.; Cincinnati, Ohio; Lynchburg, Tenn.; Detroit and Allen Park, Mich.; Lawrenceburg, Ind.; St. Louis, Mo.; Dundalk and Relay, Md.; Linfield and Philadelphia, Pa.; Hammondsport, N.Y.; Edison and Lawrenceville, N.J.; Plainfield and Chicago, Ill., to points in California, Arizona, and Nevada, for 180 days. Supporting shipper(s): There are approximately seven (7) statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: District Supervisor Joe J. Tate, Bureau of Operations, Interstate Commerce Commission, Suite A-422, U.S. Court House, 801 Broadway, Nashville, Tenn. 37203.

No. MC 142177 (Sub-No. 2TA), filed April 26, 1977. Applicant: B.W.C.S., INC., 14 Park Avenue, Salem, N.H. 03079. Applicant's representative: Frank J. Weiner, 15 Court Square, Boston, Mass. 02108. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Nonnegotiable checks, drafts, deposit slips, and documents*, from Amherst, N.H., to Brookline and Boston, Mass., and *data processing papers, cancelled checks, and audit and accounting media*, from Brookline and Boston, Mass., to Amherst, N.H., restricted against the transportation of any package or article weighing more than 70 pounds or exceeding 108 inches in length and girth combined and each package or article shall be considered as a separate and distinct shipment, and restricted against transportation of packages or articles weighing in the aggregate more than 150 pounds from one consignor at one location to one consignee at one location on any one day, for 180 days. Supporting shipper: Glenn W. Vorce, Vice President and Treasurer, Amherst Bank & Trust Company, Junction 101A and 122, Amherst, N.H. 03031. Send Protests to: District Supervisor Ross J. Seymour, Bureau of Operations, Interstate Commerce Commission, 415 Federal Building, 55 Pleasant Street, Concord, N.H. 03301.

No. MC 142353 (Sub-No. 2TA), filed May 11, 1977. Applicant: ADAMS SAND CO., INC., Highway 90, General Delivery, Mossy Head, Fla. 32434. Applicant's representative: Edward L. Adams (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer materials*, in bulk, in side-dump trailers. From Cottondale and Pace, Fla., to points in Alabama and Georgia on and south of U.S. Highway 80 and west of Interstate 75, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Kerr-McGee Chemical Corp., Kerr-McGee Center, Oklahoma City, Okla. 73125. Send protests to: District Supervisor G. H. Fauss, Jr., Bureau of Operations, Interstate Commerce Commission, Box 35008, 400 West Bay Street, Jacksonville, Fla. 32202.

No. MC 142550 (Sub 1TA), filed April 11, 1977. Applicant: BERT E. JESSUP TRANSPORTATION, INC., 3387 Wrightwood Drive, Studio City, Calif. 91604. Applicant's representative: Bert E. Jessup (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Ice Cream*, from Seattle, Wash., to Los Angeles, Calif., under a continuing contract or contracts with Adohr Farms, for 180 days. Supporting shipper: Adohr Farms 4002 W. Westminster Avenue, Santa Ana, Calif. Send protests to: Irene Carolos, Interstate Commerce Commission, Room 1321, Federal Building, 300 North Los Angeles Street, Los Angeles, Calif. 90012.

No. MC 142941 (Sub-No. 4TA), filed May 13, 1977. Applicant: SCAREOROUGH TRUCK LINES, 1313 N. 25th Avenue, Phoenix, Ariz. 85009. Applicant's representative: Lewis P. Ames, 10th Floor, 111 West Monroe, Phoenix, Ariz. 85003. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs, prepared and frozen*, NOI, from the plant site and storage facilities of Kitchens of Sara Lee, located at or near Deerfield, Ill., and New Hampton, Iowa, to points in Arizona, California, New Mexico, and Nevada, for 180 days. Applicant has also filed an underlying ETA

seeking up to 90 days of operating authority. Supporting shipper(s): Kitchens of Sara Lee, 500 Waukeegan Road, Deerfield, Ill. 60015. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 3427, Federal Bldg., 230 N. First Avenue, Phoenix, Ariz. 85025.

No. MC 143155TA, filed April 13, 1977. Applicant: RICHARD'S HAULING, 508 Clinton Avenue, Wyckoff, N.J. 07481. Applicant's representative: Mr. Ralph August, 222 Greenridge Road, Franklin Lakes, N.J. 07417. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cut and uncut rolls and cartons of fabrics*, between Fairview, N.J., and Lawrenceville, Ga., under a continuing contract with August Fabrics, Inc., for 180 days. Supporting shipper: August Fabrics, Inc., 37 Industrial Avenue, Fairview, N.J. 07022. Send protests to: District Supervisor, Joel Morrows, Interstate Commerce Commission, 9 Clinton Street, Newark, N.J. 07102.

No. MC 143179TA, filed April 19, 1977. Applicant: CNM CONTRACT CARRIERS, INC., P.O. Box 1017, Omaha, Nebr. 68101. Applicant's representative: Marshall D. Becker, Suite 530, Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Polyurethane foam*, (1) from Middleton, Wis., to points in Iowa (except Council Bluffs), Illinois, Minnesota, Michigan, Missouri, and Indiana; and (2) between Council Bluffs, Iowa, and Middleton, Wis., under a continuing contract, or contracts, with Future Foam, Inc., for 180 days. Supporting shipper(s): Foster L. Kent, Administration Manager/Sales and Marketing, Future Foam, Inc., 400 North 10th Street, Council Bluffs, Iowa 51501. Send protests to: Carrol Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 143180TA, filed April 20, 1977. Applicant: B & F DISTRIBUTING CO., 325 N. Lee Avenue, Idaho Falls, Idaho 83401. Applicant's representative: William D. Faler, P.O. Box 129, Idaho Falls, Idaho 83401. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Beer and wine*, from Los Angeles, Fairfield, Oakland, Santa Rosa, Napa, Modesto, San Jose, all in California, to Pocatello, Soda Springs, Idaho Falls, and Salmon, all in Idaho, under a continuing contract or contracts with K & S Distributors, for 180 days. Supporting shipper(s): K & S Distributors, P.O. Box 852, Salmon, Idaho 83467. Send protests to: Barney L. Hardin, District Supervisor, Interstate Commerce Commission, 550 W. Fort St., Box 07, Boise, Idaho 83724.

No. MC 143203TA, filed April 27, 1977. Applicant: UNITED TRUCKING CO., P.O. Box 1158, Miles City, Mont. 59301. Applicant's representative, Joe Gerbase, 100 Transwestern Building, 404 North 31st St., Billings, Mont. 59101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Beer and malt beverages and empty containers*, between Olympia, Wash., on the one hand, and, on the other, Miles City, Mont., under a continuing contract or contracts with Olympia Brewing Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): R. H. Rutledge, Traffic Manager, Olympia Brewing Company, P.O. Box 947, Olympia, Wash. 98501. Send protests to: District Supervisor Paul J. Labana, Interstate Commerce Commission, 2602 First Avenue North, Billings, Mont. 59101.

No. MC 143210 (Sub-No. 1TA), filed May 12, 1977. Applicant: W. C. HALL, P.O. Box 102, Callao, Va. 22435. Applicant's representative: Calvin F. Major, 200 Grace Street, Richmond, Va. 23220. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural limestone*, in bulk, from Texas, Md., to Heathsville and Village, Va., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Alliance Fertilizer Corp., P.O. Box 56, Heathsville, Va. 22473; Village Seed Service, Village, Va. Send protests to: District Supervisor Paul Collins, Interstate Commerce Commission, Room 10-502, Federal Building, 400 North Eighth Street, Richmond, Va. 23240.

No. MC 143230 (Sub-No. 1TA), filed May 5, 1977. Applicant: LUCK TRUCKING, INC., R.R. 1, Box 190, Wolcott, Ind. 47995. Applicant's representative: Walter F. Jones, Jr., 601 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Anhydrous ammonia*, from Huntington, Ind., to Ohio and Michigan; (2) *Liquid fertilizer*, from Yoder, Ind., to Ohio and Michigan; and from Kentland, Indiana, to Illinois for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Amoco Oil Company, 200 East Randolph Drive, Chicago, Ill. 60601. Send protests to: J. H. Gray, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 343 West Wayne Street, Suite 113, Fort Wayne, Ind. 46802.

PASSENGER APPLICATIONS

No. MC 1515 (Sub-No. 227TA), filed May 13, 1977. Applicant: GREYHOUND LINES, INC., Greyhound Tower, Suite 1602, Phoenix, Ariz. 85077. Applicant's representative: W. L. McCracken (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, express, and newspapers* in regular route service and *passengers and their baggage in charter service*. Operate from, to, or between: (A) Regular route: *Passengers and their baggage and express and newspapers* in the same vehicle with passengers, between Chico, Calif., and the junction of California Highway 191 and California Highway 70, serving all intermediate points: from Chicago over Skyway Road to Paradise, thence over California Highway 191 to junction California Highway 70 and return over the same route; (B) Irregular route: *Passengers and their baggage*, in one-way and round-trip charter operations: from points in Butte County, Calif., to all points in the United States (including Alaska but excluding Hawaii). Applicant seeks the requested authority to establish direct service to the City of Paradise, Calif. Passengers and bus express shippers from this community must now travel by other means approximately 20 miles to avail themselves of existing Greyhound service, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Passenger Public. Send protests to: Andrew V. Baylor, District Supervisor, Interstate Commerce Commission, Room 3427, Federal Bldg., 230 N. First Avenue, Phoenix, Ariz. 85025.

No. MC 143162 (Sub-No. 1TA), filed April 28, 1977. Applicant: KLATT TRAVEL, INC., 651 Main Avenue, P.O. Box 1161, Durango, Colo. 81301. Applicant's representative: William F. Schenkein, Suite 1600, 718 Seventeenth Street, Denver, Colo. 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, originating on or destined to Frontier Airlines flights, and to be transported in vehicles limited in capacity to no more than 12 passengers and baggage; between Durango, Colo., and Farmington, New Mexico Airport over U.S. Highway 550, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Frontier Airlines, 8250 Smith Road, Denver, Colo. 80207; Durango Chamber of Commerce, 2301 North Main, P.O. Box 1311, Durango, Colo. 81301. Send protests to: Herbert C. Ruoff, District Supervisor, Interstate Commerce Commission, 492 U.S. Customs House, 721 19th Street, Denver, Colo. 80202.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Notice No. AB 142]

NEW ORLEANS & LOWER COAST RAILROAD CO.

Abandonment of Line of Railroad Known as "South End" Between Port Sulphur and Empire in Plaquemine Parish, Louisiana

MAY 17, 1977.

The Interstate Commerce Commission hereby gives notice that: 1. The Commission's Section of Energy and Environment has prepared an environmental

threshold assessment survey in the above-entitled proceeding in which it was concluded that the proceeding does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, et seq. 2. A notice setting forth this conclusion was served April 20, 1977, and no substantive comments in opposition, of an environmental nature, have been received by the Commission in response to said notice. 3. This proceeding is now ready for further disposition within the Office of Hearings or the Office of Proceedings as appropriate.

ROBERT L. OSWALD,
Secretary.

[Amdt. No. 2 to I.C.C. Order No. 26 Under Service Order No. 1252]

Rerouting of Traffic

GREEN MOUNTAIN RAILROAD CORP.

Upon further consideration of I.C.C. Order No. 26, (Green Mountain Railroad Corporation) and good cause appearing therefor:

It is ordered, That:

I.C.C. Order No. 26 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., July 15, 1977, unless otherwise modified, changed or suspended.

It is further ordered, That this amendment shall become effective at 11:59 p.m., May 15, 1977, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., May 13, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: 9:30 a.m., Thursday, May 26, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Open Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

General—1—Amendment of Part 91 of the Commission's Rules to require type acceptance for transmitters used at radiolocation stations (Docket No. 20547).

General—2—Photographs on Radio Operator Certificates.

Safety and Special Radio Services—1—Application of Western Information Network Association (WIN) for Review of Bureau action denying WIN's petition for waiver of Section 1.932 of the Rules and reinstatement of its lapsed authorizations for private microwave facilities to operate a closed circuit educational television system in the 6575-6875 and 12,200-12,700 MHz frequency bands.

Safety and Special Radio Services—2—Notice of Proposed Rule Making relating to amendment of Part 83 to delete the requirement that voluntarily equipped ship stations be provided with a copy of Part 83 of the rules, and to require manufacturers to supply an instructional sheet with the radio equipment package.

Common Carrier—1—A Motion for Leave to File Comments filed by the Independent Data Communications Manufacturers Association, Inc. to supplement its petition for reconsideration of the Final Decision and Order in Docket No. 20288 (DDS), FCC 77-35 (released January 17, 1977).

Common Carrier—2—RCA Global Communications, Inc. (RCA Globcom) Request for Stay of Commission Final Decision and Order in Docket No. 20452, Interconnection Facilities Provided to the International Record Carriers, FCC 77-176, adopted March 8, 1977, released March 23, 1977.

Cable Television—1—Joint petition requesting issuance of order to show cause (CSC-167) filed by Station WPSD-TV (NBC, Channel 6), Paducah, Kentucky, inter alia, directed against Jackson Cable TV, Jackson, Missouri.

Renewal—1—Application (BRTT-775) of Gilbert Nathanson for renewal of license of TV translator K73AD, Palm Springs and Desert Hot Springs, California.

Special—1—Reconsideration of the July 20, 1976 Rate Integration Order, 61 FCC 2d 380 (1976).

Special—2—Creation of Joint Board for the purpose of determining the Separations methodologies applicable to Alaska and Hawaii.

Special—3—Creation of Joint Board for the purpose of prescribing the separations methodologies applicable to Puerto Rico and Virgin Islands.

Special—4—Carrier Agreement setting forth a proposal to implement MTS rate integration for Puerto Rico and Virgin Islands.

Special—5—Petitions to Reject or Suspend and Investigate tariff changes contained in Graphnet Systems, Inc. Transmittal No. 28.

Special—6—Memorandum Opinion and Notice of Proposed Rule Making concerning uniform settlement rates on parallel international communications routes.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public, Information Officer, telephone number 202-632-7260.

Issued: May 19, 1977.

[S-484-77 Filed 5-20-77;3:46 pm]

2

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: Follows scheduled open meeting Thursday, May 26, 1977.

PLACE: Room 856, 1919 M Street NW., Washington, D.C.

STATUS: Closed Commission Meeting.

MATTERS TO BE CONSIDERED:

Agenda, Item No., and Subject

Hearing—1—Petition to Add Disqualification Issue in the Norfolk, Virginia WTAR-TV comparative renewal proceeding (Docket Nos. 18791-2).

Hearing—2—Request by WNIA for extension of silence authority pendente lite in the Rochester and Cheekowaga, New York, standard broadcast renewal proceedings (Docket Nos. 20791-2).

Complaints and Compliance—1—Field investigation into the operation of Station WAEO-TV, Rhinelander, Wisconsin.

Complaints and Compliance—2—Field investigation into the operation of Station WDRK(FM), Greenville, Ohio.

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202-632-7260.

Issued: May 19, 1977.

[S-485-77 Filed 5-20-77;3:46 pm]

3

AGENCY HOLDING THE MEETING: Federal Communications Commission.

TIME AND DATE: Follows 2 p.m. Oral Argument, Thursday, May 26, 1977.

PLACE: Room 814, 1919 M Street NW., Washington, D.C.

STATUS: Closed Commission Meeting.

MATTER TO BE CONSIDERED:

Instructions to the staff following oral argument on the exceptions to the Initial Decision in the WLLE(AM), Raleigh, North Carolina, proceeding (Docket No. 19908).

CONTACT PERSON FOR MORE INFORMATION:

Samuel M. Sharkey, FCC Public Information Officer, telephone number 202-632-7260.

Issued: May 19, 1977.

[S-486-77 Filed 5-20-77;3:46 pm]

4

AGENCY HOLDING THE MEETING: Federal Trade Commission.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: May 19, 1977, page 25827.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: 10 a.m., Wednesday, May 25, 1977.

CHANGES IN THE MEETING: The meeting is now scheduled for Wednesday, June 1, 1977.

[S-483-77 Filed 5-20-77;2:28 pm]

5

AGENCY HOLDING THE MEETING: National Mediation Board.

TIME AND DATE: 2 p.m.; Wednesday, June 1, 1977.

PLACE: Board Hearing Room, 8th Floor, 1425 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

(1) Amendment to NMB fee schedule for Freedom of Information Act records searches.

(2) Findings Upon Investigation in NMB Case No. R-4582, Frontier Airlines, Inc.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Rowland K. Quinn, Jr., Executive Secretary; Tel. 202-523-5920.

(Date of Notice: May 23, 1977.)

PART II

ENVIRONMENTAL PROTECTION AGENCY

MOTOR VEHICLES

Emission Control System Performance Warranty Regulations—Short Test Establishment

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 85]

[FRL 689-6]

MOTOR VEHICLES

Emission Control System Performance Warranty Regulations—Short Test Establishment

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: Section 207(b) of the Clean Air Act, 42 U.S.C. 1857f-5a, deals with the periodic inspection of motor vehicles to determine whether they comply in actual use with applicable air pollution emission standards, and with the remedy of any deficiencies identified in such inspections. Two separate rulemakings are required to fully implement Section 207 (b): (a) The establishment by regulation of testing methods and procedures for ascertaining whether a vehicle complies with the emission standard, and (b) the establishment by regulation of a warranty by which the owner of a vehicle that fails to demonstrate in such a test that it complies with emission standards will have his vehicle repaired without cost by its manufacturer if the owner has properly operated and maintained his vehicle.

This Notice of Proposed Rulemaking deals with the first of these matters, i.e., the establishment of testing methods and procedures for ascertaining whether a vehicle complies with emission standards. Regulations dealing with the warranty for cars failing such a test are being proposed today as Subpart V of Part 85 of Title 40 of the Code of Federal Regulations.

DATES: All relevant material received on or before August 23, 1977, will be considered.

Final regulations, modified as the Administrator deems appropriate after consideration of comments, will be promulgated as soon as practicable after such consideration and will be applicable to model year 1979 and later light-duty vehicles and light-duty trucks.

ADDRESS: Interested persons may participate in this rulemaking by submitting written comments to the Administrator, Environmental Protection Agency, Attention: Office of Mobile Source Air Pollution Control (AW-455), 401 M Street SW., Washington, D.C. 20460. Ten copies are requested but not required.

FOR FURTHER INFORMATION CONTACT:

Paul Lapsley, Regulatory Management Staff, Office of Mobile Source Air Pollution Control, Environmental Protection Agency, Washington, D.C. 20460 at 202-755-0596.

SUPPLEMENTARY INFORMATION:

Statutory Requirements and Purpose

The statutory requirement for a "short test" capable of being correlated with the Federal Test Procedure is stated in Section 207(b) of the Clean Air Act:

> If the Administrator determines that (i) there are available testing methods and procedures to ascertain whether, when in actual use throughout its useful life (as determined under section 202(d)), each vehicle and engine to which regulations under section 202 apply complies with the emmission standards of such regulations, (ii) such methods and procedures are in accordance with good engineering practices, and (iii) such methods and procedures are reasonably capable of being correlated with tests conducted under section 206(a)(1), then—
>
> (1) he shall establish such methods and procedures by regulation, • • •

The requirement that the 207(b) test (hereinafter called a short test) reasonably correlate with the Federal Test Procedure (FTP) conducted under section 206(a)(1) has proved to be a difficult and controversial task. A short test must be performed in a short time on a fully warmed up vehicle, is limited at best to a very few vehicle speed/load conditions, and will be performed under a wide range of environmental conditions (i.e., temperature, humidity, human factors and instrument factors which are either uncontrollable or under limited control). Conversely, the FTP is performed with a cold start, includes a very large number of vehicle speed and load conditions simulating a typical stop-and-go urban commutation, and is performed under closely controlled laboratory environmental conditions (temperature and humidity are rigidly controlled and test personnel are under engineering quality control supervision).

The identification of testing methods and procedures and the determination that these methods and procedures are in accordance with good engineering practice and are reasonably capable of being correlated with tests conducted under section 206(a)(1) has involved the agency in an extensive testing program in which the short tests (plus the FTP) were administered to each vehicle in the following fleets:

a. *The Experimental Catalyst Fleet.* This fleet consisted of approximately fifty 1973 model year automobiles which had been fitted with catalysts and secondary air injection.

b. *The 1974 Model Year Fleet.* This fleet consisted of approximately one hundred and fifty privately owned 1974 model year automobiles and represented non-catalyst 1975 technology.

c. *The Defects Test Fleet.* This fleet was comprised of five catalyst-equipped cars. The vehicles were first set to the manufacturers' specifications and then a series of defects were introduced and the subsequent effect on emissions recorded.

d. *300-Car Test Fleet.* Approximately one hundred 1975 model year privately owned production vehicles were selected in each of three cities: Chicago, Houston and Phoenix.

In addition, EPA has another program planned to generate additional data on correlatability:

e. *State/EPA Pilot Project.* Approximately 2400, 1975/76 model year light-duty vehicles will be tested in Portland, Oregon by the FTP and the proposed short tests. Approximately 86 engine-vehicle groups will be represented in the sample.

Finally, EPA is evaluating commercially available test equipment for measuring hydrocarbons (HC), carbon monoxide (CO) and oxides of nitrogen (NO_x) in terms of accuracy, repeatability, response time and deficiencies in order to provide reports on which is acceptable.

The Proposed Regulations

On the basis of the data which have been collected from light-duty vehicles in the four test fleets described above, the Agency proposes that all of the following five tests be designated as "short tests" which meet the statutory requirements of availability, correlation and good engineering practice: The idle test, the Federal 3 Mode, the Clayton Key Mode,[1] The Federal Short Cycle, and the N.Y./N.J. composite test. These test procedures are discussed in detail in Subpart W and briefly described below.

(a) *Idle test.* The raw exhaust gas is measured with simple instrumentation to determine HC and CO concentration in the raw exhaust gases with the engine in an idling condition. Procedural variations of the idle test studied included running the test with the automatic transmission in neutral vs. drive, and idle speed at normal RPM vs. high RPM with the transmission in neutral. NO_x concentration cannot be meaningfully measured at idle since NO_x emissions are insignificant under idle conditions—an important limitation of the idle test. The idle test has been the predominant inspection test procedure utilized in currently operational and contemplated state programs.

(b) *Steady State Modal Tests. (Federal 3 Mode and Clayton Key Mode).* The raw exhaust gas is measured with simple instrumentation to determine HC, CO, and NO_x concentrations while the vehicle is driven under prescribed load conditions at two different speeds and at idle. A dynamometer is used in this test to simulate nonvarying speed and load conditions. Procedural variations between the two tests involve the severity of the load simulated. The Clayton Key Mode test is currently being evaluated by the states of Arizona and California.

(c) *Transient tests. (Federal Short Cycle and NY/NJ Composite Test).* A sample of the dilute exhaust gas (a CVS unit is used)[2] is collected in a bag while the vehicle is driven on a dynamometer to simulate a driving cycle that includes acceleration, deceleration, and cruise modes. The sample accumulated in the bag is analyzed for MC, CO, and NO_x concentration. The concentration values

[1] The Clayton Manufacturing Company has applied for patents on the Key Mode emissions test procedure and has stated its intent to charge fees for use of the diagnostic information provided with the test results. The status of the patent and the extent to which it applies to other steady state modal tests is unknown at this time.

[2] Substitution of a less costly procedure for obtaining the sample than a Constant Volume Sampler (CVS) may be possible. A substitute procedure was not evaluated.

measured are converted to a mass (gm/mile) basis. At present there is no field experience data available for these tests and no state is using or contemplating the use of such a test. In theory a large number of different transient tests are possible for simulating different driving cycles; however, in practice only two cycles have been studied: (1) A composite of the N.J. and the N.Y. Short Test and (2) the EPA Short Cycle Test developed by the Office of Mobile Source Air Pollution Control.

Both the idle test and the steady state modal tests have been used in state I/M programs. Because of the differences in equipment, manpower requirements and time required to conduct steady state modal tests over the idle test, the choice between these two tests is dependent upon the incremental improvement in accuracy and correlation derived by the steady state modal tests. The transient tests, requiring greater investment in resources, have not been implemented to date by state or local governments.

The Agency proposes, therefore, to specify these five short tests as being suitable for use, either in total or in part (where so identified), in light-duty vehicles and light-duty truck inspection programs; to identify the methodology which has been used in defining correlation for these tests; to specify the mathematical methodology to be used in the setting of short test cutpoints (that value, as measured by appropriate instruments for each pollutant, above which the vehicle fails the short test); and to specify the methodology which will be used to collect the data from which the short test cutpoints will be developed.

Implementation of Performance Warranty

Implementation of the warranty provisions of section 207(b), after the warranty regulations are promulgated by EPA, will occur when a vehicle which has been properly maintained and operated fails to conform at any time during its useful life (5 years or 50,000 miles, whichever first occurs) to the applicable emissions standards and such nonconformity results in the ultimate purchaser of such vehicle having to bear any penalty or other sanction (including the denial of the right to use such vehicle) under State or Federal law. The determination of whether a vehicle is conforming to applicable emission standards will most likely occur through the adoption of any one of the designated short tests and its associated cutpoints into a State or local government vehicle inspection program.

Currently available evidence indicates that the appropriate short test cutpoints for new model year vehicles will have to be established on a yearly basis. Further testing may reveal that cutpoints need not be set annually or for as many groups of vehicles as anticipated which would result in the development of short test cutpoints on an as needed basis. These cutpoints would remain in effect throughout the useful life of each vehicle. (Provisions are included in §85.2306 of Subpart X to enable the EPA or the manufacturers to modify the short test cutpoints over time, given that sufficient data can be provided which indicate that the cutpoints for a given group need to be revised. Provisions are also included for the updating of the cutpoints at the time of significant manufacturer changes to a vehicle covered by certification. There are essentially three options for establishing the cutpoints: states can determine the cutpoints, or they can be provided by EPA, or the manufacturers could provide the data on the basis of which cutpoints would be set either by the states or the EPA.

Although the procedures being proposed herein are aimed at the development of cutpoints by the Agency, it is feasible that the cutpoints can be developed by the states using the methodology being proposed by the agency. Comments on the way in which states would implement these provisions and the desirability for such implementation as part of the states' inspection and maintenance programs are requested. Comments are also requested on the feasibility and desirability of permitting or requiring each individual manufacturer to utilize the methodology for generating the data on the basis of which cutpoints will be set, and providing the resulting data to the EPA or to the several states for the setting of cutpoints; since it is obvious that each individual manufacturer would have a significant incentive to establish the cutpoint for his cars at the highest possible level, so as to minimize potential warranty claims, comments should include a discussion of how the EPA or the States might best supervise and control the process of data generation by manufacturers so as to assure that the resulting data are valid.

In the case that the agency develops the cutpoints, they would be developed through yearly programs wherein new model-year, privately owned, production vehicles and/or vehicles at the assembly line are tested by the FTP and by each short test. Sufficient quantities of vehicles would be obtained so as to furnish statistically meaningful results. The short test cutpoints would be determined on the basis of these data in accordance with the methodology set forth in these regulations and would then be disseminated to each state for use in its vehicle inspection program.

Discussion of Issues

(a) Correlation Methodology

Statistically, three different methodologies are associated with the concept of correlation: Regression analysis, ranking analysis and contingency table analysis.

Regression analysis is a technique by which one parameter of interest is predicted by one or more other variables of interest. Thus, a functional relationship is defined between the variables. For every value or set of values for the predictor variable, there is a value of the predicted variable.

Regression analysis can be performed with one or more predictor variables (independent variables) and with one or more predicted variables (dependent variables). When there is one dependent variable and one independent variable, the technique is usually called simple regression. A regression analysis is based upon the assumption of a relationship between the dependent and independent variables.

Most regression is based upon the "least squares" approach, although other approaches could be used. Thus, the coefficients are selected to minimize the sum of the squares of the actual values minus the predicted values. Least squares is the preferred approach since it provides estimates of the coefficients which have the minimum possible variance.

For the case of 207(b) correlation, the dependent variable is the Federal Test Procedure (FTP) emission for a specified pollutant. The independent variable is the short test emission for the same pollutant. In cases where the short test has more than one mode, there are multiple independent variables.

The disadvantage of using a regression methodology to evaluate correlation is that determination of the exact form of the functional relationship is necessary. Also, it is equally important to predict each and every dependent data point with the same absolute degree of accurarcy. Thus, a given error in the prediction of a gross emitter will affect correlation as much as the same error in a vehicle which just fails the Federal standards.

Ranking analysis is a technique by which two variables are compared without any assumption as to a predictable relationship between the variables. Each variable is compared and ordered within itself with the largest value of each variable assigned the rank of 1. Then the ranks of each pair of variables are subtracted and the differences are summed. The rank correlation coefficient is a function of the number of data points and the sum of the differences: it will be low when the variables are independent and high when they are correlated.

A rank correlation value near 1 indicates that two variables, when normalized, tend to be high or low together. A rank correlation near zero indicates that the relative rank of one variable cannot predict the relative rank of the second variable. A high but nonperfect rank correlation, however, does not allow for an assessment of the magnitude of error which would occur with the prediction process.

Contingency table analysis assumes that there is a discrete number of groups of individual measurements of a given dependent variable. There are also one or more independent variables. The analysis attempts to find one or more independent variables which can be used to discriminate between the different classes of the dependent variable. In other words, the contingency table approach says that a predictive relationship between the dependent and inde-

pendent variables is not important. Rather, the only thing of interest is that the independent variable be able to classify the dependent variable into one of the available group categories. Contingency table analysis is based upon the assumption that cutpoints can be found for one or more independent variables which will discriminate among the groups of the dependent variable. The selection of the cutpoints results in the development of a contingency table.

Contingency tables are considerably simpler to deal with than regression analyses since it is not necessary to determine the exact predictive relationship. Rather, it is sufficient to identify the number of important groups into which the dependent variable needs to be classified. For the purposes of 207(b) implementation, there are only two such groups: Vehicles which pass the FTP and vehicles which fail the FTP. Thus, Figure 1 shows the 207(b) application of a contingency table.

Predicted variable

	(FTP) of—	
	Pass	Fail
Predictor variable (short test):		
Pass	Correctly passed.	Incorrectly passed by the short test (error of omission).
Fail	Incorrectly failed by the short test (error of commission).	Correctly failed.

FIGURE 1

The definition of correlation in a contingency table can be addressed in several ways (unlike regression analysis correlation or rank correlation). First, a measure of independence between the two variables can be determined. This indicator will fall between −1 and +1, as did the other measures of correlation. Because of the simple form of the predictive relationship inherent in the table, other more meaningful measurement quantities can be computed, e.g., the ratio of vehicles failing the short test to vehicles failing the FTP, the ratio of cars incorrectly failing the short test to the total number of cars failed by the short test, etc. These quantities express the ability of the short test to correctly identify passing and failing vehicles on the FTP. A selection as to which of these quantities best expresses correlation depends upon the specific application, the relative importance of the types of errors, and the magnitude of the correctly identified vehicles.

It was anticipated that the short tests would not correlate with the FTP in a classical statistical sense, i.e., no short test is capable of a reliable and consistent prediction of the FTP mass emissions. The extensive fleet tests verified that the statistical correlation coefficients arrived at through regression techniques were low (generally less than 0.8), indicating unacceptable correlation.

However, EPA interprets the Clean Air Act requirement of "reasonable correlation" to be met if the short test is capable of reliably and consistently predicting whether the vehicle would pass or fail the FTP even if it cannot give the magnitude of the passing or failing margin. Therefore, the contingency table approach has been adopted as the method for determining correlation between the FTP and selected short tests. The reasonableness of such correlation depends on the ratio of incorrect predictions to correct predictions. In the case of the 207(b) short test the incorrect predictions are of two types, errors of commission and errors of omission, each with significantly different consequences. An error of commission (i.e., the short test incorrectly predicts failure for a vehicle that really passes the FTP) would cause a vehicle which conforms to all Federal emission requirements to be repaired under warranty at some cost to the manufacturer. It is possible, however, that air quality benefit may still be obtained from vehicles which are in conformance with the emission standards at the time of failure; vehicles in a good state of tune can often emit at levels substantially below the emission standards, especially at low mileage. An error of omission (i.e., the short test incorrectly passes a vehicle that would fail the EFP) has no cost impact on the manufacturer but represents a lost opportunity for air quality improvement.

By varying the severity of the short test cutpoint (i.e., the numerical value used to predict passing or failing on the FTP) it is possible to reduce errors of commission to any desired level, but always at the cost of increasing errors of omission.

(b) GOOD ENGINEERING PRACTICE

The criterion of good engineering practice must be resolved in terms of whether the test(s) can: (1) Be conducted with reasonable demands upon test personnel and equipment and (2) yield reasonably accurate and reproducible results when the test is performed as specified. All five of the short tests identified in these proposed regulations meet these criteria. The basis for this conclusion is explained in detail in: Regulatory Support Document—Section 207(b) NPRM. Single copies may be obtained from the Director, Emission Control Technology Division, 2565 Plymouth Road, Ann Arbor, Michigan 48105; a copy is also on file in the EPA Public Information Reference Unit, Room 2922 Waterside Mall, U.S./EPA, 401 M Street SW., Washington, D.C. 20460.

(c) SHORT TEST STANDARDS DEVELOPMENT

On a yearly basis, the Agency proposes to test vehicles of the latest model year which are privately-owned production vehicles and/or vehicles at the assembly line. (Further testing may reveal that cutpoints need not be set annually or for as many groups of vehicles as anticipated, which would result in the Agency providing short test cutpoints on an as-needed basis). The vehicles will be tested by each approved short test and by the FTP. Vehicles will be selected for testing on the basis of those engine/vehicle size/emissions control technology combination(s) (called groups) which are in production and which are significantly different. A sufficient number of vehicles will be tested in each group to satisfy statistical requirements for sample size. The data will be collected during the first nine months of the model year (these data could also serve to supplement Section 207(c), the "recall" provision, of the Clean Air Act if testing is performed with rigorous quality control). The Agency will analyze the data by the prescribed methodology and select the short test cutpoints for each group. Consolidation within groups of the final number of short test cutpoints will be performed in accordance with the methodology prescribed. The effects of real world variables (temperature, humidity, human factors, instrumentation, etc.) on short test cutpoints as determined by the state/EPA pilot project being conducted in Portland, Oregon, will be incorporated in the sets of short test cutpoints which are furnished to each state or local government.

Because errors do occur in the categorization of vehicles in the contingency table and because of the relative difference in importance of the two types of errors (Errors of Commission (Ec) and Errors of Omission (Eo), the Agency is proposing five approaches for the selection of the short test cutpoints. These five approaches are stated below and the one which is judged to best fulfill the requirements of Section 207(b) based on the data which the Agency has available and on the comments received from this notice of proposed rule making will be adopted.

Option 1. Set the short test cutpoints at the level which corresponds to a 5 percent error of commission rate (based on the total number of vehicles tested) within each group.

This method has several advantages. First, it is easy to implement. Second, each vehicle group manufacturer will be incorrectly penalized for the same fraction of his sales of that vehicle as every other vehicle group manufacturer. There are some disadvantages to this method. This occurs when the number of vehicle groups is greater than one. First, the mean FTP emissions of failed vehicles in group 1 may be very different from the mean FTP emissions of failed vehicles in group 2 even though both short test pass/fail cutpoints were set to ensure 5 percent commission errors. Second, vehicle group 1 may contain a greater percentage of error of omissions than vehicle group 2 and thus be required to repair fewer vehicles than vehicle group 2, even though both groups have the same percentage of vehicles exceeding emission standards when measured by the FTP. Third, assume that vehicle group 1 has extremely high short test variability. Then, it is likely that due to short test variability, cars with low FTP emissions will have high short test levels. This situation will result in a higher

short test pass/fail cutpoint than for a low test variability class, since high test variability increases commission errors and omission errors. Thus, a manufacturer could be rewarded for high short test variability. The same situation could occur with high FTP variability.

Option 2. Set the short test rejection ratio, $(E_c+FF)/(E_o+FF)$, equal to unity. (Vehicles which are correctly failed by the short test are classified as "FF" vehicles.)

This option is no more difficult to implement than the fixed error of commission approach. It treats all manufacturers equitably and does not give any advantage to manufacturers who produce vehicels with high FTP and/or ST (short test) variability. Rather, it encourages improvements in emissions performance because the manufacturer is never allowed to repair fewer vehicles than he should, i.e., true FTP failing vehicles. This approach does not permit the setting of a single ST cutpoint for all vehicles. This is true for all equitable approaches for setting cutpoints and therefore cannot be treated as a negative characteristic of the method. Air quality benefits will tend to improve from the original approach because the error of omission rate will be lowered. However, mean FTP emissions of failed vehicles in two different groups could still be significantly different. Many manufacturers will have to repair more error of commission vehicles than under the original concept.

Option 3. Set a fixed level of $E_c/(E_c+FF)$ for each group.

This option is more difficult to implement since $E_c/(E_c+FF)$ can be small when FF is large or when E_c is small. Thus, there is more than one way to satisfy the function. This option does, however, have the potential for crediting manufacturers of vehicle classes which have low FTP failure rates. This option does not alter the variability considerations of the first approach.

Option 4. Set the short test cutpoints so that equivalent FTP pass/fail levels are enacted for each vehicle group while maintaining the error of commission rate at five percent or less. This option has the potential for crediting groups with low FTP emissions but at the expense of increasing errors of omission. In fact, under certain circumstances, the group having the highest true failures could experience the greatest increase in errors of omission.

Option 5. Set an error of commission rate or $E_c/(E_c+FF)$ rate as a function of test variability. Allow a five percent error of commission rate when test variability is at the maximum acceptable level.

This option eliminates the variability problem inherent in Options 1 and 3. A functional relationship between errors of commission or $E_c/(FF+E_c)$ and variability could be developed using mathematical simulation techniques. This could be accomplished by taking a set of data and, using probability distribution theory and random numbers, variability could be introduced into the data base at different levels. Then, using fixed short test cutpoints, commission errors can be computed and plotted against variability.

These five approaches for the selection of short test cutpoints are detailed in Subpart X, § 85.2308. While more extensive analysis has been completed on some of these approaches, further efforts are aimed at examining the potential effects of adopting any of the five approaches for selecting short test cutpoints. Comments are particularly requested on each of the above approaches.

(d) REAL WORLD CONSIDERATIONS

All of the data available to EPA on the correlation of short tests to the FTP have been established under laboratory conditions. Inspection of vehicles at state inspection lanes will occur under varying atmospheric conditions and will also be subject to personnel errors as well as problems associated with correct instrument calibration and maintenance. The Portland study is being performed by the Agency to quantify the effects of these variables on short test correlation and to determine the effectiveness of the short test in the real world. Once the magnitudes of these variables have been quantified, they will be factored into the cutpoints for 207(b) to be published by the Agency. Incorporation of these variables will not result in unacceptable error rates or correlation. However, they may reduce the predicted air quality benefits relative to those projected from laboratory data.

(e) EFFECTS ON STATE I/M PROGRAM

Publication of Section 207(b) cutpoints will not require their adoption by a state or local government. However, if the cutpoints used by a state or local government are less stringent than the 207(b) cutpoints, then that locality will not be achieving as great an air quality improvement from its I/M program as possible. The only vehicle owners who would be afforded the warranty protection of section 207(b) are those whose emissions exceed the state I/M cutpoints. The opposite scenario, i.e., where the state cutpoints are more stringent than the section 207(b) cutpoints, could also exist. In this case, only those vehicles whose short test levels exceed the 207(b) cutpoints would be covered by warranty. The owners of vehicles whose short test values were below the 207(b) cutpoints but above the state standards would have to bear the cost of repairing their own vehicles.

Each state will have to evaluate the relative merits of either adopting the 207(b) cutpoints or adopting less stringent or more stringent short test pass/fail values.

(F) NEED FOR NEW SHORT TEST DEVELOPMENT

In light of the rapid changes which are taking place in the technology being used to meet the present and future emissions standards, it is possible that cases will occur where the proposed short tests will not function effectively as predictors of the FTP emissions from those vehicles. Should this possibility occur, the Agency will implement one or more new short tests which will apply to these new technology vehicles.

(G) ANTICIPATED AIR QUALITY BENEFITS

Because of the intimate relationship between I/M and the execution of a 207 (b) program, it is very difficult to separate their respective effectivenesses. The predicted effectiveness is, therefore, presented in two ways. The first case is for a joint 207(b)/Inspection and Maintenance program, where the 207(b) cutpoints (E_c=5 percent) are used and no I/M program previously existed. The second case is where an I/M program existed prior to the implementation of 207(b) and had been failing approximately ⅓ of the vehicles in each model year. In this case the 207(b) cutpoints (E_c=5 percent) are adopted following implementation of section 207(b). The effectiveness is expressed as a percent reduction in total emissions over the useful life of the vehicles.

Effectiveness of sec. 207(b) over the useful life of the vehicle

Case I (no prior I/M) (percent)			Case II (previous I/M programs) (percent)		
HC	CO	NOx	HC	CO	NOx
34.6 to 21.1	42.8 to 24.6	2.0 to 0.33	7.6 to 6.4	8.7 to 7.8	0.22 to 0.00.

The technical issues involved in preparing the various short tests and statistical procedures are discussed in detail in: Regulatory Support Document Section 207(b) NPRM.

(H) APPLICABILITY OF 207(B) TO LIGHT-DUTY TRUCKS

At the present time, available vehicle test data on the short tests and the FTP have only been measured on light-duty vehicles. Before final rulemaking, data will be available on light-duty trucks. Because light-duty trucks are similar to light-duty vehicles both in engineering design and in usage, the same tests which are appropriate for light-duty vehicles are expected to be appropriate for light-duty trucks. The specific short test cutpoints for light-duty trucks may differ from the light-duty vehicle cutpoints and will be determined in a separate test program. However, the methodology for determining the cutpoints is expected to apply to both light-duty vehicles and light-duty trucks.

REQUEST FOR COMMENTS

EPA is particularly interested in receiving comments and information on the following topics:

1. Appropriateness in terms of correlatability and good engineering practice of the proposed test procedures for light-duty vehicles and light-duty trucks.

2. Appropriateness of the test procedures proposed with respect to existing technology and "new" technology.

3. Appropriateness of the short test cutpoint selection methodologies proposed for light-duty vehicles and light-duty trucks. What is the most equitable approach, which is the most applicable in practice? Who should establish the cutpoints? In which way would the states establish the cutpoints?

4. Alternative methods for determining short test cutpoint values. Particularly, should some weighting factor be used to balance errors of commission and omission in terms of air quality? Also, what approach should be taken when no car in the test group exceeds the standards or all cars in the test group fail the standards?

5. Should prototype or new assembly line vehicles be used instead of privately owned vehicles in the test group? This might involve inducing typical faults. What are typical faults and what are typical failure rates on the assembly line?

6. Problems anticipated by the manufacturers caused by including the short tests in all tests performed on certification and/or assembly line vehicles—both at the EPA laboratory and at their facilities.

7. Should the short test cutpoints be based on a small number of broad groupings of vehicles (e.g., according to five engine displacement categories) rather than the engine/vehicle/technology groups proposed for use in determination of short test cutpoints?

8. Suggestions for a uniform report format and test card information. Assess the difficulty in ensuring that vehicles are tested under proper conditions, weights and shift points—running changes during year, etc.

9. Suggestions on labeling of vehicles to ensure that they are properly identified by the vehicle's inspection lane operators. Can this be incorporated into the Vehicle Identification Number (VIN) or should it be an under hood label?

10. What is reasonable short test variability and how should it be defined and incorporated?

A copy of all public comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library) 401 M Street SW., Washington, D.C. 20460. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

Notice is hereby given that Part 85 of Title 40 of the Code of Federal Regulations is proposed to be revised by the addition of new Subparts W and X as set forth below.

This Notice of Proposed Rulemaking is issued under authority of section 207(b) of the Clean Air Act, as amended (42 U.S.C. 1857f–5a).

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: May 6, 1977.

DOUGLAS M. COSTLE,
Administrator.

It is proposed to amend Part 85 of Chapter I, Title 40 of the Code of Federal Regulations by adding Subpart W and Subpart X as follows:

Subpart W—Section 207(b) Exhaust Emission Test Procedures

Sec.
85.2201 General Applicability.
85.2202 Definitions.
85.2203 Abbreviations.
85.2204 Overview.
85.2205 Transient test specifications, overview.
85.2206 Transient test procedures, general requirements.
85.2207 Federal short cycle test specifications.
85.2208 Federal short cycle test—calculations.
85.2209 New Jersey/New York composite test specifications.
85.2210 New Jersey/New York composite test—calculations.
85.2211 [Reserved]
85.2212 Dynamometer systems.
85.2213 Exhaust gas sampling system.
85.2214 Calibration procedures for transient mode tests.
85.2215 [Reserved]
85.2216 Steady state modal test specifications, overview.
85.2217 Steady state modal test procedures, general requirements.
85.2218 Clayton Key Mode test specifications.
85.2219 Federal Three Mode test specifications.
85.2220 Equipment specifications — steady state modal tests.
85.2221 Dynamometer system.
85.2222 Exhaust gas sampling system.
85.2223 Calibration procedures — steady state modal tests.

85.2229 Calibration procedures—Idle test.

Subpart X—Section 207(b) Short Test Cutpoint Methodology

85.2301 General applicability.
85.2302 Definitions.
85.2303 Overview.
85.2304 Vehicle grouping.
85.2305 Data collection.
85.2306 Short test cutpoint selection.
85.2307 Analytical technique.
85.2308 Cutpoint selection methodologies.

AUTHORITY: Sec. 207(b), Clean Air Act, as amended (42 U.S.C. 1857f–5a).

Subpart W—Section 207(b) Exhaust Emission Test Procedures

§ 85.2201 General applicability.

This subpart contains short test exhaust emission test methods to be used in implementing the emissions control system performance warranty regulations. The provisions of this subpart are applicable to 1979 and later model year light-duty vehicles and 1979 and later model year light-duty trucks.

§ 85.2202 Definitions.

The following definitions apply to this subpart beginning with the 1979 model year. Section 86.078–2 remains effective excepting those definitions which are hereby superseded and/or added.

"Car line" means a name denoting class of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis). Car line does not consider any level of decor or opulence and is not generally distinguished by such characteristics as roof line, number of doors, seats or windows except for station wagons. Station wagons are considered to be different car lines than passenger cars.

"Calibration" means the set of specifications, including tolerances, unique to a particular design, version, or application of a component or component assembly capable of functionally describing its operation over its working range.

"Clustering" means the tendency of data points, when plotted on cartesian coordinates, to appear together in distinct, compact groups.

"Discrimination" means the division of a batch of data points into 2 or more distinct groups, e.g. the division of vehicle emission data obtained by the FTP and short test(s) into groups of Ec, Eo, FF, and PP.

"Driver's Aid" means a device which graphically displays the speed-time requirements of a given test schedule and the actual vehicle test speed to assist the test technician in maintaining the proper vehicle speeds throughout the test.

"Group" means a classification of vehicles into classes having the same manufacturer, engine displacement, cylinder block configuration (e.g. V–8, I–6, etc.), number of cylinders, fuel injection or carburetion (number of carburetors, and number of carburetor venturies), emission control systems, inertia weight, and car line.

"Instrument-to-instrument variation" means variations in calibration (zero and span point) settings and/or test readings between two (or more) identical instruments produced by the same manufacturer when measuring samples from the same source (e.g. gas bottles or vehicle exhaust).

"Laboratory conditions" means a testing environment (e.g. test cell) in which as many test variables as possible are controlled (e.g. ambient temperature and humidity, on-the-job human errors) and laboratory grade instrumentation is used (when possible).

"Light-Duty Truck" means any motor vehicle, rated at 8,500 pounds GVW or less which has a vehicle curb weight of 6,000 pounds or under and which has a basic vehicle frontal area of 46 square feet or less, which is: (1) Designed primarily for purposes of transportation of property or is a derivation of such a vehicle or (2) designed primarily for transportation of persons and having a capacity for more than 12 persons, or (3) available with special features enabling off-street or off-highway operation and use.

"Light-Duty Vehicle" means a passenger car or passenger car derivative capable of seating 12 passengers or less.

"Make" means the division or similar name within a manufacturing corporation which appears on the vehicle, e.g., Chevrolet, Mercury, Dodge etc.

"Manufacturer-to-manufacturer instrument variation" means variations in calibration (zero and span point) settings and/or test readings between two (or more) instruments intended for the same use (i.e., HC analyzers) but produced by different manufacturers when measuring samples from the same source (e.g. gas bottles or vehicle exhaust).

"Manufacturer" means the major financial entity whose divisions market vehicles, e.g. General Motors, Ford Motor Company etc.

"Overheating" means engine operating temperature in excess of the temperature for which the engine and engine systems were designed, as evidenced by temperature warning light on, temperature gauge reading in the hot region, stalling or rough idling.

"Owner" means the ultimate purchaser or subsequent purchaser in whose name the vehicle is titled at the time that the short test is performed.

"Precision" means the standard deviation of replicated measurements.

"Production tolerances stack-up" means each component of an assembly is manufactured within specified tolerances, and the system, when assembled, acquires a production tolerance stack-up that is the result of the cumulative effect of the interaction of the individual tolerances of the components.

"Repeatability" means the ability of an instrument to duplicate the same results each time measurement is made under conditions as close to being identical as possible.

"Road Load" means the loading imposed on a test vehicle, expressed as power measured at the point of contact between the vehicle and the road.

"Short test" means a hot exhaust emissions test of less than five minutes duration.

"Short test cutpoint" means the value as measured by appropriate instruments for each pollutant above which the vehicle fails the short test.

"Span" means adjust the gain of an instrument to a given reading while measuring a calibration parameter under conditions designed to yield that reading. Analyzers should be spanned using calibration gases with concentrations equal to 75 to 100 percent of full scale.

"State of tune" means carburetion, ignition, and emission control system parameter settings (e.g., idle CO, idle rpm, timing, and dwell settings).

"Steady state modal test" means a short test during which undiluted, raw exhaust emission levels are collected and measured continuously while the test vehicle is operated in one or more constant speed (or idle) modes.

"Tolerance" means the range of variation permitted in maintaining a specified dimension during the manufacturing of a product.

"Transient test" means an exhaust emissions test during which exhaust samples are collected under constant volume conditions (variable dilution) while the test vehicle is operated on a dynamometer over a driving schedule consisting of a series of constant rate accelerations, constant rate decelerations, and steady state cruises, with test results reported as mass emissions.

"Vehicle registration weight" means the vehicle weight indicated on the state vehicle registration records.

"Zero" means adjust the output signal on an instrument to obtain a reading of zero while measuring a calibration parameter under conditions designed to yield a zero reading.

§ 85.2203 Abbreviations.

The abbreviations used in this subpart have the following meanings, when used in both capital and lower case:

AC=Alternating Current.
Auto.=Automatic.
C=Celsius.
CEV=Catalyst equipped experimental vehicles.
cfh=Cubic feet per hour.
CFV=Critical flow venturi.
CI=Contingency table correlation index.
CID=Cubic inch displacement.
CO_2=Carbon dioxide.
CO=Carbon monoxide.
Conc.=Concentration.
Cu. in.=Cubic inch(es).
CVS=Constant volume sampler.
E_c=Errors of commission.
Eo=Errors of omission.
EFP=Emission factors program.
EGR=Exhaust—gas recirculation.
F=Fahrenheit.
FF=Correctly failed vehicles.
FID=Flame ionization detector.
FS=Full scale.
ft.=Feet.
FTP=Federal Test Procedure.
FY=Fiscal year.
gm=Grams.
g/mi=Grams per mile.
HC=Hydrocarbon(s).
Hg=Mercury.
Hi.=High.
Hp=Horsepower.
Hr=Hour.
I/M=Inspection/maintenance.
in.=Inches.
km=Kilometers.
km/h=Kilometers per hour.
kPa=Kilopascal(s).
lb.=Pounds.
Lo.=Low.
Max.=Maximum.
in^3/hr=Cubic inches per hour.
Min.=Minute(s).
mph=Miles per hour.
MY=Model year.
NBS=National Bureau of Standards.
NDIR=Nondispersive infrared.
NJ/NY=New Jersey/New York.
NOx=Oxides of nitrogen.
No.=Number.
OMSAPC=Office of Mobile Source Air Pollution Control.
PCV=Positive Crankcase Ventilation.
PDP=Positive displacement pump.
P/F=Pass/fail.
PP=Correctly passed vehicles.
ppm=Parts per million by volume.
psi=Pounds per square inch.
r=Conventional (Pearson) correlation coefficient.
rpm=Revolutions per minute.
Sec.=Seconds.
ST=Short test.
Std.=Standard.
Trans.=Transmission.

§ 85.2204 Overview.

This subpart is divided into three categories:

(a) Test procedures, Emission calculation procedures, Equipment and Equipment Calibration procedures for Transient Tests.

(b) Test procedures, Emission calculation procedures, Equipment and Equipment Calibration procedures for Steady State Modal Tests.

(c) Test procedures, Emission calculation procedures, Equipment and Equipment Calibration procedures for the Idle test.

§ 85.2205 Transient test specifications, review.

The transient short tests consist of vehicle operation on a chassis dynamometer over one of two specified driving schedules, during which hydrocarbon, carbon monoxide, and oxides of nitrogen mass emissions are measured. A proportional part of the diluted exhaust emissions is collected continuously for subsequent analysis, using a constant volume (variable dilution) sampler (CVS).

§ 85.2206 Transient test procedures, general requirements.

(a) Vehicles shall be tested in the state of adjustment in which they arrive at the test site, with no vehicle preparation or preconditioning of any sort. Vehicles shall be tested at the ambient conditions encountered at the test site. Vehicles shall be approximately level during all phases of the test sequence to prevent abnormal fuel distribution.

(b) Exhaust samples shall be taken from both tailpipes on vehicles having more than one tailpipe exhaust outlet. The samples shall be merged prior to the CVS unit so that a composite sample can be taken. The pollutant concentration levels shall be measured according to the procedures outlined in this subpart and shall be reported as the official test results.

(c) The transient tests follow closely the Federal Test Procedure used for vehicle certification, Subpart B of Part 86 of this chapter. There are several important differences to be noted, however.

(1) The test begins with the vehicle warmed up and idling.

(2) No evaporative emission measurements are made.

(3) Different driving schedules are used.

(4) Actual distance driven is not measured.

§ 85.2207 Federal short cycle test specifications.

(a) Road load power and inertia weight settings shall be determined in accordance with the procedures used for emission certification vehicles outlined in Part 86, Subpart B of this chapter. A compete listing of all possible vehicle/engine configurations must be available at each test site prior to initiation of testing for use in determining appropriate inertia weight and road load power

requirements for each vehicle to be tested.

(b) Transmissions:

(1) Transmissions, overdrives and free wheeling units shall be operated in accordance with the manufacturers' recommendations to the ultimate purchaser as indicated in the owners manual or as supplied by EPA.

(2) Idle modes shall be run with automatic transmissions in "Drive" with the wheels braked and manual transmissions shall be in gear with the clutch disengaged.

(3) The vehicle shall be driven with minimum accelerator pedal movement to maintain the desired speed.

(4) Accelerations shall be driven smoothly according to the manufacturers' recommendations to the ultimate purchaser. For manual transmissions, the operator shall release the accelerator pedal during each shift and accomplish the shift with minimum time. If the vehicle cannot accelerate at the specified rate, the vehicle shall be operated with the accelerator pedal fully depressed until the vehicle speed reaches the value prescribed for that time in the driving schedule.

(5) The deceleration modes shall be run in gear using brakes or accelerator pedal as necessary to maintain the desired speed. Manual transmission vehicles shall have the clutch engaged and shall not change gears from the previous mode. For those modes which decelerate to zero, manual transmission clutches shall be depressed when the speed drops below 15 mph (24 km/h), when engine roughness is evident, or when engine stalling is imminent.

(6) Downshifting is allowed at the beginning of or during a power mode in accordance with the manufacturers' recommendations to the ultimate purchaser.

(c) Dynamometer procedure:

(1) The Federal Short Cycle dynamometer sequence consists of a 125 second long driving schedule consisting of a series of constant rate accelerations, constant rate decelerations, and steady speed cruises. The exhaust emissions are diluted with ambient air and a continuously proportional sample is collected for analysis. The composite samples, collected in bags, are analyzed for hydrocarbons carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbons, carbon monoxide, carbon dioxide, and oxides of nitrogen.

(2) The vehicle engine compartment hood shall remain open for the duration of the Federal Short Cycle. If vehicle overheating occurs (or is anticipated), a cooling fan(s) meeting the specifications in § 85.2212(e) may be used.

(3) The vehicle speed as measured from the dynamometer rolls shall be used. The speed vs. time characteristics of each test shall be checked against the specification to assure test validity.

(4) Practice runs over the prescribed driving schedule may be performed, provided an emission sample is not taken, for the purpose of finding the minimum throttle action to maintain the proper speed-time relationship, or to permit sampling system adjustments.

NOTE.—When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle on the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. This rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(5) The drive wheels shall be at the pressure prescribed for operation of the vehicle on the road by the tire manufacturer. If the tires are at normal operating temperature (not cold) at the time of testing, the pressure may be 2 to 3 psi above the manufacturers' recommended pressure. The vehicle shall not be tested with underinflated tires.

(6) If the dynamometer has not been operated during the 2-hour period immediately preceding the test it shall be warmed up for 15 minutes by operating at 30 mph (48km/h) using a non-test vehicle or as recommended by the dynamometer manufacturer.

(7) The inertia weight and road load power shall be set to the values determined from § 85.2207(a).

(8) If the engine stalls at any point during the dynamometer run, that test shall be voided. The engine shall then be restarted and run at 2500 rpm ±200 rpm in neutral for 15 to 30 seconds preceding a retest. This procedure shall be followed until a complete, valid test is run.

(d) Test sequence:

(1) Adjust the dynamometer for the required road load and inertia.

(2) Drive or push test vehicle onto the dynamometer so that wheels are centered on rolls.

(3) Examine vehicle information label to determine group. Record information on test report.

(4) Attach restraining device to vehicle in such a fashion that the vehicle is not damaged. Release dynamometer brake.

(5) With the sample selector valves in the "standby" position connect evacuated sample collection bags to the dilute exhaust and dilution air sample collection systems.

(6) Start the Constant Volume Sampler (if not already on), the sample pumps and the temperature recorder. The heat exchanger of the constant volume sampler, if used, should be preheated to its operating temperature before the test begins.

(7) Adjust the sample flow rates to the desired flow rate (minimum of 10 cfh. (0.28 m^3/hr)) and set the gas flow measuring devices to zero.

NOTE.—CFV–CVS sample flow rate is fixed by the venturi design.

(8) Attach adaptor(s) and exhaust collection tube(s) to vehicle tailpipe(s).

(9) Attach engine speed pickup.

(10) Idle vehicle in neutral at 2500 ±200 rpm for 15 to 30 seconds within 1 minute of beginning of dynamometer run.

(11) Place transmission in "Drive" or in gear with clutch disengaged.

(12) Turn on driver's aid and begin the initial acceleration of the driving schedule.

(13) Simultaneous with (12), start the gas flow measuring device, position the sample selector valves to direct the sample flow into the exhaust sample bag and dilution air sample bag.

(14) Operate the vehicle according to the following dynamometer driving schedule:

Mode:	*Time in mode (seconds)*
1. 0 to 16 mph (0 to 26 km/h) acceleration	6.0
2. 16 to 29 mph (26 to 47 km/h) acceleration	23.0
3. 29 mph (47 km/h) cruise	10.0
4. 29 to 37 mph (47 to 60 km/h) acceleration	18.0
5. 37 to 42 mph (60 to 68 km/h) acceleration	4.5
6. 42 to 37 mph (68 to 60 km/h) deceleration	2.5
7. 37 to 20 mph (60 to 32 km/h) deceleration	32.0
8. 20 to 0 mph (32 to 0 km/h) deceleration	7.5
9. Idle	21.5
Total	125.0

The speed at any given time on the dynamometer driving schedule must be within the tolerances given in § 86.115–78. The speed tolerance at any given time on the dynamometer driving schedule prescribed above or as printed on a driver's aid chart approved by the Administrator, is defined by upper and lower limits. The upper limit is 2 mph (3.2 km/h) higher than the highest point on the trace within 1 second of the given time. The lower limit is 2 mph (3.2 km/h) lower than the lowest point on the trace within 1 second of the given time. Speed variations greater than the tolerances (such as may occur during gear changes) are acceptable provided they occur for less than 2 seconds on any occasion. Speeds lower than those prescribed are acceptable: *Provided*, The vehicle is operated at maximum available power during such occurrences.

(15) At the end of the driving schedule simultaneously turn off the gas flow measuring device and position the sample selector valve to the "standby" position. This ends the driving portion of the test.

(16) As soon as possible, transfer the exhaust and dilution air samples to the analytical system and process. A stabilized reading for the exhaust sample must be obtained within 20 minutes of the end of the sample collection phase of the test.

(17) Disconnect the engine speed pickup, adaptor(s), exhaust collection tube(s), and restraining device.

(18) Lock dynamometer rolls and drive vehicle off of dynamometer. This ends the test sequence.

(e) Measurement operations. The following sequence of operations shall be performed in conjunction with each series of measurements:

(1) Zero the analyzers and obtain a stable zero reading. Recheck after tests.

(2) Introduce span gases and set instrument gains. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. Show actual concentrations on chart.

(3) Check zeros; repeat the procedure in paragraphs (1) and (b) of this section if required.

(4) Check flowrates and pressures.

(5) Measure HC, CO, CO_2 and NO_x concentrations of samples.

(6) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (e) (1) through (5) of this section.

(f) Records required: The following information shall be recorded with respect to each test:

(1) Test number.

(2) Date and time of day for each test.

(3) Instrument operator.

(4) Driver or operator.

(5) Vehicle: Make; Model; Vehicle identification Number; Vehicle registration number and year; Vehicle Model year; Transmission type; Odometer reading; Engine displacement; Idle rpm; Fuel system (fuel injection, number of carburetors, number of carburetor barrels); Inertia loading; Vehicle registration weight; Actual road load at 50 mph (80 km/h); drive wheel tire pressures, as applicable; emission control technology.

(6) All pertinent instrument information such as tuning-gain-serial number-detector number-range. As an alternative, a reference to a test lane number may be used, provided test lane calibration records show the pertinent instrument information.

(7) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(8) Test lane barometric pressure, ambient temperature and humidity.

NOTE: A central test site barometer may be used provided that individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(9) Pressure of the mixture of exhaust and dilution air entering the CVS metering device, the pressure increase across the device, and the temperature at the inlet. The temperature may be recorded continuously or digitally to determine temperature variations.

(10) The number or revolutions of the positive displacement pump accumulated during each test phase while exhaust samples are being collected. The number of standard cubic feet metered by a critical flow of venturi during each test phase would be the equivalent record for a CFV–CVS.

(11) The humidity of the dilution air.

NOTE.: If conditioning columns are not used (see § 86.122 and 86.144) this measurement can be deleted. If the conditioning columns are used and the dilution air is taken from the test cell, the ambient humidity can be used for this measurement.

(g) Test Report. A test report shall be completed in triplicate and shall contain the information given below. One copy shall be given to the vehicle owner or his agent.

(1) Test type and driving schedule.

(2) VIN/License No.

(3) Owner's name and address.

(4) Car make, model, MY, engine size.

(5) Date of test.

(6) Odometer reading.

(7) Date of previous test on vehicle, of retest.

(8) Inertia and road load if applicable.

(9) Test site location, lane identification.

(10) Test results (including emission measurement values).

(11) Certification by instrument operator and driver that test was correctly performed.

§ 85.2208 Federal short cycle test-calculations.

(a) For light duty vehicles and light duty trucks, the mass emissions for each pollutant shall be computed by the following formulae:

(1) Hydrocarbon mass emissions:
$HC_{mass} = V_{mix} \times Density_{HC} \times (HC_{conc} \times 10^{-6})/L$

(2) Carbon monoxide mass emissions:
$CO_{mass} = V_{mix} \times Density_{CO} \times (CO_{conc.} \times 10^{-6})/L$

(3) Oxides of Nitrogen mass emissions:
$NO_{x_{mass}} = V_{mix} \times Density_{NO_2} \times K_H \times (NO_{x_{conc.}} \times 10^{-6})/L$

(4) Carbon dioxide mass emissions
$(CO_{2_{mass}} = V_{mix} \times Density_{CO_2} \times (CO_{2_{conc.}} \times 10^{-2})/L$

(b) Meaning of symbols

(1) HC_{mass} = Hydrocarbon emissions, in grams per mile.

H = Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H = [(43.478) R_a \times P_d]/[P_B = (P_a \times R_a/100)]$ for SI units, $H = [(6.211) R_a \times P_d 2/P_H = (P_d \times R_a/100)]$.

R_a = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_B = Barometric pressure, in mm Hg (kPa).

V_{mix} = Total dilute exhaust volume in cubic feet per test corrected to standard conditions (538 R) (293 K) and 760 mm Hg (101.3 kPa)).

For PDP–CBS, V_{mix} is:

$$V_{mix} = V_a \times \frac{N(P_B - P_d)(528)\ R)}{(760\ \text{mm Hg})\ (T_p)}$$

for SI units,

$$V_{mix} = V_a \times \frac{N(P_B - P_d)(293.15\ K)}{(101.325\ \text{kPa})(T_p)}$$

$Density_{HC}$ = Density of hydrocarbon is 16.33 g/ft³ (.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.85, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$HC_{conc.} = HC_e - HC_d\ (1-1/DF)$

Where:

HC_e = Hydrocarbon concentration of the dilute exhaust sample in ppm carbon equivalent.

HC_d = Hydrocarbon concentration of the dilution air as measured, in ppm carbon equivalent.

(2) $NO_{x_{mass}}$ = Oxides of nitrogen emissions, in grams per mile.

$Density_{NO_2}$ = Density of oxides of nitrogen is 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$NO_{x_{conc.}}$ = Oxides of nitrogen concentration of the dilution/exhaust sample corrected for background, in ppm.

$NO_{x_{conc.}} = NO_{x_e} - NO_{x_d}(1-1/DF)$

Where:

NO_{x_e} = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm.

NO_{x_d} = Oxides of nitrogen concentration of the dilution air as measured, in ppm.

(3) CO_{mass} = Carbon monoxide emissions, in grams per mile.

$Density_{co}$ = Density of carbon monoxide is 32.97 g/ft³, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$CO_{conc.}$ = Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc.} = CO_e - CO_d(1-1/DF)$.

Where:

CO_e = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e = (1\text{–}0.01925\ \ CO_{2_e} - 0.000323\ R)\ CO_{em}$

Where:

CO_{em} = Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2_e} = Carbon dioxide concentration of the dilute exhaust sample, in percent.

R = Relative humidity of the dilution air, in percent (see § 86.142(n)).

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d = (1\text{–}0.000322\ R)\ CO_{dm}$.

Where:

CO_{dm} = Carbon monoxide concentration of the dilution air sample as measured, in ppm.

NOTE.—If a CO instrument which meets the criteria specified in § 86.111 is used and the conditioning column has been deleted, CO_{em} can be substituted directly for CO_e and CO_{dm} can be substituted directly for CO_d.

(4) $CO_{2_{mass}}$ = Carbon dioxide emissions, in grams per mile.

Density co_2 = Density of carbon dioxide is 51.85 g/ft³ (1.843 kg/m³), at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure.

$CO_{2_{conc.}}$ = Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2_{conc.}} = CO_{2_e} - CO_{2_d}$ (1-1/DF).

Where:

CO_{2_d} = Carbon dioxide concentration of the dilution air as measured, in percent.

(5) L = Cycle length, in mi (km)

$L = 0.75$ mi (0.21 km)

$DF = 13.4/[CO_{2_e} + (HC_e + CO_e) \cdot 10^{-4}]$

KH = Humidity correction factor.

$KH = 1/[1 - 0.0047 (H - 75)]$

for SI units $= 1/[1 - 0.0329 (H - 10.71)]$

Where:

V_o = Volume of gas pumped by the positive displacement pump, in cubic feet (ft³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure, in mm Hg (kPa).

P_1 = Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p = Average temperature of dilute exhaust entering positive displacement pump during test, R(K).

(c) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) Assume the following:

$V_o = 0.29344$ ft³/revolution; $N = 1{,}048$; $R = 48.0$ pct.; $R_e = 48.2$ pct.; $P_B = 762$ mm Hg; $P_d = 22.225$ mm Hg; $P_1 = 70$ mm Hg; $T_p = 570$ R; $HC_e = 105.8$ ppm, carbon equivalent; $NOx_e = 11.2$ ppm; $CO_{em} = 306.6$ ppm; $CO_{2_e} = 1.43$ pct.; $HC_d = 12.1$ ppm; $NOx_d = 0.8$ ppm; $CO_{dm} = 15.3$ ppm.

The basic procedures in § 86.144 are used to calculate mass emissions. Since the short test only has one phase the weighting formula in paragraph (a) of § 86.144 is not used. The mass emission values of paragraph (b) of § 86.144 are divided by the distance traveled, which, for the Federal Short Cycle, is 0.75 mi (1.2 km).

(2) The mass emission results for the Federal Short Cycle example are:

$HC_{mass} = [(259)(16.33)(95.03/1{,}000{,}000)]/(0.75)$.

$HC_{mass} = 0.534$ grams per vehicle mile.

$CO_{mass} = [(259)(32.97)(280/1{,}000{,}000)]/(0.75)$.

$CO_{mass} = 3.188$ grams per vehicle mile.

$NOx_{mass} = [(259)(54.16)(10.49/1{,}000{,}000)](0.75)$.

$NOx_{mass} = 0.196$ grams per vehicle mile.

Then:

$V_{mix} = (0.29344)(1{,}048)(762-70)(528)/(760)(570)$.

$V_{mix} = 259.0$ ft³.

$H = (43.478)(48.2)(22.225)/[762 - (22.225 \times 48.2/100)]$.

$H = 62$ grams/lb.

$K_H = 1/[1 - 0.0047(62-75)] = 0.9424$.

$CO_e = [1 - (0.01925)(1.43) - (0.000323)(48)](306.0)$

$CO_e = 293.4$ ppm.

$CO_d = [1 - (0.000323)(48)]15.3 = 15.1$ ppm.

$DF = 13.4/[1.43 + (105.8 + 293.4) \times 10^{-4})]$

$DF = 9.116$.

$HC_{conc.} = 105.8 - 12(1 - 1/9.116) = 95.03$ ppm.

$CO_{conc.} = 293.4 - 15.1(1 - 1/9.116) = 280.0$ ppm.

$NOx_{conc.} = 11.2 - 0.8(1 - 1/9.116) = 10.49$ ppm.

§ 85.2269 New Jersey/New York Composite test specifications.

(a) *Road load power and inertia weight settings.* All vehicles shall be tested at 3000 lb. inertia weight and 3.5 ± 1 hp @ 30 mph.

(b) *Transmission.* (1) Transmissions, overdrives and free wheeling units shall be operated in accordance with the manufacturers' recommendations to the ultimate purchaser as indicated in the owners manual or as supplied by EPA.

(2) Idle modes shall be run with automatic transmissions in "Drive" with the wheels braked and manual transmissions shall be in gear with the clutch disengaged.

(3) The vehicle shall be driven with minimum accelerator pedal movement to maintain the desired speed.

(4) Accelerations shall be driven smoothly according to the manufacturers' recommendation to the ultimate purchaser. For manual transmissions, the operator shall release the accelerator pedal during each shift and accomplish the shift with minimum time. If the vehicle cannot accelerate at the specified rate, the vehicle shall be operated with the accelerator pedal fully depressed until the vehicle speed reaches the value prescribed for that time in the driving schedule.

(5) The declaration modes shall be run in gear using brakes or accelerator pedal as necessary to maintain the desired speed. Manual transmission vehicles shall have the clutch engaged and shall not change gears from the previous mode. For those modes which decelerate to zero, manual transmission clutches shall be depressed when the speed drops below 15 mph (24 km/h), when engine roughness is evident, or when engine stalling is imminent.

(6) Downshifting is allowed at the beginning of or during a power mode in accordance with the manufacturers' recommendation to the ultimate purchaser.

(c) *Dynamometer procedure.* (1) The New Jersey/New York Composite test consists of a 75 second driving schedule composed of a series of constant rate accelerations, constant rate decelerations, and steady speed cruises. The exhaust emissions are diluted with ambient air and a continuously proportional sample is collected for analysis. The composite samples collected in bags are analyzed for hydrocarbons, carbon monoxide, carbon dioxide, and oxides of nitrogen. A parallel sample of the dilution air is similarly analyzed for hydrocarbon, carbon monoxide, carbon dioxide, and oxides of nitrogen.

(2) The vehicle engine compartment hood shall remain open for the duration of the NJ/NY Composite test. If vehicle overheating occurs (or is anticipated), a cooling fan(s) meeting the specifications set forth in § 85.2212(e) may be used.

(3) The vehicle speed as measured from the dynamometer rolls shall be used. The speed vs. time characteristics of each test shall be checked against the specification to assure test validity.

(4) Practice runs over the prescribed driving schedule may be performed at test points: *Provided*, An emission sample is not taken, for the purpose of finding the minimum throttle action to maintain the proper speed-time relationship, or to permit sampling system adjustments.

NOTE.—When using two-roll dynamometers a truer speed-time trace may be obtained by minimizing the rocking of the vehicle in the rolls. The rocking of the vehicle changes the tire rolling radius on each roll. This rocking may be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch.

(5) The drive wheels shall be at the pressure prescribed for operation of the vehicle on the road by the tire manufacturer. If the tires are at normal operating temperature (not cold) at the time of testing, the pressure may be 2 to 3 psi above the manufacturers' recommended pressure. The vehicle shall not be tested with underinflated tires.

(6) If the dynamometer has not been operated during the 2-hour period immediately preceding the test it shall be warmed up for 15 minutes by operating at 30 mph (48 km/h) using a non-test vehicle or as recommended by the dynamometer manufacturer.

(7) The inertia weight and road load power shall be set at 3000 lb. and 3.5±1 hp at 30 mph prior to testing.

(8) If the engine stalls at any point during the dynamometer run, that test shall be voided. The engine shall then be restarted and run at 2500 rpm ± 200 rpm in neutral for 15 to 30 seconds preceding a retest. This procedure shall be followed until a complete, valid test is run.

(d) *Test sequence.* (1) Adjust the dynamometer for the required road load and inertia.

(2) Drive or push test vehicle onto the dynamometer so that wheels are centered on rolls.

(3) Examine emission control information label to determine engine family and displacement. Record information on test report.

(4) Attach restraining device to vehicle in such a fashion that the vehicle is not damaged. Release dyno brake.

(5) With the sample selector valves in the "standby" position connect evacuated sample collection bags to the dilute exhaust and dilution air sample collection systems.

(6) Start the Constant Volume Sampler (if not already on), the sample pumps, the temperature recorder and the vehicle cooling fan. The heat exchanger of the constant volume sampler, if used, should be preheated to its operating temperature before the test begins.

(7) Adjust the sample flow rates to the desired flow rate (minimum of 10 cfh, 0.28 m³/hr) and set the gas flow measuring devices to zero.

NOTE.—CFV-CVS sampler flow rate is fixed by the venturi design.

(8) Attach adaptor(s) and exhaust collection tube(s) to vehicle tailpipe(s) (engine may be shutoff, if necessary).

(9) Attach engine speed pickup.

(10) Idle vehicle in neutral at 2,500 ±200 rpm for 15 to 30 seconds within 1 minute of beginning of dynamometer run.

(11) Place transmission in "Drive" or in gear with clutch disengaged.

(12) Start the gas flow measuring device, position the sample selector valves to direct the sample flow into the exhaust sample bag and the dilution air sample bag.

(13) Simultaneous with (12), turn on driver's aid and begin the initial acceleration of the driving schedule.

(14) Operate the vehicle according to the following dynamometer driving schedule:

Mode:		Times in mode (seconds)
1.	Idle	22
2.	0–30 mph (0–48 km/hr) acceleration	15
3.	30 mph (48 km/hr) cruise	15
4.	30–10 mph (48–16 km/hr) deceleration	12
5.	10 mph (16 km/hr) cruise	7
6.	10–0 mph (16–0 km/hr) deceleration	4
	Total	75

The speed at any given time on the dynamometer driving schedule must be within the tolerances given in § 86.115–78.

(15) At the end of the driving schedule, simultaneously turn off the gas flow measuring device and position the sample selector valve to the "standby" position. This ends the driving portion of the test.

(16) As soon as possible, tranfer the exhaust and dilution air samples to the analytical system and process them. A stabilized reading for the exhaust sample must be obtained within 20 minutes of the end of the sample collection phase of the test.

(17) Disconnect the engine speed pickup, adaptor(s), exhaust collection tube(s), and restraining device.

(18) Lock the dynamometer rolls and drive the vehicle off the dynamometer. This ends the test sequence.

(e) *Measurement operations.* The following sequence of operations shall be performed in conjunction with each service measurements:

(1) Zero the analyzers and obtain a stable zero reading. Recheck after tests.

(2) Introduce span gases and set instrument gains. In order to avoid corrections, span and calibrate at the same flow rates used to analyze the test sample. Span gases should have concentrations equal to 75 to 100 percent of full scale. If gain has shifted significantly on the analyzers, check the calibrations. Show actual concentrations on chart.

(3) Check zeros; repeat the procedure in paragraphs (e) (1) and (2) of this section if required.

(4) Check flow rates and pressures.

(5) Measure HC, CO, CO_2 and NOx concentrations of samples.

(6) Check zero and span points. If difference is greater than 2 percent of full scale, repeat the procedure in paragraphs (e) (1) through (5) of this section.

(f) *Records required.* The following information shall be recorded with respect to each test:

(1) Test number.

(2) Date and time of day for each test.

(3) Instrument operator.

(4) Driver or operator.

(5) Vehicle: Make; Model; Vehicle identification Number; Vehicle registration number and year; Vehicle Model year; Transmission type; Odometer reading; Engine displacement; Idle rpm; Fuel system (fuel injection, number of carburetors, number of carburetor barrels); Inertia loading; Vehicle registration weight; Actual road load at 50 mph (80 km/h); drive wheel tire pressures, as applicable; emission control technology.

(6) All pertinent instrument information such as tuning-gain-serial number-detector number-range. As an alternative, a reference to a vehicle test cell number may be used, with the advance approval of the EPA, provided test cell calibration records show the pertinent instrument information.

(7) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(8) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(9) Fuel temperatures, as prescribed.

(10) Pressure of the mixture of exhaust and dilution air entering the CVS metering device, the pressure increase across the device, and the temperature at the inlet. The temperature may be recorded continuously or digitally to determine temperature variations.

(11) The number of revolutions of the positive displacement pump accumulated during each test phase while exhaust samples are being collected. The number of standard cubic feet metered by a critical flow venturi during each test phase would be the equivalent record for a CFV–CVS.

(12) The humidity of the dilution air.

NOTE.—If conditioning columns are not used (see § 86.111–78) this measurement can be deleted. If the conditioning columns are used and the dilution air is taken from the test cell, the ambient humidity can be used for this measurement.

(g) *Test report.* A test report shall be completed in triplicate on a form approved by EPA and shall contain the information given below. One copy of this report should be given to the vehicle owner or his agent.

(1) Test type and driving schedule.

(2) VIN/License No.

(3) Owner's name and address.

(4) Car make, model, MY, engine size.

(5) Date of test.

(6) Odometer reading.

(7) Date of previous test on vehicle, if retest.

(8) Inertia and road load if applicable.

(9) Test site location, lane identification.

(10) Test results (including emission measurement values).

(11) Certification by instrument operator and driver that test was correctly performed.

§ 85.2210 New Jersey/New York composite test—calculations.

(a) For light duty vehicles and light duty trucks the mass emissions for each pollutant shall be computed by the following formulae:

(1) Hydrocarbon mass emissions:

$HC_{mass} = V_{mix} \times Density_{HC} \times (HC_{conc.} \times 10^{-4})/L$.

(2) Carbon monoxide mass emissions:

$CO_{mass} = V_{mix} \times Density_{CO} \times (CO_{conc.} \times 10^{-4})/L$.

(3) Oxides of Nitrogen mass emissions:

$NOx_{mass} = V_{mix} \times Density_{NO_2} \times K_H \times (NOx_{conc.} \times 10^{-4})/L$.

(4) Carbon dioxide mass emissions:

$CO_{2_{mass}} = V_{mix} \times Density_{CO_2} \times (CO_{2_{conc.}} \times 10^{-2})/L$.

(b) Meaning of symbols

(1) HC_{mass} = Hydrocarbon emissions, in grams per mile.

$Density_{HC}$ = Density of hydrocarbon is 16.33 g/ft³ (.5767 kg/m³), assuming an average carbon to hydrogen ratio of 1:1.85, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$HC_{conc.} = HC_e - HC_d$ (1-1/DF).

Where:

HC_e = Hydrocarbon concentration of the dilute exhaust sample in ppm carbon equivalent.

HC_d = Hydrocarbon concentration of the dilution air as measured, in ppm carbon equivalent.

(2) NOx_{mass} = Oxides of nitrogen emissions, in grams per mile.

$Density_{NO_2}$ = Density of oxides of nitrogen is 54.16 g/ft³ (1.913 kg/m³), assuming they are in the form of nitrogen dioxide, at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$NO_{conc.}$ = Oxides of nitrogen concentration of the dilute exhaust sample corrected for background, in ppm.

$NOx_{conc.} = NOx_e - NOx_d(1-1/DF)$.

Where:

NOx_e = Oxides of nitrogen concentration of the dilute exhaust sample as measured, in ppm.

NOx_d = Oxides of nitrogen concentration of the dilute air as measured, in ppm.

(3) CO_{mass} = Carbon monoxide emissions, in grams per mile.

$Density_{CO}$ = Density of carbon monoxide is 32.97 g/ft³), at 68°F (20°C) and 760 mm Hg (101.3 kPa) pressure.

$CO_{conc.}$ = Carbon monoxide concentration of the dilute exhaust sample corrected for background, water vapor, and CO_2 extraction, in ppm.

$CO_{conc.} = CO_e - CO_d$ (1-1/DF).

Where:

CO_e = Carbon monoxide concentration of the dilute exhaust sample volume corrected for water vapor and carbon dioxide extraction, in ppm. The calculation assumes the carbon to hydrogen ratio of the fuel is 1:1.85.

$CO_e = (1-0.01925\ CO_{2e} - 0.000323\ R)\ CO_{em}$.

Where:

CO_{em} = Carbon monoxide concentration of the dilute exhaust sample as measured, in ppm.

CO_{2e} = Carbon dioxide concentration of the dilute exhaust sample, in percent.

R = Relative humidity of the dilution air, in percent (see § 86.142(n)).

CO_d = Carbon monoxide concentration of the dilution air corrected for water vapor extraction, in ppm.

$CO_d = (1-0.000322\ R)\ CO_{dm}$.

Where:

CO_{dm} = Carbon monoxide concentration of dilution air sample as measured, in ppm.

NOTE.—If a CO instrument which meets the criteria specified in § 86.111 is used and the conditioning column has been deleted, CO_{em} can be substituted directly for CO_e and CO_{dm} can be substituted directly for CO_d.

(4) $CO_{2_{mass}}$ = Carbon dioxide emissions, in grams per mile.

Density $_{co_2}$ = Density of carbon dioxide is 51.85 g/ft³ (1.843 kg/m³), at 68° F (20° C) and 760 mm Hg (101.3 kPa) pressure

$CO_{2_{conc.}}$ = Carbon dioxide concentration of the dilute exhaust sample corrected for background, in percent.

$CO_{2_{conc.}} = CO_{2_e} - CO_{2_d}(1-1/DF)$.

Where:

CO_{2_d} = Carbon dioxide concentration of the dilution air as measured, in percent.

(5) L = Cycle length, in mi (km).

L = 0.28 mi (0.45 km).

$DF = 13.4/[CO_{2_e} + (HC_e + CO_e)\ 10^{-4}]$.

KH = Humidity correction factor.

$KH = 1/[1-0.0047(H-75)]$ for *SI* units = $1/[1-0.0329(H-10.71)]$.

Where:

H = Absolute humidity in grains (grams) of water per pound (kilogram) of dry air.

$H = [(43.478)\ R_e \times P_d]/[P_B - (P_e \times R_d/100)]$ for *SI* units, $H = (6.211)\ R_e \times P_d 2/P_B - (P_d \times R_d/100)]$.

R_e = Relative humidity of the ambient air, in percent.

P_d = Saturated vapor pressure, in mm Hg (kPa) at the ambient dry bulb temperature.

P_H = Barometric pressure, in mm Hg (kPa).

V_{mix} = Total dilute exhaust volume in cubic feet per test corrected to standard conditions (538 *B*) (293 *K*) and 760 mm Hg (101.3 kPa)).

For PDP-CVS, V_{MIX} is:

$$V_{mix} = V_e \times \frac{N(P_B - P_1)(528R)}{(760\text{ mm Hg})(T_p)}$$

for *SI* units,

$$V_{mix} = V_e \times \frac{N(P_B - P_1)(293.15K)}{(101.325\text{ kPa})(T_p)}$$

Where:

V_e = Volume of gas pumped by the positive displacement pump, in cubic feet (m³) per revolution. This volume is dependent on the pressure differential across the positive displacement pump.

N = Number of revolutions of the positive displacement pump during the test phase while samples are being collected.

P_B = Barometric pressure, in mm Hg (kPa).

P_1 = Pressure depression below atmospheric measured at the inlet to the positive displacement pump, in mm Hg (kPa) (during an idle mode).

T_p = Average temperature of dilute exhaust entering positive displacement pump during test, *R(K)*.

(c) Example calculation of mass values of exhaust emissions using positive displacement pump:

(1) Assume the following:

V_e = 0.29344 ft³/revolution; N = 1,048; R = 48.0 pct.; R_e = 48.2 pct.; P_B = 762 mm Hg; P_d = 22.225 mm Hg; P_1 = 70 mm Hg; T_p = 570 *R*; HC_e = 105.8 ppm, carbon equivalent; NOx_e = 11.2 ppm; CO_{em} = 306.6 ppm; CO_{2_e} = 1.43 pct. HC_d = 12.1 ppm; NOx_d = 0.8ppm; CO_{dm} = 15.3 ppm.

The basic procedures in § 86.144 are used to calculate mass emissions. Since the short test only has one phase the weighting formula in paragraph (a) of § 86.144 is not used. The mass emission values of paragraph (b) of § 86.144 are divided by the distance traveled, which, for the NJ/NY Composite test, is 0.28 mi (0.45 km).

Then:

$V_{mix} = (0.29344)(1,048)(762-70)(528)/(760)(570)$.

$V_{mix} = 259.0$ ft³.

$H = (43.478)(48.2)(22.225)/[762-(22.225 \times 48.2/100)]$.

$H = 62$ grams/lb.

$K_H = 1/[1-0.0047(62-75)] = 0.9424$.

$CO_e = [1-(0.01925)(1.43)-(0.000323)(48)](306.0)$.

$CO_e = 293.4$ ppm.

$CO_d = [1-(0.000323)(48)]15.3 = 15.1$ ppm.

$DF = 13.4/[1.43 + (105.8+293.4) \times 10^{-4})]$.

$DF = 9.116$.

$HC_{conc.} = 105.8-12(1-1/9.116) = 95.03$ ppm.

$CO_{conc.} = 293.4-15.1(1-1/9.116) = 280.0$ ppm.

$NOx_{conc.} = 11.2-0.8(1-1/9.116) = 10.49$ ppm.

(2) The mass emission results for the NJ/NY Composite test example are:

$HC_{mass} = [(259)(16.33)(95.03/1,000,000)]/(0.28)$.

$HC_{mass} = 1.435$ grams per vehicle mile.

$CO_{mass} = [(259)(32.97)(280/1,000,000)]/(0.28)$.

$CO_{mass} = 8.539$ grams per vehicle mile.

$NOx_{mass} = [(259)(54.16)(10.49/1,000,000)](0.28)$.

$NOx_{mass} = 0.525$ grams per vehicle mile.

§ 85.2211 [Reserved]

§ 85.2212 Dynamometer systems.

(a) *Dynamometer for Federal Short Cycle test.* (1) The dynamometer used for the Federal Short Cycle test shall be equipped with preselectable loads and inertia weights for the vehicles to be tested.

(2) The chassis dynamometer for the Federal Short Cycle test shall be capable of a minimum of 50 horsepower load absorption at 50 MPH repeatable to ±0.25 horsepower without control adjustment. Torque measurement signals shall be accurate to ±0.25 percent of full scale. Instrumentation shall be readable from the vehicle drivers seat and shall have readout accuracies within 1 percent of full scale for vehicle speed, engine RPM, torque and horsepower.

(3) The dynamometer to be used for the Federal Short Cycle test shall require inertia simulation loading from 1750 to 6000 pounds with automatic road load selections (horsepower and inertia) at 12 settings (from 1750 to 6000 pounds) that are in agreement with the specifications of § 86.129. The controls for the road load system should be capable of being interfaced with those for the variable inertia or being separated for individual load and inertia controls. An additional remote control device should be provided for the driver to set the dynamometer load when operating under separate load and inertia controls.

(b) *Dynamometer for NJ/NY Composite test.* The dynamometer used for the composite NJ/NY test shall be capable of setting a 3.5 HP load setting @ 30 mph with a 3000 lb inertia weight.

(c) *Vehicle restrainnig.* A vehicle restraining device is necessary to hold the vehicle on the dynamometer rolls effectively for both rear and front wheel drive vehicles.

(d) *Driver's aid.* A drivers aid device relating vehicle speed in MPH to time of test shall be used for variable speed mode tests as in paragraphs (a) and (b) of this section. While it is preferable to use preprinted or computer-drawn charts approved by the administrator for purposes of record keeping and driver test validity, computer-controlled oscilloscopes or digital readout devices can be employed for directing drivers but should be provided with a test validity check so that the speed-time tolerances are met as specified in § 86.115–78(b).

(e) *Cooling fan.* Cooling fan(s) are not normally needed for the short tests but some vehicles, when the ambient temperature exceeds 95° F, tend to overheat. In these cases it is permissible to use an engine cooling fan normally rated at 5300 CFM. The fan must have been certified for its capacity by the fan manufacturers and positioned as outlined in § 86.135–78(b).

(f) *RPM meter.* The engine rpm meter shall be AC powered and provided with an induction type pickup so that no tools will be needed for attachment to the ignition system.

§ 85.2213 Exhaust gas sampling system.

(a) *General.* The exhaust gas sampling systems used in the Federal Short Cycle Test and the composite New Jersey/New York Test are identical. The Federal Short Cycle Test and the composite New Jersey/New York Test employ Variable Speed Modes. Density of sampling systems to be used in these tests are designed to measure the true mass emissions of vehicles.

(b) *Mass Emission Exhaust Sampling Systems.* The requirements are identical to those described in § 86.109–78(a) and the component descriptions in § 86.109–78 (b) and (c).

§ 85.2214 Calibration procedures for transient mode tests.

(a) *Calibration of dynamometer.* The dynamometer system for transient mode tests shall be calibrated in accordance with the manufacturers basic instructions and then with the procedure outlined in § 86.118–78. The following conditions shall constitute an acceptable calibration of the system components.

(1) Four or more data points shall be measured that adequately span the horsepower range of the vehicles to be tested on the dynamometer.

(2) The minimum range covered by the data points shall be 20 horsepower.

(b) *Calibration of driver's aid.* The drivers aid device shall be calibrated for time and speed accuracy as follows:

(1) The calibration of the unit for time shall be performed using a timer with an accuracy of ±0.1 second in 60 minutes to measure the total time for the travel of the preprinted chart or computer actuated trace and the accuracy at any point shall be within ±0.2 second. The measurement shall be repeated with adjustments as needed until the accuracy is attained.

(2) The speed indication shall be calibrated by measuring the relationship between the RPM of the rolls and the readout in mph of the recorder. The relationship is expressed by the formula,

$$\text{mph} = \frac{\text{RPM} \times \Pi \times D}{1056}$$

where D equals roll diameter in inches and mph is determined to one significant decimal place.

(3) The calibration shall be performed with the use of a precision tachometer (accuracy = ±1 percent F.S. or better) to determine the RPM of the roll normally connected to the system tachometer. One reading shall be taken at 1800 rpm roll speed and a second reading 900 RPM roll speed in order to establish linearity of the system. Perform any adjustments needed to make MPH indicator of system read accurately at zero and the two points represented above.

(4) After this calibration, the system MPH meter can be used to calibrate the speed (MPH) portion of the Driver's aid recorder.

(c) *Calibration of CVS.* The requirements are identical to those described in § 86.119–78.

(d) *Calibration of HC Analyzer.* The requirements are identical to those described in § 86.121–78.

(e) *Calibration of CO Analyzer.* The requirements are identical to those described in § 86.122–78.

(f) *Calibration of NO_x Analyzer.* The requirements are identical to those described in § 86.123–78.

(g) *Calibration of CO_2 Analyzer.* The requirements are identical to those described in § 86.124–78.

(h) *Calibration of Other Equipment.* The requirements are identical to those described in § 86:126–78.

(i) *Frequency of analyzer calibrations.* The requirements are identical to those described in § 86.116–78(c)(1)(3), (d)(1)(2), (e), (f).

(j) *Frequency of dynamometer calibration.* The frequency of dynamometer calibration and the associated equipment used for testing shall, in general, be performed as often as required by the individual manufacturers of the equipment. In order to insure good standards of performance, however, both vehicle conformance checks and quality control calibrations should be performed as follows:

(1) Cross checks shall be made weekly on dynamometer systems using a vehicle with uniform or repeatable emissions to find the correlation between dynamometers and establish an acceptable degree of uniformity. Of necessity, this final emission test involves individual calibrations of the CVS (§ 85.2214–(c)) and the analytical instruments (§ 85.2214–(d) through (g)) in addition to the chassis dynamometer calibration. A desirable alternative method is to use a vehicle with repeatable emissions that has been equipped with analytical instruments and calibration gases, thereby reducing the unknowns to the CVS and chassis dynamometer.

(2) The dynamometer system shall be calibrated at least monthly according to paragraph (a) of this section unless dynamometer maintenance has been performed which could alter the calibration. In that case, or if performance cross checks show deterioration, the calibration should be made as soon as possible.

(k) *Frequency of calibration of other equipment.* Other test equipment shall be calibrated as often as required by the manufacturer or as necessary according to good engineering practice.

§ 85.2215 [Reserved]

§ 85.2216 Steady state modal test specifications, overview.

The steady state modal exhaust emission short test consists of vehicle operation over 3 steady state modes during which undiluted exhaust samples are analyzed for hydrocarbon, carbon monoxide and oxides of nitrogen.

§ 85.2217 Steady state modal test procedures, general requirements.

(a) Vehicles shall be tested in the configuration in which they arrive at the test site, with no preconditioning or vehicle preparation. Vehicles shall be tested at the ambient temperatures encountered at the test sites. Vehicles shall be approximately level during the test sequence to prevent abnormal fuel distribution.

(b) Exhaust samples shall be taken from both tailpipes on vehicles having more than one tailpipe exhaust outlet. The pollutant concentration level shall be measured for exhaust samples from each tailpipe according to the procedures outlined in this subpart and then the average emission level of the two tailpipe exhaust samples shall be reported as the official test results.

§ 85.2218 Clayton Key Mode test specifications.[1]

(a) Transmission ranges, speed ranges, and road load power settings. Transmission ranges, speed ranges, and road load power settings shall be determined according to the following schedule:

Vehicle weight class (lb)	Transmission, range/gear	Dyno load hp at mph	High-speed cruise	Low-speed cruise	Idle [1]
Up to 2,800 lb	Drive for auto trans; high gear (3d) for manual trans.	15 at 38	36 to 38	22 to 25	Automatic transmission in drive.
2,801 to 3,800 lb	Drive for auto trans; high gear for manual trans.	24 at 46	44 to 46	29 to 32	Do.
3,801 lb and up	do	30 at 50	46 to 50	32 to 35	Do.

[1] Tests in which the idle speed is not within ±100 rpm of manufacturers specification shall be declared invalid.

(b) Test weights. A complete listing of all vehicle/engine displacement combinations and their respective inertia test weights must be available at each test site prior to initiation of testing.

(c) Dynamometer procedure: (1) During the steady state exhaust emission test, the raw exhaust is collected via a sample probe(s) (as described in § 85.2222(m)) inserted directly into the vehicle tailpipe(s). The undiluted exhaust is analyzed continuously while the vehicle is run on the dynamometer in three steady state modes, and the emission levels are monitored and recorded upon stabilization of readings. Pollutant emission levels are read and reported as volumetric concentrations, expressed in parts per million of hydrocarbons and oxide of nitrogen and in percent (by volume) for carbon monoxide.

(2) Under normal test conditions, and normal vehicle operation, no cooling fan shall be in use. The vehicle engine compartment hood shall remain open during the dynamometer run. However, if problems with vehicle overheating are encountered or anticipated, a cooling fan(s) meeting the requirements set forth in § 86.135–78(b) may be used.

(3) The vehicle speed as measured from the dynamometer rolls shall be

[1] Clayton Key Mode is a proprietary procedure for which a patent has been applied for by the Clayton Manufacturing Company, which company has stated that it will charge fees for the use of this test procedure.

used for speed determination during the high speed and low speed modes. The speed of each test shall be checked against the specification to assure test validity.

(4) Rocking of the test-vehicle on a two-roll dynamometer shall be minimized by restraining the vehicle horizontally (or nearly so) by using a cable and winch restraining device.

(5) The drive wheels shall be at the pressure prescribed for operation of the vehicle on the road by the tire manufacturer. If the tires are at normal operating temperature (not cold) at the time of testing, the pressure may be 2 to 3 psi above the manufacturers' recommended pressure. The vehicle shall not be tested with underinflated tires.

(6) If the dynamometer has not been operated during the 2 hour period immediately preceding the test, it shall be warmed up for 15 minutes at 30 mph using a non-test vehicle or as recommended by the manufacturer.

(7) If the engine stalls at anytime during one of the steady-state tests, the engine shall be restarted and idled at 2,500±200 rpm for 15–30 seconds and the test resumed at the point of the stall.

(d) Test sequence: (1) Drive or push test vehicle onto the dynamometer so that drive wheels are centered on rolls.

(2) Attach restraining device to vehicle in such a fashion that the vehicle is not damaged.

(3) Open engine compartment and attach engine speed pickup.

(4) Insert sample probe(s) into tailpipe(s).

(5) Examine emission control information label to determine engine family and displacement. Record information on test report.

(6) Adjust dynamometer for the required road load.

(7) Calibrate analyzers according to § 85.2223(c) within 1 hour of the beginning of each test.

(8) Idle vehicle in neutral at 2500± 200 rpm for 15 to 30 seconds within 1 minute of start of each test.

(9) Run test vehicle in high speed mode until emission levels stabilize or for a maximum of 2 minutes.

(10) Record concentration of HC, CO, and NOx upon stabilization or record the highest reading obtained during the last 30 seconds of the 2 minute test period.

(11) Run vehicle in low speed mode until emission levels stabilize or for a maximum of 2 minutes.

(12) Record concentrations of HC, CO, and NOx upon stabilization or record the highest reading reached during the final 30 seconds of the 2 minute test period.

(13) Idle vehicle in drive until emission levels stabilize or for a maximum of 2 minutes.

(14) Record concentrations of HC, CO, and NOx upon stabilization or record the highest reading reached during the last 30 seconds of the 2 minute sampling periods.

(15) Remove sample probe(s).

(16) Remove engine speed pickup and close engine compartment.

(17) Release restraining device.

(18) Lock dynamometer rolls.

(19) Drive vehicle off of dynamometer.

(e) Record required: The following information shall be recorded with respect to each test:

(1) Test number.

(2) Date and time of day for each test.

(3) Instrument operator.

(4) Driver or operator.

(5) Vehicle: Make; Model; Vehicle identification number; Model year; vehicle registration number and year; Transmission type; Odometer reading; Engine displacement; Idle rpm; Fuel system (fuel injection, number of carburetors, number of carburetor barrels); Inertia loading; vehicle registration weight; Actual road load at 50 mph (80 km/h); drive wheel tire pressure, and applicable emission control technology.

(6) All pertinent instrument information such as tunning; gain; serial number; detector number; range. As an alternative, a reference to a vehicle test lane number may be used, with the advance approval of the Administrator, provided test lane calibration records show the pertinent instrument information.

(7) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(8) Test cell barometric pressure, ambient temperature and humidity.

NOTE: A central inspection station barometer may be used: *Provided*, That individual test lane barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(9) Readings obtained during each of the three test modes shall be the final reported emission levels, expressed in ppm for HC and NOx with CO expressed in percent by volume.

(f) Test report: A test report shall be completed in triplicate on a form approved by EPA and shall contain the following information. One copy shall be given to the vehicle owner or his agent.

(1) Test type and driving schedule.

(2) VIN/License No.

(3) Owner's name and address.

(4) Car make, model, MY, engine size, group.

(5) Date of test.

(6) Odometer reading.

(7) Date of previous test on vehicle, if retest.

(8) Inertia and road load if applicable.

(9) Test site location, lane identification.

(10) Test results (including emission measurement values).

(11) Certification by instrument operation and driver that test was correctly performed.

§ 85.2219 Federal Three Mode test specifications.

(a) Transmission ranges, speed ranges, and road load power settings. Transmission ranges, speed ranges, and road load power settings shall be determined according to the following schedule:

Vehicle weight class (lb)	Transmission range	High-speed mode		Low-speed mode		Idle mode [1]
		Speed (mph)	Load (hp)	Speed (mph)	Load (hp)	
Up to 2,500 lb	Drive for auto trans; high (3d) gear for manual trans.	50	21	30	9	Automatic transmission in neutral.
2,501 to 3,500 lb	Drive for auto trans; high gear for manual trans.	50	26	30	12	Do.
3,501 to 4,500 lb	do	50	31	30	15	Do.
Above 4,501 lb	do	50	36	30	18	Do.

[1] Test in which the idle speed is not within ±100 rpm of manufacturer's specification shall be declared invalid.

(b) Test weights. A complete listing of all vehicle/engine displacement combinations and their respective inertia test weights shall be provided to each test site prior to initiation of testing.

(c) Dynamometer procedure:

(1) During the steady state exhaust emission test, the raw exhaust is collected via a sample probe(s) (as described in § 85.2222(m)) inserted directly into the vehicle tailpipe(s). The undiluted exhaust is analyzed continuously while the vehicle is run on the dynamometer in three steady state modes, and the emission levels are monitored and recorded upon stabilization of readings. Pollutant emission levels are read and reported as volumetric concentrations, expressed in parts per million of hydrocarbons and oxides of nitrogen and in percent (by volume) for carbon monoxide.

(2) Under normal test conditions, and normal vehicle operation, no cooling fan shall be in-use. The vehicle engine compartment hood shall remain open during the dynamometer run. However, if problems with vehicle overheating are encountered or anticipated, a cooling fan(s) meeting the requirements set forth in § 86.135–78(b) may be used.

(3) The vehicle speed as measured from the dynamometer rolls shall be used for speed determination during the high speed and low speed modes. The speed of each test shall be checked against the specification to assure test validity.

(4) Rocking of the test vehicle on a two-roll dynamometer shall be minimized by restraining the vehicle horizontally (or nearly so) by using cable and winch.

(5) The drive wheels shall be at the pressure prescribed for operation of the vehicle on the road by the tire manufacturer. If the tires are at normal operating temperature (not cold) at the time of testing, the pressure may be 2 to 3 psi

above the manufacturers' recommended pressure. The vehicle shall not be tested with underinflated tires.

(6) If the dynamometer has not been operated during the 2 hour period immediately preceding the test, it shall be warmed up for 15 minutes at 30 mph using a non-test vehicle or as recommended by the manufacturer.

(7) If the engine stalls at anytime during one of the steady state tests, the engine shall be restarted and idled at 2500 ± 200 rpm for 15–30 seconds and the test resumed at the point of the stall.

(d) Test sequence: (1) Drive or push test vehicle onto the dynamometer so that drive wheels are centered on rolls.

(2) Attach restraining device to vehicle in such a fashion that the vehicle is not damaged.

(3) Open engine compartment and attach engine speed pickup.

(4) Insert sample probe(s) into tailpipe(s).

(5) Examine emission control information label to determine engine family and displacement. Record information on test report.

(6) Adjust dynamometer for the required road load.

(7) Calibrate analyzers according to § 85.2223(c) within 1 hour of the beginning of each test.

(8) Idle vehicle in neutral at 2,500± 200 rpm for 15 to 30 seconds within 1 minute of start of each test.

(9) Run test vehicle in high speed mode until emission levels stabilize or for a maximum of 2 minutes.

(10) Record concentration of HC, CO, and NOx upon stabilization or record the highest reading obtained during the last 30 seconds of the 2 minute test period.

(11) Run vehicle in low speed mode until emissions levels stabilize or for a maximum of 2 minutes.

(12) Record concentrations of HC, CO, and NO_x upon stabilization or record the highest reading reached during the final 30 seconds of the 2 minute test period.

(13) Idle vehicle in neutral until emission levels stabilize or for a maximum of 2 minutes.

(14) Record concentrations of HC, CO, and NO_x upon stabilization or record the highest reading reached during the last 30 seconds of the 2 minutes sampling period.

(15) Remove sample probe(s).

(16) Remove engine speed pickup and close engine compartment.

(17) Release restraining device.

(18) Lock dynamometer rolls.

(19) Drive vehicle off of dynamometer.

(e) Records required: The following information shall be recorded with respect to each test:

(1) Test number.

(2) Date and time of day for each test.

(3) Instrument operator.

(4) Driver or operator.

(5) Vehicle: Make; model; vehicle identification number; model year; vehicle registration number and year; transmission type; odometer reading; engine displacement; idle rpm; fuel system (fuel injection, number of carburetors, number of carburetor barrels); inertia loading; vehicle registration weight; actual road load at 50 mph (80 km/h); drive wheel tire pressure, as applicable; emission control technology.

(6) All pertinent instrument information such as tuning; gain; serial number; detector number; range. As an alternative, a reference to a vehicle test lane number may be used, with the advance approval of the Administrator, provided test lane calibration records show the pertinent instrument information.

(7) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(8) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test cell barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(9) Readings obtained during each of the three test modes shall be the final reported emission levels, expressed in ppm for HC and NOx with CO expressed in percent by volume.

(f) Test report: A test report shall be completed in triplicate on a form approved by EPA and shall contain the following information. One copy shall be given to the vehicle owner or his agent.

(1) Test type and driving schedule.

(2) VIN/License No.

(3) Owner's name and address.

(4) Car make, model, MY, engine size.

(5) Date of test.

(6) Odometer reading.

(7) Date of previous test on vehicle, if retest.

(8) Inertia and road load if applicable.

(9) Test site location, lane identification.

(10) Test results (including emission measurement values).

(11) Certification by instrument operation and driver that test was correctly performed.

§ 85.2220 Equipment specifications—steady state modal tests.

Equipment which is equivalent in all material respects to that described in §§ 85.2211 to 85.2214 may be used for steady state short tests. However, equipment described in §§ 85.2221 and 85.2222 may also be used.

§ 85.2221 Dynamometer System.

(a) *General requirements.* Steady state tests such as the Federal Three Mode and the Key Mode require a dynamometer with a power absorption unit but no inertia simulation. The same type of dynamometer specified in § 85.2212(a) can be used with the inertia assembly disengaged.

(b) *Road load power settings.* Road load power for the dynamometer shall be set according to the individual test requirements.

(c) *Dynamometer tolerance requirements.* The chassis dynamometer used for steady state tests shall be capable of a minimum of 50 HP load absorption at 50 MPH that is repeatable to ±0.25 HP without control readjustment. Torque measurement signals shall be accurate to ±0.25% of full scale. Instrumentation shall be readable from the vehicle drivers seat and shall have readout accuracies within 1% of full scale for vehicle speed, engine RPM, torque and horsepower.

(d) *Vehicle restraining device.* A vehicle restraining device is necessary to hold the vehicle on the dynamometer rolls effectively for both front and rear-wheel driven vehicles.

(e) *Driver's aid.* A drivers aid device is not required but verification of vehicle speed by recording is necessary.

(f) *Cooling fan.* External cooling fans are not normally needed for the short tests, but some vehicles, when the ambient temperature exceeds 95°F, tend to overheat. In these cases it is permissible to use an engine cooling fan normally rated at 5300 CFM. The fan must have been certified for its capacity by the fan manufacturer and positioned as outlined in § 86.135–78(b).

(g) *RPM meter.* The engine rpm meter shall be AC powered and be provided with an induction type pickup so that no tools will be needed for attachment to the ignition system.

§ 85.2222 Exhaust gas sampling system.

(a) *General.* The existing sampling systems available for use in short tests are designed to sample the raw engine exhaust and determine the concentration of the pollutants by volume. The sample handling system is an integral part of the exhaust gas analyzer package and includes the pumps, valves, filters, moisture separator, lines, detectors, meters and sample probes.

(b) *Analyzer operation, maintenance, and durability.* The analyzer shall be simple to operate and maintain by garage personnel. The analyzer shall have sufficient durability and ruggedness for frequent use and continuous analysis at various vehicle exhaust flow rates for long periods in a garage environment.

(c) *Continuous measurement.* The instruments shall be capable of continuously measuring the concentration of carbon monoxide, hydrocarbons, and/or oxides of nitrogen in vehicle exhaust emissions during a succession of "Idle Mode", "Key Mode" and/or other short inspection tests.

(d) *Instrument readout.* A direct meter readout is required for each pollutant measured and an automatic or semi-automatic digital emission indication is desirable, with a voltage output capable of continuously interfacing with a digital indicator or computer for recording vehicle exhaust emissions.

(e) *Analyzer ranges.* The analyzers shall have either a multiple range or expanded scale presentation that provides the following approximate capabilities:

Maximum Ranges=0–10% CO, 0–2000 ppm HC, 0–2000 ppm NO. Minimum Graduations=0.05% CO, 5 ppm HC, 10 ppm NO.

(f) *Accuracy.* The accuracy of the analyzer shall be closer than ±3% of the full scale reading for all ranges.

(g) *Response time.* The response time for an exhaust gas sample introduced at

the probe shall be less than 10 seconds for 90% of the reading.

(h) *Calibration check.* The system shall contain a convenient calibration check for performance testing. The calibration method may be a gas standard or other mechanical or electrical method. Air may be used for zero checking.

(i) *Warm-up time.* Warm-up time shall be as short as possible, but not greater than 30 minutes from a cold start.

(j) *Electronic circuitry.* All electronics circuitry should be solid state.

(k) *Zero and span procedures.* Zeroing and spanning of the individual instruments of the system shall be performed before and after each emission test using the instrument manufacturers recommended methods, or other method if shown to be more satisfactory.

(l) *Sample line.* The sampling probe and sample line shall be long enough to cool the exhaust gas to a temperature sufficient to condense the water of combustion, so that there is no possibility of moisture condensing in the infrared cell or sampling handling system outside of the moisture separator and water drain, and that the specific humidity of the exhaust sample gas remain relatively constant so as not to cause undue interference. The moisture separator should be of such design that it does not require cooling water.

(m) *Sample probe.* The sample probe shall be of a replaceable type and shall be made from stainless steel tubing (or other inert metal) that is not less than ¼" inner diameter (I.D.) and not greater than ⅜" outer diameter (O.D.). The probe shall be of rugged construction, especially in the area where the probe is connected to the sample line, and be equipped with an insulated handle of proper length for easy use. The insertion end of the probe tubing shall be closed and the exhaust gas sample shall be drawn through four ⅛" holes regularly spaced away from the closed end.

(n) *Repeatability.* Repeatability of the system shall be ±1% of full scale during five successive samples of the same gas source over a one hour period of continuous operation. The zero and drift of a warm-up system shall be less than ±1% of full scale during an 8 hour period of continuous operation.

§ 85.2223 Calibration procedures—steady state modal tests.

(a) *Dynamometer calibration.* The dynamometer system described in § 85.2212(a) shall be calibrated in accordance with the manufacturer's basic instructions and then with the procedure specified in § 86.118–78 except that for use in these steady mode short tests, no inertia simulation is used (Item 3). The following conditions shall constitute an acceptable calibration of the system components:

(1) Four or more data points shall be measured that adequately span the horsepower range of the vehicles to be tested on the dynamometer.

(2) The minimum range covered by the data points shall be 20 horsepower.

(b) *Analyzer calibration.* Instruments shall be calibrated at least once during each testing day (usually just previous to the commencement of testing) in accordance with the manufacturer's instructions. Cross checks shall be made weekly using calibration gases of known accuracy that are related to N.B.S. standards. A desirable alternative method is to use a vehicle with repeatable emissions that has been equipped with analytical instruments and calibration gases, thereby reducing the unknowns.

(c) *Frequency of calibration.* The frequency of dynamometer calibration and the associated equipment used for testing shall, in general, be performed as often as required by the individual manufacturers of the equipment. In order to insure good standards of performance, however, both vehicle conformance checks and quality control calibrations should be performed as follows:

(1) Cross checks shall be made weekly on dynamometer systems using a vehicle with uniform or repeatable emissions to confirm the correlation between dynamometers and establish an acceptable degree of conformance. Of necessity this final emission test involves individual calibrations of the analytical instruments and gas correlation in addition to the chassis dynamometer calibration. A desirable alternative method is to use a vehicle with repeatable emissions that has been equipped with analytical instruments and calibration gases, thereby reducing the unknowns.

(2) The dynamometer system shall be calibrated at least monthly according to paragraph (a) of this section unless dynamometer maintenance has been performed which could alter the calibration. In that case, or if performance cross checks show deterioration, the calibration should be made as soon as possible.

§ 85.2224 [Reserved]

§ 85.2225 Idle test specifications.

(a) *General requirements.* Raw exhaust is collected via a sample probe(s) (as described in § 85.2222(m)) which is inserted into the vehicle tailpipe(s) while the vehicle idles in neutral at normal idle speed. The undiluted exhaust is analyzed continuously for the duration of the idle period, and the pollutant concentrations are read and recorded upon stabilization (or at the end of a 2 minute sample period). Emission concentrations are reported in ppm (by volume) for hydrocarbons and percent (by volume) for carbon monoxide.

(1) Vehicles shall be tested in the configuration in which they arrive at the test site, with no preconditioning or vehicle preparation. Vehicles shall be tested at the ambient temperatures encountered at the test sites. Vehicles shall be approximately level during the test sequence to prevent abnormal fuel distribution.

(2) Exhaust samples shall be taken from both tailpipes on vehicles which have more than one tailpipe exhaust outlet. The pollutant concentration levels shall be measured for exhaust samples from each tailpipe according to the procedures outlined in this subpart and then the average emission level of the two tailpipe exhaust samples shall be reported as the official test results.

(3) Under normal test condition, and normal vehicle operation, no cooling fan shall be used.

(4) If the engine stalls at any time during idle test, the engine shall be restarted and idled at 2500±200 rpm for 15–30 seconds and the test resumed.

(b) *Test sequence.* (1) Drive vehicle into test area.

(2) Attach engine speed pickup.

(3) Insert sample probe(s) into tailpipe(s).

(4) Calibrate analyzers according to § 85.2223(c) within 1 hour of the beginning of each test.

(5) Idle vehicle in neutral at 2500±200 rpm for 15 to 30 seconds within 1 minute of start at each test.

(6) Idle vehicle in neutral until emission levels stabilize or for a maximum of 2 minutes.

(7) Record concentrations of HC and CO upon stabilization or record the highest reading reached during the last 30 seconds of the 2 minute sampling period.

(8) Remove sample probe(s).

(9) Remove engine speed pickup.

(10) Drive vehicle out of test area.

(c) *Records required.* The following information shall be recorded with respect to each test:

(1) Test number.

(2) Date and time of day for each test.

(3) Instrument operator.

(4) Driver or operator.

(5) Vehicle: Make; model; vehicle identification number; model year; vehicle registration number and year; transmission type; odometer reading; engine displacement; idle rpm; fuel system (fuel injection, number of carburetors, number of carburetor barrels); inertia loading; vehicle registration weight; actual road load at 50 mph (80 km/h); drive wheel tire pressure, as applicable; emission control technology.

(6) All pertinent instrument information such as tuning; gain; serial number; detector number; range. As an alternative, a reference to a vehicle test lane number may be used, with the advance approval of EPA, provided test lane calibration records show the pertinent instrument information.

(7) Recorder charts: Identify zero, span, exhaust gas, and dilution air sample traces.

(8) Test cell barometric pressure, ambient temperature and humidity.

NOTE.—A central laboratory barometer may be used: *Provided*, That individual test lane barometric pressures are shown to be within ±0.1 percent of the barometric pressure at the central barometer location.

(d) *Test report.* A test report shall be completed in triplicate on a form approved by EPA and shall contain the following information. One copy shall be given to the vehicle owner or his agent.

(1) Test type and driving schedule.

(2) VIN/License No.

(3) Owners name and address.

(4) Car make, model, MY, engine size.

(5) Date of test.

(6) Odometer reading.

(7) Date of previous test on vehicle, if retest.

(8) Inertia and road load if applicable.

(9) Test site location, lane identification.

(10) Test results (including emission measurement values).

(11) Certification by instrument operation and driver that test was correctly performed.

§ 85.2226 Equipment specifications—idle test.

The equipment described in §§ 85.2227 and 85.2228 shall be used in idle mode tests.

§ 85.2227 Dynamometer system.

None required.

§ 85.2528 Exhaust gas sampling system.

(a) *General.* The existing sampling systems available for use in short tests are designed to sample the raw engine exhaust and determine the concentration of the pollutants by volume. The sample handling system is an integral part of the exhaust gas analyzer package and includes the pumps, valves, filters, moisture separator, lines, detectors, meters, and sample probes.

(b) *Analyzer operation, maintenance, and durability.* The analyzer shall be simple to operate and maintain by garage personnel. The analyzer shall have sufficient durability and ruggedness for frequent use and continuous analysis at various vehicle exhaust flow rates for long periods in a garage environment.

(c) *Continuous measurement.* The instruments shall be capable of continuously measuring the concentration of carbon monoxide and hydrocarbons in vehicle exhaust emissions during an "Idle Mode".

(d) *Instrument readout.* A direct meter readout is required for each pollutant measured and an automatic or semi-automatic digital emission indication is desirable, with a voltage output capable of continuously interfacing with a digital indicator or computer for recording vehicle exhaust emissions.

(e) *Analyzer ranges.* The analyzers shall have either a multiple range or expanded scale presentation that provides the following approximate capabilities:

Maximum ranges—0—10 percent CO, 0–2000 ppm HS.
Minimum graduations—0.05 percent CO, 10 ppm HC.

(f) *Accuracy.* The accuracy of the analyzer shall be closer than ±3 percent of the full scale reading for all ranges.

(g) *Response time.* The response time for an exhaust gas sample introduced at the probe shall be less than 10 seconds for 90 percent of the reading.

(h) *Calibration check.* The system shall contain a convenient calibration check for performance testing. The calibration method may be a gas standard or other mechanical or electrical method. Air may be used for zero checking.

(i) *Warm-up time.* Warm-up time shall be short as possible, but not greater than 30 minutes from a cold start.

(j) *Electronic circuitry.* All electronics circuitry should be solid state.

(k) *Zero and span procedures.* Zeroing and spanning of the individual instruments of the system shall be performed before and after each emission test using the instrument manufacturers' recommended methods, or other method if shown to be more satisfactory.

(l) *Sample line.* The sampling probe and sample line shall be long enough to cool the exhaust gas to a temperature sufficient to condense the water of combustion. This is to assure that no moisture condenses in the infrared cell or sample handling system outside of the moisture separator and water drain, and to assure that the specific humidity of the exhaust sample gas remains relatively constant so as not to cause undue interference. The moisture separator should be of such design that it does not require cooling water.

(m) *Sample probe.* The sample probe shall be of a replaceable type and it shall be made from stainless steel tubing (or other inert metal) that is not less than ¼" I.D. and not greater than ⅜" O.D. The probe shall be of rugged construction, especially in the area where the probe is connected to the sample line, and be equipped with an insulated handle of proper length for easy use. The insertion end of the probe tubing shall be closed and the exhaust gas sample shall be drawn through four ⅛" holes regularly spaced away from the closed end.

(n) *Repeatability.* Repeatability of the system shall be ±1 percent of full scale during five successive samples of the same gas source over a one hour period of continuous operation. The zero and drift of a warmed-up system shall be less than ±1 percent of full scale during an 8-hour period of continuous operation.

§ 85.2229 Calibration procedures—idle test.

(a) Instruments shall be calibrated in accordance with the manufacturers' instructions. Cross checks shall be made weekly using calibration gases of known accuracy that are related to N.B.S. standards. A desirable alternative method is to use a vehicle with repeatable emissions that has been equipped with analytical instruments and calibration gases, thereby reducing the unknowns.

Subpart X—Section 207(b) Short Test Cutpoint Methodology

§ 85.2301 General applicability.

The provisions of this subpart are applicable to 1979 and later model year light-duty vehicles and 1979 and later model year light-duty trucks.

§ 85.2302 Definitions.

The following definitions apply to this subpart beginning with the 1979 model year. Section 86.078–2 remains effective excepting those definitions which are hereby superseded and/or added.

"Car line" means a name denoting a class of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis). Car line does not consider any level of decor or opulence and is not generally distinguished by such characteristics as roof line, number of doors, seats or windows except for station wagons. Station wagons are considered to be different car lines than passenger cars.

"Contingency table analysis" is based upon the assumption that cutpoints can be found for one or more independent variables which will discriminate on the groups of the dependent variable. The selection of the cutpoints results in the a contingency table analysis it is sufficient to identify the number of important ent to identify the number of important groups into which the dependent variable needs to be classified. For the purposes of 207(b) implementation, there are only two such groups: vehicles which pass the FTP and vehicles which fail the FTP. Thus, Figure 1 shows the 207(b) application of a contingency table.

Predicted variable	(FTP) of—	
	Pass	Fail
Predictor variable (ST):		
Pass	Correctly passed vehicles, *PP*	Error of omission vehicles, E_o
Fail	Error of Commission vehicles, E_c	Correctly failed vehicles, *FF*

FIGURE 1

"E_c"=cars which are incorrectly failed by the ST (commission errors).

"E_o"=cars which are incorrectly passed by the ST (omission errors).

"*FF*"=cars which are correctly failed by the ST.

"*PP*"=cars which are correctly passed by the ST.

"Distribution Characteristics" means the curve which best fits the emissions data when plotted as emission levels vs the fraction of vehicles which exhibit each emission level. The curve fit is accomplished using standard statistical distributions such as the normal, log-normal, Weibull, etc.

"Engine size" means the displacement of the engine and is not dependent upon the "engine family" definition used in the vehicle certification process.

"Group" means a classification of vehicles into classes having the same manufacturer, engine displacement, cylinder block configuration (e.g. V–8, I–6, etc.), number of cylinders, fuel injection or carburetion (number of carburetors and number of carburetor venturies), emis-

sion control systems, inertia weight, and car line.

"Light-Duty Truck" means any motor vehicle, rated at 8,500 pounds GVW or less which has a vehicle curb weight of 6,000 pounds or under and which has a basic vehicle frontal area of 46 square feet or less, which is: (1) Designed primarily for purposes of transportation of property or is a derivation of such a vehicle or (2) designed primarily for transportation of persons and having a capacity for more than 12 persons, or (3) available with special features enabling off-street or off-highway operation and use.

"Light-Duty Vehicle" means a passenger car or passenger car derivative capable of seating 12 passengers or less.

"Make" means the division or similar name within a manufacturing corporation which appears on the vehicle, e.g., Chevrolet, Mercury, Dodge etc.

"Manufacturer" means the major financial entity whose diyisions market vehicles, e.g. General Motors, Ford Motor Company etc.

"Short Test Rejection Ratio" means the ratio of vehicles failing the short test to vehicles failing the FTP. Expressed as an (E_c equation: $STRR=(E_c+FF)/(E_c+FF)$.

"Short test variability" means the ratio of the standard deviation to the mean of the short test levels within a narrow range of FTP levels.

"Technology" is used to differentiate between diverse concepts used in meeting the emission standards, e.g. catalyst, "lean burn", thermal reactor, etc.

"Vehicle size and/or weight" uses the manufacturing corporation body coding to identify vehicles in a group, as this body coding is generally understood to differentiate between full size, intermediate size, compact, etc. vehicles.

§ 85.2303 Overview.

Short test cutpoints will be established on a yearly basis by the United States Environmental Protection Agency for the most recent model year light duty vehicles and light duty trucks for each of the approved short tests. These short test cutpoints will remain in effect for the useful life of each vehicle as defined in § 86.077–2.

§ 85.2304 Vehicle grouping.

(a) For the purposes of establishing short test cutpoints, vehicles will be grouped by make, engine size, vehicle size and/or weight, and the technology used to meet the emissions standards. Vehicles so classified will be defined as a "group."

(b) In order to reduce the number of groups, when two vehicles are the same except for make they will be classified into a single group. For example, Ford Granada and Mercury Monarch will be classified into the same group because they are built from the same manufacturer's body. However, more than one group will exist for this example of consolidation by body code because of the different engine options which are offered in this basic body.

(c) In order to facilitate the process of consolidation, manufacturers will be required to provide the Agency with the marketing model identifications which are derived from the same basic body type, the commonality of engines which are used across manufacturer brands, and the differences in technology that can exist within otherwise identical vehicles and can result in the establishment of a new group. This information is to be supplied to the Administrator by September 30 of the calendar year in which the new model year vehicles are introduced.

§ 85.2305 Data collection.

(a) Data which will be used in the establishment of the short test cutpoints will be collected from one or both of the following sources:

(1) Through the testing of consumer-owned production vehicles. The testing will be performed by the EPA or its contractors. Testing will occur at different locations throughout the country so that the data may be collected in a timely fashion. Additionally, the collection of data in several localities will account for the variations in weather which occur throughout the Nation, as these variations may impact the short test/FTP relationship.

(2) Through the extrapolation of assembly line test data acquired during production of representative samples of each vehicle group.

(b) Testing of these vehicles will consist of the FTP and each approved short test. The FTP will be performed as specified in the FEDERAL REGISTER for that model year vehicle, exclusive of evaporative emissions. The short test will be performed as specified under conditions which reflect real world vehicle inspection station conditions (i.e., ambient conditions, fuel used, etc).

(c) Approximately fifty vehicles will be tested in each group. This sample size is selected because it is the smallest size which is judged to be capable of producing statistically viable results on the effects of production variables as these variables impact on the short test and FTP results.

(d) If the Administrator determines that sufficient evidence of commonality exists, groups of vehicles may be combined in order to minimize the amount of testing required and the number of different cutpoints which must be established. Manufacturers of vehicle groups which have been combined may submit test data to the Administrator to support claims that particular groups of vehicles should not (or should no longer) be included in combined groups. Based upon available data the Administrator may combine or separate vehicles groups at any time subsequent to the establishment of the initial cutpoints.

§ 85.2306 Short test cutpoint selection.

(a) Short test cutpoints will be selected for each vehicle group based upon the analytical technique described in § 85.2307 and the cutpoint selection methodologies described in § 85.2308.

(b) Manufacturers will be given two weeks to review the selected cutpoints before they are promulgated. Unless the manufacturers can submit data indicating why the selected cutpoints are not appropriate for one or more of their car groups, the cutpoints will become effective.

(c) Cutpoint information will be on file at the U.S. Environmental Protection Agency, Public Information Reference Unit, Rm. 2922, 401 M Street, SW., Washington, D.C. 20460.

(d) Should the Administrator determine, through testing by EPA or by review of manufacturer submitted data, that the cutpoints for a given group need to be changed, such a change will become effective immediately.

(e) Should a manufacturer request a vehicle running change under § 86.077–33, Part 86, of this Title 40, CFR, which requires him to run further certification tests, the manufacturer will be required to submit to the Administrator, data which would indicate any changes in the short tests (as specified in Subpart W) to FTP relationships which occur because of the running change.

§ 85.2307 Analytical technique.

(a) The cutpoints for each pollutant for each short test will be established by the use of the contingency table analytical technique.

(b) The data used to establish each group's cutpoints will be generated from the sample of test data as follows:

(1) Establish the FTP and short test distribution characteristics per pollutant for each group and for each short test from the test data.

(2) Using these data, a distribution will be developed for a very large (e.g., 50,000 vehicle) fleet of vehicles in the group. This step smooths the data and prevents the distortion of the selected cutpoints by gaps which may exist in the test data.

(3) Using the prescribed methodology for short test cutpoint selection, an iterative procedure will be followed to select the short test cutpoints which meet the criteria for each pollutant, for each short test and for each group.

§ 85.2308 Cutpoint selection methodologies.

(a) Any of the following techniques can be used by the EPA to select cutpoints.

(1) *A fixed error of commission rate* for each pollutant for each group. The short test cutpoints are determined on the basis of the distribution characteristics of the vehicles tested in each group so that the error of commission rate meets a set value.

(2) A fixed *Short Test Rejection Ratio* for each pollutant for each group. The short test cutpoints are determined on the basis of the distribution characteristics of the vehicles' emissions as determined in each group so as to meet the prescribed short test rejection ratio value.

(3) A fixed level for $E_c/(E_c+FF)$; which expresses the percentage of improperly failed vehicles as a function of all vehicles failing the short test in a particular group. The short test cutpoints are determined from the test data as described above but to meet the prescribed value of $E_c/(E_c+FF)$.

(4) Set the short test cutpoints so that equivalent FTP pass/fail levels are enacted for each vehicle group. This option would work in conjunction with a fixed acceptable commission error rate. For all groups of vehicles with acceptable test variability, the fixed error of commission cutpoint would be computed using the contingency table technique. Then, the FTP levels equivalent to the short test cutpoints for each group would be computed using linear regression estimates with the FTP as the independent variable and the short test as the dependent variable. In order to treat each group of vehicles equally from an air quality standpoint, the highest computed FTP levels for each pollutant would be selected as the equivalent FTP levels for the short test cutpoints. Using regression techniques, the short test cutpoints equivalent to these FTP levels would be determined for each vehicle group and would become the 207(b) short test cutpoints.

(5) Set the error of commission rate or $E_c/(E_c+FF)$ rate as a function of short test variability. Allow a five percent error of commission rate when test variability is at the maximum acceptable level.

$$ST_{cutpoint}=ST_{value\ at\ regression\ line\ intercept\ with\ FTP}\times(f)\ \frac{1}{correlation\ coefficient}$$

where f is determined from analysis of data from groups including passing and failing vehicles.

(2) Option 2 would fit a statistical probability distribution to the available data. Then, data would be mathematically generated in the region where they do not exist. The chosen method of selecting the cutpoints would then be applied.

(3) A defect test program would be initiated to obtain data in the region where the population of vehicles is scarce. In cases where there is no data on FTP passing cars, the program would consist of tune-ups rather than incorporation of defects. Such a program would require a knowledge of what defects to introduce as well as a large number of vehicles and tests, so as to include vehicle to vehicle variability.

(4) An additional group of vehicles would be tested. If this second group of vehicles included vehicles dissimilar to those originally tested (i.e., not all either FTP passing or failing vehicles), the ST cutpoint would be set from the second group of vehicles. This option possesses the weakness that the second group could behave the same as the first group and nothing would have been accomplished.

(5) Standards from a similar group would be transferred. This option would apply within groups of vehicles produced by the same manufacturer. Provided the same vehicle size/engine size/technology is utilized in meeting emissions standards, it can be argued that the products manufactured by Division A of a corporation are sufficiently similar to the products from Division B for the ST cutpoints to be transferable in this eventuality. An example of this approach is the use of Chevrolet Division intermediate size vehicle short test cutpoints for Pontiac Division intermediate size vehicles: *Provided*, The same displacement engine (but not necessarily the same engine family) and emissions control technology (e.g., catalyst) were used in both groups.

(6) Use the manufacturers' HC and CO idle specifications for the idle test cutpoint. This option only applies to inspection programs where the idle test is utilized.

[FR Doc.77-14620 Filed 5-24-77;8:45 am]

A functional relationship between errors of commission or $E_c/(E_c+FF)$ and variability will be developed using mathematical simulation techniques. This will be accomplished by taking a set of data and using probability distribution theory and introducing random numbers variability into the data base at different levels. Then, using fixed short test cutpoints, commission errors can be computed and plotted against variability.

(b) The above procedures of setting short test cutpoints are applicable where the vehicles in each group are divided between FTP passing and FTP failing characteristics. Cases can arise, however, when the vehicles in a group either all pass or all fail the FTP. Under these conditions, none of the above options are viable as means of setting the short test cutpoints. There are six options possible for handling this problem. Two are by mathematical means, two require additional testing and two rely on engineering judgment. Any of the following methods can be used to select short test cutpoints.

(1) This option would fit a linear regression equation to the available data and use it to project the short test/FTP relationship beyond the region of available data. The short test cutpoint would be selected to correspond with the FTP standard, allowing a margin of safety to account for correlation. Expressed in equation form, this approach says:

$$ST_{cutpoint}=ST_{value\ at\ regression\ line\ intercept\ with\ FTP}\times(f)\ \frac{1}{correlation\ coefficient}$$

[40 CFR Part 85]

[FRL–691–4]

EMISSION CONTROL SYSTEM PERFORMANCE

Warranty Regulations

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes regulations to implement section 207(b)(2) of the Clean Air Act—the emissions performance warranty. The warranty would require that a properly maintained and operated vehicle which fails an EPA-approved emissions short test during its useful life (5 years or 50,000 miles, whichever first occurs) will be remedied by the manufacturer should the owner face a penalty or sanction because of that failure. Emissions short tests are being proposed in a separate notice in today's FEDERAL REGISTER.

DATE: Deadline for submission of written comments: August 23, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Michael Scibinico, Environmental Protection Agency, Mobile Source Enforcement Division (EN–340), 401 M Street, SW., Washington, D.C. 20460. 202–755–0298.

SUPPLEMENTARY INFORMATION:

I. EXPLANATORY STATEMENT

Section 207(b) of the Clean Air Act provides, in total:

> If the Administrator determines that (1) there are available testing methods and procedures to ascertain whether, when in actual use throughout its useful life (as determined under section 202(d)), each vehicle and engine to which regulations under section 202 apply complies with the emission standards of such regulations, (ii) such methods and procedures are in accordance with good engineering practices and (iii) such methods and proceedures are reasonably capable of being correlated with tests conducted under section 206(a)(1), then—
>
> [(b)(1)]
>
> (1) he shall establish such methods and procedures by regulation, and
>
> [(b)(2)]
>
> (2) at such time as he determines that inspection facilities or equipment are available for purposes of carrying out testing methods and procedures established under paragraph (1), *he shall prescribe regulations which shall require manufacturers to warrant* the emission control device or system of each new motor vehicle or new motor vehicle engine to which a regulation under section 202 applies and which is manufactured in a model year beginning after the Administrator first prescribes warranty regulations under this paragraph (2). The warranty under such regulations shall run to the ultimate purchaser and each subsequent purchaser and shall provide that if—
>
> (A) the vehicle or engine is maintained and operated in accordance with instructions under subsection (c)(3),
>
> (B) it fails to conform at any time during its useful life (as determined under section 202(d)) to the regulations prescribed under section 202, and
>
> (C) such nonconformity results in the ultimate purchaser (or any subsequent purchaser) of such vehicle or engine having to bear any penalty or other sanction (including the denial of the right to use such vehicle or engine) under State or Federal law,
>
> then such manufacturer shall remedy such nonconformity under such warranty with the cost thereof to be borne by the manufacturer." (Emphasis added.)

Thus, full implementation of this section requires a number of findings by the Administrator leading to regulations under subsection (b)(1), and then a separate

finding leading to regulations under subsection (b)(2). The Agency is today proposing both sets of regulations under separate headings. This notice relates exclusively to subsection (b)(2), although some general background information is given below for the reader's convenience. The subsection (b)(1) proposal is entitled "Emission Control Performance Warranty Regulations—Short Test Establishment" and can be found in this volume of the FEDERAL REGISTER.

Section 207(b) requires a vehicle manufacturer, following implementation of subsection (b)(2), to warrant that a properly maintained and operated vehicle which fails a subsection (b)(1) test (hereinafter called a short test) during its useful life (5 years or 50,000 miles, whichever comes first, for all vehicles covered by this proposal) will be remedied by the manufacturer should the owner face a penalty or sanction because of that failure. This warranty (hereinafter called the Emissions Performance Warranty) is expected to become an important element in state and local emissions inspection programs, and an inducement towards improved maintenance on vehicles. These factors (often considered together as "Inspection/Maintenance" or "I/M") represent the Clean Air Act strategy which ultimately has the greatest potential for ensuring that in-use vehicles perform within emission standards.

The major obstacle which has delayed implementation to date of the Emissions Performance Warranty has been the technical difficulty in identifying short tests which "are reasonably capable of being correlated" (as the Act requires) with the sophisticated test used to define the Federal emission standards. That test, set out at 40 CFR Part 86, Subpart B, for 1977 and later model year light duty vehicles and light duty trucks, is too complex to be of use in a State or local inspection program.

The Agency believes that such short tests are now identifiable, and that the remaining criteria for publication of regulations under subsection (b)(1) are also satisfied. Consequently, those regulations are being proposed today, and form the basis for the proposal set out herein.

Under subsection (b)(2), the Administrator must "determine that inspection facilities or equipment are available for purposes of carrying out (the identified short tests)". This is interpreted to require a finding either that facilities exist which could be use to carry out the short tests, or that equipment needed to establish testing capability is available at a reasonable cost. The Administrator hereby finds that both of these circumstances presently exist. A number of emissions inspection facilities are already in operation in different States across the country. New Jersey has had a statewide program in operation for over four years. Active testing is ongoing in Portland, Oregon; Phoenix, and Tucson, Arizona; Riverside, California; Las Vegas, Nevada; Chicago, Illinois; and Cincinnati, Ohio. In all, millions of vehicles have been inspected to date using tests basically identical to those proposed today under subsection (b)(1), including both "idle" and "key mode" tests. It should be noted that the idle test may be performed without special facilities, and that the analyzers required for it are readily available and presently being sold to many service facilities for use as maintenance equipment. In sum, a State or local government which desires to engage in short test inspections is presently able to establish and equip a site capable of this type of testing.

II. General Description of Regulations.

The provisions of this notice cover all aspects of the Emissions Performance Warranty. They apply to light duty vehicles and light duty trucks; those being the categories covered by today's short test proposal. Further, as specifically required by the Act, the warranty will be applicable only to those vehicles manufactured in a model year beginning after the regulations are promulgated. (It is anticipated that 1979 and later model year vehicles will be covered.) The required warranty itself is taken directly from subsection 207(b)(2) of the Act. Under the proposal, it would have to be printed in the owner's manual for each vehicle.

Much of the proposal is devoted to the proper maintenance and operation condition of subsection 207(b)(2)(A) of the Act. Provisions cover the permissible content of maintenance and operation instructions, limits on brand name specifications, the types of evidence which will establish compliance with such instructions, Agency review and disapproval of them, and communication of these requirements to vehicle owners. Each is disscussed in detail below. The maintenance condition represents the most critical aspect of the Emission Performance Warranty. Given the fact that most vehicles do require periodic service in order to perform within emission standards for 5 years/50,000 miles, and that the owner is responsible for such work, the question becomes how this duty is to be fairly administered.

From the standpoint of the vehicle manufacturers, a simple solution might be to require that all maintenance be performed at dealer service centers or other authorized facilities. This would give the manufacturer control over the product which he must warrant. However, such an approach is unacceptable for a number of reasons. First, it is unlikely that there are enough authorized facilities in existence to handle the workload that could result. Second, this requirement would have a tremendous anticompetitive impact on the vast independent automotive service and parts industry presently in existence, in contradiction to the Agency's general policy to minimize any such impact from its regulations. Third, the right of an owner to personally maintain his own vehicle would be hindered. Lastly, there is no indication that this course of action would, in fact, ensure that vehicles would be significantly better maintained than they are today.

The Agency believes that the Emissions Performance Warranty may be implemented within the context of the traditional relationships among the affected parties, and that this should be a primary goal of the regulations. Consequently, the maintenance provisions are aimed at ensuring owners may continue to care for their vehicles as they presently do, without jeopardizing protection under the warranty.

The remainder of the proposal speaks of the remedy required by a manufacturer under the Emissions Performance Warranty, and the procedure by which a claim may be brought. Since communication to the warranty is crucial to the effectiveness of this or any other warranty, detailed requirements are set out for the inclusion of all provisions in vehicle owner's manuals.

III. Benefits of the Emissions Performance Warranty

By its nature, the Emissions Performance Warranty does not contain a direct, quantifiable air quality benefit. All warranties are in theory only cost-shifting mechanisms. That is, they determine who will pay to correct a problem; they do not attack the probem itself. In this case, the problem is poor emissions performance of in-use vehicles. The key to reducing it lies in State and local "Inspection/Maintenance" programs, as previously mentioned. Since, a local jurisdiction could enforce emissions standards by requiring the owner to bear any repair expense, and thus obtain emissions reductions without warranty coverage, the warranty may not be fairly credited with the major reduction expected from enforcement of "I/M" programs. However, some indirect air quality benefits may arise from the Warranty to the extent that it provides an incentive to establishment of "I/M" programs in areas which would otherwise not have them, causes programs to enforce stricter standards, encourages owners to better maintain their cars, and influences manufacturers to build more durable emissions control systems. The magnitude of these benefits is not quantifiable, and only experience will demonstrate the extent to which they will contribute to the overall benefits expected from "Inspection/Maintenance."

The Agency considers the Emissions Performance Warranty, coupled with the establishment of "I/M" programs, to be a major step in the Clean Air Act approch to reduction of vehicle emissions. Present Agency efforts include certification of vehicles and recall of classes which perform poorly in-use. Regulations for assembly line testing of vehicles (Selective Enforcement Auditing or SEA) where recently promulgated, and testing under them has begun. The establishment of a warranty to all individual owners that their vehicles will, if properly maintained and operated, continue to meet emissions standards is another substantial inducement to manufacturers to produce vehicles capable of meeting standards for their useful life.

IV. Specific Provisions

The major sections of the proposed regulations are discussed below.

A. Section 85.2103 Warranty

The proposed basic statement of the warranty is fashioned directly from section 207(b)(2) of the Clean Air Act. Some changes have been made as follows in an effort to make the provisions more easily understandable to vehicle owners.

First, in subsection (a)(1), the maintenance and operation requirement of section 207(b)(2)(A) of the Act is spelled out rather than referencing section 207(c)(3) as is done in the Act. Since the proposal requires the manufacturer to list all such instructions applicable to the Emissions Performance Warranty in the owner's manual, it is believed that the least confusing approach to informing the owner of his duty in this regard is simply to identify the requirement as consisting of those listed instructions.

Second, the words "applicable emissions standards of the U.S. Environmental Protection Agency" are substituted for the reference in section 207(b)(2)(B) to section 202 of the Act.

Third, the term "EPA-approved emission test" is used to signify a "correlateable short test" as required by section 207(b) for implementation of the Emissions Performance Warranty. This is intended to provide a non-technical label by which those tests which qualify for section 207(b) warranty purposes may be identified. Further, § 85.2103(a)(2) makes clear the fact that it is failure of such a test that initially triggers the possibility of manufacturer liability under the Emissions Performance Warranty.

No substantive effects are intended by any of the above modifications; any comments that such may occur are specifically requested.

An important issue under the Emissions Performance Warranty is the required scope of coverage. Section 207(b) of the Act states that manufacturers shall warrant "the emission control device or system of each new motor vehicle * * * manufactured in a model year beginning after (regulations are promulgated)." The phrase "emission control device or system" raises the question as to exactly what parts or systems of a vehicle are to be covered by the warranty. The proposal takes a broad interpretation here by defining coverage to include "any system, assembly, device, or component thereof which can affect emissions." An alternative approach would be to limit coverage to a specific list of those items constituting the emission control system, perhaps limited only to those components added solely for the purpose of controlling emissions. However, measures adopted for controlling emissions include important alterations to components and operating parameters of engines which are also vital to the non-emissions performance of those engines. To ignore such items would both excuse the manufacturer from responsibility for a substantial number of potential causes of emissions nonconformities within his ability to affect, and would leave the owner unprotected to the same extent. Hence, the Agency believes that the proposed option is most in keeping with the intent behind the Emissions Performance Warranty.

It has been postulated that the "list approach" would have the advantage of reducing the potential anticompetitive effect of the warranty simply because fewer components would be covered. However, given the possibility of warranty protection, it is presumed that any properly maintained and operated vehicle which fails an Agency-approved short-test will initially be taken to a dealer for repairs. Should the cause of the failure be investigated and found to be a part not on a given list, then the manufacturer would escape liability, but, the dealer would most likely still make the repair. Thus, little if any significant reduction in anticompetitive effect could be expected. In any case, a much larger potential for anticompetitive effect lies in the possible tying of preventative maintenance to the warranty, as opposed to actual repair of failed vehicles. This area, discussed in detail below, would not be affected by a restrictive definition of the scope of coverage of the warranty.

Comments on this aspect of the proposal are particularly requested. Those favoring a list approach are asked to give a sample list, if possible, of those parts which they believe should be included, or in the alternative, a list of those parts which are felt to be incorrectly encompassed by the proposal.

Subsection (b) specifies the time from which the 5 year protection of the Emissions Performance Warranty is to begin. In the vast majority of cases, this will coincide with delivery of the vehicle to its ultimate purchaser. However, for those vehicles used as "demonstrators" or "company cars" by a manufacturer or dealer, the period is begun at the point they are placed in this service. Although such a vehicle is not then in the hands of an ultimate purchaser, the Agency believes that it is reasonable to view it as having begun its useful life. There is little chance of consumer deception here since these cars are not sold as new, and thus purchasers generally realize that they have been used and that, consequently, their warranty protection may be less.

With regard to mileage, the warranty period is to be judged simply by a vehicle's odometer reading. That reading is protected today by numerous Federal and State consumer laws, and need not be further considered here. Any odometer which is adjusted in violation of applicable law will no longer be controlling as to the Emissions Performance Warranty.

Manufacturers should bear in mind that section 203(a)(4)(A) of the Act makes it a prohibited act to sell or lease a vehicle without warranting the emission control device or system pursuant to section 207(b). EPA will investigate any pattern of activity of a manufacturer which suggests that such warranty was not made in good faith.

B. Section 85.2104 Instructions for Maintenance and Proper Operation

This section sets out basic criteria for inclusion of instructions under the maintenance and operation condition of § 85.2103(a)(1), section 207(b)(A) of the Clean Air Act. Subsection (a) reiterates the language of section 207(c)(3) of the Act for maintenance instructions, with the clarifying provision that such instructions be likely to be performed on in-use vehicles. The additional language is included to set out what the Agency considers to be a basic element of the Act's requirement that such instructions be "reasonable."

Subsection (b) requires all maintenance instructions to be set out such that a person who regularly engages in the business of servicing automobiles will be able to satisfactorily comply with them. This is a further elaboration of the "reasonable" requirement of section 207(c)(3) of the Act. Recognizing the fact that many vehicles will be serviced at independent, non-dealer facilities, this provision can be viewed as simply part of the standard of "likely to be performed in-use." Further, it supports the prohibition of § 85.2105 against the tying of warranty coverage to dealer service.

Subsection (c) proposes a partial solution to the problem of owner maintenance. Given that many owners maintain their own vehicles, the question becomes how such individuals will be able to prove that the required instructions have been carried out. The proposed § 85.2107, which deals specifically with the issue of proof, expressly reserves the acknowledged right of an owner to perform all of the required maintenance. However, the standard of proof under such circumstances necessarily places a higher burden on the owner than he would have if he had taken his vehicle to a dealer or an independent service facility. This is due to the fact that not all owners will have the instruments and skills necessary to adequately maintain the emission control systems and devices in use today. Thus, an owner who claims the ability to totally maintain his vehicle needs to establish, essentially, that he is capable of doing so.

However, there are a substantial number of maintenance instructions which are capable of being performed by most owners (e.g., oil and filter changes, spark plug replacements, etc.). The Agency believes that these maintenance items should not be removed from the purview of owners out of their concern that they will risk loss of warranty protection by performing the instruction. One way to approach this problem would be for the Agency to define those instructions capable of owner completion, and to specify minimum requirements for proof of such. The different technologies among vehicle manufacturers would greatly complicate the effort, but the sustaining of owner's rights in this area is considered to be a necessary aspect of the regulations.

Subsection (c) proposes an alternative approach. Since a vehicle manufacturer

is in the best position to determine which maintenance instructions for his product are capable of being performed by an owner, the manufacturer is encouraged to specify such items, along with whatever evidence he would be willing to accept as proof of compliance. It is expected that manufacturers who do this will be able to gain from advertising that their vehicles are "owner serviceable", while at the same time reducing the potential for future disagreements with owners regarding proper maintenance. The approach also puts control of the question of proof in the hands of the manufacturer while protecting owners since, once specified, the manufacturer will be bound to accept the evidence called for. The Agency hopes that the owner's burden will be set at a minimal level such as, for example, retention of receipts or old parts. But, the most important factor is that advance notice will be given as to the required evidence, whatever it may be.

The Agency particularly requests comments on this proposed approach to the problem under the Emissions Performance Warranty of maintenance performed by owners. Manufacturers are encouraged to provide examples of what maintenance they would consider designating as "owner maintenance", and the evidence which would be accepted as proof of compliance.

Subsection (d) reiterates the criteria of section 207(c)(3) of the Clean Air Act for inclusion of operation instructions under § 85.2103(a)(1) of the proposal. Additional language is added to provide that all such instructions "be consistent with the normal use for which the vehicle is sold." As discussed above for subsection (a), this is again intended to elaborate on the Agency's view of how the term "reasonable" is to be interpreted in this specific context so as to give adequate notice to manufacturers regarding the standard for operation instructions required under the Emissions Performance Warranty.

C. SECTION 85.2105 PROHIBITION AGAINST BRAND NAME REQUIREMENTS

This section contains the proposal's basic prohibition against tying of the maintenance and operation condition of § 85.2103(a)(1) to the use of only parts and service provided by the vehicle manufacturer. It contains essentially the same restriction as that of section 102(c) of the Magnuson-Moss Warranty Act, 15 U.S.C. 2302(c) (1975).

Section 207(b)(2)(A) of the Clean Air Act explicitly conditions manufacturer liability under the Performance Warranty on a vehicle being "maintained and operated in accordance with instructions issued under (207)(c)(3)." Since the passage of the Clean Air Act Amendments of 1970, this condition has been the focus of much attention from EPA and from Congress itself. No one disputes the basic concept involved; that is, that a car owner is responsible for reasonable and necessary periodic maintenance of his vehicle. However, some segments of the automotive industry have expressed concern that the provision is potentially anticompetitive in that it may shift maintenance work away from independent facilities and towards manufacturer authorized dealerships.

The actual danger of such a shift is difficult to evaluate given the present lack of experience with any similar type warranty. On December 18, 1974, the Subcommittee on Environmental Problems Affecting Small Business of the Permanent Select Committee on Small Business of the House of Representatives filed a report entitled "Monopolistic Tendencies of Auto Emission Warranty Provisions" (House Report No. 93-1628, 93d Congress, 2d Session). That report concluded that the Emissions Performance Warranty could prove to be anticompetitive in that car owners might feel compelled to use only dealer service and original equipment parts in order to ensure continued protection for the full 5 years/50,000 mile period. Accordingly, the Committee recommended, among other things, that EPA pursue all administrative remedies to minimize such an effect.

The proposal contains three sections aimed directly at this potential problem. Section 85.2105, as stated, represents the basic restriction. Sections 85.2106 and 85.2107 deal respectively with the issue as related to parts and service under the Emissions Performance Warranty, and are discussed in detail below.

D. SECTION 85.2106 REPLACEMENT PARTS

With regard to the replacement parts industry, the potential for anticompetitive effects from the Emissions Performance Warranty rests in the concern that owners will use only original equipment parts so as to ensure continued protection for the full 5 year/50,000 mile period, and that service facilities will also react in the same manner. Thus, the provisions of the proposal which address the issue of performance of maintenance at independent facilities do not encompass the parts issue. Section 85.2106 is intended to fill this gap.

The basic position of § 85.2106 is twofold. First, subsection (a) provides that unless a vehicle manufacturer affirmatively indicates otherwise, he must allow use of any part identified by its manufacturer as a replacement part for a specific vehicle in question. Second, subsection (b) provides that a manufacturer who desires to avoid subsection (a) may do so by providing information sufficient to determine whether a given part meets the standards which are required. In essence, a manufacturer may set up any standard of acceptability, consistent with section 85.2105, related to the emissions performance of parts required to be replaced under the warranty. For example, he may require that all replacements be "equivalent" to the original part, as most do under general warranties today. However, if this approach is taken, then the owner's manual must set out whatever specifications are needed to judge that equivalency. In other words, the owner must be provided with the information necessary to be able to distinguish between those parts which are, and those which are not equivalent. Without this information, an "equivalency" requirement becomes virtually identical to a specification of use of only original equipment parts.

In short, the proposal allows inclusion of a "standard" for acceptability of replacement parts only if that standard may actually be applied in practice against the numerous available aftermarket parts. Otherwise, use of any part sold as a replacement will be acceptable. This is not to say that the vehicle manufacturer will be held liable for the failure of a non original equipment part. Subsection (d) specifically reserves the ability of a manufacturer to deny a warranty claim if he can show that the vehicle's failure of a short test was due to such a part.

Subsection (c) is included in anticipation of the possibility of a future EPA program for certification of aftermarket automotive parts. No such program is presently in operation, although the Agency has published an advance notice of a voluntary program (39 FR 40192, Thursday, November 14, 1974), and Congress has debated making such an effort mandatory (Congressional Record, September 30, 1976, p. H11977). The basic thrust of such a certification will be to qualify a part for use in maintenance under the Emissions Performance Warranty. The provisions of subsection (c) will remain inoperative until such a program is established.

Subsection (e) deals with another parts issue; specifically, the question of warranty coverage for parts without a definite replacement interval. Current practice today illustrates that many parts are subjected in maintenance instructions to a check or inspection, with replacement only if the part is found defective. Such an instruction is not necessarily undesirable since it can lead to the discovery and correction of component failures. However, the instruction raises the question as to whether the part is warranted beyond its first check point, or whether protection ends there with any extra life of the part being simply a benefit to the owner. The regulations specify that, for purposes of the Emissions Performance Warranty, such a part is covered for the full 5 year/50,000 mile period. In other words, the manufacturer shall be liable for replacement of any part that does not have a definite replacement interval and which becomes the basis of a claim under the Emissions Performance Warranty.

The Agency realizes that this approach may cause the routine replacement of some parts which might otherwise, depending on the circumstances of the vehicles's usage, render adequate service for a substantially longer period of time. However, this approach might also cause the design of longer lived parts. In any event, to allow such an instruction to insulate a manufacturer from liability for a part failure could render the warranty totally ineffective since a manufacturer could provide such an instruction for every part which could possibly fail. Further, this type of instruction is clearly aimed at correcting a failure after it has occurred, which is a warranty question, and not prevention of the failure, which in the Agency's view is the purpose of required maintenance.

In conjunction with these requirements, the proposal also requires that a manufacturer submit to EPA an estimate of the typical cost of each item to be replaced during maintenance required under the Emissions Performance Warranty, and the labor charge to replace it. EPA intends to make this information available to the public to enable vehicle purchasers to make some minimal comparisons among manufacturers as to the cost of the maintenance required pursuant to the Emissions Performance Warranty.

E. SECTION 85.2107 PROOF OF MAINTENANCE AND PROPER OPERATION

Section 85.2107 proposes detailed requirements as to the amount and types of proof that may be required from an owner to show compliance with the § 85.2103(a)(1) conditions to recovery under the Emissions Performance Warranty. Two major purposes are intended to be served here. First, such provisions are considered necessary to ensure a high degree of consistency with regard to interpretation of the "proper maintenance and operation" phrase. Without them, variations could be expected due to differing interpretations among those dealers and other agents of the manufacturer who are authorized to handle warranty claims, with little recourse for owners due to lack of bargaining power on their part. Some inconsistencies will still be inevitable, but the presence of detailed guidance in the owner's manual should considerably reduce the problem. Second, the provisions are intended to help reduce the anticompetitive potential of the warranty. Section 85.2105, as described, contains the basic prohibition of the proposal against tying of the warranty to "dealer service". However, in operation, problems related to the use of independent service facilities will most likely arise at the point at which proof of maintenance is required. Thus, the Agency believes that specific provisions on this issue are required.

The proposal is aimed, in essence, at preserving a car owner's present ability to have his vehicle maintained at any service facility, or to maintain it himself. This is sought to be balanced, however, against the ability of the manufacturer to avoid liability if the maintenance has not been correctly performed. Resolution of this conflict depends to a large extent on the interpretation given to the maintenance condition of the warranty.

One possible interpretation is that the Act requires the owner to be able to prove that each maintenance instruction was performed at the proper time and done correctly. This would place a large burden on those owners who have their vehicles serviced at independent facilities. The typical owner, in such an instance, is rarely in a position to make such a showing. He simply tenders his car to the shop, and returns when the work is completed. Thus, a question as to compliance with the maintenance condition would in all likelihood be resolved against him. The consequence of this interpretation is therefore to heavily favor protection of the manufacturer against improper maintenance, while discouraging use of independent facilities.

Another interpretation could be that the Act requires only that the owner make good faith efforts to obtain the requisite maintenance, with the manufacturer subsequently being held strictly liable for the emissions performance of the vehicle. In other words, the manufacturer would not be able to defend against a claim on the grounds that maintenance was not correctly performed. The requirement would be satisfied simply by tender of a vehicle to someone who held himself out as capable of following the manufacturer's instructions. The Agency believes that such an interpretation, although stringent, may be correct given the goals of the Act. Under it, manufacturers could be expected to react by reducing the amount and complexity of required maintenance, a procedure which could be expected to result in vehicles with lower emissions throughout their useful life and beyond.

A third alternative, and the one proposed in this notice, is to interpret the maintenance condition to require some initial showing by the owner, after which he will be presumed to have complied with the condition. The showing consists of evidence which the Agency believes will in most cases indicate that the work was correctly performed. However, the presumption is not made conclusive. The manufacturer may, with some exceptions, rebut the presumption by showing that the maintenance instructions have not been properly complied with. The burden of proof in this regard will be on the manufacturer, but, in most instances, he will be the party in the best position to meet such a burden. On the other hand, owners will be able to continue to have their vehicles maintained at competent independent facilities, rather than at dealerships, without risking loss of protection under the Emissions Performance Warranty simply because of that choice. The Agency believes that this approach best satisfies the intent behind the maintenance requirement of the Emission Performance Warranty; however, since this is a critical issue in the warranty, specific comments are requested. The actual provisions of the proposal are discussed below.

The basic element of the proposal is the subsection (a) provision that compliance with the maintenance requirement shall be presumed upon either of two showings, or a combination thereof, by an owner. First, presentation of a properly validated maintenance logbook shall be sufficient to raise the presumption. Second, a showing by the owner that he has submitted the vehicle to one who regularly engages in the business of servicing automobiles, and directed that person to perform the required maintenance in accordance with the manufacturer's published instructions, shall be sufficient to raise the presumption. The Agency hopes that the use of logbooks will eventually become the preferred method for proof of maintenance, and that it will result in a recognized, uniform procedure across the country for establishing compliance with the maintenance condition. However, a business receipt which contains the same information as would appear in the logbook shall be acceptable in lieu of a logbook entry. In either case, subsection (b) allows the manufacturer (with some exceptions discussed below) to rebut by proving that the required maintenance was not, in fact, correctly performed.

Subsection (c) preserves the right of an owner to establish, by means other than those of subsection (a), that his vehicle has been properly maintained; the distinction being the absence of any presumption here. Thus, an owner may have a more difficult task showing proper compliance with the maintenance condition under this subsection. For example, he may have to establish his own expertise to perform maintenance which is not specified as owner's maintenance by the manufacturer. The proposed standard is simply that of reasonable evidence. By its nature, this is something that will have to be determined on a case by case basis. Clearly, fair operation of the provision will require good faith on the part of owners, manufacturers, and dealers.

Subsection (d) proposes that a signed statement be accepted as proof of proper operation under the Emissions Performance Warranty. Due to the nature of the requirement of proper operation, the Agency believes that such a statement is all that can reasonably be demanded. No owner could disprove the negative, i.e., that he had not improperly operated his vehicle. The statement is not made conclusive since, if a vehicle exhibits obvious indications of improper operation, then a claim may be denied on that basis. However, in the absence of such a showing by the manufacturer, it is all that may be required. Subsection (e) establishes four exceptions to the ability of a manufacturer to escape liability on the basis of improper maintenance. The first is in the case of work performed by a dealer or other authorized agent of the manufacturer. Under general principles of Agency, the manufacturer must accept responsibility for such work.

The second exception is in the case of work performed on the vehicle to keep it in a safe operating condition. This is intended to allow for those instances where a vehicle will not function properly without adjustment causing it to exceed emission standards. The agency believes that such an adjustment may not affect protection under the Emissions Performance Warranty.

The third exception is intended to reach those instances where the manufacturer should have foreseen that the vehicle would not be properly main-

tained. This could be due to a number of reasons. For example, equipment necessary to adjust the engine may not be readily available in the field. The design of some emission related component may be such that it is too sensitive to be properly serviced by most mechanics. Instructions in the service manual may be incomplete, or too vague to ensure correct maintenance in most instances. If any of these conditions can be shown, or others which establish that the manufacturer should have foreseen that improper maintenance would result, then such improper maintenance may not be raised in defense of an Emissions Performance Warranty claim.

The fourth exception relates to maintenance and operation instructions not relevant to the particular failure of a vehicle to meet emission standards, and is intended to protect vehicle owners from unduly harsh application of the § 85.2103 (a)(1) conditions. If a vehicle fails due to a clearly defective component in one emission control system, the absence of maintenance to an unrelated component, or the existence of unrelated improper operation of the vehicle, should not relieve the manufacturer from liability.

Subsection (f) explicitly reserves the right of an owner to maintain his own vehicle. With regard to proof, such a person will have to, in general, meet the reasonable evidence criteria of subsection (c). An exception to this exists for those instructions listed as owner's maintenance under § 85.2104(c) of the proposal. For such maintenance, the manufacturer must set out the evidence which is desired as proof of compliance, presentation of which will then enable the owner to obtain the rebuttable presumption of subsection (a). The issue of owner maintenance is discussed in more detail in section IV.B. above.

Subsection (g) specifies requirements for proper validation of the maintenance logbook so as to satisfy subsection (a)(1). In general, this consists of the signature of the same individual who would otherwise sign a receipt sufficient to make the subsection (a)(2) showing. In the case of owner's maintenance, the owner himself shall be authorized to validate the logbook.

F. SECTION 85.2108 WARRANTY CLAIMS

A necessary element of effective operation of the Emissions Performance Warranty will be the existence of expeditious claim procedures. Section 85.2108, to this end, requires each manufacturer to establish such procedures. Given the typical manufacturer organization currently in effect, it is expected that they will involve a determination by a dealer, and perhaps subsequently by a zone representative, of the manufacturer. However, although it is expected that the vast majority of claims will be settled at these levels, the proposal does not contain any requirements related to them, except that the owner obtain an immediate decision at the point of first presentation of his vehicle for repair. The Agency is of the opinion that such details are best left to the discretion of each manufacturer.

The proposal does require that all procedures contain a designated final level of review, and that an owner be provided with a final decision on his claim within ten days of its receipt at that final level. This is deemed necessary to assure that owners whose vehicles do not pass a short test may obtain an expeditious determination as to the validity of their Emissions Performance Warranty. Owners facing sanctions due to a failed vehicle have a need to know, within a short period of time, whether a warranty claim will be honored, or whether they should seek repair at their own expense. In the case of a denied claim, an owner must also determine whether to pursue legal action against the manufacturer, and, for this reason, the proposal requires that a denial be accompanied by a written explanation.

The provision requiring review within ten days is supported by a proposal that the manufacturer be held liable for the cost of any repair work actually performed on a vehicle subsequent to the lapse of the notification period. An owner facing a penalty or sanction will be at an extreme disadvantage with regard to any time delay in the processing of his claim. This proposal, however, will ensure a fixed waiting time after which the owner will either know that his claim has been denied, or that his vehicle may be repaired at the manufacturer's expense. Hopefully, State and local jurisdictions will establish any inspection program deadlines in accordance with the warranty notification period.

A final question with regard to warranty claims is at what point in time a claim may be raised. Section 85.2108(a) specifically deals with this issue. Essentially, a cause of action under the Emissions Performance Warranty will exist upon satisfaction of all of the requirements of § 85.2103(a), subsection (3) of which states that an owner must bear a penalty or sanction as a result of a short test failure. Operation of this provision may be complicated by the fact that jurisdictions are not expected to impose any penalty at the first failure of an emissions test. Rather, the owner of a failed vehicle will probably simply be required to have the vehicle serviced, and then undergo a retest within a specified period of time. Even in the case of repeated failures, penalties or sanctions may not be imposed beyond a requirement that the owner demonstrate that a certain amount of corrective maintenance has been performed on the vehicle. Use of fines or suspensions in some jurisdictions is expected to be limited to those situations where the owner either refuses to undergo a test at all, or refuses to have corrective maintenance or repair performed on his vehicle after it fails a test.

The § 85.2103(a)(3) condition could be held to require an owner to either violate State or local law so as to incur a fine, or at the least be without the use of his vehicle, before an Emissions Performance Warranty claim could be raised. However, such an interpretation could hardly be ascribed to Congress in passing this provision (section 207(b)(2)(C) of the Act). The Agency believes that the purpose of this condition is simply to limit the warranty to those situations in which repair of the vehicle is mandatory. Consequently, the proposal specifically holds that a warranty cause of action arises immediately upon failure of a short test if the owner is required to take any corrective action as a result of that failure. The owner need not ignore a given grace period, and actually incur a penalty or sanction before the warranty becomes operational.

G. SECTION 85.2109 WARRANTY REMEDY

As stated in § 85.2103(a), the manufacturer's obligation under the Emissions Performance Warranty is to "remedy the nonconformity at no cost to the owner." The Agency's interpretation of this requirement is set out in § 85.2109. Subsection (a) deals with the precise remedy involved. It is, in essence, to place the vehicle in a conforming condition. A temporary fix, sufficient only to enable the vehicle to pass an emissions retest is unacceptable. Further, this liability is specifically clarified as being independent of any State or local limitation on the penalty or sanction required to trigger warranty protection under § 85.2103(a)(3). EPA anticipates that many jurisdictions will set a limit on repair expense after which an owner will be required to take no more action despite the fact that his vehicle continues to fail to conform to emission standards. Alternatively, owners may simply be fined if their vehicles fail I/M inspections. However, the Agency believes that such provisions should not act to limit protection under the Emissions Performance Warranty. The "penalty or sanction" paragraph of section 207(b) does restrict the applicability of the warranty to those areas with mandatory inspections, and most likely will further restrict the potential frequency of claims in those areas to annual or semi-annual periods. But, given a mandatory test with some penalty or sanction attached, the Act is clear that the warranty remedy, if obtainable, is for the manufacturer to "remedy the nonconformity". The decision by a State or locality to fix a maximum penalty or sanction for its citizens cannot affect this potential Federal liability of a manufacturer under the warranty.

Subsection (b) speaks to the cost of repair, and emphasizes the requirement that a manufacturer bear the entire cost regardless of a failed vehicle's proximity to its next scheduled maintenance point. Thus, for example, if the required remedy for a failed vehicle is a new set of spark plugs, the manufacturer must provide them without cost even though the vehicle would have been scheduled to receive a new set, at the owner's expense, within a short period of time. In sum, the cost of a repair may not be split pro rata based on the vehicle's position within the required maintenance schedule, or on any other criteria.

Under this provision, an owner may thus obtain a free tune-up when he would not have received one had his vehicle failed a week later at the maintenance interval. The Agency believes that this approach, although strict, is required by the Act. No problem arises if a vehicle fails due to a defect in a non-maintenance item since the time of such a failure is irrelevant to responsibility for repair. However, the Agency anticipates that many failures will be correctable simply by performance of routine maintenance, albeit at an earlier stage than that scheduled. In these cases, the time of failure will be determinative of responsibility, and, under the Emissions Performance Warranty, this can mean only complete responsibility. The purpose of the warranty is to ensure that a properly maintained and operated vehicle will perform within emissions standards at all times during its useful life. Although the need for routine maintenance implies that a vehicle will naturally vary in its emissions as maintenance items deteriorate, at no time should emissions exceed standards. Thus, failure of a short test indicates a problem outside of normal parameters. This, by the very nature of the warranty, must be corrected at the manufacturer's expense regardless of the point in time at which it is discovered.

Subsection (c) deals with a secondary problem related to the performance of routine maintenance as a repair under the Emissions Performance Warranty; that is, the fact that such work will affect the maintenance schedule. Clearly, parts replaced within a short time of their scheduled replacement need not be replaced again at the scheduled point, as it would only result in the needless waste of many parts. The proposal thus requires that a manufacturer adjust the maintenance schedule under these circumstances, and inform the owner of the new periods at the time of the warranty repair.

The issue of the effect of unscheduled maintenance, whether performed under the warranty or at an owner's request, is of general importance to this proposal. Experience shows that few vehicles can be expected to rigidly adhere to any maintenance schedule throughout a 5 year/50,000 mile period. Thus, particularly at later periods in a car's useful life, the question of compliance with the maintenance condition of § 85.2103(a)(1) may involve analysis of a record quite different from that envisioned by the applicable schedule. The Agency is concerned that this variable may confuse the determination of entitlement to protection under the Emissions Performance Warranty, especially in cases where the remedy is strictly maintenance oriented. Comments are particularly desired as to how this problem should be approached in any final regulations.

H. SECTION 85.2110 INCLUSION OF WARRANTY PROVISIONS IN OWNER'S MANUALS

The key to obtaining effective implementation of any warranty lies in full disclosure of its provisions to the warrantee. Accordingly, the proposal contains specific requirements intended to ensure that complete information regarding the Emissions Performance Warranty is supplied to vehicle owners. Section 85.2110 contains all of these requirements. Most are felt to be self explanatory, and are thus not discussed below.

In general, disclosure must be made in the vehicle owner's manual, which is intentionally defined broadly to allow flexibility in the presentation of the warranty information. Many manufacturers have separate warranty and/or maintenance booklets today for their own warranty or the Clean Air Act Section 207(a) warranty. This approach is at least equivalent to if not better than inclusion in the owner's manual proper, and the Agency hopes that similar type presentations will be adopted for the Emissions Performance Warranty.

The owner's manual need only contain a brief listing of the maintenance schedule, as is current practice today; provided that full descriptions of all procedures are set out in the service manual, those manuals are available, and the owner can obtain a copy of those procedures related to the Emissions Performance Warranty by mail, at nominal cost. This compromise to requiring that complete procedures be in all owner's manuals is proposed recognizing that few owners have a need for detailed instructions, and that presentation in the service manual is the established practice today. With regard to any maintenance designated as "owner's maintenance", this rationale may not be applicable, and the regulations thus require complete detailed instructions in the owner's manual for these procedures.

The owner's manual is also required to contain a logbook for the purpose of verifying compliance with the maintenance condition of the warranty. The Agency believes that this is a preferred approach to requiring that owners retain receipts for all maintenance services, although, as previously discussed, business receipts are acceptable under the proposal.

I. REVIEW OF MANUALS AND DISAPPROVAL OF MAINTENANCE AND OPERATION INSTRUCTIONS

Section 85.2111 of the proposal requires that all owner's and service manuals be submitted to the Agency for review pursuant to this subpart. In the case of maintenance and operation instructions which are determined to be out of compliance, either on their face or in actual practice, § 85.2112 provides for disapproval of such with the consequence being that they subsequently cease to be part of § 85.2103(a)(1) condition to recovery under the warranty.

No disapproval may be effected without notice to the manufacturer, an opportunity for him to present his views and evidence at an Agency hearing on the record, and publication in the FEDERAL REGISTER. Once an instruction is disapproved, however, the manufacturer will be required to send notification by mail to all owners, and the disapproval will be included in a compilation by the Agency for distribution to all interested parties.

Specific comments are requested as to the desired scope of any hearing held with regard to disapproval of a maintenance or operation instruction, including limits, if any, to be placed on discovery, intervention, cross-examination, and appeal.

V. COST OF IMPLEMENTATION

The major Agency cost involved in the implementation of the Emissions Performance Warranty will stem from whatever yearly testing is required in order to set cut-points (pass/fail points) for the various short tests identified in the subsection 207(b)(1) proposal being published today. Manufacturer costs will relate to administration of the warranty, and loss of sales due to price increases made to cover expected repair costs. An economic analysis of these factors has been prepared by the Agency and is available for inspection and copying at the U.S. Environmental protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 "M" Street, S.W., Washington, D.C. 20460. Single copies may be obtained by writing to: Environmental Protection Agency, Mobile Source Enforcement Division, Warranty Project (EN–340), 401 "M" Street, S.W., Washington, D.C. 20460.

The Agency is particularly interested in obtaining information related to the potential economic impacts of the Emissions Performance Warranty, and specifically requests comments on this topic with supporting data if available.

VI. ENVIRONMENTAL IMPACT

No adverse environmental impacts are anticipated by these regulations. As previously discussed, the warranty is basically only a cost-shifting mechanism. It will indirectly lead to some air quality benefits to the extent that it encourages implementation of State and local "Inspection/Maintenance" programs in areas which would otherwise not have them, causes more stringent standards to be enforced, induces owners to devote more attention to properly maintaining their vehicles, and influences manufacturers to build more durable emission control systems. However, the warranty itself does not contain any such impact.

No voluntary environmental impact statement has been prepared pursuant to EPA guidelines set forth in 39 FR 37419. The Emissions Performance Warranty is primarily directed at light duty vehicles, whose emission standards are specifically exempted from the EIS requirements.

VII. COMMENTS

Interested persons are encouraged to participate in this rulemaking proceeding by submitting written comments (ten copies are requested) to: Director, Mobile Source Enforcement Division (EN–340), Room 3220 (WSM), Environmental Protection Agency, 401 "M" Street, S.W., Washington, D.C. 20460.

All comments received before the close of business on the comment closing date

will be considered. All comments will be available for inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2922 (EPA Library), 401 "M" Street, S.W., Washington, D.C. 20460.

Final regulations, modified as the Administrator deems appropriate after consideration of comments, will be promulgated as soon as practicable after such consideration and will be applicable to model year 1979 and later light duty vehicles and light duty trucks.

This notice of rulemaking is issued under authority of the following sections of the Clean Air Act as amended: 207 (42 U.S.C. 1857f-5(a)), 208 (42 U.S.C. 1857f-6) and 301(a) (42 U.S.C. 1857g). The regulations would implement section 207(b) of the Clean Air Act of 1970.

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: May 6, 1977.

DOUGLAS M. COSTLE,
Administrator.

Accordingly, notice is hereby given that Part 85 of Title 40 of the Code of Federal Regulations is proposed to be revised by the addition of a new Subpart V as set forth below.

Subpart V—Emissions Control System Performance Warranty Regulations

Sec.

85.2101 General applicability.
85.2102 Definitions.
85.2103 Warranty.
85.2104 Instructions for maintenance and proper operation.
85.2105 Prohibition against brand name requirements.
85.2106 Replacement parts.
85.2107 Proof of maintenance and proper operation.
85.2108 Warranty claims.
85.2109 Warranty remedy.
85.2110 Inclusion of warranty provisions in owner's manuals.
85.2111 Review of warranty statement, maintenance and operation instructions.
85.2112 Maintenance and operation instruction disapproval.

Subpart V—Emissions Control System Performance Warranty Regulations

§ 85.2101 General applicability.

The provisions of this subpart are applicable to all 1979 and later model year light duty vehicles and light duty trucks.

§ 85.2102 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part A of Title II of the Clean Air Act, 42 U.S.C. 1857 (f)-1 through (f)-7, as amended by Pub. L. 91-604 and 93-319.

(2) "Administrator" means the Administrator of the Environmental Protection Agency or his authorized representative.

(3) "Emission control device or system" means any system, assembly, device, or component thereof which can affect emissions.

(4) "Emissions Performance Warranty" means that warranty given pursuant to this subpart.

(5) "EPA-approved emission tests" means a test prescribed under 40 CFR 85.2201 et seq.

(6) "Light duty truck" means any motor vehicle related at 8,500 pounds GVWR or less with a vehicle curb weight of 6,000 pounds or less, and a basic vehicle frontal area of 46 square feet or less, which is:

(i) Designed primarily for purposes of transportation of property or is a derivation of such a vehicle, or

(ii) Designed primarily for transportation of persons, and having a capacity of more than 12 persons, or

(iii) Available with special features enabling off-street or off-highway operation and use.

(7) "Light duty vehicle" means a passenger car or passenger car derivative capable of seating 12 passengers or less.

(8) "Model year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year; however, if the manufacturer has no annual production period, the term "model year" shall mean the calendar year.

(9) "Owner" means the ultimate purchaser or any subsequent purchaser of a vehicle.

(10) "Owner's Manual" means the instruction booklet normally provided to the purchased of a vehicle, and any other written information pertaining to the operation, maintenance, specifications, description or warranty of the vehicle provided with that booklet.

(11) "Service Manual" means that book provided by the manufacturer for use by vehicle service personnel in maintaining and repairing vehicles.

(12) "Useful Life" means a period of use of 5 years or 50,000 miles, whichever first occurs.

§ 85.2103 Warranty.

(a) The manufacturer of each vehicle to which this subpart applies shall warrant the emission control device or system of the vehicle such that if:

(1) The vehicle is maintained and operated in accordance with the manufacturer's instructions under the Emissions Performance Warranty, as set out in the owner's manual, and

(2) It fails to conform, for a period of 5 years or 50,000 miles, whichever first occurs, to the applicable emissions standards of the U.S. Environmental Protection Agency, as judged by an EPA-approved emission test, and

(3) Such nonconformity results or will result in the owner of the vehicle having to bear any penalty or other sanction (including the denial of the right to use the vehicle) under State or Federal law, then the manufacturer shall remedy the nonconformity at no cost to the owner.

(b) The warranty period shall begin on the date the vehicle is delivered to its ultimate purchaser, or if the vehicle is first placed in service as a demonstrator or company car prior to such delivery, on the date it is first placed in such service.

§ 85.2104 Instructions for maintenance and proper operation.

(a) Maintenance required under the Emissions Performance Warranty must be reasonable and necessary to assure the proper functioning of the emission control device or system of the vehicle, including that it be likely to be performed on in-use vehicles. Instructions shall be specific as to the exact procedures required, and the intervals at which they are to be performed.

(b) Maintenance instructions shall be set out such that one who regularly engages in the business of servicing automobiles will be able to satisfactorily comply with them.

(c) A manufacturer may specify those maintenance instructions which, in his opinion, are capable of being performed by a vehicle owner. Each instruction shall contain the complete procedure to be followed, and the documentation necessary to establish that it has been performed so as to qualify the owner to validate the maintenance logbook under § 85.2107(g)(2).

(d) Operation instructions applicable to the Emissions Performance Warranty must be reasonable and necessary to assure the proper functioning of the emission control devices or systems of the vehicle, including that they be consistent with the normal use for which the vehicle is sold.

§ 85.2105 Prohibition against brand name requirements.

(a) No maintenance or operation instruction issued pursuant to the Emissions Performance Warranty may include any condition on the use of any component or service (other than a component or service provided without charge under the terms of the purchase agreement) which is identified by brand, trade, or corporate name; or directly or indirectly distinguish between service performed by the franchised dealers of the manufacturer or any other service establishments with which the manufacturer has a commercial relationship, and service performed by independent automotive repair facilities with which the manufacturer has no commercial relationship, except that the prohibition of this section may be waived by the Administration if:

(1) The manufacturer satisfies the Administrator that the vehicle will function properly only if the component or service so identified is used in connection with the vehicle, and

(2) The Administrator finds that such a waiver is in the public interest.

§ 85.2106 Replacement parts.

(a) Unless specified otherwise by the vehicle manufacturer, compliance with instructions to replace parts during maintenance under the Emissions Performance Warranty shall require only the use of parts identified by their manufacturer as replacement parts for the specific vehicle in question.

(b) A vehicle manufacturer may specify that all parts replaced during maintenance under the Emissions Performance Warranty be equivalent, from an emissions standpoint, to the original equipment parts of the vehicle, or set out some other criteria for acceptability (from an emissions standpoint) not in conflict with § 85.2105: *Provided*, that the owner's manual contains complete information necessary to determine whether a given part is so equivalent or meets the acceptability criteria.

(c) In all cases, a part certified, in accordance with criteria and procedures sanctioned by the Administrator, to be an equivalent replacement part for a specific vehicle in question shall be acceptable for use during maintenance under the Emissions Performance Warranty.

(d) Notwithstanding the above, a manufacturer may avoid liability under the Emissions Performance Warranty if he can show that a particular failure of an Agency-approved emission test is caused by a non-original equipment replacement part. For purposes of this section, any part authorized by the vehicle manufacturer to be sold as a replacement part for a vehicle in question shall be considered an original equipment replacement part.

(e) A part not required to be replaced at a definite interval shall be considered as warranted for the full term of the Emissions Performance Warranty. Diagnostic maintenance instructions, that is, instructions to replace a component only if checked and found to be operating below specification, shall have no bearing on warranty coverage. The manufacturer shall be liable for any such part which becomes the basis of a claim under the Emissions Performance Warranty.

§ 85.2107 Proof of maintenance and proper operation.

(a) Upon presentation of a vehicle for repair under the Emissions Performance Warranty, an owner shall be entitled to a rebuttable presumption that the requirement of § 85.2103(a)(1) that a vehicle be maintained in accordance with the manufacturer's instructions has been met upon:

(1) Presentation of a properly validated maintenance logbook for that vehicle, or

(2) A showing that he has submitted the vehicle, at the specified intervals, to someone who regularly engages in the business of servicing automobiles, and directed that person to perform the specified maintenance in accordance with the manufacturer's instructions for that vehicle, or

(3) Any combination of the above, which, taken together, covers all of the required maintenance for the vehicle.

(b) A manufacturer may rebut the presumption of paragraph (a) of this section by showing that the maintenance instructions required under the Emissions Performance Warranty have not been properly complied with.

(c) In the absence of a showing as set out in paragraph (a) of this section, a manufacturer shall nevertheless consider the § 85.2103(a)(1) maintenance condition satisfied upon receipt of reasonable evidence that the required maintenance was performed at the proper intervals and likely to have been done correctly, unless the manufacturer can show that such is not the case.

(d) The requirement of § 85.2103(a)(1) that a vehicle be operated in accordance with the manufacturer's instructions shall be considered satisfied upon receipt of a signed statement by the owner that he has properly operated the vehicle, unless the manufacturer can show that such is not the case.

(e) Despite inability of an owner to meet any of the above requirements, a manufacturer may in no case deny a warranty claim on the basis of:

(1) Work improperly performed by a dealer or other authorized service agent of the manufacturer.

(2) Work performed on the vehicle to rectify an unsafe condition, including a driveability condition that is unsafe, attributable to the manufacturers.

(3) Work improperly performed or not performed due to the design of the vehicle, an impractical maintenance procedure, unavailability of necessary tools or instruments, or other cause which the manufacturer should have foreseen would result in such improper maintenance or lack of maintenance, or

(4) Noncompliance with any maintenance or operation instruction which the owner can show is not relevant to his vehicle's particular failure of an EPA-approved emission test.

(f) Nothing in this subpart shall be construed to prevent an owner from personally performing all of the required maintenance for his vehicle under the Emissions Performance Warranty.

(g) Proper validation of the maintenance logbook, as specified in paragraph (a)(1) of this section, shall consist of completed entries for only those items required by § 85.2110(b)(2), and the signature of either:

(1) Someone who regularly engages in the business of servicing automobiles, or

(2) The owner, in the case of items classified as owner's maintenance pursuant to § 85.2104(c) and for which the owner possesses the required documentation under that paragraph.

§ 85.2108 Warranty claims.

(a) A claim under the Emissions Performance Warranty may be raised immediately upon failure of an EPA-approved emission test if, as a result of that failure, an owner is required to take action of any kind in order to avoid imposition of a penalty or sanction. An owner need not suffer the loss of the right to use his vehicle, be fined, incur repair expenses, or actually bear any such penalty or sanction to satisfy the requirement of § 85.2103(a)(3). That requirement shall be met if a test failure sets a procedure in motion under which the owner will bear such a penalty or sanction if his vehicle is not brought into conformity, or repaired to some specified extent.

(b) Each manufacturer shall establish procedures as to the manner in which a claim under the Emissions Performance Warranty may be raised. The procedures shall require an immediate decision by the dealer, or other person to whom a vehicle is initially presented for repair, as to the validity of the claim, and shall designate a final person or office to which vehicle owners may appeal a refusal by a dealer or other agent of the manufacturer to honor a claim.

(c) Within 10 days of the receipt of an appeal by such person or office, the manufacturer shall either honor the claim or provide the owner, in writing, an explanation of the basis upon which the claim is being denied. Failure to so notify shall result in the manufacturer being liable for the cost of any subsequent work actually performed on the vehicle in order to bring it into compliance with applicable emission standards.

§ 85.2109 Warranty remedy.

(a) The manufacturer's obligation under the Emissions Performance Warranty shall be to make such adjustments or repairs as are necessary to assure that the vehicle complies with applicable emission standards of the U.S. Environmental Protection Agency, that it will continue to comply for the remainder of its useful life (if proper maintenance and operation is continued), and that it will operate in a safe manner. State or local limitations as to the extent of the penalty or sanction imposed upon an owner of a failed vehicle shall have no bearing on this liability.

(b) Under the Emissions Performance Warranty, the manufacturer shall be liable for the total cost of the remedy of any vehicle validly presented for repair, to any authorized service facility of the manufacturer.

(c) If, in the course of remedying a nonconformity under the Emissions Performance Warranty, parts are replaced or work is performed which would otherwise have been scheduled at some future time under the maintenance instructions, then the manufacturer must adjust those instructions to reflect new periods for the particular vehicle in question based on the time of the warranty repair. The owner shall be informed of the new schedule at the time of the repair under the Emissions Performance Warranty.

§ 85.2110 Inclusion of warranty provisions in owner's manuals.

The owner's manual for each vehicle to which the regulations of this subpart are applicable shall contain, at a minimum, the following information:

(a) *Warranty statement.* A basic statement of the coverage of the Emissions Performance Warranty as set out in § 85.2103. This shall be separated from any other warranty given by the manufacturer, and be prefaced by the title "Emissions Performance Warranty" set in bold face type.

(b) *Maintenance and operation instructions.* All maintenance and operation instructions intended by the manufacturer to be included in the § 85.2103

(a) (1) condition to recovery under the Emissions Performance Warranty.

(1) Maintenance instructions shall be separated from any general maintenance requirements or suggestions of the manufacturer, and shall be prefaced by the title "Required Instructions for Maintenance Under the Emissions Performance Warranty" set in bold face type. This requirement may be satisfied by a short statement of services to be performed if:

(i) The service manual for the vehicle contains a full description of all required maintenance,

(ii) Such manuals are readily available to the general public at the beginning of the model year for the vehicle, and

(iii) The ultimate purchaser of the vehicle is provided with an opportunity to obtain a copy of those instructions relevant to the warranty, by mail, at a nominal cost.

(2) In all cases, the owner's manual shall contain a "maintenance logbook" consisting of an abbreviated listing of the required maintenance in a format to facilitate the collection and storage of all information pertaining to the question of compliance with the maintenance condition. This shall include space for recording of the date and vehicle mileage at which point each instruction or group of instructions is performed, and the signature of the individual performing such, certifying that the manufacturer's procedures have been followed. In the case of maintenance pursuant to § 85.2104(c), space shall also be provided for the owner to certify that he can meet all of the documentation requirements of the manufacturer for such maintenance.

(3) Operation instructions shall be set out in full, separated from any general operation requirements or suggestions of the manufacturer, and shall be prefaced by the title "Required Instructions For Operation Under the Emissions Performance Warranty" set in bold face type.

(c) *Owner's maintenance.* Maintenance instructions, if any, provided pursuant to § 85.2104(c). All such instructions, with required documentation, shall be set out, in full, and shall be prefaced by the title "Owner's Maintenance" set in bold face type. Any procedures listed under this heading must also appear in the maintenance listing required under § 85.2110(b)(1).

(d) *Proof of compliance with required maintenance and operation instructions.* The provisions of § 85.2107 shall be set out under the heading "Proof of Compliance With Required Instructions Under the Emissions Performance Warranty" set in bold face type.

(e) *Replacement parts statement.* A statement as to acceptability of replacement parts for use in maintenance under the Emissions Performance Warranty which comports with the requirements of § 85.2106. The statement shall appear under the title "Replacement Parts for Maintenance Under the Emissions Performance Warranty" set in bold face type, and shall contain:

(1) An explanation of the manufacturer's criteria for choice of acceptable replacement parts along with complete specifications sufficient to determine that acceptability for any given part, or

(2) In lieu of paragraph (c)(1) of this section, a statement that use of any part identified by its manufacturer as a replacement part for the specific vehicle in question will be acceptable, and

(3) In all cases, a statement that use of any part certified under the authority of the U.S. Environmental Protection Agency to be an equivalent replacement part for the specific vehicle in question will be acceptable.

(f) *Warranty claims.* Complete instructions as to when and how an owner may bring a claim under the Emissions Performance Warranty, as governed by § 85.2108. Instructions shall appear under the title "Emissions Performance Warranty Claims" set in bold face type, and shall include:

(1) An explanation of the point in time at which a claim may be raised,

(2) Step-by-step procedures as to the manner in which a claim may be raised,

(3) A clear designation and address of the final claim review person or office of the manufacturer, and

(4) The provision regarding failure of the manufacturer to respond within 10 days of an appeal to that person or office.

§ 85.2111 Review of warranty statement, maintenance and operation instructions.

(a) EPA will review owner's manuals and service manuals to ensure that the Emissions Performance Warranty and its accompanying maintenance and operation instructions have been included in accordance with the requirements of this subpart.

(b) For purposes of such review, the manufacturer of each vehicle to which this subpart applies shall submit two copies to EPA of the owner's manual and service manual for each such vehicle, in the final printed format in which they are to be distributed. The manuals should be received by EPA prior to the introduction of the vehicle for sale.

(c) At the same time, the manufacturer shall submit an estimate of the cost of each item to be replaced during maintenance required under the Emissions Performance Warranty, and the labor charge to replace it, for each vehicle to which this subpart applies. Such submission need not be made to the extent that it would duplicate information already being provided to EPA pursuant to existing regulations or guidelines.

(d) All materials should be sent to: Director, Mobile Source Enforcement Division (EN-340), Environmental Protection Agency, 401 "M" Street SW., Washington, D.C. 20460.

§ 85.2112 Maintenance and operation instruction disapproval.

(a) Any maintenance or operation instruction may be disapproved upon a determination by EPA that it does not, in practice, satisfy the criteria set out in § 85.2104 for inclusion of such instructions.

(b) No disapproval shall be effected without affording the manufacturer reasonable notice in writing, and an opportunity to present his views or evidence at an Agency hearing on the record.

(c) A disapproval shall become effective upon publication of such in the FEDERAL REGISTER.

(d) Upon disapproval, an instruction shall cease to be a condition to manufacture liability under § 85.2103(a)(1). No warranty claim may be denied on the basis of non-compliance with such an instruction, or on the basis of emissions degradation due to attempts to comply.

(e) The manufacturer shall be required to mail notification of any disapproval to the owners of all affected vehicles, with an explanation of the implication of such with regard to protection under the Emissions Performance Warranty. Manufacturers shall ascertain the current addresses of owners in a manner to be approved by the Administrator.

(f) EPA may periodically publish a list of all disapproved instructions for distribution to emissions inspection facilities, and any other interested persons. Copies may be obtained by writing to: Public Information Office, Environmental Protection Agency, 401 "M" Street SW., Washington, D.C. 20460.

(g) Failure of EPA to disapprove any intruction shall have no bearing on the propriety of such instruction when considered in light of § 85.2107(e)(3).

Secretary.

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY

AB–1

Description of all lines or portions of lines identified on the Chicago and North Western Transportation Company System Diagram Map as falling within Categories 1 thru 3. 49 CFR 1121.21.

CATEGORY

All lines or portions of lines which the Chicago and North Western Transportation Company anticipates will be the subject of an abandonment or discontinuance application to be filed within the 3-year period following the date upon which the diagram, or any amended diagram, is filed with the Interstate Commerce Commission. 49 CFR 1121.20(b)(1).

ILLINOIS

(a) Rockford to Winnebago (Westerly 6.9 miles of Belvidere Subdivision).
(b) Entire segment is located in Illinois.
(c) Entire segment is located in Winnebago County.
(d) M.P. 93.5 to M.P. 100.4.
(e) No agency station located on this segment. Closed station of Winnebago served by central agency at Rockford.
Comment: Proposal does not include any industries located at Rockford.

(a) Sycamore to Byron (Westerly 30.8 miles of Ingalton Subdivision and portion of former C.G.W. Ry. Chicago to Omaha Line).
(b) Entire segment is located in State of Illinois.
(c) Entire segment is located in DeKalb and Ogle Counties.
(d) M.P. 57.5 to M.P. 88.3.
(e) Central agent at Byron responsible for associate station of Esmond and closed stations of Clare, Lindenwood, and Holcomb.

[1] AB 1 (SDM) includes Des Moines and Central Iowa Railway Company and Central Iowa Railway Company and Fort Dodge, Des Moines & Southern Railway Company.

Central agent at Sycamore (unaffected) served closed station at Five Points.
Comment: Proposal does not include industries located at Sycamore.

(a) Ringwood, Illinois to Lake Geneva, Wisconsin (Westerly 17.4 miles of Lake Geneva Subdivision).
(b) Segment is located in the States of Illinois and Wisconsin.
(c) The entire segment is located in McHenry County, Illinois and Walworth County, Wisconsin.
(d) M.P. 69.2 to M.P. 86.6.
(e) Agents located at Lake Geneva and Genoa City. Agent at Lake Geneva served closed station of Pell Lake. Agent at McHenry (unaffected) is responsible for associate station of Richmond.
Comment: Proposal does not include industries located at Ringwood.

(a) Elgin to Dundee (3.0 mile portion of Dundee Subdivision).
(b) Entire segment is located in the State of Illinois.
(c) Entire segment is located in Kane County.
(d) M.P. 43.8 to M.P. 46.8
(e) None.
Comment: Proposal does not include industries located at Elgin and Dundee.

IOWA

(a) Lake View to Holstein (Westerly 41.1 miles of Holstein Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Sac and Ida Counties.
(d) M.P. 4.5 to M.P. 45.6
(e) Central agent at Wall Lake (unaffected) is responsible for associate stations of Sac City, Early, Schaller, Galva, and Holstein.
Comment: Proposal does not include industries located at Lake View.

(a) Minerva Junction to Zearing (Easterly 19.1 miles of Roland Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Marshall and Story Counties.
(d) M.P. 240.0 to M.P. 259.1
(e) Central agent at Clemons Grove is responsible for closed stations of St. Anthony, Zearing, and Minerva. Central agent at Marshalltown (unaffected) is responsible for closed station of Keller.

(a) Ellsworth to Lawn Hill (Easterly 21.0 miles of Ellsworth Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Hamilton and Hardin Counties.
(d) M.P. 65.4 to M.P. 44.4
(e) Central agent at Jewell (unaffected) is responsible for associate stations to Radcliffe and Hubbard. Central agent at Eldora (unaffected) is responsible for associate station of Lawn Hill.
Comment: Proposal does not include industries located at Ellsworth.

(a) Hicks to Buckingham (Southern 9.3 miles of Parkersburg Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Blackhawk and Tama Counties.
(d) M.P. 38.1 to M.P. 28.8
(e) Central agent at Reinbeck (unaffected) is responsible for associate station of Buckingham and closed station of Voorhies.
Comment: Proposal does not include industries located at Hicks.

(a) Garwin to Gladbrook (6.4 mile portion of Alden Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Tama County.
(d) M.P. 12.1 to M.P. 18.5
(e) None.
Comment: Proposal does not include industries located at Garwin or Gladbrook.

(a) Marathon to Alton (59.2 mile portion of Sioux Rapids Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Buena Vista, Clay, O'Brien and Sioux Counties.
(d) M.P. 157.3 to M.P. 216.5
(e) Central agent at Sioux Rapids is responsible for associate stations of Linn Grove and Peterson. Central agent at Alton (unaffected) is responsible for associate stations of Sutherland, Paullina, and Granville.
Comment: Proposal does not include industries located at Marathon or Alton.

(a) Humboldt to LuVerne (13.7 mile portion of Forest City Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Humboldt County.
(d) M.P. 201.5 to M.P. 187.8
(e) Central agent at LuVerne (unaffected) is responsible for associate station of Livermore and closed station of Arnold.
Comment: Proposal does not include industries at Humboldt or LuVerne.

(a) Corwith to Lake Mills (Northerly 38.7 miles of Forest City Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Hancock and Winnebago Counties.
(d) M.P. 178.0 to M.P. 139.3.
(e) Central agent at Forest City is responsible for associate station of Leland. Central agent located at Britt.
Comment: Proposal does not include industries located at Corwith and Lake Mills.

(a) Olewein to Dubuque (69.3 mile portion of Dubuque Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Fayette, Buchanan, Delaware and Dubuque Counties.
(d) M.P. 245.0 to M.P. 175.7
(e) Central agent at Dubuque (unaffected) is responsible for associate station of Dyersville and closed stations of Durango, Graf, Farley, Petersburg, and Almoral. Central agent at Oelwein (unaffected) is responsible for associate station of Aurora and closed stations of Thorpe, Dundee, Lamont, and Stanley.
Comment: Proposal is contingent on agreement with C.M.St.P.&P. RR. for trackage rights between Clinton, Iowa and Dubuque. Proposal does not include industries located at Dubuque or Oelwein.

(a) Grand Junction to Minburn (Northerly 21.6 miles of Perry Subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Greene, Boone and Dallas Counties.
(d) M.P. 260.8 to M.P. 282.4
(e) Central agency at Grand Junction (unaffected) is responsible for associate stations of Rippey and Perry and closed station of Angus.
Comments: Proposal does not include industries at Grand Junction or Minburn. Proposal is contingent on C.R.I.&P. RR. abandoning operations over this trackage.

(a) Ayrshire to Terril (Northerly 34.0 miles of Tara subdivision).
(b) Entire segment is located in the State of Iowa.
(c) Entire segment is located in Palo Alto, Clay, and Dickinson Counties.
(d) M.P. 217.3 to M.P. 182.5

(e) Central agent at Spencer is responsible for associate station of Terril and closed stations of Ruthven and Langdon.

Comment: Proposal does not include industries located at Ayrshire.

(a) Gypsum to Flugstad (Westerly 11.9 miles of Flugstad Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Webster and Hamilton Counties.

(d) M.P. 1.8 to M.P. 13.7

(e) Central agent at Ford Dodge (unaffected) is responsible for closed stations of Evanston, Brushy, and Flugstad.

Comment: Proposal does not include industries at Gypsum.

(a) Jewell to Stratford (Easterly 14.6 miles of Dayton Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Hamilton and Webster Counties.

(d) M.P. 69.4 to M.P. 84.0

(e) Central agent at Gowrie (unaffected) is responsible for associate stations of Stanhope and Stratford.

Comment: Proposal does not include industries located at Jewell.

(a) Harcourt to Dayton (Westerly 5.1 miles of Dayton Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Webster County.

(d) M.P. 98.0 to M.P. 92.9

(e) Central agent at Gowrie (unaffected) is responsible for associate station of Dayton.

Comment: Proposal does not include industries at Harcourt.

(a) Trimount, Minnesota to Estherville, Iowa (southerly 26.5 miles of Estherville Subdivision).

(b) Entire segment is located in the States of Minnesota and Iowa.

(c) Entire segment is located in Martin County, Minnesota and Emmet County, Iowa.

(d) M.P. 142.4 to M.P. 168.9

(e) Central agent at Spencer (unaffected) is responsible for associate stations of Dunnell, Estherville and closed station of Huntington. Central Agent at St. James (unaffected) is responsible for associate station of Sherburn.

Comment: Proposal does not include industries located at Trimount.

(a) Camp Dodge to Granger (northerly 7.2 miles of Des Moines and Central Iowa Railway).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Dallas and Polk Counties.

(d) M.P. 11.4 to M.P. 18.6.

(e) Central agent at Des Moines (unaffected) is responsible for associate stations of Granger and Herrold.

Comment: Proposal does not include industries at Camp Dodge.

MICHIGAN

(a) Ishpeming to Martin's Landing (Westerly 15.1 miles of Martin's Landing Spur).

(b) Entire segment is located in the State of Michigan.

(c) Entire segment is located in Marquette County.

(d) M.P. 74.5 (L.S.&I. RR.) to M.P. 196.6.

(e) Central agent at Ishpeming (unaffected) is responsible for closed stations of Clowry, Martin's Landing, and Blueberry Mine.

Comments: Proposal does not include industries located at Ishpeming Proposal is for discontinuance of operations only.

MINNESOTA

(a) Lake Crystal to Winnebago (24.6 miles—entire Winnebago Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Blue Earth and Faribault Counties.

(d) M.P. 0.0 to M.P. 24.6

(e) Central agent at Mankato (unaffected) is responsible for associate stations of Garden City, Vernon Center, Amboy, and Winnebago.

Comment: Proposal does not include industries located at Lake Crystal.

(a) Heron Lake to Lake Wilson (36.6 miles—entire Slayton Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Jackson, Nobles, and Murray Counties.

(d) M.P. 0.0 to M.P. 36.6

(e) Central agent at Worthington (unaffected) is responsible for associate stations of Dundee, Lime Creek, Avoca, Slayton, Hadley, and Lake Wilson.

Comment: Proposal does not include industries located at Heron Lake.

(a) Bingham Lake to Currie (38.3 miles—entire Currie Subdivision).

(b) Entire segment located in the State of Minnesota.

(c) Entire segment located in Cottonwood and Murray Counties.

(d) M.P. 0.0 to M.P. 38.3.

(e) Central agent at Windom (unaffected) is responsible for associate stations of Delft, Jeffers, Storden, Westbrook, Dovray, and Currie.

Comment: Proposal does not include industries located at Bingham Lake.

(a) St. James to Hanska (Northerly 13.4 miles of Hanska Spur).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Watonwan and Brown Counties.

(d) M.P. 125.2 to M.P. 111.8.

(e) Central agent at St. James (unaffected) is responsible for associate stations of LaSalle and Hanska.

Comment: Proposal does not include industries located at St. James.

(a) Trimount to Ormsby (Northerly 4.7 miles of Estherville Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Martin and Watonwan Counties.

(d) M.P. 140.7 to M.P. 136.0.

(e) Central agent at St. James (unaffected) is responsible for associate station of Ormsby.

Comment: Proposal does not include industries located at Trimount.

(a) Trimount, Minnesota to Estherville, Iowa. Line description is on Page 11 (Iowa).

(a) Rochester to Stewartville (12.6 mile portion of Rochester Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Olmsted County.

(d) M.P. 146.0 to M.P. 158.6.

(e) Central agent at Rochester (unaffected) is responsible for associate stations of Simpson and Stewartville.

Comment: Proposal does not include industries located at Rochester.

(a) Hopkins to Norwood (Easterly 31.4 miles of Morton Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Hennepin and Carver Counties.

(d) M.P. 19.6 to M.P. 51.3.

(e) Central agent at Hopkins (unaffected) is responsible for associate stations of Deephaven, Excelsior, Manitou, Victoria, Waconia, and Young America.

Comments: Proposal does not include industries located at Hopkins or Norwood. Proposal is contingent on agreement with C.M.St.P.&P. RR. for trackage rights between Minneapolis and Norwood.

(a) Northfield to Faribault (12.3 mile portion of Red Wing Subdivision).

(b) Entire segment is located in the State of Minnesota.

(c) Entire segment is located in Rice County.

(d) M.P. 58.1 to M.P. 45.8

(e) Central agent at Randolph (unaffected) is responsible for associate station of Dundas and closed station of Bridgewater.

Comments: Proposal does not include industries located at Northfield or Faribault. Proposal is contingent on agreement with C.M.St.P.&P. RR. for trackage rights between Northfield to Faribault.

NEBRASKA

(a) Blair to Tekamah (Southerly 17.4 miles of Lyons Subdivision).

(b) Entire segment is located in the State of Nebraska.

(c) Entire segment is located in Washington and Burt Counties.

(d) M.P. 98.1 to M.P. 80.7.

(e) Central agent at Blair (unaffected) is responsible for associate stations of Herman and Tekamah, and closed station of Ranch Spur.

Comment: Proposal does not include industries located at Blair.

(a) Fremont to Lincoln (48.3 mile portion of Lincoln Subdivision).

(b) Entire segment is located in the State of Nebraska.

(c) Entire segment is located in Dodge, Saunders, and Lancaster Counties.

(d) M.P. 39.2 (UP RR) to M.P. 48.5

(e) Central agent at Fremont (unaffected) is responsible for associate station of Cedar Bluffs. Central agent at Lincoln (unaffected) is responsible for associate stations of Wahoo and Coresco, and closed stations of Colon and Davey.

Comments: Proposal is contingent on agreements with U.P. RR. and M.P. RR. for trackage rights between Fremont and Lincoln. Proposal does not include industries located at Fremont or Lincoln.

(a) Elkhorn Jct. to Blair (22.4 mile portion of Sioux City Subdivision).

(b) Entire segment is located in the State of Nebraska.

(c) Entire segment is located in Douglas and Washington Counties.

(d) M.P. 121.6 to M.P. 99.2

(e) Central agent at Omoha (unaffected) is responsible for associate station of Florence and closed station of Ft. Calhoun.

Comment: Proposal does not include industries located at Blair or Omaha (Elkhorn Jct. is a junction point in Omaha).

SOUTH DAKOTA

(a) Jolly to Jolly Dump (3.7 miles—entire Jolly Dump Spur).

(b) Entire segment is located in the State of South Dakota.

(c) Entire segment is located in Butte County.

(d) M.P. 0.0 to M.P. 3.7.

(e) Central agent at Belle Fourche (unaffected) is responsible for associate station of Jolly Dump.

(a) Redfield to Frankfort (Easterly 9.7 miles of Frankfort Spur).

(b) Entire segment is located in the State of South Dakota.

(c) Entire segment is located in Spink County.

(d) M.P. 388.9 to M.P. 379.2.

(e) Central agent at Redfield (unaffected) is responsible for associate station of Frankfort.

Comment: Proposal does not include industries located at Redfield.

(a) James Valley Jct. to Redfield (Easterly 33.8 miles of Oakes Subdivision).

(b) Entire segment is located in the State of South Dakota.

(c) Entire segment is located in Beadle and Spink Counties.

(d) M.P. 4.0 to M.P. 37.8

(e) Central agent at Huron (unaffected) is responsible for associate station of Hitchcock.

Comments: Proposal is contingent on agreement with C.M.St.P.&P.RR. for trackage rights between Wolsey, South Dakota and Redfield. Proposal does not include industries located at James Valley Junction or Redfield.

WISCONSIN

(a) Ripon to Bancroft (Westerly 58.9 miles of Marshline Subdivision).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Fond du Lac, Green Lake, Marquette, Waushara and Portage Counties.

(d) M.P. 20.5 to M.P. 124.4

(e) Central agent at Ripon (unaffected) is responsible for associate stations of Green Lake, Chier St. Marie Sand Co. Pit, Princeton, and Neshkoro. Central agent at Almond is responsible for associate stations of Bannerman, Wautoma, Wild Rose and closed station of Bancroft.

Comment: Proposal does not include industries located at Ripon.

(a) Merrillan to Marshfield (Westerly 37.5 miles of Merrillan Subdivision).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Jackson, Clark; and Wood Counties.

(d) M.P. 0.0 to M.P. 37.5

(e) Central agent at Merrillan (unaffected) is responsible for associate stations of Neillsville, Granton, Chili, and closed station of Kurth.

Comment: Proposal does not include industries located at Merrillan or Marshfield.

(a) Edgar to Marshfield (22.0 mile portion of Marshfield Subdivision).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Marathon and Wood Counties.

(d) M.P. 40.8 to M.P. 62.8

(e) Central agent at Wausau (unaffected) is responsible for associate station of Stratford and closed stations of Fenwood and Opal.

Comment: Proposal does not include industries located at Edgar or Marshfield.

(a) Conover to Phelps (9.2 miles entire Phelps Spur).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Villas County.

(d) M.P. 0.0 to M.P. 9.2.

(e) Central agent at Watersmeet (unaffected) is responsible for associate station of Phelps.

Comment: Proposal does not include industries located at Conover.

(a) Beloit to Evansville (23.0 miles portion of Beloit and Footville Subdivisions).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Rock County.

(d) M.P. 92.5 to M.P. 115.5.

(e) Central agent at Beloit (unaffected) is responsible for closed station of Afton. Central agent at Madison (unaffected) is responsible for associate station of Footville and closed station of Magnolia.

Comment: Proposal does not include industries located at Beloit or Evansville.

(a) Ringwood, Illinois to Lake Geneva, Wisconsin. Line description is on Pages 2 and 3 (Illinois).

(a) Medary Jct. to Galesville (23.2 miles—a portion of the Adams Subdivision and the entire Galesville Spur).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in LaCrosse and Trempealeau Counties.

(d) M.P. 268.3 to M.P. 284.5 and M.P. 284.0 to M.P. 291.0.

(e) Central agent at LaCrosse (unaffected) is responsible for associate stations of Onalaska, Midway, Trempealeau, Galesville and closed station of Lyties.

Comment: Proposal does not include industries located at Medary.

(a) Shawano to Eland (Westerly 29.3 miles of Shawano Subdivision).

(b) Entire segment is located in the State of Wisconsin.

(c) Entire segment is located in Shawano County.

(d) M.P. 38.7 to M.P. 68.0.

(e) Central agent at Shawano (unaffected) is responsible for associate station of Bowler and closed station of Thornton.

Comment: Proposal does not include industries located at Shawano or Eland.

CATEGORY 2

All lines or portions of lines potentially subject to abandonment which the Chicago and North Western Transportation Company has under study and believes may be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues. 49 CFR 1121.20 (b) (2).

IOWA

(a) Burt to Bancroft (3.0 mile portion of Burt Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Kossuth County.

(d) M.P. 145.5 to M.P. 148.5.

(e) Central agent at Burt (unaffected) is responsible for associate station of Bancroft.

Comment: Proposal does not include industries located at Burt.

(a) LuVerne to Corwith (8.6 mile portion of Forest City Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Kossuth and Hancock Counties.

(d) M.P. 186.6 to M.P. 178.0

(e) Central agent at Britt (unaffected) is responsible for associate station of Corwith and closed station of Hanna.

Comment: Proposal does not include industries located at LuVerne.

(a) Rolfe to Ayrshire (22.2 mile portion of Tara Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Pocahontas and Palo Alto Counties.

(d) M.P. 239.5 to M.P. 217.3.

(e) Central agent at Rolfe (unaffected) is responsible for associate stations of Curlew and Ayrshire, and closed stations of Plover and Mallard.

Comment: Proposal does not involve industries located at Rolfe.

(a) Carroll to Harlan (Southerly 40.2 miles of Harland Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Carroll, Crawford, and Shelby Counties.

(d) M.P. 421.7 to M.P. 461.9

(e) Agent located at Harlan and central agent located at Carroll (unaffected) is responsible for associate stations of Manning and Irwin, and closed station of Halbur.

Comment: Proposal does not include industries located at Carroll.

(a) Belmond to Alexander (Easterly 7.7 miles of Belmond Subdivision).

(b) Entire segment is located in the State of Iowa.

(c) Entire segment is located in Wright and Franklin Counties.

(d) M.P. 206.3 to M.P. 198.6

(e) Central agent at Belmond (unaffected) is responsible for associate station of Alexander.

Comment: Proposal does not include industries located at Belmond.

(a) Mason City to Kesley (Northerly 34.8 miles of Parkersburg Subdivision).

LOS ANGELES & SALT LAKE
RAILROAD COMPANY
SYSTEM DIAGRAM (AB-35)

Description of Lines

Pursuant to the regulations of the Interstate Commerce Commission (49 C.F.R. 1121.21), following is a description of lines of Los Angeles & Salt Lake Railroad Company as shown on the System Diagram Map.

Category 1 - Lines anticipated to be the subject of abandonment applications within three years.

California

(a) Designation of line: Crestmore Branch
(b) States in which located: California
(c) Counties in which located: Riverside and San Bernadino, Counties
(d) Milepost locations: M.P. 3.00 at Crestmore, to M.P. 4.24.
(e) There are no agency or terminal stations located on this line.

Utah

(a) Designation of line: Cedar City Branch
(b) States in which located: Utah
(c) Counties in which located: Iron
(d) Milepost locations: M.P. 31.83 near Cedar City, to M.P. 33.17 near Cedar City
(e) Cedar City at M.P. 32.52 is an agency station located on this line.

(a) Designation of line: Ironton Branch
(b) States in which located: Utah
(c) Counties in which located: Utah
(d) Milepost locations: M.P. 0.00 at Ironton, to M.P. 1.87.
(e) There are no agency or terminal stations located on this line.

Category 2 - Lines which are potentially subject to abandonment and which the carrier has under study and believes may be the subject of a future abandonment

application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues.

California

(a) Designation of line: Crestmore Branch
(b) States in which located: California
(c) Counties in which located: Riverside
(d) Milepost locations: M.P. 0.00 near Riverside Junction, to M.P. 0.86.
(e) There are no agency or terminal stations located on this line.

Nevada

(a) Designation of line: Boulder City Branch
(b) States in which located: Nevada
(c) Counties in which located: Clark
(d) Milepost locations: M.P. 9.8 near Henderson, to M.P. 22.67 near Boulder City
(e) Henderson at M.P. 9.87 is an agency station located on this line.

(a) Designation of line: Pioche Branch
(b) States in which located: Nevada
(c) Counties in which located: Lincoln
(d) Milepost locations: M.P. 14.78 near Panaca, to M.P. 32.96 near Pioche
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Prince Branch
(b) States in which located: Nevada
(c) Counties in which located: Lincoln
(d) Milepost locations: M.P. 0.10 near Prince Junction, to M.P. 8.81 near Prince.
(e) There are no agency or terminal stations located on this line.

Utah

(a) Designation of line: Silver City Branch
(b) States in which located: Utah
(c) Counties in which located: Juab
(d) Milepost locations: M.P. 0.48 near Silver City, to M.P. 2.42.
(e) There are no agency or terminal stations located on this line.

SYSTEM DIAGRAM (AB-36)

Description of Lines

Pursuant to the regulations of the Interstate Commerce Commission (49 C.F.R. 1121.21), following is a description of lines of Oregon Short Line Railroad Company as shown on the System Diagram Map.

Category 1 - Lines anticipated to be the subject of abandonment applications within three years.

Idaho

(a) Designation of line: Ketchum Branch
(b) States in which located: Idaho
(c) Counties in which located: Blaine and Lincoln Counties
(d) Milepost locations: M.P. 15.65 near Richfield, to M.P. 69.84 near Ketchum
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: East Belt Branch
(b) States in which located: Idaho
(c) Counties in which located: Fremont County
(d) Milepost locations: M.P. 38.56 near Newdale, to M.P. 44.28 near Belt
(e) Newdale at M.P. 38.08 is an agency station.

(a) Designation of line: Yellowstone Branch
(b) States in which located: Idaho
(c) Counties in which located: Fremont County
(d) Milepost locations: M.P. 51.0 near Ashton, to M.P. 90.7 near Big Springs
(e) Ashton at M.P. 50.99 is an agency station

Idaho and Montana

(a) Designation of line: Yellowstone Branch
(b) States in which located: Idaho and Montana
(c) Counties in which located: Fremont County, Idaho, and Gallatin County, Montana
(d) Milepost locations: M.P. 90.7 near Big Springs, to M.P. 107.2 near West Yellowstone
(e) There are no agency or terminal stations located on this line.

Idaho and Nevada

(a) Designation of line: Wells Branch
(b) States in which located: Idaho and Nevada
(c) Counties in which located: Twin Falls County, Idaho, and Elko County, Nevada
(d) Milepost locations: M.P. 29.35 near Rogerson, to M.P. 123.46 near Wells.
(e) There are no agency or terminal stations located on this line.

Category 2 - Lines which are potentially subject to abandonment and which the carrier has under study and believes may be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues.

Idaho

(a) Designation of line: Ketchum Branch
(b) States in which located: Idaho
(c) Counties in which located: Lincoln County
(d) Milepost locations: M.P. 0.00 near Shoshone, to M.P. 15.65 near Richfield
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Hill City Branch
(b) States in which located: Idaho
(c) Counties in which located: Camas, Lincoln, and Blaine Counties
(d) Milepost locations: M.P. 0.00 near Richfield, to M.P. 58.34 near Hill City
(e) There are no agency or terminal stations on this line.

(a) Designation of line: New Meadows Branch
(b) States in which located: Idaho
(c) Counties in which located: Adams County
(d) Milepost locations: M.P. 84.52 near Rubicon, to M.P. 90.17 near New Meadows
(e) There are no agency or terminal stations on this line.

(a) Designation of line: Grace Branch
(b) States in which located: Idaho
(c) Counties in which located: Caribou County
(d) Milepost locations: M.P. 0.00 near Alexander, to M.P. 5.58 near Grace
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Wells Branch
(b) States in which located: Idaho
(c) Counties in which located: Twin Falls County
(d) Milepost locations: M.P. 0.00 near Twin Falls, to M.P. 29.35 near Rogerson
(e) Twin Falls at M.P. 0.00 is an agency station.

Category 3 - Applications pending before the Interstate Commerce Commission.

Idaho

(a) Designation of line: West Belt Branch
(b) States in which located: Idaho
(c) Counties in which located: Madison and Jefferson Counties
(d) Milepost locations: M.P. 10.8 near Menan, to M.P. 26.48 near Edmonds
(e) Menan at M.P. 10.41 is an agency station.

(a) Designation of line: Boise Cut-Off
(b) States in which located: Idaho
(c) Counties in which located: Ada County
(d) Milepost locations: M.P. 423.5 near Orchard, to M.P. 442.0 near Boise
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Goshen Branch
(b) States in which located: Idaho
(c) Counties in which located: Bingham and Bonneville Counties
(d) Milepost locations: M.P. -0.06 near Firth, to M.P. 17.53 near Ammon
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Grace Branch
(b) States in which located: Idaho
(c) Counties in which located: Caribou County
(d) Milepost locations: M.P. 5.58 near Grace, to M.P. 6.91 near Grace.
(e) There are no agency or terminal stations located on this line.

SACRAMENTO NORTHERN RAILWAY

System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, § 1121.22, that the Sacramento Northern Railway Company, has filed with the Commission its color-coded system diagram map in docket No. AB 72 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 72 (SDM).

ROBERT L. OSWALD,
Secretary.

Descriptions of Lines to Accompany
Soo Line Railroad Company System Diagram Map

Category I

Lines or portions of lines which the carrier anticipates will be the subject of an abandonment or discontinuance application to be filed within three years.

1. (a) Carrier's designation
Greenwood Line

(b) State or states in which line is located
Wisconsin

(c) County or counties in which line is located
Wood and Clark

(d) Mileposts delineating line
281.5 to 304.1

(e) Agency or terminal stations located on line with milepost designation

Spokeville	294.6
Loyal	297.9
Greenwood	303.5

2. (a) Carrier's designation
North St. Paul Line

(b) State or states in which line is located
Minnesota

(c) County or counties in which line is located
Washington and Ramsey

(d) Mileposts delineating line
428.4 to 439.77

(e) Agency or terminal stations located on line with milepost designation

Carnelian Jct.	428.5
Duluth Jct.	433.67

3. (a) Carrier's designation
St. Paul

(b) State or states in which line is located
Minnesota

(c) County or counties in which line is located
Ramsey

(d) Mileposts delineating line
18.19 to 19.17

(e) Agency or terminal stations located on line with milepost designation
None

4. (a) Carrier's designation
Newberry to Shingleton

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Luce, Schoolcraft and Alger

(d) Mileposts delineating line
59.0 to 104.38

(e) Agency or terminal stations located on line with milepost designation

McMillan	67.26
Seney	79.54
Creighton	95.10

(NOTE: Abandonment of this line will be contingent upon coordination of certain operations with other railroads to continue service west of Marquette and between Munising Junction and Shingleton.)

5. (a) Carrier's designation
Munising Jct. to Marquette

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Alger and Marquette

(d) Mileposts delineating line
116.83 to 152.50

(e) Agency or terminal stations located on line with milepost designation

Ridge	119.36
AuTrain	125.03
Deerton	135.71
Siding 145	145.1

(NOTE: Abandonment of this line will be contingent upon coordination of certain operations with other railroads to continue service west of Marquette and between Munising Junction and Shingleton.)

6. (a) Carrier's designation
St. Ignace to Trout Lake

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Mackinac and Chippewa

(d) Mileposts delineating line
0 to 27.12

(e) Agency or terminal stations located on line with milepost designation

St. Ignace	0.13
Moran	11.06

7. (a) Carrier's designation
Nestoria to Bergland

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Baraga, Houghton and Ontonagon

(d) Mileposts delineating line
201.68 to 268.89

(e) Agency or terminal stations located on line with milepost designation

Vermilac	211.40
Covington	215.04
Sidnaw	224.00
Kenton	233.42
Trout Creek	239.12
Bruce Crossing	250.61
Ewen	255.34

(NOTE: Abandonment of this line will be contingent upon coordination of certain operations with other railroads to continue service west of Marquette, Michigan.)

8. (a) Carrier's designation
Calumet Line (AB-57 (Sub. 5))

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Houghton

(d) Mileposts delineating line
0 to 14.28

(e) Agency or terminal stations located on line with milepost designation

Hancock	1.72
Calumet	14.28

9. (a) Carrier's designation
Lake Linden Line (AB-57 (Sub. 5))

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Houghton

(d) Mileposts delineating line
0 to 9.53

(e) Agency or terminal stations located on line with milepost designation

Dollar Bay	3.4
Lake Linden	9.53

10. (a) Carrier's designation
Baraga to Houghton (AB-57 (Sub. 5))

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Baraga and Houghton

(d) Mileposts delineating line
23.0 to 48.21

(e) Agency or terminal stations located on line with milepost designation

Keweenaw Bay	28.2
Chassell	40.5
East Houghton	48.0
Houghton	48.21

Category II

Lines or portions of lines potentially subject to abandonment.

1. (a) Carrier's designation
Plummer Line

(b) State or states in which line is located
Minnesota

(c) County or counties in which line is located
Aitkin and Cass

(d) Mileposts delineating line
270.26 to 369.27

(e) Agency or terminal stations located on line with milepost designation

Palisade	281.3
Swatara	296.7
Remer	312.9
Boy River	325.6
Federal Dam	332.1
Portage Lake	339.1
Schley	344.2
Soo Jct.	345.72

2. (a) Carrier's designation
Pollock Line

(b) State or states in which line is located
North Dakota and South Dakota

(c) County or counties in which line is located
McIntosh, N. D. and McPherson and Campbell, S. D.

(d) Mileposts delineating line
341.87 to 411.11

(e) Agency or terminal stations located on line with milepost designation

Danzig	351.4
Ashley	359.3
Venturia	368.2
Madra	377.8
Artas	383.8
Herreid	397.1
Pollock	409.7

Category III

Lines or portions of lines for which an abandonment or discontinuance application is currently pending before the Interstate Commerce Commission.

1. (a) Carrier's designation
Duluth Trackage (AB-57 (Sub. 4))

(b) State or states in which line is located
Minnesota

(c) County or counties in which line is located
St. Louis

(d) Mileposts delineating line
467.93 to 468.20

(e) Agency or terminal stations located on line with milepost designation
None

2. (a) Carrier's designation
Raco Line (AB-57 (Sub. 2))

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Chippewa and Luce

(d) Mileposts delineating line
19.69 to 46.69

(e) Agency or terminal stations located on line with milepost designation

Raco	20.03
Rexford	25.18
Strongs	31.87
Eckerman	35.25
Hulbert	40.97

3. (a) Carrier's designation
Rapid River Line (AB-57 (Sub. 1))

(b) State or states in which line is located
Michigan

(c) County or counties in which line is located
Delta and Alger

(d) Mileposts delineating line
348.69 to 379.23

(e) Agency or terminal stations located on line with milepost designation

Trenary	368.0
Traunik	372.8
Eben Jct.	379.0

(NOTE: A final order authorizing abandonment of this line was issued by the Commission on October 13, 1976. However, that order has not been implemented.)

UNION PACIFIC RAILROAD COMPANY
SYSTEM DIAGRAM (AB-33)

Description of Lines

Pursuant to the regulations of the Interstate Commerce Commission (49 C.F.R. 1121.21), following is a description of lines of Union Pacific Railroad Company as shown on the System Diagram Map.

Category 1 - Lines anticipated to be the subject of abandonment applications within three years.

Utah

(a) Designation of line: Park City Branch
(b) States in which located: Utah
(c) Counties in which located: Summit County
(d) Milepost locations: M.P. 27.39 near Freight Yard Junction to M.P. 28.43 near Park City
(e) The Park City Agency Station is located on this line at M.P. 28.41.

(a) Designation of line: Ontario Branch
(b) States in which located: Utah
(c) Counties in which located: Wasatch County
(d) Milepost locations: M.P. 2.45 at Keetley, to M.P. 5.43
(e) There are no agency or terminal stations located on this line.

Category 2 - Lines which are potentially subject to abandonment and which the carrier has under study and believes may be the subject of a future abandonment application because of either anticipated operating losses or excessive rehabilitation costs, as compared to potential revenues.

Colorado

(a) Designation of line: Greeley Branch
(b) States in which located: Colorado
(c) Counties in which located: Weld County
(d) Milepost locations: M.P. 0.00 near Greeley Junction, to M.P. 10.86 near Gill
(e) There are no agency or terminal stations located on this line.

Nebraska

(a) Designation of line: Loup City Branch
(b) States in which located: Nebraska
(c) Counties in which located: Sherman and Howard Counties
(d) Milepost locations: M.P. 0.20 near St. Paul, to M.P. 39.60 near Loup City
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Scotia Branch
(b) States in which located: Nebraska
(c) Counties in which located: Greeley County
(d) Milepost locations: M.P. 44.57 near Scotia Junction, to M.P. 45.94 near Scotia
(e) There are no agency or terminal stations located on this line.

Category 3 - Applications pending before the Interstate Commerce Commission.

Nebraska

(a) Designation of line: Kearney Branch
(b) States in which located: Nebraska
(c) Counties in which located: Custer and Logan Counties
(d) Milepost locations: M.P. 83.11 at Arnold, to M.P. 102.47 at Stapleton
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Lyman Branch
(b) States in which located: Nebraska
(c) Counties in which located: Scotts Bluff County
(d) Milepost locations: M.P. 5.0 near Hartman, to M.P. 6.4 at Stegall
(e) There are no agency or terminal stations located on this line.

(a) Designation of line: Sears Branch
(b) States in which located: Nebraska
(c) Counties in which located: Scotts Bluff County
(d) Milepost locations: M.P. 0.00 near Sears, to M.P. 2.8 near Janise
(e) There are no agency or terminal stations located on this line.

Kansas

(a) Designation of line: Leavenworth Branch
(b) States in which located: Kansas
(c) Counties in which located: Leavenworth and Douglas Counties
(d) Milepost locations: M.P. 20.72 near Tonganoxie, to M.P. 34.49 near Lawrence
(e) Lawrence at M.P. 34.34 is an agency station.

Colorado

(a) Designation of line: Coalmont Branch
(b) States in which located: Colorado
(c) Counties in which located: Jackson County
(d) Milepost locations: M.P. 93.0 near Walden, to M.P. 108.0 near Hebron
(e) Walden at M.P. 92.21 is an agency station.

Wyoming

(a) Designation of line: Encampment Branch
(b) States in which located: Wyoming
(c) Counties in which located: Carbon County
(d) Milepost locations: M.P. 24.29 near Saratoga, to 33.40 near Cow Creek
(e) Saratoga at M.P. 24.02 is an agency station.

YAKIMA VALLEY TRANSPORTATION CO.

System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, § 1121.22, that the Yakima Valley Transportation Company, has filed with the Commission its color-coded system diagram map in docket No. AB 131 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on April 29, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each State in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 131 (SDM).

ROBERT L. OSWALD,
Secretary.

SYSTEM DIAGRAM MAP of the YAKIMA VALLEY TRANSPORTATION CO. AB No. 131 prepared in conjunction with I.C.C. Order Ex Parte No. 274 (Sub-No. 2) and Title 49 of the code of Federal Regulation 1121.

YAKIMA VALLEY TRANSPORTATION COMPANY
SYSTEM DIAGRAM (AB-131)

Description of Lines

Pursuant to the regulations of the Interstate Commerce Commission (49 C.F.R. 1121.21), following is a description of the line of Yakima Valley Transportation Company as shown on the System Diagram Map.

Category 3 - Abandonment applications pending before the Interstate Commerce Commission.

(a) Designation of line: Yakima Valley Branch Line
(b) States in which located: Washington State
(c) Counties in which located: Yakima County
(d) Milepost locations: M.P. 3.01 near Selah, to M.P. 3.47 near Selah
(e) There are no agency or terminal stations located on this line.

PART IV

ENVIRONMENTAL PROTECTION AGENCY

PESTICIDE PRODUCTS CONTAINING TOXAPHENE

Rebuttable Presumption Against Registration and Continued Registration

ENVIRONMENTAL PROTECTION AGENCY

[OPP-30000/13; FRL 731-2]

PESTICIDE PROGRAMS

Rebuttable Presumption Against Registration and Continued Registration of Pesticide Products Containing Toxaphene

The Deputy Assistant Administrator, Office of Pesticide Programs, Environmental Protection Agency (EPA), has determined that a rebuttable presumption exists against registration and continued registration of all pesticide products containing toxaphene.[1]

I. Regulatory Provisions

A. General

EPA promulgated regulations (40 CFR 162) for the registration, reregistration, and classification of pesticides on July 3, 1975 (40 FR 28242). Section 162.11 of the regulations provides that a rebuttable presumption against registration shall arise if it is determined that a pesticide meets or exceeds any of the criteria for risk set forth in § 162.11(a)(3). If it is determined that such a presumption against continued registration of a pesticide has arisen, the regulations require that the registrant be notified by certified mail and that the registrant be provided with an opportunity to submit evidence in rebuttal of the presumption. In addition, the Agency has determinded that the public should be provided with notice of the presumption in order to solicit comments from interested parties and obtain any additional information relevant to the presumption.

A notice of rebuttable presumption against registration or continued registration of a pesticide is not to be confused with a notice of intent to cancel the registration of a pesticide, and may or may not lead to cancellation. The notice of rebuttable presumption is issued when the evidence related to risk meets the Agency's criteria. The notice of intent to cancel is issued only after the risks and benefits of a pesticide are carefully considered and it is determined that the pesticide may generally cause unreasonable adverse effects to the environment.

Accordingly, all registrants and applicants for registration are invited pursuant to 40 CFR 162.11(a)(4) to submit evidence in rebuttal of the presumptions listed in Part II of this notice and, in the case of oncogenicity, to submit information which relates to the assessment of oncogenic risks as set forth in a Federal Register notice concerning the Agency's Interim Procedures and Guidelines for Health Risk and Economic Impact Assessment of Suspected Carcinogens (41 FR 21402). Registrants and other interested parties may submit data on benefits which they believe would justify registration or continued registration in the event that the Agency determines that the risk presumpions have not been completely rebutted. In addition, any registrant may petition the Agency to voluntarily cancel any current registration pursuant to Section 6(a)(1) of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751, 7 U.S.C. 136 et seq.).

This notice of rebuttable presumption against toxaphene also describes scientific studies which suggest that toxaphene may adversely affect or cause mutagenesis, endocrine effects, enzymatic effects, reproductive effects, and population reductions in avian species including the rare and endangered species, the Brown Pelican. The Agency is soliciting information and comment on these questions, but is not now presuming against toxaphene on the basis of these studies.

B. Rebuttal Criteria

Section 162.11(a)(4) provides that a registrant seeking continued registration may rebut the presumption by sustaining the hurden of proving:

(1) In the case of a pesticide presumed against pursuant to the acute toxicity criteria of § 162.11(a)(3)(i) or pursuant to the lack of emergency treatment criteria of § 162.11(a)(3)(iii), "that when considered with the formulation, packaging, method of use, and proposed restrictions on the directions for use and widespread and commonly recognized practices of use, the anticipated exposure to an applicator or user and to local, regional, or national populations of nontarget organisms is not likely to result in any significant acute adverse effects";

(2) In the case of a pesticide presumed against pursuant to the chronic toxicity criteria of § 162.11(a)(3)(ii), "that when considered with proposed restrictions on use and widespread and commonly recognized practices of use, the pesticide will not concentrate, persist or accrue to levels in man or the environment likely to result in any significant chronic adverse effects"; or

(3) In either case, that "the determination by the Agency that the pesticide meets or exceeds any of the criteria for risk was in error."

C. Benefits Information

In addition to submitting evidence to rebut the presumption of risk, § 162.11(a)(5)(iii) provides that a registrant "may submit evidence as to whether the economic, social and environmental benefits of the use of the pesticide subject to the presumption outweigh the risk of use." If the risk presumptions are not rebutted, the benefit evidence submitted by the registrant[2] and any preliminary EPA staff recommendations may be considered by the Administrator in determining the appropriate regulatory action. Specifically § 162.11(a)(5)(iii) provides that if the "benefits appear to outweigh risks," the Administrator may issue a notice of intent to hold a hearing pursuant to section 6(b)(2) of FIFRA rather than a notice of intent to cancel or deny registration pursuant to section 6(b)(1) of FIFRA. Alternatively, if the "benefits do not appear to outweigh the risks, the Administrator shall issue a notice pursuant to section 3(c)(6) or section 6(b)(1) of the Act, as appropriate." Moreover, if at any time the Administrator, determines that a pesticide poses an "imminent hazard" to humans or the environment, a notice of suspension may be issued pursuant to section 6(c) of the Act.

II. Presumptions

40 CFR 162.11(a)(3) provides that a rebuttable presumption shall arise if a pesticide's ingredient(s), metabolite(s) or degradation product(s) meet or exceed (i) acute toxicity risk criteria relating to hazards to humans, domestic animals, or wildlife, or (ii) chronic toxicity risk criteria relating to oncogenic, mutagenic, and delayed toxic effects in man and/or test animals, or relating to population reductions in nontarget organisms or fatality to members of endangered species.

The preamble to the document which promulgated 40 CFR Part 162 (FR 28262) discussed those pesticide's which meet or exceed the acute toxicity criteria of § 162.11(a)(3)(i)(B) and stated they must be closely scrutinized to determine if the hazard which the pesticide's acute toxicity presents to these life forms necessitates restrictions on use or denial or cancellation of the registrations.

A. Risk Criteria—Hazard to Wildlife: Aquatic Organisms

Section 162.11(a)(3)(i)(B)(3) provides that a rebuttable presumption shall arise against a pesticide use if it "(r)esults in a maximum calculated concentration following direct application to a 6-inch layer of water more than ½ the acute LC_{50} for aquatic organisms representative of the organisms likely to be exposed as measured on test animals specified in the Registration Guidelines."[3] Data reviewed during the assessment of hazards, as a result of the use of toxaphene products, indicate that resulting water concentrations from the use on rice and cranberries do exceed the level, ½ the acute LC_{50} for representative fresh water fish and crustacean species as set forth in this section (Sanders, H. O. 1969. Bur. Sport Fish. Wildl. Tech. Papers #25; Sanders & Cope. 1966. Trans. Am. Fish. Soc. 95 #2; Macek & McAllister 1970: Trans. Am. Fish. Soc. 99#1).

Organisms	Species	LC_{50} value
Water flea or Daphnia.	(*Daphnia pulex*).....	15 p/b (48 hr).
Largemouth bass.	(*Micropterus salmoides*).	2 p/b (48 hr).
Rainbow trout..	(*Salmo gardneri*).....	4 p/b (48 hr).
Scud.....	(*Gammarus lacustris*).:	26 p/b (96 hr).
Channel catfish.	(*Ictalurus punctatus*)..	13 p/b (96 hr).
Bluegill sunfish..	(*Lepomis macrochirus*).	18 p/b (96 hr).

The above LC_{50} values were used as determinative values to confirm whether toxaphene products applied to a fresh water environment met or exceeded the criteria for rebuttable presumption. Calculations based on representative label rates indicate that the lowest recommended dosage for use on either rice or cranberries results in a 6-inch layer of water concentration of 1104 ppb (1.104 ppm).

Since a great deal of rice is grown in coastal areas where it is released into estuarine or marine environments, it was decided to examine LC_{50} values for representative aquatic organisms that would be exposed to effluent from rice field drainages (Schimmel et al. EPA contribution #268. Prepub. Copy).

Organism	Species	LC_{50} (96 hr)
Pink shrimp.....	(*Penaeus duorarum*)....	1.4 p/b.
Grass shrimp.....	(*Palaemonetes pugio*)....	4.4 p/b.
Sheepshead minnow.	(*Cyprinodon variegatus*).	1.1 p/b.
Pinfish.....	(*Lagodon rhomboides*)...	0.5 p/b.

Bearing in mind the calculated values for the resulting water concentration of toxaphene, 1104 ppb (1.104 ppm), when applied to cranberries and/or rice at the lowest recommended dosage of 2 pounds per acre, it is clear that the criteria of § 162.11(a)(3)(i)(B)(3) are exceeded.

B. Chronic Toxicity

(1) *Oncogenic effects in test animals.* 40 CFR 162.11(a)(3)(ii)(A) provides, "A rebuttable presumption shall arise if a pesticide's ingredient(s) • • • (induces) oncogenic effects in experimental mammalian species or in man as a result of oral, inhalation or dermal exposure • • •." As a further clarification of the provision, the preamble to the Intereim Guidelinesstates that "a substance will be considered a presumptive cancer risk when it causes a statistically significant excess incidence of benign or malignant tumors in humans or animals."

A limited number of truly "oncogenic" studies were found in the literature. The most recent, a study by the National Cancer Institute of the National Institutes of Health (1976. Experimental Design Status Report: Carcinogenesis bioassay), reveals that a significant increase in the incidence of cancerous growths did in fact develop in male and female mice fed toxaphene for a period of 1 year, 10 months. An increase in tumors in female rats was also seen. Dr. Melvin Reuber, a specialist in the field of carcinogenesis, also stated that toxaphene "may be tumorigenic in male rats." Several other long-term feeding studies to rats and other test animals suggest that histological changes did occur in various organs of the animals tested, principally the liver.

(2) *Other chronic and/or delayed toxic effects.* To assess the true effects of pesticides to man and the environment, it has been customary to use common yet sensitive organisms as test subjects in various registration testing protocols. In this manner it is possible t learn of hazards or other harmful effects resulting from pesticide exposure. Some of these organisms serve as indicators of possible effects that can and sometimes do occur in higher life forms. In other instances they provide a means of extrapolating noted effects to man.

Regardless of how the noted effects are interpreted or used, they are true indicators of a change from the norm which can be harmful or even fatal to the life forms tested and should be heeded.

40 CFR 162.11(a)(3)(ii)(B) provides that "A rebuttable presumption shall arise if a pesticide's ingredient(s) • • • [p]roduces any other chronic or delayed toxic effect in test-animals • • •."

In three tests by Merhle and Mayer, fathead minnows, brook trout, and channel catfish have been used in various registration testing protocols. These same fish species, when exposed to nanogram levels of toxaphene, gave evidence of serious changes in collagen and calcium levels in their bone structure. These changes were serious enough to cause backbones to fracture with slight electrical stimulation (Undated. Bone development & growth of fish as affected by toxaphene. Prepub. Copy; 1975. J. Fish Res. Brd. Can. 32#5, 2 articles).

Although not followed to the same end result, tests by Chernoff and Carver on rats gave indications of certain ossification centers (sternal and caudal) that failed to develop in the fetal stages (1976. Bull. Environ. Contam. Tox. 15#6). Recent work done on black ducks by Finley and Ludke has indicated significant decreases in collagen levels and increases in calcium levels in the sternal areas of young ducks (1976. USDI Prog Rpt. Study Plan P-D-508-15).

C. Population Reduction in Nontarget Organisms

Many of the above changes, as well as changes in normal animal behavior patterns, result in reduced survivability of the animal species affected; in some instances, the ultimate results were serious kills or "reductions in natural populations." Agency Pesticide Episode Reports (PERS) data show that toxaphene has been the known causative agent in 94 fish kills since 1966. There are indications in the literature that it has played a major part in many others.

III. Other Adverse Effects With Respect to Which the Agency Seeks Additional Information

A review of the scientific literature suggests several other adverse effects that may be caused by toxaphene, which are listed and discussed briefly below. The Agency is not presuming against toxaphene based upon these effects at this time. However, the Agency Working Group will continue to investigate these effects and may issue a supplementary Position Document discussing them in greater detail. If appropriate, the Agency will presume against toxaphene based upon these effects. The Agency requests comments on the information listed below, and requests submission of any additional studies or relevant information on toxaphene related adverse effects, including but not limited to mutagenesis, endocrine effects, reproductive effects, enzymatic effects, population reductions in nontarget organisms, and fatalities in endangered species. The studies referenced below are available for public inspection in the Office of Special Pesticide Reviews (WH-566), Office of Pesticide Programs, Environmental Protection Agency, East Tower, Room 446, 401 M Street SW., Washington, D.C. 20460.

A. Chronic Effects: Mutagenesis

40 CFR 162.11(a)(3)(ii)(A) provides that a rebuttable presumption shall arise, "if a pesticide's ingredient(s) • • • [i]nduces mutagenic effects, as determined by multitest evidence."

A study by Samosh, examined during the course of review, revealed some chromosomal damage to peripheral luekocytes in Russian women workers exposed to polychlorocamphene and two other halogenated chlorocamphene compounds used as insecticides (1974. Cytol. Gen. 8(1):24–27).

B. Other Chronic or Delayed Toxic Effects

(1) *Endocrine effects.* 40 CFR § 162.11(a)(3)(ii)(B) provides that a rebuttable presumption shall arise, "if a pesticide's ingredients(s) • • • [p]roduces any other chronic or delayed toxic effect • • •"

One such "other chronic" effect was noted in bobwhite quail treated with toxaphene. It stimulated thyroid growth and iodine uptake. It also caused adrenal hypertrophy (Hurst et al. 1974. Poultry Sci. 53:125–133).

Another study by Makovskaya et al. related changes that took place in the

[1] A position document prepared by the Agency Working Group on toxaphene is available for public inspection in the Office of Special Pesticide Reviews (WH-566), Office of Pesticide Programs, Environmental Protection Agency, East Tower, Room 447, 401 M Street SW., Washington, D.C. 20460. This position document contains an appendix of references, background information, and other material pertinent to the issuance of this notice of rebuttable presumption. The supporting materials con tained in the position document are referenced in this notice where appropriate.

[2] Registrants or other interested persons who desire to submit benefit information should consider submitting information on the following subjects, along with any other relevant information they desire to submit:

1. Identification of the major uses of the pesticide, including estimated quantities used by crop or other application.
2. Identification of the minor uses of the pesticide, including estimated quantities used by category such as lawn and garden uses and household uses.
3. Identification of registered alternative products for the uses set forth in (1) and (2) above, including an estimate of their availability.
4. Determination of the change in costs to the user of providing equivalent pesticide treatment with any available substitute products.
5. Assessment of regulation impact upon user productivity (e.g., yield per acre and/or total output) from using available substitute pesticides or from using no other pesticides.
6. If the impacts upon either user costs or productivity are significant, a qualitative assessment of the regulation's impact on production of major agricultural commodities and retail food prices of such commodities.

[3] The Guidelines for Registering Pesticides in the United States appeared in the Federal Register June 25, 1975 (40 FR 26802).

endocrine glands of mice, rats, and rabbits after prolonged low-level exposure to toxaphene. It producted changes in the adrenals, in the island cells of the pancreas, and in the seminiferous epithelium of the testes. It also caused hyperfunction in the thyroid and atrophic changes in the hypophysis (1971. Med. Prac. 2:128–131).

Another Russian study also related changes that occurred in workers exposed to polychlorocamphene, the Russian equivalent of toxaphene (Blekherman & Il'ina. Undated. All-Union Sci Res. Inst. of Hyg. & Tox. of Pesticides, Polymers, and Plastics).

(2) *Reproductive effects.* A fish study by Mayer et. al., using extremely low levels (ppt) of toxaphene to treat brook trout, resulted in reduced egg viability. Those that did hatch had reduced survivability (1975. Ecol. Res. Series, EPA 600/3–75–013).

A study by Samosh relates changes in the menstrual cycle and estrogen metabolism in female agricultural workers exposed to several halogenated organchlorines, one of which was polychlorocamphene (1974. Cytl. Gen. 8(1):24–27).

A third study by Welch et al. discusses the effect of toxaphene on rats relative to utilization of esterone and reduced uterotropic activity (1971. Tox. App. Pharm. 19:234–246).

(3) *Enzymatic effects.* A study by Desaiah and Koch, using channel catfish tissues as the test medium and toxaphene as the test chemical, resulted in significant changes in several enzyme systems (1975. Bull. Environ, Contam. Tox. 13#2).

Yet another study on rats by Kuz'minskaya and Alekhina using toxaphene as the test compound resulted in reduction in overall lactate dehydrogenase activity in the liver and serum (1976. Environ. Health Rpt. 13:127–132).

(4) *Population reduction in nontarget organisms.* 40 CFR 162.11(a)(3)(ii)(C) provides that a rebuttable presumption shall arise, "if a pesticide's ingredient(s) * * * can reasonably be anticipated to result in significant local, regional, or national population reductions in nontarget organisms, or fatality to members of endangered species."

Large kills of waterfowl have occurred in California, Arizona, South Dakota, and Texas. Other associated shore birds and fish-eating birds were also found dead in large numbers. In all, significant levels of toxaphene were found in the adipose tissue and in many of the body organs. These kills included white pelicans, cattle egrets, blackcapped night herons, greater blue herons, and various duck species. In a recent episode in Louisiana, dead and dying Brown Pelicans, a rare and endangered species, were found. When chemical analysis was completed significant residues of toxaphene were found (Hunt and Keith. 1963. Univ. of Calif.; Johnson, 1966. S. D. Bird Notes. 18#3; Memo from J. Keith, dated 10–28–76).

Several other studies related reductions in populations of various bird species following the spraying or treating of short-grass ranges with toxaphene for the control of grasshoppers and range caterpillars (McEwen et al. 1972. J. Range Mngmt. 25#3; Memo: Kuntzelman to Files, 1976).

IV. Registration and Products Subject to the Notice

All registrants and applicants for registration listed below are being notified by certified mail of the rebuttable presumption existing against registration and continued registration of their products.

The registrants and applicants for registration shall have 45 days from the date this notice is sent or until July 15, 1977 to submit evidence in rebuttal of the presumption. However, the Administrator may, for good cause shown, grant an additional 60 days during which such evidence may be submitted. Notice of such an extension, if granted, will appear in the Federal Register.

V. Duty to Submit Information on Adverse Effects

Registrants are required by law to submit to EPA any additional information regarding any adverse effects on man or the environment which comes to a registrant's attention at any time, pursuant to section 6(a)(2) of FIFRA and 40 CFR 162.8(d). If any registrant of toxaphene has any published or unpublished information, studies, reports, analyses, or reanalyses regarding any adverse effect in animal species or humans, residues and claimed or verified accidents to humans, domestic animals, or wildlife which have not been previously submitted to EPA, the material must be submitted immediately. At the time each registrant responds to this notice, each registrant shall submit a written certification to the Agency that all information regarding any adverse effects known to the registrant has been submitted. In addition the registrants should notify EPA of any studies currently in progress, including the purpose of the study, the protocol, the approximate completion date, and summary of all results observed to date.

VI. Public Comments

A Position Document, dated April 19, 1977, prepared by an Agency Working Group on toxaphene and containing background information and copies of references to published studies and Agency reports is available for public inspection. During the time allowed for submission of rebuttal evidence, comments on the presumptions set forth in the notice and on the material contained in the Position Document are also solicited from the public. In particular, any documented episodes of adverse effects to humans, domestic animals, or wildlife, and information as to any laboratory studies in progress or completed, are requested to be submitted to EPA as soon as possible. Likewise any studies or comments on the benefits from the use of toxaphene are requested to be submitted.

All comments and information should be sent to the Federal Register Section, Technical Services Division (WH–569), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M Street SW., Washington, D.C. 20460. Three copies of the comments or information should be submitted if possible to facilitate the work of the Agency and others interested in inspecting them. The comments and information should bear the identifying notation "OPP–30000/13." Comments and information received within the specified time limit shall be considered before it is determined whether a notice shall be issued in accordance with 40 CFR 162.11(a)(5)(ii).

Comments received after the specified time period will be considered only to the extent feasible, consistent with the time limits imposed by 40 CFR 162.11(a)(5)(ii). All written comments and information filed pursuant to the notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. during normal working days. The Position Document is available from the Office of Special Pesticide Reviews (OSPR), Office of Pesticide Programs (WH–568), Environmental Protection Agency, Rm. 447, East Tower, during the same time period. Specific questions with regard to this notice should be directed to the OSPR (Acting) Project Manager for Toxaphene, Mr. Frederick Hageman, at the above office address or at 202–755–5755.

Your cooperation is solicited in identifying any errors or omissions which may have been made in the following computer listings. Corrections to the listings may not necessarily be published in the Federal Register, but rather handled by mail with affected parties. Omissions will be corrected by notice in the Federal Register.

Dated: May 12, 1977.

Edwin L. Johnson,
Deputy Assistant Administrator for Pesticide Programs.

INTERNATIONAL RADIO REGULATIONS

Preparation for General World Administrative Radio Conference of International Telecommunication Union

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20271: FCC 77-285]

INTERNATIONAL RADIO REGULATIONS

Preparation for General World Administrative Radio Conference of International Telecommunication Union; Fourth Notice of Inquiry

Adopted: April 27, 1977.

Released: May 17, 1977.

In the matter of an inquiry relative to preparation for a General World Administrative Radio Conference of the International Telecommunication Union to consider revision of the international Radio Regulations, Docket No. 20271.

1. On November 24, 1976, the Commission adopted a Third Notice of Inquiry in the above entitled matter (FCC 76-1099, No. 43086). It was released on December 6, 1976, and appeared in the FEDERAL REGISTER on December 13, 1976 (41 FR 54309). The period for comments and reply comments has passed.

2. The purpose of the Third Notice of Inquiry was to solicit comments on a proposed International Frequency Allocations Table (Article 5) see 42 FR 11258, February 28, 1977. The comments and reply comments received on the Third Notice of Inquiry are being considered by the Commission and will be dealt with later. In the Fourth Notice of Inquiry, we shall discuss the topics of the small antenna earth stations, several technical regulations, and the emission designator, thus reducing the number of subjects to be considered in the Fifth Notice of Inquiry. This will expedite our preparation for the General World Administrative Radio Conference (GWARC).

SMALL ANTENNA EARTH STATIONS

3. In the first Notice of Inquiry issued in this docket we solicited "comments or recommendations concerning changes or revisions to the international Radio Regulations which the public believes should be considered by the Commission in developing pertinent U.S. positions". One of the topics which arose in response to that Notice was the use of small diameter earth station antennas.[1] Space systems utilizing these stations can provide communications services which cannot be economically or conveniently provided by terrestrial systems, and already a number of communications systems using the small antennas have been authorized. For example, the Commission has authorized the use of several 4.5 meter antennas for domestic satellite communications to offshore oil drilling platforms, the use of 69 earth stations with 4.5 meter antennas to provide communications to "bush" communities of Alaska, as well as several smaller antennas on a developmental basis. Recently, we issued a Declaratory Ruling[2] dealing with the use of small antennas with domestic satellites, and have authorized several small antennas pursuant to that decision for the reception of program material distributed by domestic satellites.

4. In addition to the use of small antennas in the Fixed-Satellite Service, other space radiocommunications services are also involved which are substantially different and may require totally different criteria than discussed herein. For instance, small antennas are used in the shipboard terminals served by the MARISAT system providing communications services in the Maritime-Mobile Satellite Service, and are intended to be used in the AEROSAT program to conduct experimental communications in the Aeronautical-Mobile Satellite Service. The United States government is also expected to make frequent use of small diameter antennas. A number of small antennas have been used, and are being used, in the Applications Technology Satellite (ATS-6) and the Communications Technology Satellite (CTS) experimental programs. The U.S. Government Communications Satellite System (USG CSS)[3] utilizes small antenna earth stations and the use of small antennas is included in the proposed Disaster Warning Satellite[4] program.

5. It is apparent that there will be a steady growth in potential uses of small antenna earth stations in all of the space services; however, uncontrolled use of these terminals could have a significant adverse impact on the utilization of the limited spectrum and orbit resource of the geostationary satellite orbit. The long term resource requirements imposed by expected use of small earth terminals and the effects of that use should be treated in the U.S. preparation for the 1979 GWARC. Accordingly, in the Second Notice of Inquiry issued in this docket we solicited comments and supporting technical material with respect to the use of small earth terminals on the following points:

(a) Identification of the communication services and operational characteristics which entail use of small diameter earth station antennas;

(b) Estimates of the volume (in terms of voice channels and/or bit rate, and required rf bandwidth) of the communications services to be provided by means of small earth terminals, and the estimated number of small earth terminals to be used in the provision of such services, including the geographic distribution of the small terminals;

(c) Identification of the typical baseline technical characteristics of the satellite network serving small earth terminals; and

(d) Identification of the preferred frequency bands to be utilized to serve small earth terminals.

Various parties submitted comments, and they have all been considered. Because of space limitations they are not summarized herein; however, they will be noted where appropriate in the following discussion.

6. The diameter of an earth station antenna could affect the interference levels between satellite networks, as well as between terrestrial and earth stations in bands shared by both space and terrestrial radio services. The Carrier to thermal Noise (C/N) ratio obtained at an earth station could also be dependent on the earth station antenna diameter, although the imposition of a Power Flux Density (PFD) limit in certain bands tends to set a limit on the minimum usable size of the earth station antenna. When the diameter of an earth station antenna is reduced, the main beam gain is reduced; however, the sidelobe level of most antennas generally remains unaltered, or increases, with this reduction. It follows that the difference between the main beam gain and the sidelobe level, called the discrimination, generally decreases with the diameter of the antenna. When every other parameter of a receive earth station antenna remains unaltered,[5] a reduction of the antenna diameter generally increases the interference introduced into it from adjacent satellites and decreases its Carrier to Interference (C/I) ratio. Similarly, as a transmitting earth station antenna diameter is reduced, the antenna gain is reduced; this generally results in a requirement for more transmit power to satisfy the link budget. Increased transmitter power results in more interference power into adjacent satellite and adjacent terrestrial systems.

7. The comments and reply comments concerning this question raised in the Second Notice of Inquiry have generally focused on the use of small antennas in the Fixed-Satellite Service, with emphasis on the 4 and 6 GHz bands used by domestic satellite systems. A number of technical approaches were suggested, such as restrictions on off-axis EIRP density or the imposition of a minimum Gain to noise Temperature (G/T) ratio. Some parties also suggested that exclusive allocations be made for Small Antenna Earth Stations (SAES). That such questions need be addressed is apparent from the increased use of small antennas which is generally expected in the future. For example, COMSAT General estimates requirements of 1600 MHz, 800 MHz and 950 MHz for use by small antenna earth stations in providing data, video and facsimile, and voice communications (assuming 60 kHz channels), respectively, by the year 2000 in the Fixed-Satellite Service alone. While our Declaratory Ruling and Order referenced above addressed the use of small antennas with our present domestic satellites in a manner that insures reasonably small orbital separations between satellites, consideration is appropriate to the question of how small antennas could be employed on a worldwide basis in a manner that insures efficient orbit and spectrum use. While this question is of importance not only in the Fixed-Satellite Service, but also in the other space services where operational requirements could lead to the use of antennas that are small enough to be carried by hand, specific criteria for them are not addressed in this Inquiry. These issues, except as noted above, and suggested approaches to resolution will be discussed in the following paragraphs.

8. The frequency bands 2500–2535 and 2655–2690 MHz, according to AT&T, "• • • have already been allocated for support services which are usually considered to be of the small earth terminal variety." AT&T believes that the frequency bands 6625–7125 MHz and 11.7–12.2 GHz are both suitable for accommodating SAES; the latter has no sharing problems with the fixed service in the U.S. It also believes that the frequency band 12.5–12.75 GHz is suitable for SAES use because the smaller number of radio relay systems in this band makes the sharing problem less critical than in the 6 and 4 GHz bands. Collins Radio, in its reply comments, supported the contentions of AT&T. Transcommunications suggested that a clear channel of 40 MHz in the 6/4 GHz bands should be established for SAES operations. EXXON suggested that the SAES could be shifted at a later date from the 6/4 GHz bands to other frequency bands or that they could be required to use more sophisticated equipment. In addition, AT&T stated that the frequency band 14.0–14.5 GHz is currently free of sharing between the space and terrestrial services. American Satellite Corporation also expressed the need for exclusive allocations to SAES below 10 GHz. However, other respondents did not agree to this approach. Both Communications Satellite Corporation (COMSAT) and COMSAT General Corporation (COMSAT General) opposed allocation of exclusive frequency bands to SAES.

9. The frequency bands 2500–2535 and 2655–2690 MHz have a comparatively small 35 MHz bandwidth and as such could be less attractive. In the United States, this band is shared co-equally with the Instructional Television Fixed Service (ITFS). The sharing situation between an ITFS omnidirectional transmitter and an earth station is very critical. To this time, no common carrier has decided to put a transponder in this band. Considering this, these frequency bands may not offer an attractive choice for SAES use in the U.S.

10. Contrary to the assertions of AT&T, the frequency band 6625–7125 MHz is heavily used, although it may be less so than the 3700–4200 MHz band. In the U.S., the 6625–7125 MHz band is allocated to private microwave and television pickup whereas the 3700–4200 MHz band is allocated to common carrier point-to-point microwave. In order to satisfy the requirements stated by the advisory Fixed-Satellite Service Working Group, the frequency band 6625–6925[6] MHz has been proposed for the Fixed-Satellite (Earth-to-space) service. The frequency band 6625–7125 MHz is presently allocated to the Fixed-Satellite Service (Space-to-earth) in Brazil, United States and Canada on a secondary basis by footnote 392AA[6A]. In order to provide protection to SAES, the band 6925–7125 MHz would have to be allocated internationally on a primary basis.

11. In Region 2, the frequency band 11.7–12.2 GHz is allocated on a primary basis to both the Fixed-Satellite and Broadcasting-Satellite Services, as well as to terrestrial services, on a co-equal primary basis. Within the United States, however, this band is allocated on a primary basis only to the two space services. For individual reception, relatively small diameter antenna earth stations are proposed to be used with high EIRP satellites. COMSAT General, in its comments to the Second Notice of Inquiry, stated that "• • • small earth terminals employing SCPC transmissions in a fixed service satellite system would be subject to interference from higher power broadcasting satellite service. Nevertheless, for certain types of small user applications, use of the 12/14 GHz bands at this time is the only feasible alternative • • • However, the relatively large EIRP difference, anticipated between broadcasting and fixed satellites operating in this band may restrict the utility of this band for such SAES applications. Further study is needed to assess the impact of high EIRP television transmissions in the Broadcasting-Satellite Service on the type of SCPC operations contemplated for SAES in this band.

12. If frequency bands are to be allocated exclusively to SAES, as proposed by AT&T, then the frequency band 11.7–12.2 GHz could be one choice, with 6925–7125 MHz (after primary allocation), 2500–2535 MHz and 2565–2690 MHz the other, but perhaps less attractive in terms of the available bandwidth choices. The 2.5 GHz band is reasonably developed and the space attenuation is independent of weather conditions. The 12 GHz band is currently being developed and requires a fade margin for rain/snow attenuation. There is currently no satellite service in the 6925–7125 MHz band; however, it appears there would be little difficulty in borrowing the available technology from the adjacent bands.

TECHNICAL APPROACHES

13. A number of technical approaches were suggested by the parties to specify limitations on technical design or operating parameters of SAES in order to set bounds on the impact of such facilities on spectrum and orbit utilization. While the proposals discussed below are prompted by SAES, they would be presumably applied to all types of earth station facilities.

INTERFERENCE LEVEL

14. Both COMSAT and COMSAT General stated that the single entry 400 pWpO interference level of CCIR Recommendation 466 (Rev. 74) should be the overriding sharing criterion. According to COMSAT General the 400 pWpO level of baseband interference should be met by an immediate adjacent satellite at an orbital separation of 4°. COMSAT has recently proposed that the amount of allowable interference specified by CCIR Recommendation 466 should be subject to a "scaling law" and should be a function of the ratio of the antenna diameter to the operating wavelength of the antenna. Basically, COMSAT proposes that the permissible intersatellite network interference for larger orbital spacings should be less than that for closer orbital spacings.

15. COMSAT General assumed an acceptable level of interference for digital transmission to be a degradation in the carrier to thermal noise (C/N) ratio of 0.2 dB; COMSAT pointed out that interference criteria for digital systems should be developed. COMSAT believes that a permissible change in the operating Bit Error Rate (BER) should be established and adopted by the 1979 GWARC.

16. The interference into an analog signal has been calculated using the convolution method.[7] This method has been extended[8] to calculate the interference caused by Single Channel Per Carrier (SCPC) channels used by a number of small antenna earth stations. These SCPC channels generally have a channel spacing of between 60 and 30 kHz, depending on the type of modulation employed and service application. While studies conducted to date have indicated an apparent feasibility of implementing such types of SCPC operations with 4 degree separations between current domestic satellites in the 4 and 6 GHz bands under certain limited conditions, such use has not yet been demonstrated in the general case.

17. AT&T has also expressed concern that a proliferation of SAES in the 4 and 6 GHz bands might impair the development and expansion of microwave relay systems in these bands, particularly since the present sharing criteria may not accurately reflect the aggregate interference over the entire length of a transcontinental system from a larger number of earth stations than the two or four presently assumed. Other parties take issue with AT&T's position, pointing to

[1] For convenience, an earth station antenna can be considered to be "small" if its gain is less than or equal to the gain of a parabolic antenna whose diameter is less than ninety times the operating wavelength (4.5 m at 6 GHz).

[2] *Declaratory Ruling and Order* (FCC 76-1169) adopted December 15, 1976 in RM-2614 and RM-2725.

[3] Characteristics of the United States Government Communications Satellite System, Phase II, US CCIR SG 6C/234, 1976.

[4] Disaster Warning Satellite Study update, NASA, TMX-73407, Lewis Research Center, Cleveland, Ohio, May 1976.

[5] In practice, the communications services provided by means of small antenna earth stations tend to differ substantially in quantity and quality from those provided by meansmeans of larger antennas.

[6] It is noted that 6875-6925 MHz is part of the proposed band which continues to be shared with terrestrial fixed services.

[6A] The Fixed-Satellite Service is a primary service in this band within the United States. However, changes in this allocation are presently under consideration; see Third Notice of Inquiry in this Docket.

[7] B. A. Pontano, J. C. Fuenzalida and N. K. M. Chitre, "Interference into angle modulated systems carrying multi-channel telephone signals," IEEE Transactions on Communications, Vol. COM-24, No. 6, pp. 715-726, June 1973.

[8] A. Das and George Sharp, "Convolution method of interference Calculation," FCC/OCE RS 75-04, April 1975.

the greater use that small antenna earth stations can make of natural or man-made shielding and the lower probability that such earth stations would be simultaneously transmitting on the same frequency. ASC stated that "• • • interference into a particular frequency slot in a terrestrial radio-relay system is more nearly proportional to the number of satellites being accessed • • •" However, none of these parties advanced specific proposals in this regard for our consideration.

UPLINK POWER LIMITATIONS

18. In order to limit the interference level produced by any SAES to an adjacent satellite, several respondents have proposed a numerical limit on the earth station radiation density. AT&T found "• • • considerable merit • • •" in the Commission suggested e.i.r.p. density criterion:

36—25 log θ dBW/4 kHz, 2.5<θ<48°.

AT&T suggested that this criterion should be applicable to any three-dimensional angle off the main beam axis. ASC, in its reply comments, agreed to the basic principle of a limit on the off-axis radiation density. EXXON and the Central Committee on the Telecommunications of the American Petroleum Institute endorsed the earth station e.i.r.p. density limit suggested by the Commission. Western Union also supported the concept of "• • • control of uplink power density • • •"

19. COMSAT derived and proposed a maximum PFD limit at the geostationary orbit from an earth station not to exceed

—115.5—25 log θ dBW/m² in any 40 kHz band.

It expressed the preference for radiation density expressed per 40 kHz because that is "• • • the narrowest RF carrier unit normally encountered in practice". The currently used bandwidth of 4 kHz was adopted because of the relationship to the "nominal" 4 kHz telephone channel and the convenience in measuring this value with available instrumentation; it has little relation to the bandwidth of the signal. A signal with a large spike may be able to pass the 40 kHz radiation density criterion, but may fail the 4 kHz density criterion. COMSAT recognized that, depending on the type of modulation, "• • • different carriers having the same maximum power flux density may produce substantially different interference levels • • •" COMSAT's proposal provides protection to satellites but not necessarily to terrestrial radio relay systems However, an off-axis three-dimensional e.i.r.p. density criteria could protect both satellites and radio relay systems.

20. COMSAT General calculated the level of the off-axis (4°) e.i.r.p. density that could be transmitted from an earth station without causing more than 400 pWpO of interference to an adjacent FM analog satellite system at an orbital separation of 4 degrees. Results of the calculations indicate a range of 10.4 to 27 dBW/4 kHz of permissible off-axis radiation depending on the transmission systems involved. COMSAT General concluded that it would not be possible to establish a single off-axis e.i.r.p. density limit, although it could be possible to specify a range of off-axis e.i.r.p. density for different transmission parameters. However, COMSAT General believes that the specifications of large sets of e.i.r.p. densities may not be practicable.

G/T RATIO

21. The ratio of the Gain of the antenna to the noise Temperature of the receiving system (G/T) is a figure of merit for an earth station. ASC stated that "The capacity, in number of circuits, of a transponder increases as the earth station G/T increases. This is because, in order to provide adequate transmission quality, satellite downlink power can be traded off against the earth station G/T. Since the downlink power is limited, more must be used to compensate for the lower G/T and lower gain of a small diameter antenna. This higher allocation of power thereby lowers the circuit capacity of a transponder. Thus transponder capacity varies directly with earth station G/T, up to a maximum capacity determined by the transponder bandwidth and earth station modulation techniques." COMSAT, EXXON, Collins Radio Group, Joint Council on Educational Telecommunication (JCET) and the Central Committee on the Telecommunications of the American Petroleum Institute opposed the establishment of any G/T criteria. AT&T suggested that a minimum value of G/T of 20 dB at 4 GHz is insufficient and proposed a minimum value of 30 dB.

ORTHOGONAL POLARIZATION

22. COMSAT believes that the use of polarization discrimination as a means to increase single-satellite capacity is economically and operationally vastly superior to its use in reducing interference between systems. COMSAT believes that the adoption of standards for polarization discrimination would not be desirable. Western Union submitted that, "• • • certain additional advantages accrue to future satellite systems which reuse the frequency spectrum with orthogonal polarization, it is also recognized that the mode of operation increases the cost of small diameter antenna earth stations • • •" Home Box Office (HBO) challenged the "cost penalty" statement of Western Union. HBO stated that Western Union had not offered any data to support the claim that a cost penalty is incurred by the use of small antenna earth stations in conjunction with cross-polarized satellite systems. JCET endorsed the adoption of cross-polarization standards.

SIDELOBE RADIATION

23. A SAES has generally smaller discrimination. ASC, JCET and AT&T suggested sidelobe control of the SAES; and AT&T suggested the following three-dimensional sidelobe envelope in the 4 GHz band for SAES:

32—25 log (θ) dBi 1° ≦ θ ≦ 48°
—10 dBi 48° ≦ θ ≦ 180°

However, EXXON opposed any regulation of sidelobes, and the Central Committee on Telecommunications of the American Petroleum Institute suggested that the SAESs should have less stringent sidelobe control. The Corporation for Public Broadcasting (CPB) is developing SAESs with smaller sidelobe levels. The paraboloidal reflector, off-set fed with a corrugated conical horn, has been demonstrated to be capable of providing radiation patterns with extraordinarily low radiation levels in the far-out and back-lobe regions. Levels more than 75 dB below the main beam maximum have been attained outside the mainbeam region—and beyond the first few sidelobes—for an antenna having a half-power beamwidth of approximately 1.7°.* It is likely that development of low-cost, low sidelobe antennas would reduce the barriers to SAES usage.

DISCUSSION

24. As noted in the Second Notice of Inquiry, the purpose of requesting comments on the use of small antenna earth stations was to seek suggestions from interested parties on how to insure efficient utilization of the orbit on an international basis. Our focus on small antenna reflects the potentially larger impact of such facilities on required satellite separations if no additional steps are taken to control their impact. As noted above, we have recently issued a Declaratory Ruling setting forth our approach to licensing small antenna earth stations with present domestic satellites in the 4 and 6 GHz bands in a manner that preserves orbital separations of 4 degrees required for standard size antennas with diameters of 10 meters or more. However, the approach taken in that decision was more of an administrative one in defining the types of technical showings and analyses required in applications submitted for authority to construct and operate small antenna earth stations, rather than the imposition of specific technical standards on the design and operation of such facilities. While such a flexible approach is feasible on a domestic basis, it is not evident that an analogous type of approach is feasible on an international basis. This is because the current coordination and notification procedures set forth in Article 9A of the international Radio Regulations are directed to avoiding unacceptable levels of interference to existing satellite networks, not to insuring reasonably small satellite separations.

25. With respect to the proposals of several parties that exclusive allocations or sub-allocations be reserved for common carrier SAES operations, we are not convinced that this would be a satisfactory approach. In particular, there is a wide range of communications requirements that can be satisfied with SAES in a manner that would not require large orbital separations between satellites. Specific requirements have not been identified for SAES which cannot be satisfied with careful coordination between satellites to preserve reasonably small satellite separations. Absent such requirements, it appears preferable to avoid distinctions in the international Radio Regulations with respect to the use of certain frequency bands that are based only on antenna size.

*H. Paris Coleman, R. M. Brown and B. D. Wright, "Paraboloidal reflector offset fed with a corrugated conical horn", pp. 817–819, IEEE Trans. on Antennas and Propagation, November 1975.

26. Accordingly, parties advocating exclusive allocations or sub-allocations for SAES operations should focus their comments on the following points:

(a) What types of communications requirements require transmissions from SAES that are incompatible, even with careful frequency coordination, with reasonably small (e.g., less than 4 degrees) satellite spacings achievable with larger antennas;

(b) Given such requirements, would the present allocations in the vicinity of 2.5 GHz have sufficient bandwidth to support economically feasible systems, or would a wider bandwidth, e.g., 6625–6925 MHz, be required; in the latter event, where would the corresponding downlink allocation be located; and

(c) In the event such allocations were limited to the types of uses of SAES identified in (a) above, what orbital separations would be possible in such bands.

27. The technical approaches suggested by several of the parties appear to have a greater degree of effectiveness. However, it is still necessary to further examine these suggestions to insure that any such restrictions do not inadvertently preclude types of services that may be provided by SAES after necessary coordination is effected that retains reasonably small satellite separations. Of these suggestions, EIRP density limits and/or antenna sidelobe standards appear to have the greatest support. However, as pointed out by COMSAT General, a wide range of power densities can be expected in actual practice. Any proposed limit would therefore only preclude the worst case type of situations with additional frequency coordination required to accommodate other cases and still maintain small spacings. While a power limit as a function of off-axis angle would be sufficient in the case of transmitting earth stations, some limit on receiving antenna characteristics would appear necessary under such an approach to maintain orbital separations required to protect receiving stations to reasonable values. However, restrictions on minimum G/T ratios were not widely supported and do not in themselves appear to provide sufficient assurance that reasonably small orbital separations will result.

28. Accordingly, it appears desirable to obtain additional comments with respect to proposals to place restrictions on technical characteristics of earth station facilities. Specifically, the following points should be addressed:

(a) Would a power limitation of the magnitude discussed in paragraphs 18 and 19 above preclude types of services that could otherwise be accommodated with reasonably small satellite separations through careful frequency coordination;

(b) What should be the specific numerical value and the reference bandwidth for the specification of e.i.r.p. densities;

(c) Is it technically and economically feasible to achieve, in practice, the following sidelobe level:

Gain, dB=30—25 $\log_{10}$ θ, 2.5<θ<48°
—12, 48°<o 180°

where θ=angle off the main beam axis.

(d) What interference criteria should be used for digital systems? What should be permissible bit error rate?

(e) Is the use of cross-polarization more effective in increasing the capacity of an individual satellite by frequency re-use or in reducing separation between satellites? Is the use of orthogonal polarization economically and technically feasible for reducing interference related to SAES systems? What values of cross-polarization, if any, should be specified?

(f) For what bands should such standards be specified, and how would such values change with the frequency band to which they are applicable?

29. While we recognize the importance of interference criteria establishing required satellite spacings, it has not been considered appropriate to specify such values in the international Radio Regulations themselves. Rather, such criteria have more appropriately been set forth in relevant CCIR Reports and Recommendations for the guidance of administrations in effecting coordination under Articles 9 and 9A. However, to the extent that more current criteria are available for the purpose of determining when coordination is required through Appendices 28 and 29, consideration is appropriate to including such revised criteria there. Comments in this regard are requested.

30. Finally, it is noted that the majority of comments have focused only on the 4 and 6 GHz bands used by present fixed satellites. It must be emphasized, however, that the 1979 GWARC will be concerned with all frequency bands and all space radiocommunications services. However, the considerations discussed above are primarily applicable to the Fixed- and the Broadcasting-Satellite Services, whereas the criteria for other services could be substantially different.

TECHNICAL REGULATIONS

31. The Commission is reviewing the technical provisions of the Radio Regulations.

32. The Commission is recommending changes in Article 7 and in Appendices 3 and 4 as discussed in Appendix A. In the regulations 470VC through VE, the station keeping of space stations is proposed to be ±0.1 degree which will provide better orbit-spectrum utilization. In the regulation 470 VF, the spacecraft antenna pointing error is proposed to be 0.1 degree providing reduced inter-satellite system interference and providing reduced unwanted signals in the adjacent territory of another Administration. Similar provisions were adopted in the 1977 Broadcasting-Satellite World Administrative Radio Conference.

33. In the Third Notice of Inquiry we submitted three options for the expression of a frequency tolerance and asked for the public's opinion on which would be most appropriate in the international Radio Regulations. The first option expressed the tolerance as a percentage of carrier frequency (as in the present Radio Regulations); the second option applied an absolute tolerance to each frequency band; and the third applied a percentage tolerance related to the authorized or necessary bandwidth. The American Telephone and Telegraph Company and the COMSAT General Corporation commented on the options.

34. AT&T stated that "The first two options are equally preferable and the third is less desirable." It believes the first method is attractive because "• • • in equipment design the maximum possible frequency tolerance tends to be proportional to the absolute frequency" and also because "• • • the difficulty of maintaining a transmitter within a specified frequency range generally increases in proportion to carrier frequency"; however, AT&T states one drawback is that "• • • it may result in transmitters in higher bands being allowed to drift more than those in lower bands • • •". It believes that the second method "• • • relates directly to the ways in which equipment is operated and maintained • • • maintenance instructions ordinarily specify the requirements in absolute frequency • • •". AT&T opposes the adoption of the third method because "• • • narrowband users in a given bandwidth might be required to maintain a tighter tolerance than a wideband user in the same band" and that would constitute a double standard. AT&T noted that the fundamental problem in specifying tolerances is that prescribed tolerances are applied over too wide a range and recommended that tolerances be specified for each frequency band; in that case it would make little difference if the permissible tolerance were stated as an absolute number or as a percentage.

35. COMSAT General supported the second option because "• • • option (a) will result in either too tight specifications for low frequency bands, or loss of spectrum at high frequency bands, while option (c) on the other hand will result in various frequency tolerance specifications within the same frequency band, based upon the authorized or necessary bandwidth".

36. Paragraph 154 of the Third Notice of Inquiry presented three options for designating frequency tolerances for radio relay systems. The comments received indicated a "preference" for the second option, which would apply an

absolute tolerance to each frequency band in the Radio Regulations, and an opposition to the third option, which would apply a percentage tolerance relative to the authorized or necessary bandwidth. Since one of the two respondents stated the first two options are equally preferable, we have made proposals for modification to Radio Regulation Appendix 3 which uses both methods, dependent upon the specific characteristics of the radio services involved.

37. The revisions to Appendices 3 and 4 of the Radio Regulations are proposed herein for the purpose of obtaining comments. In many cases the frequency tolerances shown for the proposed revision of Appendix 3 are more stringent than are required by the FCC rules, or within the Government. The current tolerances required by the Radio Regulations are much too loose when compared with the current state of the art. Tighter tolerances would lead to improved spectrum utilization. The big question is how much tighter should these tolerances be. Comments, therefore, are sought on the technical rationale to depart from the tolerances shown. To accommodate expected improvements in spectrum utilization by certain services, it was deemed necessary to propose tighter tolerances than are required by the current Radio Regulations.

EMISSION DESIGNATORS

38. The designation of emissions is set forth in Article 2 of the Radio Regulations. This designation consists of the necessary bandwidth, the type of modulation of the main carrier, the type of transmission, and supplementary characteristics. Reference is made within the international Radio Regulations to specific emission designations in Articles 5, 7, 28, 28A, 29A, 32, 35, 36 and 39, as well as in numerous Appendices, and Resolutions. The designation of the emission is a very important and useful tool in the management of the radio spectrum, especially with regard to the evaluation of potential for and susceptibility to interference.

39. Recommendation 8 of the Administrative Radio Conference, Geneva, 1959, requested that the CCIR, in conjunction with the IFRB, study various methods of designating and classifying emissions. The method was to be one which would suffice over a long period, and which would enable all of the *essential* information of the emissions to be provided (emphasis added). The CCIR engaged this task and produced Recommendation 432 in earlier Plenary Assemblies. After a period of testing, the U.S. found Recommendation 432 to be unacceptable and made further recommendations which led to the adoption of Opinion 44 at the XIIIth Plenary of the CCIR. Opinion 44 calls for Administrations to conduct trials of the method of classifying and designating their emissions as described in the Annex to Opinion 44 with the ultimate object of enabling the next appropriate Administrative Radio Conference to consider the method for inclusion in the Radio Regulations.

40. Extensive trials of the new emission system were not conducted; however, various government agencies examined the new proposal to determine its impact on their operations. While comments generally indicated that the system described in Opinion 44 could be implemented, there was strong concern evinced over whether there was to be any benefit derived from the new system and what impact the new system would have on day-to-day operations. Opinion 44 was studied further by the U.S. in its CCIR activities and a new proposal to modify Opinion 44 was submitted to the May–June 1976 CCIR Interim Meetings. The U.S. proposal, along with those of several other administrations, resulted in a revised Opinion 44 being adopted by the interim meetings. The U.S. is now attempting to refine this system even further, looking towards its final adoption at the CCIR Final Meetings, thereby providing a sound basis for U.S. proposals in this area to the 1979 World Administrative Radio Conference. This refinement is a continuing process, as is the entire conference preparatory activity. Attached as Appendix B to this Notice of Inquiry is the latest version of the emission designator system being considered by the United States for possible eventual submission to the 1979 WARC. Comments are solicited regarding the merits, advantages and disadvantages of this new system as opposed to the current method, bearing in mind that the United States has been a leader in the revision of the emission designator system and that some modification to the system will be inevitable at the 1979 WARC.

41. All participants should keep in mind the importance of the 1979 WARC results. Based upon past experience, decisions reached at this conference can be expected to provide the basis for international radio regulation policy for most of the remainder of this century. It is of the utmost importance to develop U.S. proposals which effectively promote that combination of telecommunication uses which offers the maximum social and economic contribution to the national welfare and which also contain the flexibility necessary to accommodate important new applications of this dynamic technology as well as the unique requirements of our international partners in the ITU. It must be recognized that the U.S. proposals are for the GWARC and that the national implementation of the results of the GWARC will require extensive U.S. national consideration.

42. Comments on the use of small antenna earth stations relevant to the preparation for the 1979 GWARC are hereby sought from all interested United States individuals, parties, or groups of parties which may exist.

43. Pursuant to applicable procedures set forth in § 1.415 of the Commission's rules, interested persons may file comments on or before July 11, 1977, and reply comments on or before July 26, 1977. All relevant and timely comments and reply comments, along with any pertinent information which the Commission may have available, will be considered. When commenting, it should be borne in mind that this effort is directed toward international regulations and not domestic issues. The U.S. wants to achieve maximum flexibility in international regulatory proposals.

44. Although § 1.419 of the Commission's Rules required that an original and five copies of all statements, briefs or comments be filed in response to a Notice, the Commission's conference preparatory organization necessitates the filing of an original and nineteen copies. All responses received will be available for public inspection during regular business hours in the Commission's Public Reference Room at its Headquarters in Washington, D.C.

45. This Notice is issued pursuant to the authority set forth in section 4(i) of the Communications Act of 1934, as amended 47 U.S.C. 154 (i).

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Appendix A

(Technical Regulations)

Spa2 Station Keeping of Space Stations[2]

470VB § 26. Space stations on geostationary satellites:
Spa2

MOD 470VC Spa2 -shall have the capability of maintaining their positions within ~~±1~~ 0.1 degree of the longitude and latitude of their nominal positions, but efforts should be made to achieve a capability of maintaining their positions at least within ~~±0.5~~ 0.05 degree of the longitude and latitude of their nominal positions;

MOD 470VD Spa2 -shall maintain their positions within ~~±1~~ 0.1 degree of longitude and latitude of their nominal positions irrespective of the cause of variation; but

NOC 470VE Spa2 -need not comply with No. 470VD as long as the satellite network to which the space station belongs does not produce an unacceptable level of interference into any other satellite network whose space station complies with the limits given in No. 470VD.

Spa2 [2]In the case of space stations on geosynchronous satellites with orbits having an angle of inclination greater than 5 degrees the positional tolerance shall relate to the nodal point.

470VE.1 Spa2 [1]The level of unacceptable interference shall be fixed by agreement between the administrations concerned, using the relevant C.C.I.R. Recommendations as a guide.

Reason: In the interest of more efficient orbit-spectrum utilization, it is considered necessary to maintain a closer station-keeping tolerance of ±0.1 degree in longitude and latitude. This minimizes the loss in receiving antenna gain and aids in reducing the potential for interference.

Spa2 Pointing Accuracy of Antennae on Geostationary Satellites

MOD 470VF Spa2 § 27. The pointing direction of maximum radiation of any earthward beam of antennae on geostationary satellites shall be capable of being maintained within:

10 2% of the half power beamwidth relative to the nominal pointing direction, or

~~0.5~~ 0.1 degrees relative to the nominal pointing direction, whichever is greater. This provision applies only when such a beam is intended for less than global coverage.

In the event that the beam is not rotationally symmetrical about the axis of maximum radiation, the tolerance in any plane containing this axis shall be related to the half power beamwidth in that plane.

This accuracy shall be maintained only if it is required to avoid unacceptable interference[2] to other systems.

470VF.1 Spa2 [2]The level of unacceptable interference shall be fixed by agreement between the administrations concerned, using the relevant C.C.I.R. Recommendations as a guide.

Reason: These modifications are proposed to minimize the spillover outside the intended coverage area and to take maximum advantage of frequency re-use when pencil beams are used. It is necessary to maintain the highest possible beam-pointing accuracy.

APPENDIX 3

Mar Mar2

Table of Frequency Tolerances*

(See Article 12)

1. Frequency tolerance is defined in Article 1 and is expressed in parts in 10^6 or, in some cases, in hertz Hz.

2. The power shown for the various categories of stations is the mean power as defined in Article 1.

Frequency Bands (lower limit exclusive, upper limit inclusive) and Categories of Stations	Tolerances applicable until 1st January, 1966* 1987 to transmitters in use and to those to be installed before 1st January, 1964 1985	Tolerances applicable to new transmitters installed after 1st January, 1964 1985 and to all transmitters after 1st January, 1966* 1987
*1st January, 1970 in the case of all tolerances marked with an asterisk.		
Band: 10 to 535 kHz		
1. Fixed Stations:		
- 10 to 50 kHz	1 000	1 000 100
- 50 to 535 kHz	200	200 50
2. Land Stations:		
a) Coast Stations:		
- power 200 W or less	500 1)	500 20 Hz l)
- power above 200 W	200 1)	200 20 Hz l)
b) Aeronautical Stations	100*	100* 50
3. Mobile Stations:		
a) Ship Stations	1 000 k)	1 000 20 Hz k)
b) Ship's Emergency Transmitters	5 000	5 000 20 Hz

*Certain services may need tighter tolerances for technical and operational reasons.

Frequency Bands (lower limit exclusive, upper limit inclusive) and Categories of Stations	Tolerances applicable until 1st January, 1966* 1987 to transmitters in use and to those to be installed before 1st January, 1964 1985	Tolerances applicable to new transmitters installed after 1st January, 1964 1985 and to all transmitters after 1st January, 1966* 1987
*1st January, 1970 in the case of all tolerances marked with an asterisk.		
c) Survival Craft Stations	5 000	5 000 20 Hz
d) Aircraft Stations	500	500 50
4. Radiodetermination Stations	100*	100*
5. Broadcasting Stations	10 Hz	10 Hz
Band: 535 to 1 605 kHz Broadcasting Stations	10 Hz b)	10 Hz
Band: 1605 to 4 000 kHz		
1. Fixed Stations:		
- power 200 W or less	100	100
- power above 200 W	50	50
2. Land Stations		
- power 200 W or less	100h) 1)	100 50 h)1)
- power above 200 W	50h) 1)	50 h) 1)
3. Mobile Stations		
a) Ship Stations	200 i) k)	200 20 Hz 6) k)
b) Survival Craft Stations	300	300 20 Hz
b A) Emergency Position-Indicating Radiobeacons	300	300 20 Hz
c) Aircraft Stations	100 *	100 r)
d) Land Mobile Stations	200	200 20 Hz

Frequency Bands (lower limit exclusive, upper limit inclusive) and Categories of Stations	Tolerances applicable until 1st January, 1966* 1987 to transmitters in use and to those to be installed before 1st January, 1964 1985	Tolerances applicable to new transmitters installed after 1st January, 1964 1985 and to all transmitters after 1st January, 1966* 1987
*1st January, 1970 in the case of all tolerances marked with an asterisk.		
4. Radiodetermination Stations:		
- power 200 W or less	100	100 20
- power above 200 W	50	50 10
5. Broadcasting Stations	20	20 10 Hz
Band: 4 to 29.7 MHz		
1. Fixed Stations:		
- power 500 W or less	50	50 30
- power above 500 W	15	15 10
2. Land Stations:		
a) Coast Stations:		
- power 500 W or less	50 h) 1)	50 20 Hz h) 1)
- power above 500 W and less than or equal to 5 kW	30*h) 1)	30* 20 Hz h) 1)
- power above 5 kW	15 h) 1)	15 20 Hz h) 1)
b) Aeronautical Stations:		
- power 500 W or less	100	100 r)
- power above 500 W	50	50 r)
c) Base Stations:		
- power 500 W or less	100	100 30
- power above 500 W	50	50 10
3. Mobile Stations:		
a) Ship Stations		
1) Class A1 emissions	50 p) q)	50 20 Hz p) q)
2) Emissions other than A1	50 i) k)	50 20 Hz i) h)

Frequency Bands (lower limit exclusive, upper limit inclusive) and Categories of Stations	Tolerances applicable until 1st January, 1966* 1987 to transmitters in use and to those to be installed before 1st January, 1964 1985	Tolerances applicable to new transmitters installed after 1st January, 1964 1985 and to all transmitters after 1st January, 1966* 1987
*1st January, 1970 in the case of all tolerances marked with an asterisk.		
- power 50 W or less	50 c) i) k)	50 c) r) k) 20 Hz
- power above 50 W	50 i) k)	50 r) k) 20 Hz
b) Survival Craft Stations	200	200 20 Hz
c) Aircraft Stations	100*	100* r)
d) Land Mobile Stations	200	200 20 Hz
4. Broadcasting Stations	15	15 2
Band: 29.7 to 100 MHz		
1. Fixed Stations:		
- power 200 W or less	50*	50* 30
- power above 200 W	30	30 10
2. Land Stations:		
- power 15 W or less	50	50
- power above 15 W	20	20
3. Mobile Stations:		
- power 5 W or less	100	100 50
- power above 5 W	50	50 20
4. Radiodetermination Stations	200	200 50

Frequency Bands (lower limit exclusive, upper limit inclusive) and Categories of Stations	Tolerances applicable until 1st January, ~~1966*~~ 1987 to transmitters in use and to those to be installed before 1st January, 1964 1985	Tolerances applicable to new transmitters installed after 1st January, 1964 1985 and to all transmitters after 1st January, ~~1966*~~ 1987
	*1st January, 1970 in the case of all tolerances marked with an asterisk.	
5. Broadcasting Stations (other than television):

3. Space Stations	10	7

Notes referring to Table of Frequency Tolerances

a) SUP

b) In the area covered by the North American Regional Broadcasting Agreement (NARBA) the tolerance of 20 Hz may continue to be applied.

c) SUP

d) This tolerance is not applicable to survival craft stations operating on the frequency 243 MHz.

e) Where specific frequencies are not assigned to radar stations, the bandwidth occupied by the emissions of such stations shall be maintained wholly within the band allocated to the service and the indicated tolerance does not apply.

f) For transmitters using time division multiplex the tolerance of 300 may be increased to 500.

g) This tolerance applies only to such emissions for which the necessary bandwidth does not exceed 3 000 kHz; for larger bandwidth emissions a tolerance of 300 applies.

h) For coast station single sideband radiotelephone transmitters the tolerance is 20 Hz.

i) For ship station single sideband radiotelephone transmitters the tolerance is
1) in the band 1 605 – 4 000 kHz:
100 Hz for transmitters in use or to be installed before 1 January 1982
50 Hz for transmitters installed after 1 January 1982.
2) in the band 4 000 – 23 000 kHz
100 Hz for transmitters in use or to be installed before 1 January 1978.
50 Hz for transmitters installed after 1 January 1978
(See also Appendix 17A).

j) SUP

k) For ship station transmitters used for direct printing telegraphy or for data transmissions, the tolerance is 40 Hz. This tolerance is applicable to equipment installed after 1 January 1976 and to all equipment after 1 January 1985. For equipment installed before 2 January 1976 the tolerance is 100 Hz (with a maximum deviation of 40 Hz for short periods of the order of 15 minutes).

l) For coast station transmitters used for direct printing telegraphy and for data transmission the tolerance is 15 Hz. This tolerance is applicable to equipment installed after 1 January 1976 and to all equipment after 1 January 1985. For equipment installed before 2 January 1976 the tolerance is 40 Hz.

m) SUP

n) For coast and ship station transmitters in the band 156 – 174 MHz put into service after 1 January 1975 a tolerance of 10 parts in 10^6 shall apply. This tolerance is applicable to all transmitters, including survival craft stations, after 1 January 1985.

o) For transmitters used by on-board communication stations a tolerance of 5 parts in 10^6 shall apply.

p) Applicable from 1 June 1977. However, in the A1 Morse working frequency bands a frequency tolerance of 200 parts in 10^6 may be applicable to existing transmitters after 1 June 1977, provided that the emissions are contained within the band in question.

q) In the A1 Morse calling frequency bands frequency tolerances of 40 parts in 10^6 in the bands between 4 and 23 MHz and of 30 parts in 10^6 in the 25 MHz band are recommended as far as possible.

r) For single sideband transmitters operating in the Aeronautical Mobile (R) Service, the tolerance is:

1) In the band 1605 - 4000 kHz
Aeronautical Stations 10 Hz
Airport Stations 20 Hz

2) In the band 4 - 29.7 MHz
Aeronautical Stations 10 Hz
Aircraft Stations 20 Hz

REASON: See reasons for Appendix 4.

APPENDIX 4

Table of Tolerances for the Levels of Spurious Emissions

(See Article 12)

1. The following table indicates the tolerances which shall apply to the mean power of any spurious emission supplied by a transmitter to the antenna transmission line.

2. Furthermore, spurious Spurious radiation from any part of the installation other than the antenna system, i.e., the antenna and its transmission line, shall not have an effect greater than would occur if this antenna system were supplied with the maximum permissible power at that spurious emission frequency.

3. These tolerances shall not, however, apply to ship's emergency transmitters or survival craft stations.

4. 3. For technical or operational reasons, specific services may demand tolerances tighter than those specified in the Table.

5. The final date by which all equipment shall meet the tolerances specified in Column B is 1st January, 1970. Nevertheless, all administrations recognize the urgent need to implement Column B tolerances for all equipment at the earliest possible dates and will endeavour to ensure that necessary changes are made to all transmitters under their jurisdiction well before this date and wherever possible by 1st January, 1966.

6. No tolerance is specified for transmitters operating on fundamental frequencies above 235 MHz. For these transmitters the levels of spurious emissions shall be as low as practicable.

Fundamental Frequency Band	The mean power of any spurious emission supplied to the antenna transmission line shall not exceed the values specified as tolerances in Columns A and B below	
	A Tolerances applicable until 1st January, ~~1970~~ 1982 to transmitters now in use and to those installed before 1st January, ~~1964~~ 1980	B Tolerances applicable to new transmitters installed after 1st January, ~~1964~~ 1980 and to all transmitters after 1st January, ~~1970~~ 1982
Below 30 MHz	40 decibels below the mean power of the fundamental without exceeding the power of ~~200~~ 50 milliwatts	~~40~~ 60 decibels below the mean power of the fundamental without exceeding the power of 50 ~~milliwatts~~ microwatts [1][2][3]
30 MHz to ~~235 MHz~~ and above for transmitters having mean power:		
-- greater than over 25 watts	60 decibels below the mean power of the fundamental without exceeding 1 milliwatt[4]	60 decibels below the mean power of the fundamental without exceeding ~~1 milliwatt~~ 50 microwatts
-- 25 watts or less	40 decibels below the mean power of the fundamental without exceeding 25 microwatts and without the necessity for reducing this value below 10 microwatts[4]	~~40~~ 60 decibels below the mean power of the fundamental without exceeding 25 microwatts and without the necessity for reducing this value below ~~10 microwatts~~[4]

[1] For transmitters of mean power exceeding 50 kilowatts and which operate below 30 MHz over a frequency range approaching an octave or more, a reduction below 50 ~~milliwatts~~ microwatts is not mandatory, but a minimum attenuation of 60 decibels shall be provided and every effort should be made to keep within the 50 ~~milliwatts~~ microwatts limit.

[2] For hand-portable equipment of mean power less than 5 watts which operates in the frequency band below 30 MHz, the attenuation shall be at least 30 decibels, but every effort should be made to attain ~~40~~ 60 decibels attenuation.

[3] For mobile transmitters which operate below 30 MHz any spurious emission shall be at least ~~40~~ 60 decibels below the fundamental without exceeding the value of ~~200~~ milliwatts, 50 microwatts but every effort should be made to keep within the 50 ~~milliwatts~~ microwatts limit whereever practicable.

[4] For frequency modulated maritime mobile radio-telephone equipment which operates above 30 MHz, the mean power of any spurious emission falling in any other international maritime mobile channel, due to products of modulation, shall not exceed a limit of 10 microwatts and the mean power of any other spurious emission on any discrete frequency within the international maritime mobile band shall not exceed a limit of 2.5 microwatts. Where, exceptionally, transmitters of mean power above 20 watts are employed, these limits may be increased in proportion to the mean power of the transmitter.

REASON: It is believed that these tables should be revised to achieve an improvement to spectrum utilization. A review of both government and non-government tolerances shows that the specific limits appearing in the tables are attainable. Comments, however, are invited as to the desirability of using the specific tolerances shown.

U. S. PROPOSED REVISION OF CCIR DRAFT RECOMMENDATION AB/1

As requested by I.F.R.B. Circular-letter No. 357, 15 July 1976, we have evaluated the provisional method of classifying and designating emissions as proposed by C.C.I.R. Draft Recommendation AB/1 and are submitting the following comments and recommendations.

In general, the method proposed in C.C.I.R. Draft Recommendation AB/1, provides a means to specify all essential information relating to an emission and we endorse the principle of including the essential information in three mandatory symbols. Our recommendations and comments represent changes which, it is felt, should simplify the application of the method without sacrificing essential content and effectiveness. Recommendations are summarized below and are included in the enclosure, which is a proposed revision to Draft Recommendation AB/1:

a. A simplified method of designating necessary bandwidth is proposed;

b. Information dealing with the nature of the multiplexing signal was shifted from the fifth symbol (optional) and inserted as part of the second symbol;

c. The use of optional symbols by administrations may be implemented only as part of the administration's internal data process. Optional symbols should not be listed in Article 2; and,

d. The letter N has been substituted for O in the list of symbols to avoid confusion as to whether it is the number zero or the letter O.

The method designating the necessary bandwidth of emissions proposed in Recommendation AB/1 appeared to be unnecessarily complicated considering the universality of use of emission designators and compelling reasons to keep the designator as simple to understand as possible, while retaining completeness, in order to accommodate those less technically advanced. Moreover, there is a measurable advantage to be able to understand the bandwidth at a glance without performing any conversions. Accordingly, the method proposed, following that used in the United States, employs a letter H,K,M, or G to designate Hz, kHz, MHz or GHz

respectively, and a numerical value, having a maximum of four characters, including a decimal point. It was considered that if there was a computer reason to designate bandwidth in the "scientific method" proposed in Recommendation AB/1, then the conversion from a direct reading bandwidth should be made by those inserting the data into the computer. The method proposed is currently satisfactorily used in computer-based frequency management data systems in the United States. Examples, with comparison to Recommendation AB/1 are given below.

Necessary bandwidth	Proposed herein	Recommendation AB/1
25 Hz	H25	0250
400 Hz	H400	4000
2.4 kHz	K2.4	2401
12.5 kHz	K12.5	1252
36 kHz	K36	3602
180 kHz	K180	1803
1.25 MHz	M1.25	1254
6.25 MHz	M6.25	6254
27 MHz	M27	2705
200 MHz	M200	2006
5.6 GHz	G5.6	5607

A change from Draft Recommendation AB/1 which we are proposing affects the fifth optional symbol. The information contained in that symbol has been inserted into the second symbol because it was felt that the nature of the multiplexing signal was essential and should be included in the 3 mandatory symbols to preserve the use of the minimum number of symbols. This is consistent with judgments expressed previously in Recommendation 432-1 and Opinion 44 of the CCIR. The information was readily accommodated in the second symbol by allowing that symbol to become either alphabetical or numerical. The scheme adopted and outlined in the enclosure designates a modulated single channel emission by a number. Unmodulated and multi-channel emissions are designated by letters. In this manner, it was possible to retain the familiar symbols of Article 2 of F1, F2, F3, A1, A2 and A3 for single channel frequency modulated and double sideband emissions.

It is felt that the fourth symbol (optional) was not clearly defined and created a certain amount of confusion as to its application because it contains more than one character that could apply equally to describe an element of the emission. Further, some of the information, such as that relating to protection ratios or privacy should not be part of an emission symbol, even though its use is considered optional.

U. S. PROPOSED REVISION OF CCIR DRAFT RECOMMENDATION AB/1

ANNEX

PART 1

PROVISIONAL METHOD FOR THE DESIGNATION OF EMISSIONS**

1. Emissions are designated according to their necessary bandwidth and their classification. Whenever the full designation of an emission is required, the classification for that emission shall be preceded by an indication of the necessary bandwidth.

SECTION I

NECESSARY BANDWIDTH

2. The necessary bandwidth shall be expressed by a maximum of five characters as follows:

The first character shall be a letter H, K, M, or G to designate Hz, kHz, MHz or GHz respectively. The letter shall be followed by a number composed of a maximum of three significant digits and a decimal point, if necessary. The number may not be less than 1.

Examples

Necessary Bandwidth	Symbol
25 Hz	H25
400 Hz	H400
2.4 kHz	K2.4
12.5 kHz	K12.5
36 kHz	K36
180 kHz	K180
1.25 MHz	M1.25
6.25 MHz	M6.25
27 MHz	M27
200 MHz	M200
5.6 GHz	G5.6

** For certain terms used in Part 1, see Part 2.

SECTION II

CLASSIFICATION

3. Emissions are classified and symbolized according to the following characteristics. Modulation used only for short periods for incidental purposes such as identification, calling, etc., should be ignored.

SECTION II.1

BASIC CHARACTERISTICS

4.1 First symbol - Nature of emission (see Sec. 5 below).

4.2 Second symbol - Nature of signal modulating the main carrier and nature of multiplexing (See Sec. 6 below).

4.3Third symbol - Type of transmission (see Sec. 7 below).

5. First symbol-Nature of emission

5.1 Emission of an unmodulated carrier ..... N

5.2 Emission in which the main carrier is predominantly amplitude-modulated. It may include cases where sub-carriers are angle-modulated.

5.2.1 Double-sideband ..... A

5.2.2 Single-sideband, full carrier ..... H

5.2.3 Single-sideband, reduced carrier ..... R

5.2.4 Single-sideband, suppressed carrier ..... J

5.2.5 Independent sideband ..... B

5.2.6 Vestigial sideband C

5.3 Emission in which the main carrier is angle modulated

5.3.1 Frequency modulation ..... F

5.3.2 Phase modulation ..... G

5.4 Emission of pulses (the carrier may, in addition, be frequency modulated)*

5.4.1 Unmodulated sequence of pulses ..... P

*Emissions, where the main carrier is directly modulated by a signal which has been coded into quantized form (e.g. pulse code modulation), should be designated under Secs. 5.2 or 5.3.

5.4.2 A sequence of pulses which are modulated:

5.4.2.1 in amplitude ..... K

5.4.2.2 in width/duration L

5.4.2.3 in position/phase ..... M

5.4.2.4 by combinations of the foregoing or other means ..... Q

5.5 Cases not covered above, in which an emission consists of the main carrier modulated, either simultaneously or in a pre-established sequence, in a combination of two or more of the following modes:

- amplitude, - angle, - pulse ..... W

5.6 Cases not otherwide covered X

6. Second symbol - Nature of signal modulating the main carrier and nature of multiplexing

6.1 No modulating signal ..... N

6.2 A single channel containing quantized information without the use of a modulating sub-carrier* 1

6.3 A single channel containing quantized information with the use of a modulating sub-carrier* 2

6.4 A single channel containing analogue information 3

6.5 Two or more channels containing quantized information, operating simultaneously or in a pre-established sequence, all of which modulate the sub-carriers in frequency or phase,

6.5.1 Frequency-division multiplex ..... A

6.5.2 Time-division multiplex ..... B

6.5.3 Frequency-division multiplex with one or more channels using time-division multiplex C

6.5.4 Type of multiplexing other than above ..... D

6.6 Two or more channels containing quantized information operating simultaneously or in a pre-established sequence.

6.6.1 Frequency-division multiplex ..... E

6.6.2 Time-division multiplex ..... F

6.6.3 Frequency-division multiplex with one or more channels using time-division multiplex ..... G

6.6.4 Type of multiplexing other than above ..... H

6.7 Two or more channels containing analogue information operating simultaneously or in a pre-established sequence.

6.7.1 Frequency-division multiplex ..... J

6.7.2 Time-division multiplex ..... K

6.7.3 Frequency-division multiplex with one or more channels using time-division multiplex L

6.7.4 Type of multiplexing other than above ..... M

6.8 Composite system transmitting simultaneously, or in a pre-established sequence, one or more channels containing quantized information, together with one or more channels containing analogue information,

6.8.1 Frequency-division multiplex ..... P

6.8.2 Time-division multiplex ..... Q

6.8.3 Frequency-division multiplex with one or more channels using time-division multiplex ..... R

6.8.4 Type of multiplexing other than above ..... S

6.9 Cases not otherwise covered X

*This excludes time-division multiplex.

7. Third symbol - Type of transmission.

7.1	Unmodulated main carrier or pulses	N
7.2	Telegraphy - manual	A
7.3	Telegraphy - automatic	B
7.4	Facsimile	C
7.5	Data transmission, telemetry, telecommand	D
7.6	Telephony (including sound broadcasting)	E
7.7	Television (video)	F
7.8	Combination of telegraphy (automatic) and facsimile	G
7.9	Combination of telegraphy (automatic) and telephony	H
7.10	Combination of facsimile and telephony	J
7.11	Combination of telephony and television	K
7.12	Combination of the above not otherwise covered	L
7.13	Cases not otherwise covered	X

SECTION II. 2

ADDITIONAL CHARACTERISTICS

8. If Administrations wish to describe for their internal needs further details of an emission, additional symbols fitting the present method of designating emissions may be used.

PART 2

THE MEANING OF CERTAIN TERMS AS USED IN THIS ANNEX

Main carrier — The wave that may be combined with a modulating signal in the last modulation stage of a radio transmitter.

Sub-carrier — A carrier which is employed in an intermediate modulating process and then applied as part of the signal modulating the main carrier.

Analogue signal — A signal that follows the variation of a physical phenomenon continuously with an infinite number of possible values.

Quantized signal — A signal that varies over a finite number of discrete values.

PART 3

EXAMPLES

Description	RR Art. 2 Symbol	Symbols proposed in this method	
		§§ 5, 6, 7	
I. No modulation			
A. Emission of a radio-frequency carrier with no modulation			
A.1 No quantized or analogue information channels (CW radar)	or (AO (FO	XNN	
B. Unmodulated pulse train	PO	PNN	
C. Unmodulated pulse train using frequency-modulated carrier (chirp radar)	PO	PXN	
II. A single channel containing quantized information without the use of a modulating sub-carrier			
A. Emission predominantly amplitude-modulated			
A.1 Double-sideband (on-off keying)			
A.1.1 telegraphy using code with elements of differing numbers and/or durations, aural reception (Morse)	A1	A1A	
A.1.2 telegraphy using code with elements of differing numbers and/or durations, automatic reception (Morse)	A1	A1B	
A.1.3 telemetry using code with elements of the same number and duration, without error-correction	A1	A1D	

Description	RR Art. 2 Symbol	Symbols proposed in this metnod §§ 5, 6, 7	
B. Emission angle-modulated			
B.1 Telegraphy using code with elements of differing numbers and/or durations, automatic reception (frequency-shift keying, Morse)	F1	F1B	
B.2 Telegraphy using code with elements of the same number and duration without error-correction (frequency-shift keying, teleprinter)	F1	F1B	
B.3 Telegraphy using code with elements of the same number and duration with error-correction (frequency-shift keying, teleprinter)	F1	F1B	
B.4 Facsimile, quantized (weather chart)	F4	F1C	
B.5 Data transmission in quantized form	F1	F1D	
C. Emission of pulses			
C.1 A sequence of pulses modulated in code (telemetry signals)	P1C	Q1D	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
III. A single channel using quantized information with the use of a modulating sub-carrier			
A. Emission predominantly amplitude-modulated			
A.1 Double sideband			
A.1.1 telegraphy using code with elements of differing numbers and/or durations for aural reception (Morse) (on-off keying of modulated carrier)	A2	A2A	
A.1.2 telegraphy using code with elements of differing numbers and/or durations for automatic reception (on-off keying of modulating sub-carrier)	A2	A2B	
A.2 Single-sideband, full carrier			
A.2.1 modulation by a continuous tone (Standard frequency emission)	A2H	H2X	
A.2.2 telegraphy using code with elements of the same number and duration without error-correction (sequential single frequency code selective calling signal, Appendix 20C of the Radio Regulations)	A2H	H2B	

Description	RR Art. 2 Symbol	Symbols proposed in this me hod §§ 5, 6, 7	
A.3 Single-sideband, suppressed carrier			
A.3.1 telegraphy using code with elements of differing numbers and/or durations for automatic reception (on-off keying of modulating sub-carrier)	A2J	J2B	
A.3.2 telegraphy using code with elements of the same number and duration with error-correction (narrow-band direct-printing telegraphy)	A2J	J2B	
B. Emission angle-modulated			
B.1 Frequency modulation			
B.1.1 telegraphy using code with elements of the same number and duration with error-correction (narrow-band direct-printing signal, frequency-shift keying of modulating sub-carrier)	F2	F2B	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
IV. A single channel containing analogue information			
A. Emission predominantly amplitude-modulated			
A.1 Double-sideband			
A.1.1 sound channel of broadcasting quality	A3	A3E	
A.1.2 telephone channel with privacy device	A3	A3E	
A.1.3 telephone channel without privacy device	A3	A3E	
A.1.4 facsimile, analogue	A4	A3C	
A.2 Single-sideband, full carrier			
A.2.1 sound channel of broadcasting quality	A3H	H3E	
A.2.2 telephone channel of good commercial quality with privacy device	A3H	H3E	
A.3 Single-sideband, reduced carrier			
A.3.1 sound channel of broadcasting quality	A3A	R3E	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
A.4 Single-sideband, suppressed carrier			
A.4.1 telephone channel with separate frequency modulated signals to control the level of demodulated speech signals (Lincompex)	A3J	J3E	
A.4.2 Analogue facsimile (frequency modulation of an audio frequency sub-carrier which modulates the main carrier in the single-sideband suppressed-carrier mode)	A4J	J3C	
A.5 Vestigial sideband			
A.5.1 sound channel of broadcasting quality	A3C	C3E	
A.5.2 monochrome television (video)	A5C	C3F	
A.5.3 colour television	A5C	C3F	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
B. Emission angle-modulated			
B.1 Frequency modulation			
B.1.1 sound channel of broadcasting quality	F3	F3E	
B.1.2 telephone channel with privacy device	F3	F3E	
B.1.3 analogue facsimile	F4	F3C	
B.1.4 Colour television (video)	F5	F3F	
C. Emission of pulses			
C.1 A sequence of pulses, modulated			
C.1.1 in amplitude			
C.1.1.1 telephone channel without privacy device	P3D	K3E	
C.1.2 in phase or position			
C.1.2.1 analogue data transmission	P1F	M3D	
C.1.2.2 analogue telecommand	P1F	M3D	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
V. Two or more channels containing quantised information operating simultaneously or in a pre-established sequence, all of which modulate the sub-carriers in frequency or phase			
A. Emission predominantly amplitude-modulated			
A.1 Double-sideband			
A.1.1 multichannel voice-frequency telegraphy with error-correction	A7	AAB	
A.2 Single-sideband, reduced carrier			
A.2.1 multichannel voice-frequency telegraphy with error-correction in which some channels are time-division multiplexed	A7A	RAB	
A.3 Independent sidebands			
A.3.1 quantized facsimile in one sideband and multichannel voice-frequency telegraphy with error-correction and time-division multiplex in the other sideband	A9B	BAG	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
VI. Two or more channels containing quantised information operating simultaneously or in a pre-established sequence			
A. Emission predominantly amplitude-modulated			
A.1 Double-sideband (with two or more audio-frequency sub-carriers)			
A.1.1 standard frequency emission	A2	AHL	
B. Emission angle-modulated			
B.1 Frequency modulation			
B.1.1 Four-frequency diplex	F6	FHB	
B.2 Phase modulation			
B.2.1 Digital radio-relay system, in which the baseband is constituted by pulse-code modulated telephony channels in time-division multiplex and modulates the main carrier in quadrature phase-shift keying	F3	GPL	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
VII. Two or more channels containing analogue information operating simultaneously or in a pre-established sequence *			
A. Emission predominantly amplitude-modulated			
A.1 Single-sideband, full carrier			
A.1.1 several telephone channels in frequency-division multiplex	A3H	HJE	
A.2 Single-sideband, reduced-carrier			
A.2.1 sound channels of broadcasting quality	A3A	RJE	
A.3 Single-sideband, suppressed-carrier			
A.3.1 telephone channels of good commercial quality with privacy device	A3J	JJE	
A.4 Independent sidebands			
A.4.1 sound channels of broadcasting quality	A3B	BJE	
A.4.2 telephone channels of good commercial quality with privacy device	A3B	BJE	
A.4.3 two analogue facsimile signals using frequency modulation of sub-carriers	A4B	BJC	
A.4.4 telephone channels, each with separate frequency-modulated signals to control the level of demodulated speech signal (Lincompex)	A3B	BJE	

* In the present set of examples, there are no examples of two or more channels containing analogue information in a pre-established sequence.

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
B. Emission, angle-modulated			
B.1 Frequency modulation			
B.1.1 stereophonic sound channel of broadcasting quality	F3	FJE	
B.1.2 telephone channels of good commercial quality	F3	FJE	
B.1.3 FDM-FM radio-relay system, multi-channel telephony in which the base-band is constituted by frequency-division multiplex and modulates the main carrier in frequency	F3	FJE	
B.1.4 colour television with four sound channels of broadcasting quality	F9	FJK	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
VIII. Composite systems, transmitting simultaneously or in a pre-established sequence one or more channels containing quantized information together with one or more channels containing analogue information			
A. Emission predominantly amplitude-modulated			
A.1. Double-sideband			
A.1.1 telegraphy using code with elements of differing numbers and/or durations for automatic reception (on one sub-carrier) together with one telephone channel (on a second sub-carrier)	A9	APH	
A.1.2 VOR with voice consisting of the main carrier modulated by:			
- a 30 Hz sub-carrier,			
- a carrier resulting from a 9960 Hz tone frequency-modulated by a 30 Hz tone,			
- a telephone channel,			
- a 1020 Hz keyed tone for continual Morse identification	A9	APL	

Description	RR Art. 2 Symbol	Symbols proposed in this method §§ 5, 6, 7	
A.2 Independent sideband			
A.2.1 several telegraph channels using code with elements of the same number and duration with error-correction together with several telephone channels with privacy devices	A9B	BPH	
B. Emission, angle-modulated			
B.1 Frequency modulation			
B.1.1 several telegraph channels using code with elements of the same number and duration without error-correction (frequency-shift keying) together with several telephone channels	F9	FPH

Title 3—The President

Executive Order 11987 • May 24, 1977

EXOTIC ORGANISMS

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the purposes and policies of the Lacey Act (18 U.S.C. 42) and the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), it is hereby ordered as follows:

Section 1. As used in this Order:

(a) "United States" means all of the several States, the District of Columbia, the Commonwealth of Puerto Rico, American Samoa, the Virgin Islands, Guam, and the Trust Territory of the Pacific Islands.

(b) "Introduction" means the release, escape, or establishment of an exotic species into a natural ecosystem.

(c) "Exotic species" means all species of plants and animals not naturally occurring, either presently or historically, in any ecosystem of the United States.

(d) "Native species" means all species of plants and animals naturally occurring, either presently or historically, in any ecosystem of the United States.

Sec. 2. (a) Executive agencies shall, to the extent permitted by law, restrict the introduction of exotic species into the natural ecosystems on lands and waters which they own, lease, or hold for purposes of administration; and, shall encourage the States, local governments, and private citizens to prevent the introduction of exotic species into natural ecosystems of the United States.

(b) Executive agencies, to the extent they have been authorized by statute to restrict the importation of exotic species, shall restrict the introduction of exotic species into any natural ecosystem of the United States.

(c) Executive agencies shall, to the extent permitted by law, restrict the use of Federal funds, programs, or authorities used to export native species for the purpose of introducing such species into ecosystems outside the United States where they do not naturally occur.

(d) This Order does not apply to the introduction of any exotic species, or the export of any native species, if the Secretary of Agriculture or the Secretary of the Interior finds that such introduction or exportation will not have an adverse effect on natural ecosystems.

Sec. 3. The Secretary of the Interior, in consultation with the Secretary of Agriculture and the heads of other appropriate agencies, shall develop and implement, by rule or regulation, a system to standardize and simplify the requirements, procedures and other activities appropriate for implementing the provisions of this Order. The Secretary of the Interior shall ensure that such rules or regulations are in accord with the performance by other agencies of those functions vested by law, including this Order, in such agencies.

Jimmy Carter

THE WHITE HOUSE,

[FR Doc.77-15120 Filed 5-24-77;1:41 pm]

Executive Order 11988 • May 24, 1977

FLOODPLAIN MANAGEMENT

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4001 et seq.), and the Flood Disaster Protection Act of 1973 (Public Law 93-234, 87 Stat. 975), in order to avoid to the extent possible the long and short term adverse impacts associated with the occupancy and modification of floodplains and to avoid direct or indirect support of floodplain development wherever there is a practicable alternative, it is hereby ordered as follows:

Section 1. Each agency shall provide leadership and shall take action to reduce the risk of flood loss, to minimize the impact of floods on human safety, health and welfare, and to restore and preserve the natural and beneficial values served by floodplains in carrying out its responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

Sec. 2. In carrying out the activities described in Section 1 of this Order, each agency has a responsibility to evaluate the potential effects of any actions it may take in a floodplain; to ensure that its planning programs and budget requests reflect consideration of flood hazards and

floodplain management; and to prescribe procedures to implement the policies and requirements of this Order, as follows:

(a)(1) Before taking an action, each agency shall determine whether the proposed action will occur in a floodplain -- for major Federal actions significantly affecting the quality of the human environment, the evaluation required below will be included in any statement prepared under Section 102(2)(C) of the National Environmental Policy Act. This determination shall be made according to a Department of Housing and Urban Development (HUD) floodplain map or a more detailed map of an area, if available. If such maps are not available, the agency shall make a determination of the location of the floodplain based on the best available information. The Water Resources Council shall issue guidance on this information not later than October 1, 1977.

(2) If an agency has determined to, or proposes to, conduct, support, or allow an action to be located in a floodplain, the agency shall consider alternatives to avoid adverse effects and incompatible development in the floodplains. If the head of the agency finds that the only practicable alternative consistent with the law and with the policy set forth in this Order requires siting in a floodplain, the agency shall, prior to taking action, (i) design or modify its action in order to minimize potential harm to or within the floodplain, consistent with regulations issued in accord with Section 2(d) of this Order, and (ii) prepare and circulate a notice containing an explanation of why the action is proposed to be located in the floodplain.

(3) For programs subject to the Office of Management and Budget Circular A-95, the agency shall send the notice, not to exceed three pages in length including a location map, to the state and areawide A-95 clearinghouses for the geographic areas affected. The notice shall include: (i) the reasons why the action is proposed to be located in a floodplain; (ii) a statement indicating whether the action conforms to applicable state or local floodplain protection standards and (iii) a list of the alternatives considered. Agencies shall endeavor to allow a brief comment period prior to taking any action.

(4) Each agency shall also provide opportunity for early public review of any plans or proposals for actions in floodplains, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

(b) Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in a floodplain, whether the proposed action is in accord with this Order.

(c) Each agency shall take floodplain management into account when formulating or evaluating any water and land use plans and shall require land and water resources use appropriate to the degree of hazard involved. Agencies shall include adequate provision for the evaluation and consideration of flood hazards in the regulations and operating procedures for the licenses, permits, loan or grants-in-aid programs that they administer. Agencies

shall also encourage and provide appropriate guidance to applicants to evaluate the effects of their proposals in floodplains prior to submitting applications for Federal licenses, permits, loans or grants.

(d) As allowed by law, each agency shall issue or amend existing regulations and procedures within one year to comply with this Order. These procedures shall incorporate the Unified National Program for Floodplain Management of the Water Resources Council, and shall explain the means that the agency will employ to pursue the nonhazardous use of riverine, coastal and other floodplains in connection with the activities under its authority. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order. Agencies shall prepare their procedures in consultation with the Water Resources Council, the Federal Insurance Administration, and the Council on Environmental Quality, and shall update such procedures as necessary.

Sec. 3. In addition to the requirements of Section 2, agencies with responsibilities for Federal real property and facilities shall take the following measures:

(a) The regulations and procedures established under Section 2(d) of this Order shall, at a minimum, require the construction of Federal structures and facilities to be in accordance with the standards and criteria and to be consistent with the intent of those promulgated under the National Flood Insurance Program. They shall deviate only to the extent that the standards of the Flood Insurance Program are demonstrably inappropriate for a given type of structure or facility.

(b) If, after compliance with the requirements of this Order, new construction of structures or

facilities are to be located in a floodplain, accepted floodproofing and other flood protection measures shall be applied to new construction or rehabilitation. To achieve flood protection, agencies shall, wherever practicable, elevate structures above the base flood level rather than filling in land.

(c) If property used by the general public has suffered flood damage or is located in an identified flood hazard area, the responsible agency shall provide on structures, and other places where appropriate, conspicuous delineation of past and probable flood height in order to enhance public awareness of and knowledge about flood hazards.

(d) When property in floodplains is proposed for lease, easement, right-of-way, or disposal to non-Federal public or private parties, the Federal agency shall (1) reference in the conveyance those uses that are restricted under identified Federal, State or local floodplain regulations; and (2) attach other appropriate restrictions to the uses of properties by the grantee or purchaser and any successors, except where prohibited by law; or (3) withhold such properties from conveyance.

Sec. 4. In addition to any responsibilities under this Order and Sections 202 and 205 of the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4106 and 4128), agencies which guarantee, approve, regulate, or insure any financial transaction which is related to an area located in a floodplain shall, prior to completing action on such transaction, inform any private parties participating in the transaction of the hazards of locating structures in the floodplain.

Sec. 5. The head of each agency shall submit a report to the Council on Environmental Quality and to the Water Resources Council on June 30, 1978, regarding the status of their procedures and the impact of this Order on the agency's operations. Thereafter, the Water Resources Council shall periodically evaluate agency procedures and their effectiveness.

Sec. 6. As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting floodplains.

(b) The term "base flood" shall mean that flood which has a one percent or greater chance of occurrence in any given year.

(c) The term "floodplain" shall mean the lowland and relatively flat areas adjoining inland and coastal waters including floodprone areas of offshore islands, including at a minimum, that area subject to a one percent or greater chance of flooding in any given year.

Sec. 7. Executive Order No. 11296 of August 10, 1966, is hereby revoked. All actions, procedures, and issuances taken under that Order and still in effect shall remain in effect until modified by appropriate authority under the terms of this Order.

Sec. 8. Nothing in this Order shall apply to assistance provided for emergency work essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

Sec. 9. To the extent the provisions of Section 2(a) of this Order are applicable to projects covered by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

Executive Order 11989 • May 24, 1977

OFF-ROAD VEHICLES ON PUBLIC LANDS

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in order to clarify agency authority to define zones of use by off-road vehicles on public lands, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), Executive Order No. 11644 of February 8, 1972, is hereby amended as follows:

Section 1. Clause (B) of Section 2(3) of Executive Order No. 11644, setting forth an exclusion from the definition of off-road vehicles, is amended to read "(B) any fire, military, emergency or law enforcement vehicle when used for emergency purposes, and any combat or combat support vehicle when used for national defense purposes, and".

Sec. 2. Add the following new Section to Executive Order No. 11644:

"Sec. 9. Special Protection of the Public Lands. (a) Notwithstanding the provisions of Section 3 of this Order, the respective agency head shall, whenever he determines that the use of off-road vehicles will cause or is causing considerable adverse effects on the soil, vegetation, wildlife, wildlife habitat or cultural or historic resources of particular areas or trails of the public lands, immediately close such areas or trails to the type of off-road vehicle causing such effects, until such time as he determines that such adverse effects have been eliminated and that measures have been implemented to prevent future recurrence.

"(b) Each respective agency head is authorized to adopt the policy that portions of the public lands within his jurisdiction shall be closed to use by off-road vehicles except those areas or trails which are suitable and specifically designated as open to such use pursuant to Section 3 of this Order.".

Executive Order 11990 • May 24, 1977

PROTECTION OF WETLANDS

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), in order to avoid to the extent possible the long and short term adverse impacts associated with the destruction or modification of wetlands and to avoid direct or indirect support of new construction in wetlands wherever there is a practicable alternative, it is hereby ordered as follows:

Section 1. (a) Each agency shall provide leadership and shall take action to minimize the destruction, loss or degradation of wetlands, and to preserve and enhance the natural and beneficial values of wetlands in carrying out the agency's responsibilities for (1) acquiring, managing, and disposing of Federal lands and facilities; and (2) providing Federally undertaken, financed, or assisted construction and improvements; and (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

(b) This Order does not apply to the issuance by Federal agencies of permits, licenses, or allocations to private parties for activities involving wetlands on non-Federal property.

Sec. 2. (a) In furtherance of Section 101(b)(3) of the National Environmental Policy Act of 1969 (42 U.S.C. 4331(b)(3)) to improve and coordinate Federal plans,

functions, programs and resources to the end that the Nation may attain the widest range of beneficial uses of the environment without degradation and risk to health or safety, each agency, to the extent permitted by law, shall avoid undertaking or providing assistance for new construction located in wetlands unless the head of the agency finds (1) that there is no practicable alternative to such construction, and (2) that the proposed action includes all practicable measures to minimize harm to wetlands which may result from such use, In making this finding the head of the agency may take into account economic, environmental and other pertinent factors.

(b) Each agency shall also provide opportunity for early public review of any plans or proposals for new construction in wetlands, in accordance with Section 2(b) of Executive Order No. 11514, as amended, including the development of procedures to accomplish this objective for Federal actions whose impact is not significant enough to require the preparation of an environmental impact statement under Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended.

Sec. 3. Any requests for new authorizations or appropriations transmitted to the Office of Management and Budget shall indicate, if an action to be proposed will be located in wetlands, whether the proposed action is in accord with this Order.

Sec. 4. When Federally-owned wetlands or portions of wetlands are proposed for lease, easement, right-of-way or disposal to non-Federal public or private parties, the Federal agency shall (a) reference in the conveyance those uses that are restricted under identified Federal, State or local wetlands regulations; and (b) attach

other appropriate restrictions to the uses of properties by the grantee or purchaser and any successor, except where prohibited by law; or (c) withhold such properties from disposal.

Sec. 5. In carrying out the activities described in Section 1 of this Order, each agency shall consider factors relevant to a proposal's effect on the survival and quality of the wetlands. Among these factors are:

(a) public health, safety, and welfare, including water supply, quality, recharge and discharge; pollution; flood and storm hazards; and sediment and erosion;

(b) maintenance of natural systems, including conservation and long term productivity of existing flora and fauna, species and habitat diversity and stability, hydrologic utility, fish, wildlife, timber, and food and fiber resources; and

(c) other uses of wetlands in the public interest, including recreational, scientific, and cultural uses.

Sec. 6. As allowed by law, agencies shall issue or amend their existing procedures in order to comply with this Order. To the extent possible, existing processes, such as those of the Council on Environmental Quality and the Water Resources Council, shall be utilized to fulfill the requirements of this Order.

Sec. 7. As used in this Order:

(a) The term "agency" shall have the same meaning as the term "Executive agency" in Section 105 of Title 5 of the United States Code and shall include the military departments; the directives contained in this Order, however, are meant to apply only to those agencies which perform the activities described in Section 1 which are located in or affecting wetlands.

(b) The term "new construction" shall include draining, dredging, channelizing, filling, diking, impounding, and related activities and any structures or facilities begun or authorized after the effective date of this Order.

(c) The term "wetlands" means those areas that are inundated by surface or ground water with a frequency sufficient to support and under normal circumstances does or would support a prevalence of vegetative or aquatic life that requires saturated or seasonally saturated soil conditions for growth and reproduction. Wetlands generally include swamps, marshes, bogs, and similar areas such as sloughs, potholes, wet meadows, river overflows, mud flats, and natural ponds.

Sec. 8. This Order does not apply to projects presently under construction, or to projects for which all of the funds have been appropriated through Fiscal Year 1977, or to projects and programs for which a draft or final environmental impact statement will be filed prior to October 1, 1977. The provisions of Section 2 of this Order shall be implemented by each agency not later than October 1, 1977.

Sec. 9. Nothing in this Order shall apply to assistance provided for emergency work, essential to save lives and protect property and public health and safety, performed pursuant to Sections 305 and 306 of the Disaster Relief Act of 1974 (88 Stat. 148, 42 U.S.C. 5145 and 5146).

Sec. 10. To the extent the provisions of Sections 2 and 5 of this Order are applicable to projects covered

by Section 104(h) of the Housing and Community Development Act of 1974, as amended (88 Stat. 640, 42 U.S.C. 5304(h)), the responsibilities under those provisions may be assumed by the appropriate applicant, if the applicant has also assumed, with respect to such projects, all of the responsibilities for environmental review, decisionmaking, and action pursuant to the National Environmental Policy Act of 1969, as amended.

Executive Order 11991 • May 24, 1977

RELATING TO PROTECTION AND ENHANCEMENT OF ENVIRONMENTAL QUALITY

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in furtherance of the purpose and policy of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4321 et seq.), the Environmental Quality Improvement Act of 1970 (42 U.S.C. 4371 et seq.), and Section 309 of the Clean Air Act, as amended (42 U.S.C. 1857h-7), it is hereby ordered as follows:

Section 1. Subsection (h) of Section 3 (relating to responsibilities of the Council on Environmental Quality) of Executive Order No. 11514, as amended, is revised to read as follows:

"(h) Issue regulations to Federal agencies for the implementation of the procedural provisions of the Act (42 U.S.C. 4332(2)). Such regulations shall be developed after consultation with affected agencies and after such public hearings as may be appropriate. They will be designed to make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives. They will require impact statements to be concise, clear, and to the point, and supported by evidence that agencies have made the necessary environmental analyses. The Council shall include in its regulations procedures (1) for the early preparation of environmental impact statements, and (2) for the referral to the Council of conflicts between

agencies concerning the implementation of the National Environmental Policy Act of 1969, as amended, and Section 309 of the Clean Air Act, as amended, for the Council's recommendation as to their prompt resolution.".

Sec. 2. The following new subsection is added to Section 2 (relating to responsibilities of Federal agencies) of Executive Order No. 11514, as amended:

"(g) In carrying out their responsibilities under the Act and this Order, comply with the regulations issued by the Council except where such compliance would be inconsistent with statutory requirements.".

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 12—Banks and Banking

CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

PART 5—SUPPLEMENTAL APPLICATION PROCEDURES FOR CHARTERS, DOMESTIC BRANCHES, MERGERS, RELOCATIONS, CONVERSIONS, DOMESTIC OPERATING SUBSIDIARIES, FIDUCIARY POWERS AND TITLE CHANGES

Scope of Part

AGENCY: Comptroller of the Currency.

ACTION: Final rule.

SUMMARY: This amendment revises 12 CFR Part 5 establishing supplemental hearing and notice procedures applicable to certain activities of national banks. The purpose of the amendment is to clarify that the establishment of a *de novo* operating subsidiary by a national bank is not an activity which is included within the scope of that Part.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard H. Neiman, Staff Attorney, Legal Advisory Services Division, Comptroller of the Currency, Washington, D.C. 20219, 202–447–1884.

SUPPLEMENTARY INFORMATION: On November 1, 1976, the Comptroller of the Currency published in the FEDERAL REGISTER (41 FR 47934) an amendment expanding the scope of 12 CFR Part 5 to include additional activities of national banks within the hearing and notice procedures established by that Part. Inadvertently, the amendment, as published, applied the hearing and notice procedures to the establishment of de novo operating subsidiaries. The Comptroller considers the establishment of a de novo operating subsidiary as analogous to the incorporation of a department of a bank and therefore routinely does not require for such applications the supplemental procedures set forth in Part 5. Accordingly, Part 5 is being amended expressly to delete the establishment of *de novo* operating subsidiaries from the scope of that Part.

Mr. Neiman is the principal drafter of this revision.

In consideration of the above, 12 CFR Part 5 is amended by revising § 5.1 to read:

§ 5.1 Scope of Part.

This part contains procedures by which the Comptroller of the Currency may reach informed decisions with respect to applications to charter national banks, to establish domestic branches of national banks, to merge or consolidate with or purchase the assets of another bank where the resulting bank is a national bank, to relocate offices of national banks, to convert state-chartered institutions to national banks, to acquire domestic operating subsidiaries, to exercise fiduciary powers, to change corporate titles, and in other such cases as the Comptroller in his sole discretion shall deem appropriate. These procedures provide a method by which all persons interested in the subject matter of such applications may present their views. Nothing contained herein shall be construed to prevent interested persons from presenting their views in a more informal manner when deemed appropriate by the Comptroller, his deputy, or by the Regional Administrator of National Banks, or to prevent the Comptroller or the Regional Administrator from conducting such other investigation as may be deemed appropriate. The procedures established by this Part, other than the notice provision of § 5.2a, and written comment provision of § 5.4a, do not apply to applications for permission to establish a CBCT branch, unless the Comptroller shall specifically so direct.

Dated: May 13, 1977.

ROBERT BLOOM,
Acting Comptroller of the Currency.

[FR Doc.77-15052 Filed 5-25-77;8:45 am]

PART 9—FIDUCIARY POWERS OF NATIONAL BANKS AND COLLECTIVE INVESTMENT FUNDS

Applications for a Stay or Review of Actions of Registered Clearing Agencies

AGENCY: Comptroller of the Currency.

ACTION: Final rule.

SUMMARY: These sections establish procedures to be followed by national banks which are appealing from an adverse action by a registered clearing agency. The banks have had this right of appeal for over a year. This Part is intended to provide a specific procedure for these appeals.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Dean E. Miller, Deputy Comptroller for Trust Operations, Comptroller of the Currency, Washington, D.C. 20219, 202–447–1731.

SUPPLEMENTARY INFORMATION: On June 25, 1976, there was published in the FEDERAL REGISTER (41 FR 26223) a proposal to add new §§ 9.21 and 9.22. These sections set procedures for appeals by national banks from adverse actions of registered clearing agencies. They require that requests for stays of adverse actions be in writing and include a statement as to why a stay should be granted. They also establish certain formal requirements in connection with a subsequent appeal. Interested persons were given 30 days in which to comment upon the proposed sections.

One written comment letter was received and it found the proposed new sections to be in good form, both from a technical and administrative standpoint.

The principal drafter of this document was Mr. Dean E. Miller, Deputy Comptroller for Trust Operations. The text of the new sections were substantially the result of a joint drafting effort by the Federal banking agencies and the Securities and Exchange Commission.

The proposed new sections are hereby adopted with minor editorial changes and are set forth below.

Dated: May 17, 1977.

ROBERT BLOOM,
Acting Comptroller of the Currency.

§ 9.21 Applications for stays of disciplinary sanctions or summary suspensions imposed by a registered clearing agency.

If any registered clearing agency imposes any final disciplinary sanction pursuant to section 17A(b)(3)(G) of the Securities Exchange Act of 1934, or summarily suspends or limits or prohibits access pursuant to section 17A(b)(5)(C) of the Act, any person aggrieved thereby for which the Comptroller of the Currency is the appropriate regulatory agency may file with the Comptroller of the Currency, by telegram or otherwise, a request for a stay of imposition of such action. Such request shall be in writing and shall include a statement as to why such stay should be granted.

§ 9.22 Applications for review of final disciplinary sanctions, denials of participation, or prohibitions or limitations of access to services imposed by registered clearing agencies.

(a) Proceedings on an application to the Comptroller of the Currency under section 19(d)(2) of the Securities Exchange Act of 1934 for review of any final disciplinary sanction, denial or conditioning of participation, or prohibition or limitation with respect to access to services offered by a registered clearing agency shall be governed by this rule.

(b) An application for review pursuant to section 19(d)(2) of the Act shall be filed with the Comptroller of the

Currency within 30 days after notice thereof was filed pursuant to section 19 (d) (1) of the Act and received by the aggrieved person applying for review, or within such longer period as the Comptroller of the Currency may determine. The Comptroller of the Currency shall serve a copy of the application on the registered clearing agency, which shall, within ten days after receipt of the application, certify and file with the Comptroller of the Currency one copy of the record upon which the action complained of was taken, together with three copies of an index to such record. The Comptroller of the Currency shall serve upon the parties copies of such index and any papers subsequently filed.

(c) Within 20 days after receipt of a copy of the index, the applicant shall file a brief or other statement in support of his application which shall state the specific grounds on which the application is based, the particular findings of the registered clearing agency to which objection is taken, and the relief sought. Any application not perfected by such timely brief or statement may be dismissed as abandoned.

(d) Within 20 days after receipt of the applicant's brief or statement the clearing agency may file an answer thereto, and within 10 days of receipt of any such answer the applicant may file a reply. Any such papers not filed within the time provided by paragraphs (b), (c) or (d) of this section will not be received except upon special permission of the Comptroller of the Currency.

(e) On its own motion, the Comptroller of the Currency may direct that the record under review be supplemented with such additional evidence as it may deem relevant. Nevertheless, the registered clearing agency and persons who may be aggrieved by its action shall be obliged to introduce all evidence that they deem relevant in the proceedings before the registered clearing agency, and no such person shall be entitled to introduce additional evidence unless he shows to the satisfaction of the Comptroller of the Currency that such additional evidence is material and that there were reasonable grounds for his failure to introduce such evidence in such proceedings. Any request for leave to introduce additional evidence shall be filed promptly so as not to delay the disposition of the proceeding.

(f) Oral argument before the Comptroller of the Currency or his designated representative may be requested by the applicant or the registered clearing agency as follows: (1) By the applicant with his brief or statement within 10 days after receipt of the registered clearing agency's answer, or (2) by the clearing agency with its answer. The Comptroller of the Currency, in its discretion, may grant or deny any request for oral argument and, where it deems it appropriate to do so, the Comptroller of the Currency will consider an application on the basis of the papers filed by the parties, without oral argument.

(Secs. 17A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78q-1, 78s and 78w).)

[FR Doc. 77-15051 Filed 5-25-77;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No.76-CE-28-AD; Amdt.39-2909]

PART 39—AIRWORTHINESS DIRECTIVES

Beech Models F33A, F33C, V35B, A36, 95-B55, 95-B55A, E55, E55A, 58, 58A, 65-B80, C90, E90, B99, A100, B100 and 200 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule, amendment to existing Airworthiness Directive.

SUMMARY: AD 76-22-02 requires replacement of defective seat belt roller adjusters used with inverted "Y" type shoulder harnesses installed on various Beech model airplanes to correct an unsafe condition. Some serial numbers of these model airplanes were omitted from the manufacturer's service instructions and thus not included in the applicability statement of the Airworthiness Directive (AD). This revision makes the AD applicable to those omitted airplanes.

EFFECTIVE DATE: June 2, 1977.

ADDRESSES: Beechcraft Service Instructions No. 0850-313, Rev. I, applicable to this AD, may be obtained from Beech Aircraft Corporation, Commercial Service Department, 9709 East Central, Wichita, Kansas 67201.

FOR FURTHER INFORMATION CONTACT:

William L. Schroeder, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Mo. 64106. Telephone: 816-374-3446.

SUPPLEMENTARY INFORMATION: AD 76-22-02 (Amendment 39-2755) was issued October 21, 1976 and published in the FEDERAL REGISTER on November 1, 1976 (41 FR 47911, 47912), effective November 4, 1976. This AD requires replacement of defective seat belt roller adjusters used with inverted "Y" type shoulder harnesses installed on certain serial numbers of Beech Models F33A, F33C, V35B, A36, 95-B55, 95-B55A, E55, E55A, 58, 58A, 65-B80, C90, E90, B99, A100, B 100, and 200 airplanes in accordance with Beechcraft Service Instructions No. 0850-313. This action was taken to prevent a seat belt from slowly releasing tension during normal usage, which if unnoticed by the occupant could result in injury to him during those times when he is relying on the seat belt for safety. AD 76-22-02 was made applicable to those serial numbers of Beech model airplanes listed in the manufacturer's service instructions. Subsequent to the issuance of the AD reports were received establishing that the defective seat belt roller adjusters were installed on airplanes other than those included in the manufacturer's service instructions and in the applicability statement of the AD. Accordingly, this revision is necessary to make AD 76-22-02 applicable to those omitted airplanes. In addition, Beechcraft Service Instructions No. 0850-313, Rev. I, has been issued and includes the omitted airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than thirty (30) days after the date of publication in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal authors of this document are William L. Schroeder, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator 14 CFR § 11.89, § 39.13 of the Federal Aviation Regulations (14 CFR § 39.13), Amendment 39-2755 (41 FR 47911, 47912), AD 76-22-02, is further amended as follows:

1. Revise the applicability statement so that it now reads as follows:

BEECH. Applies to the airplane models and serial numbers listed below having inverted "Y" type shoulder harnesses installed, except those airplanes that have previously complied with AD 76-22-02 (Amendment 39-2755):

Models	*Serial No.*
F33A	CE-490 through CE-633.
F33C	CJ-49 through CJ-120.
V35B	D-9582 through D-9861.
A36	E-515 through E-824.
95-B55 and 95-B55A	TC-1653 through TC-1946.
E55 and E55A	TE-986 through TE-1077.
58 and 58A	TH-425 through TH-732.
65-B80	LD-477 through LD-505.
C90	LJ-626 through LJ-682 and LJ-684.
E90	LW-93 through LW-171, LW-173, LW-174, and LW-178.
B99	U-157 through U-164.
A100	B-199 through B-226.
B100	BE-1 through BE-7.
200	BB-7, BB-8, BB-12, BB-18 through BB-87, BB-89 through BB-128, BB-130 through BB-136.

2. Revise the compliance statement so that it now reads as follows:

Compliance: Required as indicated, unless already accomplished in accordance with AD 76-22-02 (Amendment 39-2755).

To prevent slippage during normal use of the lap belt assembly installed with the inverted "Y" type shoulder harness, within 100 hours' time in service after the effective date of this AD, accomplish the following in accordance with Beechcraft Service Instructions No. 0850-313, Rev. I, or later approved revisions:

This amendment becomes effective June 2, 1977.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655 (c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR § 11.89).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo., on May 16, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[Airspace Docket No. 76-RM-26]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Duchesne, Utah, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates a 1200 foot transition area at Duchesne, Utah, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Duchesne, Utah, Municipal Airport, based on the Myton, Utah, VORTAC.

EFFECTIVE DATE: August 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Clyde A. Powers, Airspace Specialist, Operations, Procedures and Airspace Branch, ARM-538, Federal Aviation Administration, Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; telephone 303-837-3937.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking (NPRM) was published in the FEDERAL REGISTER on Thursday, March 24, 1977, (42 FR 15916) which described the proposed Duchesne, Utah, transition area as follows:

DUCHESNE, UTAH

That airspace extending upward from 1200 feet above the surface within 8 miles north and 6 miles south of the 089°T and 268°T radials extending from 14 miles east to 14 miles west of the Myton VORTAC.

Subsequent to the publication of this NPRM in the FEDERAL REGISTER on March 24, 1977, it was noted that the proposed Duchesne, Utah, transition area description was erroneous and should be corrected as follows:

DUCHESNE, UTAH

That airspace extending upward from 1200 feet above the surface within 8 miles north and 6 miles south of the Myton, Utah, VORTAC 104°T and 283°T radials extending from 14 miles east to 14 miles west of the VORTAC.

No objections were received in response to the proposed Duchesne, Utah, transition area described in the NPRM published in the FEDERAL REGISTER on March 24, 1977. Since the above described corrections to this proposed transition area are minor in nature and places no burden on the public, notice and public procedure thereon is unnecessary. Except for editorial changes and the corrected radials, this amendment is the same as proposed in the notice.

The principal authors of this document are Clyde A. Powers, Air Traffic Service, and Daniel J. Peterson, Regional Counsel.

Accordingly, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR 71.181) is amended, effective August 11, 1977, by adding the following new transition area:

DUCHESNE, UTAH

That airspace extending upward from 1200 feet above the surface within 8 miles north and 6 miles south of the 104°T and 283°T radials extending from 14 miles east to 14 miles west of the Myton VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Aurora, Colo., on May 18, 1977.

M. M. MARTIN,
Director, Rocky Mountain Region.

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

[Docket No. 16824, Amdt. No. 1074]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATE: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESS: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from:

1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAPs, mailed weekly, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150; add $30 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts

printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Aerospace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPS). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

* * * Effective August 11, 1977:

Wenatchee, WA—Pangborn Field, VOR-A, Amdt. 3
Wenatchee, WA—Pangborn Field, VOR-B, Amdt. 3

* * * Effective July 14, 1977:

Santa Monica, CA—Santa Monica Muni, VOR-A, Amdt. 4
Santa Monica, CA—Santa Monica Muni, VOR Rwy 3, Amdt. 7

* * * Effective July 7, 1977:

Bessemer, AL—Bessemer, VOR Rwy 5, Original
Bessemer, AL—Bessemer, VOR/DME Rwy 5, Original, cancelled
Miami, FL—Miami International, VOR Rwy 12, Amdt. 22
Miami, FL—Miami International, VOR Rwy 30, Amdt. 5
Sarasota (Bradenton), FL—Sarasota-Bradenton VOR Rwy 22, Admt. 5
Hilo, HI—General Lyman Field, VOR Rwy 26, Amdt. 3
Hilo, HI—General Lyman Field, VOR/DME Rwy 26 (TAC) Original
Hilo, HI—General Lyman Field, VOR/DME-A, Original
Hilo, HI—General Lyman Field, VORTAC Rwy 26, Amdt. 3, cancelled
Hilo, HI—General Lyman Field, VORTAC-A, Amdt. 1, cancelled
Ithaca, NY—Tompkins County, VOR Rwy 14, Amdt. 10
North Myrtle Beach, SC—Grand Strand, VOR Rwy 5, Amdt. 13
North Myrtle Beach, SC—Grand Strand, VOR Rwy 23, Amdt. 14
Orangeburg, SC—Orangeburg, VOR Rwy 4, Orig
Culpeper, VA—Culpeper Municipal, VOR-A, Amdt. 2

* * * Effective May 17, 1977:

Annette Island, AK—Annette Island, VOR TAC Rwy 30, Amdt. 7
Annette Island, AK—Annette Island, VOR TAC-A, Amdt. 8

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

* * * Effective August 11, 1977:

San Diego, CA—Gillespie Field, LOC-D Amdt. 4

* * * Effective July 7, 1977:

Sarasota (Bradenton), FL—Sarasota-Bradenton, LOC/DME (BC) Rwy 13, Amdt. 1
Greenville, NC—Pitt-Greenville, SDF Rwy 19, Amdt. 1

* * * Effective June 16, 1977:

Baton Rouge, LA—Ryan, LOC Rwy 22, Original

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

* * * Effective July 7, 1977:

Greenville, NC—Pitt-Greenville, NDB Rwy 19, Amdt. 7
North Myrtle Beach, SC—Grand Strand, NDB Rwy 23, Amdt. 5
Orangeburg, SC—Orangeburg, NDB-A, Amdt. 5

* * * Effective June 30, 1977:

Anahuac, TX—Chambers County, NDB Rwy 30, Original

* * * Effective May 17, 1977:

Annette Island, AK—Annette Island, NDB-B, Amdt. 9
Ketchikan, AK—Ketchikan, NDB/DME Rwy 11, Amdt. 2

4. By amending § 97.29 ILS-MLS SIAPs identified as follows:

* * * Effective July 14, 1977:

Dallas-Ft. Worth, TX—Dallas-Ft. Worth Regional, ILS Rwy 17L, Amdt. 6
Dallas-Ft. Worth, TX—Dallas-Ft. Worth Regional, ILS Rwy 17R, Amdt. 6
Dallas-Ft. Worth, TX—Dallas-Ft. Worth Regional, ILS Rwy 31R, Amdt. 2
Dallas-Ft. Worth, TX—Dallas-Ft. Worth Regional, ILS Rwy 35L, Amdt. 6
Dallas-Ft. Worth, TX—Dallas-Ft. Worth Regional, ILS Rwy 35R, Amdt. 6

* * * Effective July 7, 1977:

Hilo, HI—General Lyman Field, ILS Rwy 26, Amdt. 3
Ithaca, NY—Tompkins County, ILS Rwy 32, Amdt. 1
North Myrtle Beach, SC—Grand Strand, ILS Rwy 23, Amdt. 2

* * * Effective May 17, 1977:

Ketchikan, AK—Ketchikan, ILS/DME-1, Rwy 11, Amdt. 1
Raleigh, NC—Raleigh-Durham, ILS Rwy 5, Amdt. 18

* * * Effective May 13, 1977:

Los Angeles, CA—Los Angeles International, ILS Rwy 24R, Amdt. 11

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Delegation: 24 FR 5662 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on May 20, 1977.

JAMES M. VINES,
Chief, Aircraft Programs Division.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2882]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Atlantic Richfield Co.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: This consent order requires a Los Angeles, Calif., manufacturer and marketer of petroleum products, among other things to cease failing to furnish credit card customers with periodic statements setting forth credit balances; failing to notify customers of their right to request and receive cash refunds of such credit balances; failing to provide prescribed disclosure statements with credit balance notifications; and failing to make proper refunds as detailed in the order.

DATE: Complaint and order issued April 27, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Lewis H. Goldfarb, (acting) Assistant Director for Special Statutes, Bureau of Consumer Protection, Federal Trade Commission, 6th & Pennsylvania Ave. NW., Washington, D.C. 20580, 202-724-1139.

[1] Copies of the Complaint and the Decision and Order filed with the original document.

SUPPLEMENTARY INFORMATION: On Thursday, February 17, 1977, there was published in the FEDERAL REGISTER (42 FR 9722) a proposed consent agreement with analysis In the Matter of Atlantic Richfield Company, a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR, are as follows:

Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-20 Disclosures; 13.533-45 Maintain records; 13.533-55 Refunds, rebates and/or credits. Subpart—Delaying or Withholding Corrections. Adjustments or Action Owed: § 13.675 Delaying or withholding corrections, adjustments or action owed. Subpart—Neglecting, Unfairly or Deceptively, to Make Material Disclosure: § 13.1895 Scientific or other relevant facts.

(Sec. 6, 38 Stat. 721 (15 U.S.C. 46). Interprets or applies sec. 5, 38 Stat. 719, as amended (15 U.S.C. 45).)

JOHN F. DUGAN,
Acting Secretary.

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Globe Newspaper Co., Inc.

AGENCY: Federal Trade Commission.

ACTION: Order to cease and desist.

SUMMARY: This consent order, among other things, requires a Dorchester, Mass., newspaper publisher to cease misrepresenting the role, identity, and purpose of telephone solicitors; failing to disclose the amount of charitable donations it will make in exchange for the purchase of newspaper subscriptions; and placing in the hands of others the means and instrumentalities by which the public may be deceived. Further, the firm is required to donate $70,000 to the St. Jude Research Hospital; maintain files containing inquiries and complaints relating to proscribed practices; and institute a surveillance program designed to insure solicitors' compliance with the terms of the order.

DATE: Complaint and order issued April 29, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

Lewis H. Goldfarb, (acting) Assistant Director for Special Statutes, Bureau of Consumer Protection, Federal Trade Commission, 6th and Pennsylvania Ave., NW., Washington, D.C. 20580, 202–724–1139.

SUPPLEMENTARY INFORMATION: On Wednesday, February 23, 1977, there was published in the FEDERAL REGISTER (42 FR 10741) a proposed consent agreement with analysis In the Matter of Globe Newspaper Co., Inc., a corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings, and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR, are as follows:

Subpart—Advertising Falsely or Misleadingly: § 13.15 Business status, advantages or connections; § 13.15–5 Advertising and promotional services; § 13.15–30 Connections or arrangements with others; § 13.15–225 Personnel or staff; § 13.42 Connection of others with goods; § 13.155 Prices; § 13.155–95 Terms and conditions; 13.160 Promotional sales plans; § 13.205 Scientific or other relevant facts; § 13.260 Terms and conditions. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533–20 Disclosures; § 13.533–45 Maintain records; § 13.533–45(c) Complaints; § 13.533–55 Refunds, rebates, and/or credits. Subpart—Failing to Maintain Records: § 13.1051 Failing to maintain records. Title 22—Foreign Relations

CHAPTER II—AGENCY FOR INTERNATIONAL DEVELOPMENT, DEPARTMENT OF STATE

PART 214—ADVISORY COMMITTEE MANAGEMENT

AGENCY: Agency for International Development.

ACTION: Notice of Amendment to AID Regulation 14, Advisory Committee Management, 22 CFR, Part 214.

SUMMARY: This notice announces certain amendments to AID Regulation 14, Advisory Committee Management, Title 22, Code of Federal Regulations, Chapter II, Part 214, which was last published in its entirety in the FEDERAL REGISTER of August 7, 1975, 40 FR 33205. These changes are required because of a recently effective amendment to the Federal Advisory Committee Act.

EFFECTIVE DATE: May 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard F. Calhoun, AID Advisory Committee Management Officer, Agency for International Development, Department of State, Washington, D.C. 20523 (202–632–9726).

SUPPLEMENTARY INFORMATION: Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) provides that a meeting of a Federal advisory committee may be closed to the public if the head of the agency to which the advisory committee reports determines that certain circumstances exist which justify closing the meeting. In the past the circumstances justifying the closing of an advisory committee meeting were contained in the Freedom of Information Act, Section 552(b) of Title 5 United States Code. Effective March 12, 1977, Section 10(d) was amended to change the circumstances justifying the closing of a committee meeting from those contained in the Freedom of Information Act to those enumerated in the Government in the Sunshine Act, subsection (c) of section 552b of Title 5, U.S. Code. AID's Regulation 14 has several subsections which refer to section 552(b). The revisions indicated below are conforming amendments which change these statutory references from section 552(b) to subsection (c) of section 552b Title 5, U.S. Code.

Accordingly, 22 CFR Part 214 is amended as follows:

1. By revising § 214.32(b)(1) to read as follows:

§ 214.32 Calling of advisory committee meetings.

* * * * *

(b) * * *

(1) The agenda lists the matters to be considered at the meeting and indicates whether any portion of the meeting is to be closed to the public in accordance with subsection (c) of section 552b of title 5, United States Code.

2. By revising § 214.33(b) to read as follows:

§ 214.33 Notice of meetings.

* * * * *

(b) Notices include the name of the advisory committee; the time of the meeting; the purposes of the meeting; a statement regarding the extent to which the public will be permitted to attend and, if any portion is closed, why such closure or partial closure is necessary, including citation of the appropriate exemption permitted under subsection (c) of 5 U.S.C. section 552b. Thus, AID Notices of Advisory Committee meetings normally state that the meeting is open to the public and include the place of meeting; and instructions for gaining access to open meetings which are held in a "secured" building.

3. By revising § 214.34(a)(2) and (b) to read as follows:

§ 214.34 Public participation.

(a) * * *

(2) The Administrator, AID, has formally determined that a meeting or portion of a meeting may be closed to the public in accordance with subsection (c) of section 552b of title 5, United States Code.

(b) Advisory Committee requests to close all or part of a meeting or a series of meetings are to include the reasons for proposed closure, citing specific exemptions involved under subsection (c) of section 552b of title 5, United States Code. Such requests are submitted by the AID Advisory Committee Representative, through the Advisory Committee Management Officer and the General Counsel to the Administrator at least forty (40) days before the scheduled date of the meeting.

Dated: May 10, 1977.

ROBERT H. NOOTER,
Acting Administrator.

Title 29—Labor

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2607—DISCLOSURE AND AMENDMENT OF RECORDS UNDER THE PRIVACY ACT

Clarification of Exemption

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: The Pension Benefit Guaranty Corporation ("PBGC") hereby amends its Privacy Act regulations to clarify an exemption invoked by PBGC from certain provisions of the Privacy Act. This action limits the exemption to records in the "Personnel Records—PBGC" record system. The intended effect is to limit the exemption to only those records to which the exemption is pertinent and to state more fully the reasons for exercising this exemption.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard J. Anderson, Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, NW., Washington, D.C. 20006, 202–254–4895.

SUPPLEMENTARY INFORMATION: On November 30, 1976, the Pension Benefit Guaranty Corporation (hereinafter PBGC) published for comment in the FEDERAL REGISTER, 41 FR 52485, a proposed revision of § 2607.10 of its Privacy Act regulation (29 CFR Part 2607). The purpose of the revision is to limit the exemption contained in section 552a(k)(5) of the Privacy Act only to the PBGC's "Personnel Records" system and to state more fully the reasons for exercising this exemption. The PBGC received no comments on the proposal and therefore is hereby promulgating the revision as proposed.

Therefore, in Part 2607 of Title 29, Code of Federal Regulations, § 2607.10 is hereby revised as follows:

§ 2607.10 Specific exemptions.

Under the authority granted by 5 U.S.C. 552a(k)(5), the PBGC hereby exempts the system of records entitled "Personnel Records—PBGC" from the provisions of 5 U.S.C. 552a (c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f), to the extent that the disclosure of such material would reveal the identity of a source who furnished information to PBGC under an express promise that the identity of the source would be held in confidence or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence.

The reasons for asserting this exemption are to insure the gaining of information essential to determining suitability for employment, to insure that full and candid disclosures are obtained in making such determinations, to prevent subjects of such determinations from thwarting the completion of such determinations, and to avoid revelation of the identities of persons who have furnished or will furnish information to PBGC in confidence.

(Sec. 552a(f), Pub. L. 93–579, 88 Stat. 1900 (5 U.S.C. 552a(f)); Sec. 4002(b)(3), Pub. L. 93–406, 88 Stat. 1004 (29 U.S.C. 1302(b)(3)).)

Issued in Washington, D.C., this 18th day of May 1977.

RAY MARSHALL,
Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

[FR Doc.77–14945 Filed 5–25–77;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER DD—IMPLEMENTATION AND INTERPRETATION OF THE 72 COLREGS

(CGD 77-075)

APPLICATION OF 72 COLREGS TO TERRITORIES AND POSSESSIONS

Special Note

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This amendment informs the public generally, and mariners in particular, of the localities where the International Regulations for Preventing Collisions at Sea, 1960 (60 COLREGS), and the Convention on the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS) are in force, including the territories to which the 72 COLREGS are extended. This information is needed by the public, and especially by mariners, since the 72 COLREGS will enter into force internationally on July 15, 1977.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: Because the 72 COLREGS (done at London, October 20, 1972, as rectified by Proces-Verbal of December 1, 1973) will enter into force internationally on July 15, 1977, this amendment to Subchapter DD contains information that the public, especially mariners, needs to know and be able to obtain in a convenient manner. The Coast Guard has determined that this information must appear in Subchapter DD with the implementation and interpretation of the 72 COLREGS. Since this information does not contain a rule, it is not subject to the rule making requirements of 5 U.S.C. 553, 72 COLREGS provides in Article III that a Contracting Party to the Convention may, by notification in writing to the Secretary-General of the Intergovernmental Maritime Consultative Organization, extend the application of the Convention to territories for which the Party is the administering authority. The United States and the United Kingdom have made such notifications as to certain territories, and other nations may make similar extensions in the future. In addition, because certain nations have accepted the 72 COLREGS, while other nations which have accepted the 60 COLREGS (16 UST 794, TIAS 5813) have not yet accepted 72 COLREGS, there may be some resulting confusion regarding which set of rules must be observed in a particular location.

The purpose of the informational note being added to Subchapter DD is to inform the public generally, and mariners in particular, of the localities where the 72 COLREGS are clearly in force, including the territories to which 72 COLREGS has been extended. As other nations become Parties to 72 COLREGS, or as other extensions of 72 COLREGS are announced by Parties as to territories administered by those Parties, the Coast Guard will update the note.

DRAFTING INFORMATION

The principal persons involved in drafting this document are: Captain Clarence R. Hallberg, Project Manager and Project Attorney, Office of Chief Counsel; assisted by LT Richard A. Legatski and Mr. Stanley M. Colby, Office of Chief Counsel.

In accordance with the preceding, Subchapter DD is amended by inserting a special note immediately after the title of the subchapter. As amended, Subchapter DD reads as follows:

Subchapter DD—Implementation and Interpretation of 72 COLREGS

SPECIAL NOTE: Application of the 72 COLREGS to territories and possessions.

a. Article III of the Convention on the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), done at London, October 20, 1972, as rectified by Proces-Verbal of December 1, 1973, provides that a party may notify the Secretary-General of the Intergovernmental Maritime Consultative Organization that it extends the application of the Convention to territory for which it is responsible for international relations. Since it is the intention of the United States that the 72 COLREGS apply to all U.S. territories and possessions to the same extent that the International Regulations for Preventing Collisions at Sea, 1960 (60 COLREGS) (16 UST 794, TIAS 5813) previously applied, the United States has given notice to the Secretary-General that the provisions of the 1972 COLREGS are applicable on July 15, 1977, to the following territories and possessions for which the United States is responsible for international relations:

Puerto Rico
Guam
The Canal Zone
The Virgin Islands of the United States
American Samoa
The Trust Territory of the Pacific Islands
Midway Island
Wake Island
Johnston Island
Palmyra Island
Kingman Reef
Howland Island
Baker Island
Jarvis Island
Navassa Island

b. In accordance with Article III, other parties to the Convention have notified the Secretary-General that application of 72 COLREGS is extended. These parties with their territorial extensions are listed in Table 1.

TABLE 1. TERRITORIAL EXTENSIONS OF OTHER PARTIES TO 72 COLREGS

Party to Convention	*Territories to which 72 COLREGS are Extended*
United Kingdom	Hong Kong.

Because earlier formulations of the COLREGS were not elaborated as treaties, they came into force by the almost simultaneous enactment of domestic legislation by the majority of maritime nations. The COLREGS were judicially considered as being customary international law, that is to say international law based upon the consensus of maritime nations rather than upon an express instrument. Because 72 COLREGS was elaborated as a treaty, and under usual treaty practice only parties are bound, there may be a period of time after the 72 COLREGS come into force during which the ships of a nation not party to 72 COLREGS might not be considered as being bound to comply with the convention. While it is most likely that the 72 COLREGS will rapidly achieve the status of customary international law, thereby obviating any concern on the part of the mariner as to whether a particular nation is a party, it does not necessarily follow that the courts in all nations will apply 72 COLREGS to the vessels of a non-party nation. In the absence of changes in their domestic law there may be certain nations that will feel compelled to continue 60 COLREGS in force, despite the coming into force of 72 COLREGS.

The following nations are Contracting Parties for which 72 COLREGS will apply upon the Convention's entry into force:

Algeria	Monaco
Bahamas	Netherlands
Belgium	New Zealand
Brazil	Nigeria
Bulgaria	Norway
Canada	Papua New Guinea
Denmark	Poland
Finland	Romania
France	South Africa
German Democratic Republic	Spain
	Sweden
Germany, Federal Republic	Switzerland
	Syrian Arab Republic
Ghana	
Greece	USSR
Hungary	United Kingdom
Iceland	United States
India	Yugiosavia
Liberia	Zaire
Mexico	

The following nations have accepted the 60 COLREGS but are not Contracting Parties to 72 COLREGS:

Argentina	Lebanon
Australia	Libyan Arab Republic
Austria	
Barbados	Madagascar
Burma	Maldives
China	Morocco
Cuba	Oman
Cyprus	Pakistan
Czechoslovakia	Paraguay
Ecuador	Peru
Egypt	Philippines
Fiji	Portugal
Gambia	Republic of Korea
Indonesia	Singapore
Ireland	Surinam
Israel	Tonga
Italy	Trinidad & Tobago
Ivory Coast	Tunisia
Jamaica	Turkey
Japan	United Republic of Cameroon
Kuwait	

(Convention on the International Regulations for Preventing Collisions at Sea, 1972 (as rectified); E.O. 11964 (42 FR 4327); 49 CFR 1.46(b).)

Dated: May 19, 1977.

O. W. SILER,
U.S. Coast Guard Commandant.

[FR Doc.77-15082 Filed 5-25-77;8:45 am]

[CGD 2-77-01-R]

PART 127—SECURITY ZONES

Establishment of Security Zone; Monongahela, Allegheny, and Ohio Rivers, Pittsburgh, Pa.

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment establishes the waters of the Monongahela River, the Allegheny River and the Ohio River in the vicinity of Pittsburgh, Pennsylvania as a security zone from 11:00 a.m. EDST, June 12, 1977, to 12:01 a.m. EDST, June 13, 1977. This security zone is created because several United Nations Ambassador's and United States government officials will be aboard passenger vessels within the area. This security zone is intended to be part of the comprehensive system of ensuring the safety of these persons.

EFFECTIVE DATE: This amendment is effective from 11:00 a.m. EDST, June 12, 1977 to 12:01 a.m. EDST, June 13, 1977.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Commander C. J. Robinson, Marine Safety Office, 312 Stanwix Street, Pittsburgh, Pennsylvania 15222 (412-644-5808).

SUPPLEMENTARY INFORMATION: This amendment is issued without publication of a notice of proposed rule making, because this security zone involves a foreign affairs function of the United States.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: LCDR C. J. Robinson, Project Manager, Captain of the Port, Pittsburgh, Pennsylvania, and LT S. Delaney, Project Attorney, Legal Officer, Commander, Second Coast Guard District, 1520 Market Street, St. Louis, MO 63103 (314-425-4655).

In consideration of the foregoing, Part 127 of Title 33 of the Code of Federal Regulations is amended by adding § 127.201 to read as follows:

§ 127.201 The Monongahela, Allegheny, and Ohio Rivers, Pittsburgh, Pennsylvania.

The waters and waterfront facilities within the following boundary is a security zone: mile 11.2 Monongahela River, not including Lock and Dam 2, to mile 0.0 Monongahela River at the confluence of the Ohio, Allegheny and Monongahela Rivers; mile 0.8 Allegheny River, located below Seventh Street Bridge, to mile 0.0 Allegheny River, at the confluence of the Ohio, Allegheny and Monongahela Rivers; and mile 0.0 Ohio River to mile 0.7 Ohio River, located below the West End Bridge.

(40 Stat. 220, as amended, (50 U.S.C. 191) sec. 6(b), 80 Stat. 937; (49 U.S.C. 1655(b)); E.O. 10173, E.O. 10277, E.O. 10352, E.O. 11249; 3 CFR, 1949-1953 Comp. 356, 778, 873, 3 CFR 1964-1965 Comp. 349, 33 CFR Part 6, 49 CFR 1.46(b).)

Dated: May 26, 1977.

CHARLES J. ROBINSON,
Lieutenant Commander, U.S. Coast Guard, Acting Captain of the Port, Pittsburgh, Pennsylvania.

[FR Doc.77-15081 Filed 5-25-77;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 734-7]

PART 52—APPROVAL AND PROMULGATION OF STATE IMPLEMENTATION PLANS

North Dakota Plan Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action approves revisions to the North Dakota State Implementation Plan which were submitted by the Governor of North Dakota on May 26, 1976, and proposed for approval by the Environmental Protection Agency (EPA) on October 19, 1976. The North Dakota submittal includes new and revised legislation and regulations which are approved because they are consistent with EPA regulations. EPA approval of the North Dakota regulations allows the State to assume the primary responsibility for carrying out the provisions of the regulations. One of the regulations EPA is approving provides for the prevention of significant air quality deterioration. Approval of this regulation not only allows the State to assume the responsibility for the review of new sources under this regulation, but also allows the State to propose to reclassify areas of the State.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Louis W. Johnson, Chief, Planning and Operations Section, Air Programs Branch, U.S. Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. 303-837-3711.

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10885), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved and promulgated the North Dakota State Implementation Plan (SIP). On September 26, 1974 (39 FR 34537), the Administrator disapproved a portion of the North Dakota SIP, as well as the SIP's of other states, because of circuit court rulings that confidentiality provisions could prevent the release of emission data to the public. On June 12, 1975 (40 FR 25009), the Administrator disapproved another portion of North Dakota's and other states' SIPs in that there were no procedures for preventing the significant deterioration of air quality as required by section 101(b)(1) of the Clean Air Act. Federal regulations § 52.21 (b), (c), (d), (e) and (f) were incorporated by reference and made a part of the North Dakota SIP.

The North Dakota SIP revisions include amendments to the North Dakota Century Code, revised new source review and permit to operate regulations (Regulation 23-25-14), new source performance standards (Regulation 23-25-12), emission standards for hazardous air pollutants (Regulation 23-25-13), and a prevention of significant air quality deterioration regulation (Regulation 23-25-15).

On October 19, 1976 (40 FR 46010), the Administrator proposed to approve the North Dakota SIP revisions and requested the public to comment on the approvability of the revisions. No comments regarding the revisions were received.

The requirements for public hearings and plan revisions (40 CFR 51.4 and 51.6) have been met by the State's proposed revisions, except that the revisions were not submitted within 60 days of adoption as required by 40 CFR 51.6(d). The intent of the 60-day limit has not been circumvented, however, and this requirement is waived.

The revisions to the North Dakota Century Code clarify the authorities and duties of the Department of Health and the Air Pollution Control Advisory Council. Penalties for violations were increased to be consistent with the Clean Air Act. The revisions also state explicitly that emission data shall not be considered as confidential information. The EPA disapprovals under 40 CFR 52.1825 and 52.1826 are therefore withdrawn.

The new source review revisions, Regulation 23-25-14, meet the requirements of 40 CFR 51.18 with the exception of subparagraph (h)(2)(i), which requires that the entire new source application be available for public inspection. The revision requires only that a summary be available. Supplemental information was submitted by the State Agency on August 23, 1976, which states that the entire application will be available for public inspection. The requirements of 40 CFR 51.18(h)(2)(i) are therefore met.

Regulations 23-25-12 and 23-25-13, for new source performance standards and hazardous air pollutants respectively, are consistent with the Federal regulations published under 40 CFR Parts 60 and 61.

Regulation 23-25-15, for prevention of significant air quality deterioration, is consistent with 40 CFR 52.21. The allowable increments for increases in air quality levels and the effective dates in the North Dakota regulation are identical to the Federal regulation. The North Dakota regulation covers additional source

categories, coal mines and electric arc furnaces, and provides for inclusion in the increment of the emissions expected from growth associated with a facility.

40 CFR 52.1829, promulgating the Federal prevention of significant air quality deterioration regulation for North Dakota, may now be partially revoked. The Federally promulgated prevention of significant deterioration regulation cannot be totally revoked since, consistent with § 52.21 (d) and (f), source reviews for new or modified sources which are owned or operated by the Federal Government or for new or modified sources located on Federal lands or Indian reservations must still be conducted by the EPA Regional Office. The State may conduct new source reviews of sources located on Indian reservations if it has assumed jurisdiction over such land under other laws. In accordance with 40 CFR 52.21(f)(3) the State in some cases may also review new or modified sources to be constructed or operated on Federal lands pursuant to leasing or other Federal agreements. In addition, this SIP revision will not affect the authority of Indian governing bodies to propose redesignation of their lands or of the Federal Land Managers to submit to the Administrator a proposal to redesignate any Federal lands to a more restrictive designation, provided the procedures contained in 40 CFR 52.21 are followed.

The primary purpose of this SIP revision is to authorize the State to conduct PSD new source reviews; however, the State regulations also address redesignation, although none is being proposed at this time. While the State's redesignation provisions generally correspond to the Federal regulations, some Federal procedural requirements are omitted from the State's regulation, such as consultation with affected Indian governing bodies, Federal Land Managers, local governments and submittal to EPA of the proposed redesignation for approval. The approval of this submittal does not relieve the State from the procedural requirements contained in 40 CFR 52.21(c) applicable to redesignation. Therefore, before any redesignation is effective for new source review purposes, the EPA must approve or disapprove the proposed redesignation and such agency action will be based upon the contained in § 52.21(c) and the Agency's guidelines which have been furnished to the State.

Therefore, EPA is partially revoking and modifying the North Dakota SIP, 40 CFR 52.1829, so as to: (1) Provide for preconstruction review by the Administrator of Federally owned or operated sources and sources located or to be located on Federal or Indian lands; (2) permit the State of North Dakota, Federal Land Managers and Indian governing bodies to propose redesignation in accordance with § 52.21(c); and (3) permit the State to conduct all other new source PSD reviews.

Since any redesignation must be approved by EPA, new source reviews must be at a minimum based on the Federally approved increments. The State may base its review on more stringent increments if a redesignation has been adopted by the State but not approved by EPA; however, such a review would not be Federally enforceable. If the State's redesignation resulted in less stringent increments, EPA would enforce the applicable increments of the approved SIP until the State's redesignation was approved.

The Administrator finds that the North Dakota SIP revisions meet the substantive and procedural requirements of section 110 of the Clean Air Act and 40 CFR Part 51. Therefore, the Administrator approves the North Dakota SIP revisions as set forth in this rulemaking.

This rulemaking will be effective immediately on May 26, 1977. The Agency finds that good cause exists for not deferring the effective date of this rulemaking because the regulations are already in effect under State and Federal law and Federal approval imposes no new burdens.

(Sec. 110, Clean Air Act, as amended (42 U.S.C. 1857c-5); sec. 301 as amended (42 U.S.C. 1857g).)

Dated: May 19, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart JJ—North Dakota

1. In § 52.1820, paragraphs (c)(6) and (c)(7) are added as follows:

§ 52.1820 Identification of plan.

* * * * *

(c) * * *

(6) Revisions to the North Dakota Century Code making emission data public information and revising penalties, revised new source performance standards, emission standards for hazardous air pollutants, and prevention of significant air quality deterioration regulations submitted on May 26, 1976, by the Governor.

(7) Supplemental information stating that the complete new source application would be available for public review submitted August 23, 1976 by the State Department of Health.

§ 52.1825 [Reserved]

2. Section 52.1825 is revoked.

§ 52.1826 [Reserved]

3. Section 52.1826 is revoked.

4. Section 52.1829 is revised to read as follows:

§ 52.1829 Significant deterioration of air quality.

The provisions of § 52.21 (b), (c), (d), (e), and (f) are hereby incorporated by reference and made a part of the applicable implementation plan for the State of North Dakota, but only for purposes of: (1) Providing for preconstruction review by the Administrator of Federally owned or operated stationary sources and stationary sources located on Federal or Indian lands; and, (2) permitting Federal Land Managers and Indian governing bodies to propose redesignation in accordance with the procedures in § 52.21(c).

SUBCHAPTER E—PESTICIDE PROGRAMS

[FRL 734-3; PP6F1828 and PP7F1889/R130]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Bentazon

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the herbicide bentazon on a variety of raw agricultural commodities. This amendment was requested by BASF Wyandotte Corp. This rule establishes permissible levels of bentazon residues on certain crops and also provides a definition for the term peanuts.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street, SW., Washington, D.C. 20460, 202-426-2632.

SUPPLEMENTARY INFORMATION: On August 24, 1976, and January 17, 1977, notice was given (41 FR 35758 and 42 FR 3191) that BASF Wyandotte Corp., Agricultural Chemicals Dept., 100 Cherry Hill Rd., Parsippany, NJ 07054, had filed pesticide petitions for pesticide tolerances with the EPA. These petitions proposed that 40 CFR 180.355 be amended by the establishment of tolerances for combined residues of the herbicide bentazon (3-isopropyl-1*H*-2,1,3-benzothiadiazin-4 (3*H*)-one-2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on the raw agricultural commodities peanuts (nutmeats after the removal of hulls) at 0.05 part per million (ppm), peanut hay at 3 ppm, peanut hulls at 0.3 ppm, corn grain and fresh corn (including sweet corn, kernels plus cob with husk removed) at 0.05 ppm, corn forage and fodder at 3 ppm, rice at 0.05 ppm, rice straw at 3 ppm, the hay of seed and pod vegetables (except soybeans) at 3 ppm, and soybean hay at 0.3 ppm (PP6F1828) and in or on the raw agricultural commodity group seed and pod vegetables (dry) at 0.05 ppm (PP7F1889). No comments were received in response to these notices of filing.

The data submitted in these petitions and other relevant material have been evaluated, and the pesticide is considered to be useful for the purpose for which the tolerances are sought. However, there are neither proposed uses nor residue studies for the raw agricultural commodities dill and okra, which are members of the commodity group seed and pod vegetables. Thus, for purposes of this rule, the category seed and pod vegetables (dry) is too inclusive and would allow the establishment of tolerances on crops that would not be supportable by the available data. Consequently, the category is changed to dried peas and dried beans (except soybeans). Similarly, the hay of seed and pod vegetables is changed to the vine hays of dried peas and dried beans (except soybeans). Also, since past tolerances on peanuts have been established on the meat of the peanut excluding the shell, the qualified "nutmeats after the removal of hulls" is unnecessary after the term "peanuts." (40 CFR 180.1 is herewith amended to include a definition for peanuts.)

The toxicology studies (both referenced and submitted) and their corresponding no-effect levels (NEL) evaluated in approving the proposed tolerances in both petitions consisted of a rat LD_{50} (lethal dose) study, a 90-day rat-feeding study (NEL 70 ppm), a 90-day dog-feeding study (NEL 300 ppm), a three-generation rat reproduction study (NEL greater than 180 ppm), ratteratogenicity study (NEL 66.7 mg/kg), a dominant lethal rate study (NEL greater than 180 ppm), a 2-year rat-feeding study (NEL 350 ppm), and an 18-month mouse-feeding study (NEL 350). The calculated maximum permissible intake (MPI) for man of bentazon based on long-term rat studies is 10.5 mg/day. The proposed uses in PPs 6FI828 and 7F1889 would result in a theoretical maximum exposure of 0.15% and less than 1% of this MPI, respectively.

An adequate analytical method (gas chromatography using a sulfur-specific flame photometric detector) is available to enforce the proposed tolerances. Tolerances have previously been established for residues of bentazon in or on soybeans; eggs; and the meat, fat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep at 0.05 ppm (negligible residue except for soybeans) and in milk at 0.02 ppm (negligible residue). The negligible residue designation has been removed from the existing tolerances because long-term studies are now available. The existing egg, meat, milk, and poultry tolerances are adequate to cover any residues resulting from the proposed uses as delineated in 40 CFR 180.6(a)(2).

It has been determined that these tolerances will protect the public health, and it is concluded, therefore, that the tolerances be established as set forth below.

Any person adversely affected by this regulation may, on or before June 27, 1977, file written objections with the Hearing Clerk, EPA, East Tower, Rm. 1019, 401 M St. SW, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and should specify both the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective May 26, 1977, 40 CFR 180.1 and 40 CFR 180.355 are amended as set forth below.

(Sec. 408(d)(2), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)).)

Dated: May 19, 1977.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

1. Part 180, Subpart A, § 180.1 is amended by adding the following new paragraph:

§ 180.1 Definitions and interpretations.

* * * * *

(j) * * *

9. The term peanuts means the peanut meat after removal of the hulls.

2. Part 180, Subpart C, § 180.355 is revised in its entirety by (1) editorially restructuring paragraphs (a) and (b) into alphabetized columnar listings, (2) alphabetically inserting tolerances of 3 ppm on corn fodder and forage, peanut hay, rice straw, and the vine hays of dried peas and dried beans (except soybeans); 0.3 ppm on peanut hulls and soybean hay, and 0.05 ppm on dried beans (except soybeans), corn grain, fresh corn, peanuts, peas (dried), and rice in paragraph (a), and (3) deleting the designation "negligible residue" from both paragraphs as follows:

§ 180.355 Bentazon; tolerances for residues.

(a) Tolerances are established for combined residues of the herbicide bentazon (3-isopropyl-1*H*-2,1,3-benzothiadiazin-4(3*H*)-1-2,2-dioxide) and its 6- and 8-hydroxy metabolites in or on raw agricultural commodities as follows:

Commodity:	Parts per million
Beans (except soybeans), dried	0.05
Beans (exc. soybeans), dried, vine hays	3
Corn, fodder	3
Corn, forage	3
Corn, grain	0.05
Corn, fresh (inc. sweet K+CWHR)	0.05
Peanuts	0.05
Peanuts, hay	3
Peanuts, hulls	0.3
Peas (dried)	0.05
Peas (dried), vine hays	3
Rice	0.05
Rice, straw	3
Soybeans	0.05
Soybeans, hay	0.3

(b) Tolerances are established for combined residues of bentazon (3-isopropyl-1-1*H*-2,1,3-benzothiadiazin-4(3*H*) - one-2,2-dioxide) and its metabolite 2-amino-*N*-isopropyl benzamide in raw agricultural commodities as follows:

Commodity:	Parts per million
Cattle, fat	0.05
Cattle, mbyp	0.05
Cattle, meat	0.05
Eggs	0.05
Goats, fat	0.05
Goats, mbyp	0.05
Goats, meat	0.05
Hogs, fat	0.05
Hogs, mbyp	0.05
Hogs, meat	0.05
Milk	0.02
Poultry, fat	0.05
Poultry, mbyp	0.05
Poultry, meat	0.05
Sheep, fat	0.05
Sheep, mbyp	0.05
Sheep, meat	0.05

SUBCHAPTER N—EFFLUENT GUIDELINES AND STANDARDS

[FRL 735-2]

PART 410—TEXTILE INDUSTRY POINT SOURCE CATEGORY

Pretreatment Standards for Existing Sources; Final Rulemaking

AGENCY: Environmental Protection Agency:

ACTION: Final rule.

SUMMARY: This action sets forth final pretreatment standards for existing sources in the following subcategories of the textile mills point source category: Wool scouring, wool finishing, dry processing, woven fabric finishing, knit fabric finishing, carpet mills and stock and yarn dyeing and finishing. The effect of the rule will be to set four general prohibitions for pollutants which create a fire or explosion hazard, which cause corrosive damage, which obstruct sewer flow or which upset treatment efficiency. After considering new industry data and reviewing the technical basis for specific pollutant limitations as proposed in 1974, EPA has concluded that the four general prohibitions are most appropriate.

EFFECTIVE DATE: June 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Harold B. Coughlin, Environmental Protection Agency, Effluent Guidelines Division, 401 M Street, SW., Room 911 WSME—(WH-552), Washington, D.C. 20460, Telephone number 202-426-2560.

SUPPLEMENTARY INFORMATION: On July 5, 1974, EPA promulgated a regulation adding Part 410 to Title 40 of the Code of Federal Regulations (39 FR 24736). That regulation with a subsequent correction established effluent limitations and guidelines for existing sources and standards of performance and pretreatment standards for new sources and proposed pretreatment standards for existing sources in the textile mills point source category. Pursuant to section 307(b) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1317(b)) (the Act), the regulation set forth below will amend 40 CFR Part 410 textile mills point source category by adding § 410.14 of the wool scouring subcategory (Subpart A); § 410.24 of the wool finishing subcategory (Subpart B), § 410.34 of the dry processing subcategory (Subpart C), § 410.44 of the woven fabric finishing subcategory

(Subpart D), § 410.54 of the knit fabric finishing subcategory (Subpart E), § 410.64 of the carpet mills subcategory (Subpart F) and § 410.74 of the stock and yarn dyeing and finishing subcategory (Subpart G).

The Technical Basis of Pretreatment Standards for Existing Sources

The regulation set forth below establishes pretreatment standards for pollutants introduced to publicly owned treatment works (POTW) from existing sources within the subparts set forth above. This regulation is intended to implement the concepts of the general regulation for pretreatment standards for existing sources set forth in 40 CFR Part 128. This general regulation was published in final form on November 8, 1973 (38 FR 30982).

The general pretreatment regulation (40 CFR Part 128) described above and its application to effluent limitations and standards has sometimes caused confusion. In order to correct any lack of clarity, 40 CFR Part 128 is set aside for existing sources within the subparts set forth in paragraph (a) above. In its place, the specific pretreatment standards applicable to each subcategory are set forth in detail below as the pretreatment standard for that subcategory. This mechanism will eliminate any possible confusion as to the materials which are limited or controlled by the pretreatment standard for each subcategory. This decision is also warranted because new general pretreatment regulations have been proposed (42 FR 6476 et seq., Feb. 2, 1977), which will revoke and replace 40 CFR Part 128 upon promulgation. When the general pretreatment regulations are promulgated, these standards will be reviewed for consistency with the general policy stated therein.

A supplemental technical study was made to determine the levels of pretreatment requirements which are appropriate considering the limitations established for direct dischargers under sections 301 and 304 and the requirements of section 307(b). The findings of this study and technical rationale for the establishment of pretreatment standards are summarized in Appendix A to this preamble. Since some municipalities might have a problem with treatment of a textile discharge, Appendix A also contains alternative treatment technology information as a guide to municipalities in exercising their prerogative to control specific substances.

The report entitled "Supplement for Pretreatment to the Development Document for the Textile Mills Point Source Category" details the additional technical analysis undertaken in support of the final regulation set forth herein and is available for inspection at the EPA Publice Information Reference Unit, Room 2922 (EPA Library), Waterside Mall, 401 M Street SW., Washington, D.C. 20460, at all EPA Regional offices and at State water pollution control offices. A supplementary analysis prepared for EPA of the possible economic effects of the regulation is also available for inspection at these locations. An additional limited number of copies of these reports are available. Persons wishing to obtain a copy may write the Environmental Protection Agency, Effluent Guidelines Division, Washington, D.C. 20460, Attention: Distribution Officer, WH-552. Copies of the technical documentation will also be available from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Copies of the economic analysis document will be available through the National Technical Information Service, Springfield, Va. 22151.

Did the Public Comment?

Prior to this publication, many agencies and interest groups were consulted and given an opportunity to participate in the development of these standards. Immediately prior to this rulemaking the results of this study were circulated for comment to persons known to be interested. A summary of public participation in this rulemaking, public comments and the Agency's response is contained in Appendix B to this preamble.

What Is The Economic and Inflationary Impact?

The economic impact is expected to be minimal for all subcategories in this industry and no price increases are anticipated as a result of the regulations. No plant closures or production curtailments will occur. In the event that all affected municipalities exercise their prerogative to impose the entire complement of optional pretreatment technologies for about 2000 plants in the subcategories, the wool dyeing and finishing subcategory would be heavily impacted. New plants in this category are not financially feasible even without pollution control requirements. The older, medium-sized plants in the woven fabric dyeing and finishing subcategory and existing small plants in the stock and yarn dyeing and finishing subcategory could face closure if they were forced to absorb the pollution control costs of all of the optional pretreatment technologies. However, they could absorb some fraction of the cost. The economic impact is discussed in greater detail in Appendix A.

Compliance Date

Compliance with the prohibited discharge standards is required immediately upon the effective date of these regulations since these standards are essentially the same as 40 CFR 128.131 and since the deadline for compliance with 40 CFR 128.131 has passed.

The Agency is subject to an order of the United States District Court for the District of Columbia entered in *Natural Resources Defense Council* v. *Train* (Civ. No. 2153-73, 75-0172, 75-1698 and 75-1267) which required the promulgation of pretreatment standards for this industry category no later than May 15, 1977.

In consideration of the foregoing, 40 CFR Part 410 is hereby amended as set forth below and shall become effective on June 30, 1977.

Dated: May 18, 1977.

Douglas M. Costle,
Administrator.

Appendix A—Technical Summary and Basis for Regulations

This Appendix summarizes the basis of final pretreatment standards for existing sources in the textile mills point source category.

(1) *General methodology.* The pretreatment standards set forth herein were developed in the following manner. The point source, flow and volume of water used in the pose of determining whether separate standards are appropriate for different segments within the category. The raw waste characteristics for each such segment were then identified. This included an analysis of the source, flow and volume of water used in the process employed, the sources of waste and waste waters in the operation and the constituents of all waste water. The principal basis used in developing the pretreatment standards for this industry is analogous to the technology based derivations used in developing the regulations for the direct dischargers. In this regard, the treatment technology employed by direct dischargers is the same as that utilized by POTW to achieve secondary treatment requirements, i.e., primary treatment plus secondary biological treatment. Another integral part of the basis for these standards is the identification of pollutants which either upset or pass through POTW.

The control and treatment technologies were established within each segment. This included an identification of each distinct control and treatment technology, including both in-plant and end-of-process technologies, which is existent or capable of being designed for each segment. It also included an identification of, in terms of the amount of constituents and the chemical, physical, and biological characteristics of pollutants, the effluent level resulting from the application of each of the technologies. The problems, limitations, and reliability of each treatment and control technology were also specified. In addition, the nonwater quality environmental impact, such as the effects of the application of such technologies upon other pollution problems, including air, solid waste, noise, and radiation were discussed. The energy requirements of each control and treatment technology were determined as well as the cost of the application of such technologies.

This information was then evaluated to determine what levels of technology reflected the application of appropriate pretreatment technologies. To help select these technologies, various factors were considered. These included the total cost of application of technology, the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, nonwater quality environmental impact (including energy requirements) and other factors.

The data base for the above analysis included EPA permit applications, EPA sampling and inspection reports, consultant reports, and industry submissions.

(2) *Summary of conclusions with respect to the textile mill point source category.*—(i) *Categorization.* For the purpose of establishing pretreatment standards, factors such as types of raw materials, manufacturing processes and final products, age, size, and location of plants, waste water volume, pollutant content, and treatability by typical

POTW including secondary treatment technology, were all considered as potential bases for subcategorizing the textile industry. The principal factors which contributed most to subcategorization were raw material type, final product, manufacturing process and waste water character. Subcategorization by these principal factors was substantiated by assessment of other factors such as relative wasteload and hydraulic contributions to POTW, type of secondary treatment at a POTW (e.g.—trickling filter, activated sludge, etc.), and influent pollutant concentrations.

(ii) *Waste characteristics.* For all seven subcategories, the known significant waste water pollutants and pollutant properties include flow, pH, total suspended solids (TSS), BOD5, COD, oil and grease, total chromium, phenol and sulfide.

(iii) *Treatment and control technology.*—(a) *Rationale for Pretreatment Standards.* Waste water treatment and control technologies have been studied for this industry to determine what is the appropriate pretreatment technology.

The following discussions of treatment technologies outline the bases for the pretreatment standards. These discussions do not preclude the selection by individual municipalities with different circumstances of other waste water treatment alternatives which provide equivalent or better levels of treatment.

Performance data for POTW treating textile waste water indicate that where treatment systems are properly designed to handle this specific waste water, pollutants of concern (i.e., BOD5, COD, TSS, and oil and grease) are removed to consistently low concentrations, and therefore do not pass through a POTW inadequately treated. Where POTW are not meeting their NPDES permits, there are contributing problems, such as hydraulic overloading (related to increased residential or commercial development), POTW operational problems, or very stringent water quality constraints. The pollutants proposed (existing sources) and promulgated (new sources) for pretreatment, COD, chromium, phenol, sulfide, wool scouring oil and grease, have not been reported to cause upsets of POTW.

The removal of wool scouring oil and grease was studied at nine locations. Five of these plants which discharge to POTW reported widely varying levels of oil and grease both within and between plants. Nevertheless, there is no indication of a problem either at the POTW or in the collection system. This is probably due to their low percent participation in the POTW. Also, this oil and grease is from animal origin rather than the more resistent petroleum base. Four other plants treat or pretreat wastes in biological systems. One of these plants reported oil and grease concentrations of about 1500 mg/l after centrifugation prior to biological treatment. After approximately 30 hours aeration, the effluent oil and grease was reduced to about 50 mg/l. The available wool scouring data suggest that high raw waste loads are experienced but that properly designed and operated POTW can treat this waste water satisfactorily. Therefore, a wool scouring oil and grease pretreatment standard is not required at this time.

The raw waste concentrations of chromium, phenol and sulfide were also investigated. Total chromium values from 47 plants in the industry indicated an average raw waste concentration of 0.14 mg/l with a minimum of 1 mg/l. A lack of hexavalent chromium data exists and the following summarizes this data: one plant reported 0.15 mg/l hexavalent out of 0.20 mg/l total chromium; two plants report a maximum of 0.05 mg/l hexavalent chromium compared to a total chromium maximum of 0.28 mg/l; and two other mills report no hexavalent chromium out of a maximum of 0.02 mg/l total chromium. In summary, where hexavalent chromium is present it should only occur at very low concentrations. Phenol values from thirty-five plants averaged 0.17 mg/l, 1 mg/l maximum and sulfide values from seventeen plants averaged 0.59/1, 7 mg/l maximum. Therefore, at the low levels of chromium, phenol and sulfide reported in this industry, these pollutants are compatible with POTW biological treatment.

(b) *Suggested guidance for affected municipalities.* The Agency has concluded that pretreatment regulations which include substantive limitations for specific pollutants on a national basis are not required. However, it must be recognized that the waste water from textile dyeing and finishing plants can create or contribute to at least the following POTW problems: coarse suspended solids which clog pumps, foul bearings and aerators or float in basins; excessive fluctuations of hydraulic or organic loadings; and highly alkaline or acidic discharges. Each of these problems can be largely controlled by careful design and diligent operation of a POTW. Mitigating and site specific circumstances can dictate the need for pretreatment.

Screens such as hydrosieves or vibrating screens are available to capture essentially all of the coarse suspended solids. A combination of coarse and fine screening may be necessary to remove rags and yarn along with individual fibers, lint and flock. While POTW can remove individual fibers, clumps of fibers, rags and large coarse solids should be removed to avoid their interference with the operation of the POTW.

Equalization can even out excessive hydraulic or organic loadings. Lack of equalized hydraulic or organic loading can degrade a normally adequate acclimated biological population in biological treatment or cause complete wash out of trickling filters or clarified sludge blankets.

Extreme pH values or widely fluctuating pH can seriously upset the operation and function of POTW. Control of pH can be accomplished by the addition of lime, caustic soda or other alkali; addition of sulfuric acid or carbon dioxide; mixing of high and low pH streams, passage over limestone beds; or injecting waste flue gas.

Recently revised general guidelines have been made available, per Federal Register notice (42 FR 838) dated January 4, 1977, for use by municipalities in the establishment of pretreatment regulations where local circumstances warrant. It is intended that this preamble and the supplementary development document should provide general assistance to municipalities in identifying problems and potential solutions along with associated costs. Specific on-site engineering and cost evaluation should still be made by municipal engineers or their consultants to more fully evaluate all local circumstances which may allow a unique and cost effective solution to problems which are identified.

(iv) *Cost estimates for control of waste water pollutants.* Cost information was obtained directly from industry, engineering firms, equipment suppliers, government sources and available literature. Costs are based on actual industry installations or engineering estimates for projected facilities as supplied by contributing companies. In the absence of such information, cost estimates have been developed from either plant-supplied costs for similar waste treatment installations at plants making similar products or general cost estimates for treatment technology.

(v) *Energy requirements and nonwater quality environmental impacts.* There are no major nonwater quality considerations associated with screening, equalization or neutralization pretreatment technologies. There are solid waste and energy considerations associated with biological treatment and chemical coagulation alternatives.

(vii) *Economic impact analysis.* This section summarizes the economic and inflationary impacts of the pretreatment standards for the textile mills point source category.

(a) *Inflationary Impact.* Executive Order 11821 (November 27, 1974) requires that major proposals for legislation and promulgation of regulations and rules by Agencies of the executive branch be accompanied by a statement certifying that the inflationary impact of the proposal has been evaluated. The Administrator has directed that all regulatory actions which are likely to exceed any of the following four criteria will require certification.

1. Additional national annualized costs of compliance, including capital charges (interest and depreciation), will total $100 million within any calendar year by the attainment date, if applicable, or within five years of implementation.

2. Total additional cost of production of any major product is more than 5 percent of the selling price of the product.

3. Net national energy consumption will be increased by the equivalent of 25,000 barrels of oil a day (equal to 50 trillion BTU per year or 5 billion kilowatt-hours per year).

4. Additional annual demands are created or annual supply is decreased by more than 3 percent for any of the following materials by the attainment date, if applicable, or within five years of implementation: slate steel, tubular steel, stainless steel, scrap steel, aluminum, copper, manganese, magnesium, zinc, ethylene, ethylene glycol, liquified petroleum gases, ammonia, urea, plastics, synthetic rubber, or pulp.

No significant capital cost is anticipated. However, in the unlikely event that all affected municipalities exercise their prerogative to impose all of the optional pretreatment technologies, assuming that none of the plants have any treatment in place, total investment cost for this industry is estimated to be as high as $440 million, while total annual costs are estimated to be $154 million. These costs are in first quarter 1976 dollars. Total annual costs are equal to operation and maintenance cost plus a capital cost based on a fifteen (15) year depreciation and an approximate nine (9) percent interest rate. This is based upon the document entitled "Economic Impact of Pretreatment Standards for the Textile Industry".

As can be seen above, the potential total national annualized costs of compliance for the pretreatment standards could be above $100 million per year. The increase in cost of production is less than 5 percent of the selling price. Energy consumption may be increased by a nominal amount and the projected increase in demand or decrease in supply for any of the above materials is nominal. Because of the potential that total national annualized cost of compliance could be above $100 million, the Agency certifies that the inflationary impact has been considered in formulating these regulations and has prepared an inflationary impact statement contained in the report, "Economic Impact Pretreatment Standards for the Textile Industry".

(b) *Economic Impact Analysis.* The Agency has considered the economic impact of the internal and external costs of the effluent limitations guidelines. Internal costs are defined as investment and annual cost, where annual cost is composed of operating costs, maintenance costs, the cost of capital and

depreciation. External cost deals with the assessment of the economic impact of the internal costs in terms of price increases, production curtailments, plant closures, resultant unemployment, community and regional impacts, international trade, and industry growth.

In order to determine what possible impact could result if municipalities required any of the optional pretreatment technologies, an incremental cost analysis was performed. For each model plant developed, an impact analysis was completed using an incremental capital cost approach with capital costs ranging from $25,000 to $300,000, each increment being $25,000. For each textile model plant, an analysis was completed for each of the following impact indicators: required price increase; after tax income; after tax return on sales; after tax return on invested capital.

A separate report on the economic analysis indicates the range of impacts to be expected for each model developed. Plant closures and production curtailments for each industry subcategory are discussed as follows.

1. *Wool Scouring.* No plant closures are expected in this industry subcategory and the economic impact will be minimal. Existing medium size plants could be impacted if investment costs were to run above $200,000 but not to a point where they still would not be profitable to operate. Pollution control costs do not prevent new plants from entering the market.

2. *Wool Dyeing and Finishing.* According to the impact analysis, any required investment in pollution control will result in a plant closure. The plants that are presently operating are marginal at best, with after tax return on sales in the 1 percent range. New plants in this subcategory are not financially feasible even before pollution control costs are included in the cost.

3. *Woven Fabric Dyeing and Finishing.* With the exception of older, medium-size existing plants, no impact is expected for this subcategory. In the case of the older medium size model, such plants are well established in the industry and have a lower cost of debt capital, and it is not expected that they will cease operation. However, their after-tax returns are not very high and even a moderate investment in pollution control equipment could result in plant closures for the sixteen plants in this subcategory. Much of the uncertainty here rests with the outcome of international trade agreements presently under negotiation.

4. *Knit Fabric Dyeing and Finishing.* No impacts are expected in this subcategory.

5. *Carpet Manufacture Dyeing and Finishing.* No impacts are expected in this subcategory.

6. *Stock and Yarn Dyeing and Finishing.* The only impact that would be felt in this subcategory would be on the existing small plants. Pollution investment costs above $150,000 could impact a plant but not to a point where they would still not be profitable to operate. Market conditions in terms of demand would be the determining factor as to whether or not the plant would close.

The impact of these regulations is expected to be minimal for the textile industry and little or no price increase is projected. No production curtailment from plant closures is projected and there will be a negligible effect on profitability on plants which are indirect dischargers. Based upon this analysis the effects on employment industry growth and international trade are expected to be minimal.

In enforcing optional pretreatment requirements municipalities must be careful to assess the economic impact of any such controls on the wool dyeing and finishing subcategory. In addition careful attention must be given to the older plants in the woven fabric dyeing and finishing subcategory and the small plants in the stock and yarn dyeing and finishing subcategory.

APPENDIX B—SUMMARY OF PUBLIC PARTICIPATION

Prior to this publication, copies of the draft document were sent to the industry trade association, Federal agencies, state, local, and territorial pollution control agencies. In addition, copies were sent to many textile mills which discharge to a POTW. Each of these parties was given an opportunity to participate in the development of pretreatment standards by submitting written comments. In addition, a public meeting was held on February 2, 1977, at EPA headquarters in Washington, D.C. at which interested parties were invited to express their views. Public comments were also solicited when pretreatment standards for these segments were proposed in the FEDERAL REGISTER on July 5, 1974.

The following responded with comments: American Textile Manufacturers Institute; Northern Textile Association; Carpet and Rug Institute; State of South Carolina; State of Georgia; Kleinschmidt and Dutting; and Camp, Dresser and McKee.

The primary issues raised by commenters during the development of the pretreatment regulations for the textile industry are as follows:

1. Several commenters indicated there is no justification for national pretreatment standards. Occurrence of problems associated with the presence of textile waste waters in sewer collection systems and at POTW is neither consistent nor universal. Further, local ordinances include provisions with authority to control these problems.

The Agency has reviewed all available industry and POTW data and information in light of these comments and has concluded that problems attributable to textile waste waters are not consistent or nationwide in scope. One reason for this is that textile wastes are diluted in public collection systems. Another reason is that some POTW are specifically designed and/or operated to receive and treat textile waste waters. Also, certain textile manufacturing processes produce waste waters that are easier to treat than others. There are many combinations of variables which must be considered in comparing POTW. Sometimes it is difficult to explain why some POTW have success while others fail under seemingly similar circumstances. The preamble to the regulation and the development document are intended to provide general assistance to municipalities and their consultants in the identification of problems and potential solutions. In summary, the Agency has determined that specific pollutant national pretreatment standards are not appropriate for the textile industry. The Agency has determined that four general prohibitions which prohibit pollutants which create a fire or explosion hazard, which cause corrosive damage, which obstruct sewer flow or which upset treatment efficiency are most appropriate for POTW and the textile industry.

2. A number of comments address treatment costs. Most indicated that treatment costs in the North should be higher than the South and that costs should be higher for urban locations than for rural ones. The costs for energy were also considered too low.

The Agency has reviewed the treatment design criteria and the capital and annual costs and has found that Agency costs are applicable to the North, the South, urban and local situations. There will obviously be instances where costs are higher or lower than those estimated in the Development Document but the Agency costs are typical pretreatment costs for average textile mills in urban and rural locations. Particular attention has been given to screening, equalization and neutralization and these costs appear to be particularly reasonable. One commenter indicated that the size of equalization was much larger than typically needed. Thus, the Agency's costs for this technology have been overestimated. In summary, the Agency's pretreatment costs are reasonable for estimating economic impacts of treatment technology on the industry.

The Agency has also reviewed the energy cost data submitted with comments. The agency recognizes that some electricity rates are significantly higher than the 1.5 cents per kilowatt-hour used. However, the Agency costs are incremental increased costs due to new pretreatment technology. This added technology will utilize energy at an incremental cost less than the area's average industrial energy cost. These energy costs are near or below the Agency's estimate. Thus, the Agency's energy usage estimate is reasonable.

3. The comment was made that pretreatment standards were needed for hexavalent chromium and wool scouring oil and grease.

The Agency reviewed its data base for chromium and for wool scouring oil and grease. Additional data were collected for hexavalent chromium and for wool scouring oil and grease.

A lack of hexavalent chromium data exists. Data from five plants were located and these data showed low contributions of hexavalent chromium in total chromium analyses. In only one case was a low level of total chromium mostly in the hexavalent form. Because of the lack of information and the low levels of total chromium reported (maximum 1 mg/l), no concentration limit is appropriate at this time. However, the Agency is presently reconsidering 1983 limitations and will specifically investigate hexavalent chromium.

With regard to wool scouring oil and grease, information was available from nine plants. Five of these plants which discharge to POTW reported widely varying levels of oil and grease both within and between plants. Nevertheless, there is no indication of a problem either at the POTW or in the collection system. This is probably due to their low percent participation in the POTW. Also, this oil and grease is from animal origin rather than the more resistent petroleum base. Four other plants treat or pretreat wastes in biological systems. One plant reported oil and grease concentrations of about 1500 mg/l after centrifugation prior to biological treatment. After approximately 30 hours aeration, the effluent oil and grease was reduced to about 50 mg/l. The available wool scouring data suggest that high raw waste loads are experienced but that properly designed and operated POTW can treat this waste water satisfactorily. Therefore, a wool scouring oil and grease pretreatment standard is not required at this time.

§ 410.10 [Amended]

1. Section 410.10 is amended by inserting the phrases "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

2. Subpart A is amended by adding § 410.14 as follows:

§ 410.14 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under Section 307(b) of the Act for a source within the wool scouring subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the wool scouring subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.20 [Amended]

3. Section 410.20 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

4. Subpart B is amended by adding § 410.24 as follows:

§ 410.24 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under Section 307(b) of the Act for a source within the wool finishing subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the wool finishing subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.30 [Amended]

5. Section 410.30 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

6. Subpart C is amended by adding § 410.34 as follows:

§ 410.34 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under section 307(b) of the Act for a source within the dry processing subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the dry processing subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.40 [Amended]

7. Section 410.40 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

8. Subpart D is amended by adding § 410.44 as follows:

§ 410.44 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under section 307(b) of the Act for a source within the woven fabric finishing subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the woven fabric finishing subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.50 [Amended]

9. Section 410.50 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

10. Subpart E is amended by adding § 410.54 as follows:

§ 410.54 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under section 307(b) of the Act for a source within the knit fabric finishing subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the knit fabric finishing subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.60 [Amended]

12. Section 410.60 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

13. Subpart F is amended by adding § 410.64 as follows:

§ 410.64 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under section 307 (b) of the Act for a source within the carpet mills subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the carpet mills subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

§ 410.70 [Amended]

14. Section 410.70 is amended by inserting the phrase "and to the introduction of pollutants into treatment works which are publicly owned" after the word "discharges."

15. Subpart G is amended by adding § 410.74 as follows:

§ 410.74 Pretreatment standards for existing sources.

For the purpose of establishing pretreatment standards under Section 307 (b) of the Act for a source within the stock and yarn dyeing and finishing subcategory, the provisions of 40 CFR Part 128 shall not apply. The pretreatment standards for an existing source within the stock and yarn dyeing and finishing subcategory are set forth below.

(a) No pollutant (or pollutant property) introduced into a publicly owned treatment works shall interfere with the operation or performance of the works. Specifically, the following wastes shall not be introduced into the publicly owned treatment works:

(1) Pollutants which create a fire or explosion hazard in the publicly owned treatment works.

(2) Pollutants which will cause corrosive structural damage to treatment works, but in no case pollutants with a pH lower than 5.0, unless the works is designed to accommodate such pollutants.

(3) Solid or viscous pollutants in amounts which would cause obstruction to the flow in sewers, or other interference with the proper operation of the publicly owned treatment works.

(4) Pollutants at either a hydraulic flow rate or pollutant flow rate which is excessive over relatively short time periods so that there is a treatment process upset and subsequent loss of treatment efficiency.

(b) Any owner or operator of any source to which the pretreatment standards required by paragraph (a) of this section are applicable, shall be in compliance with such standards upon the effective date of that subsection.

Title 41—Public Contracts and Property Management

CHAPTER 8—VETERANS ADMINISTRATION

PART 8-74—SPECIAL PROCUREMENT CONTROLS

PART 8-75—DELEGATIONS OF AUTHORITY

Miscellaneous Amendments

AGENCY: Veterans Administration.

ACTION: Final regulation.

SUMMARY: These parts are revised to make technical changes to reflect organizational changes, to revoke obsolete material, and to limit the purchasing authority of cemetery superintendents.

EFFECTIVE DATE: May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Clyde C. Cook, Director, Supply Service, Veterans Administration, Washington, D.C. 20420 (202-389-3808).

SUPPLEMENTARY INFORMATION: Section 8-74.113 is revised to reflect organizational changes. Section 8-75.201-1 is revised to provide the heads of all departments and staff offices with equivalent standby authority to procure professional services. Section 8-75.201-9 concerning authority to amend contracts for drugs and chemicals is revoked as unnecessary as a separate, specific delegation. Section 8-75.201-11 concerning registration with the Drug Enforcement Administration is revoked as inappropriate to Part 8-75. Sections 8-75.201-12 and 8-75.201-13 are revised to make the technical correction of including hospital-regional office centers. Section 8-75.201-14 is revoked to reflect the transfer to the Food and Drug Administration of the drug quality assurance program formerly conducted by the Marketing Center. Section 8-75.201-16 is revised to limit the purchasing authority of cemetery superintendents to emergency purchases of less than $300.

Since the proposed changes consist of statements of VA organization and practices, compliance with the provisions of 38 CFR 1.12 relating to regulatory development is considered unnecessary.

NOTE.—The Veterans Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular No. A-107.

Approved: May 20, 1977.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

1. In § 8-74.113, paragraphs (b) and (c) (1) are revised to read as follows:

§ 8-74.113 Telecommunications equipment.

* * * * *

(b) The descriptive literature to be furnished by the contractor after award, required by the clause in § 8-7.150-18, is to be reviewed and approved by the Telecommunications Service, Department of Data Management, prior to delivery and/or installation by the contractor. Promptly upon receipt of the descriptive literature, contracting officers will forward it together with a copy of the contract, the formal specification, or the detailed purchase description to the Associate Deputy Chief Medical Director for Operations (134).

(c) Solicitations, including those for construction, for telecommunications equipment based on "brand name or equal" purchase description (see FPR 1-1.307-4 to 1-1.307-9 inclusive) are subject to the following:

(1) Prior to award, contracting officers will forward to the Associate Deputy Chief Medical Director for Operations (134) the abstract of bids, one copy of each offer received, including descriptive literature and pertinent letters, and the comments and recommendations of the contracting officer.

* * * * *

2. Section 8-75.201-1 is revised to read as follows:

§ 8-75.201-1 Professional services.

The Chief Benefits Director, Chief Data Management Director, Chief Medical Director, and the Director, National Cemetery System, are delegated authority to execute, award and administer contracts for the acquisition of those professional services, except architect-engineer, that are authorized by FPR 1-3.204. This authority is for use only in those cases where for cogent reasons the use of the servicing supply organization is not appropriate. When the authority is used, care must be taken to ensure that all provisions of FPR (41 CFR Ch. 1) and VAPR (41 CFR Ch. 8) are complied with. In that connection special emphasis is placed on the VAPR provisions regarding legal review.

§ 8-75.201-9 [Revoked]

3. Section 8-75.201-9 is revoked.

§ 8-75.201-11 [Revoked]

4. Section 8-75.201-11 is revoked.

5. In § 8-75.201-12, paragraph (a) is revised to read as follows:

§ 8-75.201-12 Loan guaranty program.

(a) The authority to execute, award, and administer contracts, purchase orders, and other agreements for the expenditure of funds for supplies or services for the maintenance, protection, repair, rehabilitation, enlargement, completion, conversion, or demolition of properties acquired under chapter 37, title 38, United States Code, is delegated to:

(1) Chief Benefits Director.
(2) Director, Loan Guaranty Service.
(3) Director, Regional Office.
(4) Director, VA Center with Department of Veterans Benefits activities.
(5) Loan Guaranty Officer.
(6) Assistant Loan Guaranty Officer.

* * * * *

6. In § 8-75.201-13, paragraph (a) is revised to read as follows:

§ 8-75.201-13 Education and rehabilitation program.

(a) Except as stated in this section, the authority to negotiate, award, and administer contracts, purchase orders, and other agreements for the expenditure of funds for the vocational rehabilitation program is delegated to:

(1) Chief Benefits Director.
(2) Director, Education and Rehabilitation Service.
(3) Director, Regional Office.
(4) Director, VA Center with Department of Veterans Benefits activities.

* * * * *

§ 8-75.201-14 [Revoked]

7. Section 8-75.201-14 is revoked.

8. In § 8-75.201-16, paragraph (c) is revised and paragraph (d) is added so that the revised and added material reads as follows:

§ 8-75.201-16 National Cemetery System.

Authority for the National Cemetery System to procure supplies, equipment and nonpersonal services is delegated as follows:

* * * * *

(c) Authority to procure, in emergency situations when the servicing supply organization cannot be utilized and in accordance with the provisions of FPR 1-3.6, supplies, equipment, and nonpersonal services (including construction) required for the operation of National Cemeteries is delegated to:

(1) Director and Deputy Director, National Cemetery System.

(2) Director and Deputy Director, National Cemetery Supervising Office.

(d) Authority to procure items and nonpersonal services up to $300 per transaction for the operation of National Cemeteries is delegated to Cemetery Superintendents. The authority is to be used only in emergency situations when the servicing supply organization cannot be utilized, and the method of purchase is limited to the use of SF 44 as provided in FPR 1-3.605-1.

[FR Doc.77-15031 Filed 5-25-77;8:45 am]

Title 46—Shipping

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77-011]

PART 10—LICENSING OF OFFICERS AND MOTORBOAT OPERATORS AND REGISTRATION OF STAFF OFFICERS

Military Service Exclusion From Licensing Requirements for Recency of Service

AGENCY: Coast Guard, Department of Transportation.

ACTION: Final Rule.

SUMMARY: This amendment revises experience requirements for an original or raise of grade of licenses for officers of uninspected vessels in order to bring the requirements in line with those for other officer licenses.

EFFECTIVE DATE: This amendment is effective on May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590 (202-426-1477).

SUPPLEMENTARY INFORMATION: Since this amendment merely brings the requirements in line with existing requirements for other licenses, it is exempted from notice of proposed rule making and public procedure thereon by 5 U.S.C. 553(b), and it may be made effective in less than 30 days after publication in the FEDERAL REGISTER because 5 U.S.C. 553(d) does not apply. The principal persons involved in drafting this proposal are: Lieutenant Commander James Norman, Project Manager, and Lieutenant Edward J. Gill, Jr., Project Attorney.

DISCUSSION OF AMENDMENT

The existing experience requirement for an original or raise of grade of licenses for officers of uninspected vessels does not provide for service in the armed forces of the United States to be excluded from the recency of service requirement. Existing requirements for all other deck and engineer officers' licenses provide for the exclusion. It is the Coast Guard's policy that military service be excluded from the recency of service requirement for an original or raise in grade of license of all officers.

Accordingly, Part 10 of Title 46 of the Code of Federal Regulations is amended as follows:

1. By revising § 10.15-25(d) to read:

§ 10.15-25 Application and experience required for original or raise of grade.

* * * * *

(d) No original license or raise of grade shall be issued to any applicant unless at least one year of his qualifying service shall have been obtained within the three years next preceding his application for examination. Service in the armed forces of the United States shall not be counted in computing the three years.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 557]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period May 27–June 2, 1977. This regulation is needed to provide for orderly marketing of fresh Valencia oranges for the regulation period because of the production and marketing situation confronting the orange industry.

EFFECTIVE DATE: May 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202–447–3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of Valencia oranges, as provided in this regulation, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantities of Valencia oranges that may be marketed from District 1, District 2, or District 3 during the specified week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation for the quantities of Valencia oranges that should be marketed during the specified week. The recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors covered in the order. The committee further reports the fresh market demand for Valencia oranges is very good.

Average f.o.b. price was $3.66 per carton on 519 cars for the week ended May 19, as compared with $3.49 per carton on 363 cars the previous week.

Track and rolling supplies at 375 cars were up 238 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantities of Valencia oranges which may be handled should be established as provided in this regulation.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information becomes available upon which this regulation is based and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient. A reasonable time is permitted for preparation for such effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for Valencia oranges and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning such provisions and effective time has been provided to handlers of Valencia oranges. It is necessary, to effectuate the declared policy of the act, to make this regulation effective during the period specified. The committee meeting was held on May 24, 1977.

§ 908.857 Valencia Orange Regulation 557.

* * * * *

(b) Order. (1) The quantities of Valencia oranges grown in Arizona and designated parts of California which may be handled during the period May 27, 1977, through June 2, 1977, are hereby fixed as follows:

(i) District 1: 328,000 cartons;

(ii) District 2: 472,000 cartons;

(iii) District 3: Unlimited.

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: May 25, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-15308 Filed 5-25-77;11:53 am]

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 31—GENERAL LICENSES FOR BYPRODUCT MATERIAL

PART 32—SPECIFIC LICENSES TO MANUFACTURE, DISTRIBUTE, OR IMPORT CERTAIN ITEMS CONTAINING BYPRODUCT MATERIAL

Addition to General License for In Vitro Diagnostic Products

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations to add Mock Iodine-125 to the list of radionuclides in the general license for medical laboratory use. This rule change, requested by The Nucleus of Oak Ridge, Tennessee, will benefit the medical patient by improving the data for the diagnosis of disease.

EFFECTIVE DATE: June 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Deborah A. Bozik, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (301–443–6911).

SUPPLEMENTARY INFORMATION: On March 24, 1977, the Nuclear Regulatory Commission (NRC) published a proposed rule (42 FR 15913) to amend its regulations: (1) § 31.11 to add Mock Iodine-125 to the list of radionuclides in the general license for in vitro diagnostic use; and (2) § 32.71 to add Mock Iodine-125 to the list of radionuclides manufactured and distributed for use under the in vitro general license. The public was invited to submit written comments on the proposed rule by May 9, 1977, and no comments were received. Therefore, the text of § 31.11 and § 32.71 set out below is identical with the proposed amendment.

The general license in § 31.11 authorizes any physician, clinical laboratory or hospital to receive, acquire, possess, transfer or use iodine-125, iodine-131, carbon-14, hydrogen-3, selenium-75 and iron-59 for in vitro testing of body fluids. In vitro refers to laboratory tests performed outside of the human body.

The Nucleus, Inc., of Oak Ridge, Tennessee, filed a petition for rule making (PRM 31—2) with the NRC (by letter dated June 23, 1976) requesting the inclusion of Mock Iodine-125 in the general license in § 31.11. This notice of rule making responds to the request of the Nucleus, Inc.

Under the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Parts 31 and 32 are published as a document subject to codification.

1. Section 31.11 of 10 CFR Part 31 is amended by adding new paragraphs, (a)(7) and (c)(5), and amending paragraphs (d)(1) and (f) to read as follows:

§ 31.11 General License for use of byproduct material for certain in vitro clinical or laboratory testing.

(a) A general license is hereby issued to any physician, clinical laboratory or hospital to receive, acquire, possess, transfer, or use, for any of the following stated tests, in accordance with the provisions of paragraphs (b), (c), (d), (e), and (f) of this section, the following byproduct materials in prepackaged units:

* * * * *

(7) Mock Iodine—125 reference or calibration sources, in units not exceeding 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each for use in in vitro clinical or laboratory tests not involving internal or external administration of byproduct material, or the radiation therefrom, to human beings or animals.

* * * * *

(c) A person who receives, acquires, possesses, or uses byproduct material pursuant to the general license established by paragraph (a) of this section shall comply with the following:

* * * * *

(5) The general licensee shall dispose of the Mock Iodine-125 reference or calibration sources described in paragraph (a)(7) of this section as required by § 20.301 of this chapter.

* * * * *

(d) The general licensee shall not receive, acquire, possess, or use byproduct material pursuant to paragraph (a) of this section:

(1) Except as prepackaged units which are labeled in accordance with the provisions of a specific license issued under the provisions of § 32.71 of this chapter or in accordance with the provisions of a specific license issued by an Agreement State that authorizes manufacture and distribution of iodine-125, iodine-131, carbon-14, hydrogen-3 (tritium), selenium-75, iron-59, or Mock Iodine-125 for distribution to persons generally licensed by the Agreement State.

* * * * *

(f) Any person using byproduct material pursuant to the general license of paragraph (a) of this section is exempt from the requirements of Parts 19 and 20 of this chapter with respect to byproduct materials covered by that general license, except that such persons using the Mock Iodine-125 described in paragraph (a)(7) of this section shall comply with the provisions of §§ 20.301, 20.402, and 20.403 of this chapter.

2. Section 32.71 of 10 CFR Part 32 is amended by adding a new paragraph, (b)(7), and amending paragraphs (c)(1) and (e) to read as follows:

§ 32.71 Manufacture and distribution of byproduct material for certain in vitro clinical or laboratory testing under general license.

An application for a specific license to manufacture or distribute byproduct material for use under the general license of § 31.11 of this chapter will be approved if:

* * * * *

(b) The byproduct material is to be prepared for distribution in prepackaged units of:

* * * * *

(7) Mock Iodine-125 in units not exceeding 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each.

(c) Each prepackaged unit bears a durable, clearly visible label:

(1) Identifying the radioactive contents as to chemical form and radionuclide, and indicating that the amount of radioactivity does not exceed 10 microcuries of iodine-131, iodine-125, selenium-75, or carbon-14; 50 microcuries of hydrogen-3 (tritium); 20 microcuries of iron-59; or Mock Iodine-125 in units not exceeding 0.05 microcurie of iodine-129 and 0.005 microcurie of americium-241 each; and

* * * * *

(e) The label affixed to the unit, or the leaflet or brochure which accompanies the package, contains adequate information as to the precautions to be observed in handling and storing such byproduct material. In the case of the Mock Iodine-125 reference or calibration source, the information accompanying the source must also contain directions to the licensee regarding the waste disposal requirements set out in § 20.301 of Part 20 of this chapter.

* * * * *

[Docket No. RM 50-3]

PART 51—LICENSING AND REGULATORY POLICY AND PROCEDURES FOR ENVIRONMENTAL PROTECTION

Uranium Fuel Cycle Impacts From Spent Fuel Reprocessing and Radioactive Waste Management; Reopened Hearing

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of reopened hearing on interim rule.

SUMMARY: The notice provides procedures for the conduct of a public hearing on the question whether the Commission's recently adopted interim rule (42 FR 13803; March 14, 1977) specifying environmental impacts from reprocessing and waste management in the nuclear fuel cycle should be made permanent for future use, and if it should be altered, in what respect.

DATE: Written notice of intent to present views at the hearing to be furnished by June 27, 1977.

ADDRESS: Written notice of intent to present views at the hearing, containing name of individual and name of organization represented, should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

FOR FURTHER INFORMATION CONTACT:

Mr. Martin G. Malsch, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, phone 301–492–7203.

REOPENED HEARING

In the Matter of Amendment of 10 CFR Part 51—Licensing of Production and Utilization Facilities (Environmental Effects of the Uranium Fuel Cycle).

In November 1972, a document entitled "Environmental Survey of the Nuclear Fuel Cycle" was published by the Directorate of Licensing of the Atomic Energy Commission (AEC). The purpose of that document was to establish a technical basis for informed consideration of environmental effects of the uranium fuel cycle in the environmental impact statements for individual light water power reactors (LWR's). Comments on the Environmental Survey were solicited, and an informal rule making hearing was held on February 1 and 2, 1973. The purpose of the hearing was to consider possible amendments of Appendix D of 10 CFR Part 50 which would, by rule, specify the environmental effects of the uranium fuel cycle to be factored into the assessment of costs and benefits in environmental impact statements for individual LWR's. Written comments were received in response to the FEDERAL REGISTER notice, and recommendations for im-

provement were offered during the hearings. After consideration of the written comments and the hearing record, the AEC promulgated the final fuel cycle rule (so-called Table S–3) on April 22, 1974 (39 FR 14188). The AEC indicated in its decision that the rule and survey would be re-examined from time to time to accommodate new information. The same Table S–3 was thereafter included in 10 CFR Part 51.

On July 21, 1976 the United States Court of Appeals for the District of Columbia decided *Natural Resources Defense Council* v. *NRC*, a case involving a legal challenge to the fuel cycle rule. The court approved the overall approach and methodology of the fuel cycle rule. It found that, regarding most phases of the fuel cycle, the underlying survey represented an adequate description of the processes involved. The court noted that the survey assembled data on consumption of resources, discussed the risks of accidents and other hazards in detail, and provided numerous references to the scholarly literature and technical reports in support of the conclusions as to environmental impact. However, the court found that the rule was inadequately supported by the record insofar as it treated two particular aspects of the fuel cycle—the impacts from reprocessing of spent fuel and the impacts from radioactive waste management. The U.S. Supreme Court has since agreed to review the Court of Appeals decision.

On August 16, 1976, the Commission published a General Statement of Policy (41 FR 34707) in response to the *Natural Resources Defense Council* v. *NRC* decision, and a related decision, *Aeschliman* v. *AEC*, issued on the same date. The Commission announced its intention to reopen the rulemaking proceeding on the environmental effects of the fuel cycle to supplement the existing record and to determine whether or not the rule should be amended. The Commission directed the Staff to prepare a revised and well-documented environmental survey dealing with radioactive waste management and reprocessing impacts. The revised survey was to serve as the basis for an interim rule on radioactive waste management and reprocessing impacts. The Commission also noted that after promulgation of an interim rule, a public hearing would be held to facilitate public participation on the question whether the interim rule should be made permanent for future use, and if it should be altered; in what respect.

The revised survey called for by the Commission's General Statement of Policy—NUREG–0116—was completed in October 1976. On October 18, 1976, notice was published in the FEDERAL REGISTER (41 FR 45849) that the survey, an impact analysis, and a proposed interim rule on waste management and reprocessing impacts were available to the public, and that comment on them was solicited. The revised survey was also forwarded to interested Federal agencies for comment. The comments received, and staff analysis thereof, are set forth in NUREG–0216. A response to the comments on the impact analysis was also prepared. These documents served as the basis for an interim rule published in effective form on March 14, 1977 (42 FR 13803). As indicated in the notice of proposed rulemaking published on October 18, 1976, the Commission is considering adoption of this interim rule in final form.

The Commission indicated in its General Statement of Policy that the rules for the conduct of the hearing in the reopened rulemaking proceeding on the final rule would be specified later, after receipt and analysis of comments on a petition for rulemaking, involving among other things the hearing format for this proceeding, that had been proposed for this purpose by Natural Resources Defense Council, Inc. (NRDC).

NRDC's proposed procedures and the comments received thereon have all been considered by the Commission. Most of the letters of comment (representing some sixty-six organizations) that expressly addressed the procedural aspects of the NRDC petition were opposed to NRDC's suggestion as to the scope of the reopened proceeding. Only the Union of Concerned Scientists and NRDC's own letter of comment supported the suggestion that the scope of the proceeding be the entire S–3 table and not be limited to waste management and reprocessing matters. As stated in the FEDERAL REGISTER notice on the proposed interim rule, referred to above, the Nuclear Regulatory Commission staff is initiating a study designed to examine information that has developed since promulgation of the fuel cycle rule in 1974 for the purpose of updating the rule in areas other than waste management and reprocessing. This study is being initiated as a separate matter and will not be completed for some time. As explained more fully below, the Commission believes that prompt completion of final rulemaking proceedings on waste management and reprocessing impacts is in the public interest and, for this reason, the NRDC's suggestion as to scope has not been adopted.

NRDC's other procedural suggestions were essentially to use a modified version of the procedures prescribed by the Commission for use in the so-called GESMO proceeding. ("Environmental Statement Mixed Oxide Fuel," 41 FR 1133, January 6, 1976). The GESMO procedures contemplate a legislative-type hearing with the possible opportunity for a subsequent adjudicatory hearing. NRDC recommends this procedural approach with several significant modifications. Where the GESMO procedures would not allow subpoenas "except upon a showing of exceptional circumstances," NRDC would make the test merely whether the subpoenas were "reasonably necessary." Similarly, where the GESMO procedures allow discovery only where "exceptional circumstances" and "compelling justification" are shown, NRDC would allow discovery where "reasonably necessary." Finally, while the GESMO procedures leave to the Commission's discretion the question of allowing cross-examination in a follow-on adjudicatory proceeding, NRDC's proposal would appear to remove that discretion if a participant makes a "threshold showing" as to the need for such additional procedures.

The GESMO procedures or the modified GESMO procedures proposed by NRDC were supported by the comment letters of the California Energy Resources Conservation and Development Commission, the Union of Concerned Scientists and the NRDC's own letter of comment. The other ten letters of comment generally supported the use of the existing S–3 procedures, noting that the court had implicitly endorsed them if administered "in a more sensitive, deliberate manner". The commenters also stated that the procedures proposed by NRDC were not required by law and were burdensome, complex and time consuming.

The Administrative Procedure Act, which governs rulemaking by the Commission, requires only advance notice and opportunity for written comment. Thus both NRDC's proposal and the original procedures followed in this matter—which called for an informal public hearing with witnesses subject to questioning by the hearing board—establish modes of public participation that go beyond the requirements generally applicable to rulemaking under the Administrative Procedure Act. However, the law is clear that an agency may provide for public participation beyond the statutory requirements. In deciding on the need for such additional procedures in this matter, several factors have been considered. The procedures must be designed to develop and illuminate the important matters of fact, policy and law that underlie the proposed rule. Also, provision for procedures to permit testing of information provided may be appropriate. Finally, the need for prompt and efficient decisionmaking must be considered.

On the first factor, the experience in the original rulemaking proceeding on the fuel cycle rule provides an extremely useful guide for decision. The original procedures proved adequate for development and illumination of a wide range of fuel cycle impact issues, including issues related to uranium mining and milling operations, fuel fabrication, and enrichment. True, the record was held inadequate on the two matters at issue here, but these issues are of the same character as the other issues regarding which the record did prove adequate.

The procedures recommended by NRDC more closely approach the kinds of procedures followed in adjudicatory, as opposed to rulemaking, proceedings, than do the original fuel cycle rule procedures. In many (but not all) respects as stated they resemble the GESMO procedures. To the extent they go further, for example in providing for more extensive discovery, they embody elements

of formality and adversariness the Commission believes are inappropriate for these proceedings. Moreover, the GESMO proceeding has not proceeded to any adjudicatory stage, and therefore the Commission has no directly applicable experience to draw upon regarding how the procedures there adopted will work. The court here indicated that the procedures previously employed could suffice, and indeed did for other issues.

Finally, there is a need for a prompt decision. The final rule will be applied to nuclear power plant licensing proceedings then pending. Construction and operation of nuclear power plants entail commitments of resources measured in terms of billions of dollars and have a significant impact on both national and local needs and programs. The Commission does not expect these hearings to resolve finally the important questions regarding waste management and other activities associated with the back end of the fuel cycle. Their limited role in assisting the development of environmental impact analyses is an appropriate factor to be considered. Indeed prompt completion of this reopened hearing will facilitate prompt identification and consideration of any new information which may be developed. This information can then be brought to bear on these nuclear power plant licensing decisions by application of the final rule.

Accordingly, notice is hereby given that the rules for the conduct of the reopened hearing and the authorities and responsibilities of the Hearing Board will be the same as originally applied in this matter (38 FR 49, January 3, 1973) except that specific provision is hereby made for the Hearing Board to entertain suggestions from participants as to questions which the Board should ask of witnesses for other partilicipants. The Commission is confident that these procedures can and will be applied by the Hearing Board in a sensitive and careful fashion so as to assure the ventilation and consideration of waste management and reprocessing issues called for by the Court in *Natural Resources Defense Council* v. *NRC*. The Commission intends to monitor carefully the course of the proceeding to assure that this goal is achieved. The location of the hearing will be announced in a separate FEDERAL REGISTER notice. The exact time for commencement of the hearing will be established by the Hearing Board. A Hearing Board consisting of Michael L. Glaser, John H. Buck, and R. Beecher Briggs will preside. Michael L. Glaser is an attorney and member of the law firm of Glaser and Fletcher, P. C., in Washington, D.C. He is a member of the District of Columbia and Maryland bars and has been a part-time member of the Atomic Safety and Licensing Board Panel since 1972. Mr. Glaser will serve as chairman of the hearing board. John H. Buck is Vice-Chairman of the Atomic Safety and Licensing Appeal Panel. He has served as a member of this panel since 1969. Dr. Buck was formerly Chief Physicist at the Oak Ridge National Laboratory. He was a member of the hearing board for the Emergency Core Cooling System rulemaking hearings of the United States Atomic Energy Commission that took place in 1973. He is a Fellow of the American Association for the Advancement of Science and a Fellow of the American Physical Society. R. Beecher Briggs has been a part-time member of the Atomic Safety and Licensing Board Panel since 1966.

Previous to his retirement in 1975, Mr. Briggs was Senior Research Engineer at Oak Ridge National Laboratory and had formerly served as Director of the Molten Salt Reactor Program and Director of Homogeneous Reactor Projects and Reactor Experimental Division. He is presently a consultant for Oak Ridge National Laboratory, operated by the Union Carbide Nuclear Division, and for Union Carbide Corporation, with the latter on subjects unrelated to nuclear energy.

Any person who intends to present views at the hearing should furnish in writing his name and the name of the organization he represents to the Secretary of the Commission by June 27, 1977. The subject of the hearing will be confined to the environmental effects of spent fuel reprocessing and radioactive waste management in the light water power reactor uranium fuel cycle, and to the question whether the outcome of the interim rulemaking should be made permanent for future use, or if it should be altered, in what respects. In this regard, the light water power reactor uranium fuel cycle should be taken as including, alternatively (1) no reprocessing of spent fuel and follow-on interim and/or long-term storage or disposal of spent fuel, or (2) reprocessing spent fuel for purposes other than recycle of plutonium, with follow-on interim and/or long-term storage or disposal of plutonium and wastes from reprocessing, with plutonium either separated from or included with the wastes.[1] The matter of possible changes to the impacts from spent fuel reprocessing and radioactive waste management in the light water power reactor fuel cycle arising from the possible reprocessing and subsequent wide-scale use of mixed oxide fuel is being addressed separately in the proceeding on the wide-scale use of mixed oxide fuel (Docket No. RM–50–5). Both NUREG–0116 and NUREG–0216 will be included in the hearing record. The NRC Staff has initiated a study designed to examine information that has developed since promulgation of the fuel cycle rule for the purpose of generally updating the rule in other subject areas. This updating will be the subject of a separate rulemaking proceeding.

For further information on this matter, interested persons should consult NUREG–0116 and NUREG–0216, copies of which are on file in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Documents relied upon in preparing NUREG–0116 and NUREG–0216 will also be made available for public inspection at the same location.

Dated at Washington, D.C. this 20th day of May 1977.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77–15141 Filed 5–25–77;8:45 am]

[1] The Commission recognizes that its reassessment of GESMO (42 FR 22964, May 5, 1977) may call for a change in scope of this hearing on the final Table S–3 rule. The Commission, rather than the Hearing Board, will make that decision if and when necessary.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 170]

PROPOSED REVISION OF LICENSE FEE SCHEDULES

Extension of the Public Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of period for public comment on proposed rule.

SUMMARY: The Nuclear Regulatory Commission extends until July 1, 1977 the period for public comment on the proposed schedule of fees for facilities and materials licenses that appeared in the FEDERAL REGISTER on May 2, 1977 (42 FR 22149). This extension is in response to a request from the General Atomic Company for additional time to comment.

DATE: Comments must be received on or before July 1, 1977.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT:

Mr. W. O. Miller Office of Administration, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, 301–492–7225.

SUPPLEMENTARY INFORMATION: On May 2, 1977, the Nuclear Regulatory Commission published proposed amendments to Title 10, Chapter I, Code of Federal Regulations, Part 170, revising the Commission's schedule of fees for facilities and materials licenses (42 FR 22149). Interested persons were invited to submit to the Secretary of the Commission by June 1, 1977, written comments for consideration in connection with the proposed amendments.

The Secretary has since received a request from the General Atomic Company, San Diego, California, asking that the comment period be extended to July 1, 1977. General Atomic notes that additional information relevant to the proposed amendments was presented at a public meeting on May 12, 1977, and that additional time is necessary to consider this new information.

In view of the amount and complexity of the material encompassed by the proposed new fee schedule and the introduction of new information at the public meeting, the request for an extended comment period appears justified. Accordingly, and pursuant to 10 CFR 2.808 (b), the period for public comment is extended to July 1, 1977.

Dated at Washington, D.C. this 23rd day of May, 1977.

SAMUEL J. CHILK,
Secretary of the Commission.

[FR Doc.77–15116 Filed 5–25–77;8:45 am]

FEDERAL ELECTION COMMISSION

[11 CFR Ch. II]

[Notice 1977–31]

SOLICITATIONS BY SEPARATE SEGREGATED FUNDS OF LABOR ORGANIZATIONS

ACTION: Proposed Regulation.

SUMMARY: This notice contains a request for comments for a proposed regulation regarding solicitations by the separate segregated funds of labor organizations.

CLOSE OF COMMENT PERIOD: June 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Daniel J. Swillinger, Assistant General Counsel, 523–4060.

SUPPLEMENTARY INFORMATION: The Commission requests public comment in the form of suggested language for a regulation concerning the scope of a labor organization's right to use a method of solicitation once that method has been used by a corporation, see 11 CFR 114.5(k) (41 FR 35959, August 25, 1976) and 2 U.S.C. 441b(b)(6).

The Commission publishes the following series of questions to describe the issues to be addressed in the comments:

(1) If a corporation with a separate segregated fund makes payroll deduction and/or stock dividends withholding available to its executive and administrative personnel and stockholders only through December 31, 1977, and a labor organization representing members working for the corporation makes a request during that period for payroll deduction for its members, during what period is the corporation required to provide payroll deduction for those labor union members?

(2) If the corporation makes payroll deduction and/or stock dividend withholding available only through December 31, 1977, and no labor organization representing members working for the corporation makes a request for payroll deduction for its members until January 1, 1978, or later, is the corporation required to provide payroll deduction for those labor union members? If so, for what period?

(3) If the corporation makes payroll deduction and/or stock dividend withholding available only during the months of April, May, June and July of 1977, and a labor organization representing members working for the corporation makes a request during that period for payroll deduction for its members, during what period is the corporation required to provide payroll deduction for those labor union members?

(4) If the corporation makes payroll deduction and/or stock dividend withholding available only during the months of April, May, June and July of 1977, and no labor organization representing members working for the corporation makes a request for payroll deduction for its members until August 1, 1977, or later, is the corporation required to provide payroll deduction for those labor union members? If so, for what period?

(5) If the corporation makes payroll deduction and/or stock dividend withholding available during a calendar year and one labor organization representing members working for the corporation makes a valid and timely request for payroll deduction for its members, but another labor organization which represents other members working for the corporation fails to make a request during the calendar year, is the corporation required to provide payroll deduction for those members of the labor organization which failed to make a timely request? If so, for what period?

(6) If the corporation makes payroll deduction and/or stock dividend withholding available to executives and stockholders of a subsidiary corporation which does not have any employees who are members of a labor organization is the corporation required to make payroll deduction withholding available to labor union members employed by another subsidiary corporation of the same parent corporation?

The Commission requests that comments be submitted in the form of a proposed regulation to cover the issues raised by the questions. Comments should be submitted on or before June 27, 1977 to Regulation Section, Office of General Counsel, Federal Election Commission, 1325 K Street, N.W., Washington, D.C. 20463.

Dated: May 23, 1977.

JOAN D. AIKENS,
Vice Chairman for the Federal Election Commission.

[FR Doc.77–15075 Filed 5–25–77;8:45 am]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Chapter I]

[Docket No. 14581; Reference Advance Notice 75–17]

DISTANCE-TO-GO RUNWAY MARKERS

AGENCY: Federal Aviation Administration/DOT (FAA).

ACTION: Withdrawal of advance notice of proposed rule making.

SUMMARY: This notice withdraws Advance Notice No. 75–17 (40 FR 20289; published May 9 1975) in which the Federal Aviation Administration invited public participation in the identication and selection of a course or alternate courses of action with respect to possible rule making: (1) To require that distance-to-go runway markers be installed every 1,000 feet on all runways utilized by turbine-powered airplanes and (2) to provide a pilot with runway length information to assist him in making takeoffs and landings.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, AFS–940, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202–755–8716.

SUPPLEMENTARY INFORMATION: As explained in the advance notice, the Air Line Pilots Association (ALPA) petitioned the Federal Aviation Administration to amend the Federal Aviation Regulations to require distance-to-go marker boards every 1,000 feet on all runways utilized by turbine-powered airplanes. The reasons for the ALPA petition, as set forth in the Advance Notice (No. 75–17), are based on the ALPA belief that distance-to-go marker boards every 1,000 feet on the runway would provide the pilot with his location on the runway and that this information would assist him in determining the safest course of action to follow in the event of an emergency situation.

The ALPA petition did not include a prosposal that the use of the runway markers by pilots of turbine-powered airplanes be mandatory. In its comment to the public docket concerning Notice No. 75–17, the ALPA stated that it encourages the use of runway distance-to-go markers but that they should be used only as an additional piece of information and at the pilot's discretion. The ALPA believes that there should not be a required operational procedure based on the existence of the runway distance-to-go markers.

A narrow majority of the comments to the advance notice, the total of which exceeded one hundred and twenty-five, were opposed to requiring the installation of distance-to-go runway markers. In general, opposition centered around the high cost of installation and maintenance of the markers when compared to what many believe are limited benefits to be derived from their installation.

Some airport operators opposed the installation of runway markers primarily because of the expense of installation and maintenance and because the use of them at some of the larger airports has proved unsatisfactory. One airport operator reported that markers installed and maintained by the military at a large civil airport are difficult to maintain, subject to frequent damage from jet blast, and cannot be adjusted to display the correct information when a runway threshold is temporarily displaced.

In its comment on the advance notice, the Air Transport Association of America (ATA) noted that, in early 1971, as a result of an NTSB recommendation that distance-to-go runway markers be installed, the airlines reviewed the matter in some detail. It was concluded that any attempt to use distance-to-go runway markers or to use the Instrument Navigation System for acceleration rate information to V_1 (critical-engine-failure) speed was not feasible for airline operations. The ATA notes that it was the opinion of the airlines at that time, based on individual investigations and experience, that acceleration checks during takeoff roll could cause more exposure to accidents than the procedure might prevent.

With respect to acceleration time to V_1, another commentator stated that the use of stopwatch information is the most accurate source available. Moreover, other comments asserted that information regarding aircraft location on the runway is available from approach plates and airport diagrams. Another person opposed to mandatory installation of runway markers noted that, during low visibility takeoffs and landings, the occasions when the markers would ostensibly be used, their visibility would be limited due to pilot concentration on the runway centerline. One commentator asserted that outside scan beyond the periphery of the runway is undesirable during low visibility operations.

The FAA agrees that use of the runway markers during takeoff might result in a potentially unsafe situation since the pilot not in control would be required to monitor passage of the markers. This would divert his attention from adequately monitoring engine and flight instruments and would increase the probability of his failing to call out the V, speeds at the proper time during a most critical period of the takeoff.

A further objection voiced by the ATA was that it fears that the use of the markers on takeoff might increase exposure to unnecessary high speed aborts and subsequent exposure to abort overruns. The ATA states that the airlines also concluded that the benefits of runway distance-to-go markers on landing roll are minimal.

With respect to emergency situations when an abort may be necessary, airplane flight manuals currently incorporate accelerate/stop distance information which assures adequate runway in the event of an emergency abort. The FAA believes that the procedures used by the airlines for setting and cross-checking takeoff V_1 reference speeds are adequate and that the balanced field length concept is safe and reasonable. An Air Carrier Operations Bulletin (No. 72–6) was issued by the FAA to assure that air carrier training programs and operating procedures emphasize the necessity for flight crews to assure that takeoff V_1 speeds accurately reflect all pertinent considerations prior to takeoff.

Numerous commentators noted that, without cockpit procedures that involve the use of runway markers, the markers would be ignored or relegated to the category of "nice to know" but not necessary information. The lack of procedures has caused some commentators to conclude that other, more widely used airport improvements, including VASI and other visual aids, should be given precedence.

With respect to the costs involved in the installation of distance-to-go runway markers on all runways used by turbine-powered airplanes, FAA study of the matter has led to the conclusion that, to be useful under low visibility conditions and during hours of darkness, distance-to-go markers would require interior-lighted transparent panels visible from both take-off directions, with numerals easily readable at distances beyond 500 feet. Due to obstruction clearance criteria, markers would require lateral offset of 75 feet or more, dependent upon height. If elevated to avoid snow obliteration, markers would require greater offset, and correspondingly greater size for readability.

Cost sampling for commercially available markers indicates that an acceptable marker would cost from $1,000 to $2,000 installed, dependent upon size, construction, offset distance, electrical wiring requirements, and other related factors. A typical 7,000-foot runway requiring approximately 14 distance-to-go markers would, therefore, require an expenditure of $14,000 to $28,000. There are currently 402 airports in the United States that are certificated under Part 139, with a total of 777 runways capable of turbojet operations. If adopted, this proposal would cost from $10.8 to $21.7 million for those airports receiving air carrier service. No attempt has been made to calculate costs for an additional 834 airports with 5,000-foot paved runways that are not certificated under Part 139, but are fully capable of accommodating turbine powered aircraft.

A further consideration with respect to evaluation of the cost of installation of distance-to-go runway markers is the fact that, by virtue of the Metric Conversion Act of 1975, Pub. L. 94–168 (89 Stat. 1007), it is the policy of the United States to coordinate and plan the increasing use of, and eventual voluntary conversion to, the metric system. Accordingly, until that conversion is completed, the adoption of a runway marking system that would later require conversion to the metric system without a proportionally significant benefit to safety in air commerce is not justified.

The FAA determined that use of distance-to-go runway markers would provide an additional means of determining airplane performance during takeoff and landing provided supporting performance data are made available in the airplane Flight Manual. However, based on the analysis of comments received in response to Notice No. 75–17, costs for installation of distance-to-go runway markers, and their possible obsolescence due to metrication, the FAA has determined that their installation at the present time would not be practical, and in the interim period could be counterproductive in safety of operations.

The FAA has determined that rulemaking action on the ALPA proposal is not warranted at the present time. However, withdrawal of the advance notice does not preclude the FAA from issuing similar notices in the future due to a change in circumstances, nor does it commit the FAA to any course of action.

The principal authors of this document are Joe N. Cate, Jr., Air Carrier Regulations Branch, Flight Standards Service, and Margaret C. Sweeney, Office of the Chief Counsel.

In consideration of the foregoing, the Advance Notice of Proposed Rule Making published in the FEDERAL REGISTER (40 FR 20289) on May 9, 1975, and circulated as Notice No. 75–17, entitled "Distance-to-Go Runway Markers", is hereby withdrawn.

(Secs. 313(a) and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a) and 1421) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Washington, D.C., on May 17, 1977.

R. P. SKULLY,
Director,
Flight Standards Service.

[14 CFR Part 71]

[Docket No. 77–SO–13]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES. CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: A public use instrument approach procedure is being developed for the Marathon, Florida, Airport, and additional controlled airspace is required for containment of IFR operations. This proposed rule will designate the Marathon, Florida, transition area and will lower the base of controlled airspace in the vicinity of the airport from 1200 to 700 feet to accommodate the anticipated IFR operations.

COMMENT DATE: Comments must be received on or before July 5, 1977.

ADDRESS: Send comments on the proposal to Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

Donald Ross, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320, telephone 404–763–7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, Attention: Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before July 5, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling 202–426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate the Marathon, Fla., 700-foot transition area. This action will provide additional controlled airspace to accommodate aircraft performing IFR operations at Marathon Flight Strip Airport.

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR 71) by adding the following:

MARATHON, FLORIDA

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Marathon Flight Strip (Lat. 24°43'33" N., Long. 81°03'05" W.); within 3 miles each side of the 251° bearing from the Marathon RBN, extending from the 6.5-mile radius area to 8.5 miles west of the RBN; excluding the portion outside the continental limits of the United States.

DRAFTING INFORMATION

The principal authors of this document are Donald Ross, Airspace and Procedures Branch, Air Traffic Division and Ronald R. Hagadone, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in East Point, Ga., on May 13, 1977.

GEORGE R. LACAILLE,
Acting Director,
Southern Region.

[Docket No. 77–SO–16]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: A public use instrument approach procedure is being developed for the Mount Olive Municipal Airport and additional controlled airspace is required for containment of IFR operations. This proposed rule will alter the Goldsboro transition area by lowering the base of controlled airspace in the vicinity of the airport from 1200 to 700 feet.

COMMENT DATE: Comments must be received on or before July 5, 1977.

ADDRESS: Send comments on the proposal to Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

C. Herman Thompson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta Georgia 30320, telephone 404–763–7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. All communications received on or before July 5, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both

before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW, Washington, D.C. 20591, or by calling 202–426–8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Goldsboro, North Carolina, 700-foot transition area. This action will provide additional controlled airspace to accommodate aircraft performing IFR operations at the Mount Olive Municipal Airport.

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR 71) by altering the Goldsboro transition area as follows:

"• • • northeast of the RBN • • •" will be deleted and "• • • northeast of the RBN; within a 6.5-mile radius of Mount Olive Municipal Airport (Lat. 35°13'24" N., Long. 78°02'21" W.); • • •" will be substituted therefor.

DRAFTING INFORMATION

The principal authors of this document are C. Herman Thompson, Airspace and Procedures Branch, Air Traffic Division and Richard L. Faber, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

This amendment is proposed under the authority of Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in East Point, Ga., on May 13, 1977.

GEORGE R. LACAILLE,
Acting Director,
Southern Region.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 22]

DRAWBACK CLAIMS

Proposed Amendment to the Customs Regulations Relating to Retention of Records

AGENCY: United States Customs Service.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains a proposed change in the regulations pertaining to the retention of certain specified records relating to drawback claims. This change in the record retention requirement is made necessary by the accelerated payment of drawback claims procedure. The change is intended to prevent the premature destruction of the required records.

DATE: Comments must be received on or before: June 27, 1977.

ADDRESS: Comments may be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Richard M. Belanger, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

"Drawback" denotes a situation in which a duty or tax, lawfully collected, is refunded or remitted; wholly or partially, because of a particular use made of the merchandise on which the duty or tax was collected. One of the more common types of drawback is that allowed upon the exportation of articles manufactured or produced in the United States with the use of imported merchandise (section 313(a), Tariff Act of 1930 (19 U.S.C. 1313(a))). Part 12 of the Customs Regulations (19 CFR Part 22) contains the provisions regarding drawback claims.

Section 22.46 of the Customs Regulations (19 CFR 22.46) currently provides that all records required to be kept by the manufacturer or producer under 19 CFR Part 22 with respect to drawback claims, and records kept by others to complement the records of the manufacturer or producer, shall be retained for at least 3 years after payment of such claims. The purpose of this requirement is to make certain that the required records will be available if it is necessary for the Customs Service to perform an audit to verify the claim. Prior to 1973, payment of a drawback claim was made only after liquidation of the claim, which is the final computation of the amount of drawback due. However, on December 22, 1972 (37 FR 28284), the Customs Regulations were amended by adding a new section 22.20a (19 CFR 22.20a), which, among other things, provided for accelerated payment of drawback claims prior to liquidation. Thus, it is possible that if 3 years have elapsed since the accelerated payment of the drawback claim, the required records might be destroyed even though the claim may not have been liquidated.

Therefore, in order to prevent the premature destruction of the required records, it is proposed to amend section 22.46 of the Customs Regulations by substituting the word "liquidation" for "payment".

This amendment is proposed under the authority of R.S. 251, as amended (19 U.S.C. 66), and sections 313 and 624, 46 Stat. 693, as amended, 759 (19 U.S.C. 1313, 1624).

COMMENTS

Before adopting this proposed regulation, consideration will be given to any written comments that are submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Headquarters, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this proposed regulation was Richard M. Belanger, Attorney, Regulations and Legal Publications Division of the Office of Regulations and Rulings, United States Customs Service. However, personnel from other offices of the United States Customs Service participated in developing the regulation, both on matters of substance and style.

PROPOSED AMENDMENT

It is proposed to amend § 22.46 of the Customs Regulations (19 CFR 22.46) to read as follows:

§ 22.46 Retention of records.

All records required to be kept by the manufacturer or producer under this part of the regulations with respect to drawback claims, and records kept by others to complement the records of the manufacturer or producer, shall be retained for at least 3 years after liquidation of such claims.

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: May 13, 1977.

BETTE B. ANDERSON,
Under Secretary.

DEPARTMENT OF STATE

[22 CFR Parts 21, 22]

[Docket No. SD-130]

CONSULAR SERVICES

Change in Fees

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State proposes to combine the two schedules of fees charged for consular services performed in the United States and its Foreign Service posts into one schedule of fees. As the result of a recent cost study requested by the General Accounting Office, fees for services performed in the United States and its Foreign Service posts have been adjusted to arrive at a uniform cost applicable to both the Department and the Foreign Service.

Except for the passport issuance fee, which is set by statute, the proposed new fee structure is based on the weighing of policy considerations and Fiscal Year 1975 costs. This will enable the Department to carry out consular services and be sure that its fees are consistent with U.S. foreign policy interests and with the user charge principle as prescribed by the Congress and applied by the President. The new Schedule of Fees for Consular Services will be reviewed and revised periodically to insure full cost recovery consistent with national interests.

DATES: Comments must be received on or before June 24, 1977. The proposed effective date is July 25, 1977.

ADDRESS: Send comments to Hugh Adamson, Bureau of Security and Consular Affairs, Department of State, 2201 C Street NW., Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT:

Hugh Adamson (202–632–9010).

SUPPLEMENTARY INFORMATION: The Department of State is responsible for providing various consular services to both United States and foreign nationals. These services include: passport and citizenship; visa services for aliens; services relating to vessels and seamen; notarial services and authentications; services relating to taking evidence; and copy and recording services.

The proposed revision of fees charged has been adjusted to insure that they are fair and equitable, taking into consideration direct and indirect cost to the U.S. Government, value to the recipient, public policy or interest served, and other pertinent facts. The separate cost figures for the foreign activity and the United States activity were totaled together to arrive at a uniform unit cost. The overall unit costs so derived was the primary basis for setting a fee for that item of service. The policy and criteria followed in establishing the fees will be published in Volume 7, Foreign Affairs Manual.

Accordingly, Parts 21 and 22 of Title 22 of the Code of Federal Regulations would be revised as set forth below.

PART 21—[RESERVED]

PART 22—SCHEDULE OF FEES FOR CONSULAR SERVICES—DEPARTMENT OF STATE AND FOREIGN SERVICE

Sec.

22.1 Schedule of fees.
22.2 Requests for services in the United States.
22.3 Remittances in the United States.
22.4 Request for services, Foreign Service.
22.5 Remittances to Foreign Service Posts.
22.6 Refund of fees.
22.7 Collection and return of fees.
22.8 Effective date.

AUTHORITY: Secs., 3, 4, 63 Stat. 111, as amended (22 U.S.C. 811a; 2658; 22 U.S.C. 2651; 5 U.S.C. 483a; 22 U.S.C. 1201), E.O. 10718, 22 FR 4632; 3 CFR, 1954–1958 Comp. page 382.

§ 22.1 Schedule of fees.

Item No.	Passport and citizenship services	Fee
1	Execution of application for passports (22 U.S.C. 214)	$3.00
2	Examination of passport application executed before a foreign official	3.00
3	Issuance of passport (22 U.S.C. 214)	10.00
	(Item No. 4 vacant.)	
5	Issuance of card of identity and registration	5.00
6	Execution of application for or issuance of passport:	
	(a) To officers or employees of the United States proceeding abroad or returning to the United States in the discharge of their official duties, or members of their immediate families (22 U.S.C. 214)	(1)
	(b) To American seamen who require a passport in connection with their duties aboard an American flag-vessel (22 U.S.C. 214)	(1)
	(c) To widows, children, parents, brothers, or sisters of deceased members of the Armed Forces proceeding abroad to visit the graves of such members (22 U.S.C. 214)	(1)
	(d) To employees of the American National Red Cross proceeding abroad as a member of the Armed Forces of the United States (10 U.S.C. 2602(c))	(1)
	(e) To Peace Corps volunteers and volunteer leaders, who are deemed to be employees of the United States for purposes of exemption from passport fees (22 U.S.C. 2504(f))	(1)
7	Amendment of passport:	
	(a) To show current or new information, including changes in members of family	(1)
	(b) To correct administrative error	(1)
	(c) To extend time limitation	(1)
8	Verification of passport	(1)
9	Execution of application for registration	(1)
10	Execution of affidavit in regard to American birth in connection with application for passport or citizenship determination	(1)
11	Administering the oath of allegiance to a native-born American woman who lost her citizenship solely by marriage to an alien	(1)
12	For delivery to the applicant of a certified copy of an executed form:	
	(a) Of repatriation of a native-born American woman whose marital status with an alien terminated prior to Jan. 13, 1941	3.00
	(b) Of repatriation of a native-born American woman under sec. 324 of the Immigration and Nationality Act (8 U.S.C. 1435)	3.00
	(c) Of repatriation under the act of July 20, 1954 (8 U.S.C. 1428 supp.) of a person who while a citizen of the United States lost his citizenship by voting in Japan between Sept. 2, 1945, and Apr. 27, 1952, inclusive	3.00
13	Documents relating to births, marriages or deaths of American citizens abroad where reported to a Foreign Service post:	
	(a) Registration of birth of American citizen, including furnishing 1 Certification of Birth and 1 copy of form FS-240 "Report of Birth Abroad of a Citizen of the United States of America"	6.00
	(b) "Certificate of Witness to Marriage" in quadruplicate	45.00
	(c) Authentication of original documents of marriage, per copy. Certified copies of the above documents may be obtained from the Passport Office, Department of State, Washington, D.C. 20524, per copy	3.00
	(d) "Report of Death of an American Citizen" and sending 1 copy each to legal representative and to closest known relative or relatives. Additional certified copies may be obtained from the Office of Special Consular Services, Department of State, Washington, D.C. 20520, per copy	(1) 3.00
14	Documents from passport files and related records (except as specified in item 13):	
	(a) For file search	6.00
	(b) For duplicating by photocopy or other such means each copy of each page	.15
	(c) For certifying of a true copy for each copy of each page	1.00
	(d) For certifying by letter under official seal a statement or extract from passport files or a statement that no record of a passport file can be located (plus $6 search charge 14a)	1.00
15	Any service described in item 14 when:	
	(a) Required for official use by an agency of the Federal Government or of any of the States or their subdivisions or of the District of Columbia, or of any of the territories and possessions of the United States	(1)
	(b) Performed in response to a subpena or other order of a court. (However, fees are chargeable when the service is for the benefit of a party in interest and a court order or subpena is issued in his behalf.)	(1)
	(c) Performed in providing to a party in interest, a copy of the transcript of a hearing held before a panel, board, or other authority of the Department	(1)
16	Granting an exception under 22 CFR 53.2(b) of travel control regulations	25.00
17	For any passport service furnished in the United States upon request during nonregular duty hours. (This fee is in addition to any statutory fees or communication costs.)	10.00
18	Instant photo service, where offered by a Foreign Service post, for each pair of identical photographs	3.00
	(Item No. 19 vacant.)	
	Visa services for aliens	
20	Furnishing and verification of application for immigrant visa, including duplicate copy	5.00
21	Issuance of each immigrant visa	20.00
22	Furnishing and verification of application and issuance of nonimmigrant visa. (Fees prescribed in appendix C, Visa Handbook of Department of State, as amended from time to time.)	(2)

Item No.	Passport and citizenship services	Fee
23	Furnishing and verification of application and issuance of nonimmigrant visa to:	
	(a) An alien proceeding solely in transit to and from the headquarters district of the United Nations under the provisions of sec. 11 of the agreement between the United Nations and the United States of America regarding the headquarters of the United Nations (61 Stat. 756)	(1)
	(b) An official representative of a foreign government, or an international or regional organization of which the United States is a member	(1)
	(c) An alien participating in a U.S. Government program	(1)
24	Visa or supplemental visa of alien crew list up to 40 crew members	10.00
	41 to 100 crew members	25.00
	101 to 200 crew members	45.00
	Over 200 crew members	60.00
25	Revalidation or transfer of a nonimmigrant visa	(2)
	(Item Nos. 26 through 29 vacant.)	
	Services relating to vessels and seamen	
30	Noting marine protest, when required by a master of a foreign or an undocumented vessel	7.00
31	Extending marine protest, when required by master of a foreign or an undocumented vessel	10.00
32	Protest of master against charterers or freighters, when required by master of a foreign or an undocumented vessel	6.00
33	Shipment or discharge of seaman on undocumented vessel, each seaman	14.00
34	Recording of bill of sale of vessel purchased abroad, taking of application for provisional certificate of registry or certificate of American ownership, and investigation	10.00
35	Issuance of provisional certificate of registry or certificate of American ownership	8.00
36	Services under this tariff (unless designated "no exceptions") when performed for American vessels or for American seamen (22 U.S.C. 1186). (The consular officer should charge under item 93 for time spent away from the consular office or afterduty hours for item No. 30 through 36.)	(1)
	(Item Nos. 37 through 44 vacant).	
	Notarial services and authentication	
45	Administering an oath and certificate thereof	3.00
46	Taking the acknowledgment of the execution of a document, and certificate thereof	3.00
47	Certifying under official seal that a copy or extract made from an official or a private document is a true copy. For certifying each copy of each page	1.00
48	Certifying to official character of a foreign notary or other official (i.e. authenticaling a document)	3.00
49	Administering oaths, taking acknowledgments, or supplying authentications, in connection with application for letters patent or registration of trademarks, or with the assignment or transfer of rights thereunder	3.00
50	Administering an oath and certificate thereof for petition for immediate relative, nonimmigrant fiance(e), temporary worker nonimmigrant intracompany transferee, or preference immigrant status	3.00
51	Administering oaths or taking acknowledgments, or authenticating the signatures of officials, in connection with kinsmen's petitions for wages and effects of deceased seamen of the American merchant marine (46 U.S.C. 627)	10.00
52	For affidavit of petitioner or his agent on documents or evidence to be presented to the Federal Government	3.00
53	Authenticating a Federal, State or territorial seal, or certifying to the official status of an officer of the U.S. Department of State, or of a foreign diplomatic or consular officer accredited to or recognized by the U.S. Government, on any document submitted to the Department for that purpose	3.00
	(Item number 54 vacant.)	
55	Noting of a negotiable instrument for want of acceptance or payment, certifying to protest, and giving notice to issuer and endorsers when requested to do so. (In addition to this fee the consular officer should charge under item 93 for time spent away from the consular office or afterduty hours in presentment of the instrument for acceptance or payment.)	8.00
	(Item Nos. 56 and 57 vacant.)	
58	Services under the heading, "Notarial Services and Authentications", when rendered:	
	(a) In connection with the execution of forms or documents required by or to be presented to any department or agency of the Federal Government	(1)
	(b) In connection with the execution of forms or documents required by or to be presented to the States and their subdivisions, the District of Columbia, or any of the territories or possessions of the United States	(1)
	(c) In connection with the assignment and transfer of U.S. bonds or other Federal financial obligations or the execution of powers of attorney therefor to collect interest thereon	(1)
	(d) To claimants and beneficiaries and their witnesses, in connection with Federal, State, and municipal allotment, pension, retirement, insurance, medical compensation, or like benefits	(1)
	(e) In the execution of tax returns for filing with the Federal or State Governments or political subdivisions thereof	(1)
	(f) To American citizens, while outside the United States, in preparation of ballots to be used in any primary, general, or other public elections in the United States or in territories under their jurisdiction	(1)
	(g) For official noncommercial use by a foregin government or by an international agency of which the Government of the United States is a member	(1)
	(h) To an official of a foreign government in circumstances where furnishing the service is an appropriate or reciprocal courtesy	(1)
	(i) To U.S. Government personnel and Peace Corps volunteers or their dependents officially stationed or traveling in a foreign country	(1)
59	Affidavit on preparation and packing of remains	(1)
60	Consular mortuary certificate	(1)
	(Items 61 through 64 vacant.)	
65	In taking depositions or executing commissions to take testimony:	
	(a) For the services of a diplomatic or consular officer. (for each hour or fraction thereof.)	37.00
	(b) For the services, if required, of a staff member of the Foreign Service as interpreter, stenographer, or typist. (For each hour or fraction thereof.)	11.00
	(c) If services of (a) or (b) above are required to be performed away from office or afterdnty hours, the charge shall be as follows for each hour or fraction thereof for:	
	(1) American employee	61.00
	(2) Foreign Service local employee	22.00
	(Transportation and incidental expenses as defined in item 93 shall be collected if applicable to services performed under (a), (b), or (c) above.)	
66	Executing commissions to take testimony in connection with foreign documents for use in criminal cases when the commission is accompanied by an order of Federal court on behalf of an indigent party as contemplated by 18 U.S.C. 3495	(1)
67	Providing seal and certificate for return of letters rogatory executed by foreign officials	12.00
	(Item Nos. 68 and 69 vacant.)	
	Decedents and decedent's estates	
70	Taking into possession under 22 U.S.C. 1175 the personal estate of any citizen who shall die within the limits of a consular district, inventorying, selling, and finally disposing thereof according to law, for each $100 of inventory value or fraction thereof	$5.00
71	Service as described under item 70 above when performed in the case of a deceased officer or employee of the United States	(1)

Item No.	Passport and citizenship services	Fee
72	Placing or removal of official seal on estates of decedents; for disbursing funds supplied by relatives and others; for forwarding to legal representative or other authorized person of securities and other instruments not negotiated (or not negotiable) by the consular officer, or evidence of bank deposits of the decedent; or for releasing on the spot against memorandum receipt and without occasion either for safekeeping on official accountability or for consular inventory and appraisal, to the legal representative or other authorized person in the country, of personal property taken into nominal possession for the explicit purpose of transfer of custody	(1)
73	Arrangements for shipping or other disposition of remains	(1)
	(Item No. 74 vacant.)	
	Copying, recording and proctoring	
75	For typing a copy of document or extract of a document. (For each 200 words or part thereof)	2.00
76	For photocopying or otherwise duplicating a document. (For each copy of each page) (This fee does not apply to such customary activities as issuance of copies of records; (1) from supplies kept for distribution, such as press releases and information leaflets; (2) as part of normal and generally reciprocal services performed by the posts's library or the library of the Department at the request of similar agencies or institutions; or (3) in lieu of or as enclosures to letters with the purpose of saving costs in preparing mail.)	.15
	(Item No. 77 vacant.)	
78	Supervising or proctoring an examination at the request of an agency or instrumentality of the Federal or a State Government by a consular or other officer, including completion of a certificate without seal, for each hour or fraction thereof, unless the cost thereof is reimbursable to the Department of State by an agency or instrumentality of the Federal or a State Government	37.00
	(Item Nos. 79 through 81 vacant.)	
	Other Special Consular Services	
82	Preparing and sending interested party messages for the primary benefit of nongovernment individuals, organizations or groups: (a) From Department of State to Foreign Service post	15.00
	(b) From a Foreign Service post to the Department of State	15.00
83	Translating of documents to assist nongovernment individuals, organizations, or groups. (For each quarter hour or fraction thereof of staff employee time.)	3.00
84	U.S. Selective Service Registration in a foreign country	(2)
85	Distribution of U.S. Treasury checks to Federal beneficiaries	(1)
86	Searching for and forwarding a document requested from a Foreign Service post by a nongovernment individual, organization, or group (for each document)	6.00
	(Item Nos. 87 through 90 vacant)	
91	Collection of fees by a Foreign Service post for: Services performed by Department of State offices within the United States under this schedule of fees; services performed under sec. 6.14 of title 22, Code of Federal Regulations (Freedom of Information services)	(1)
	Exemption for Federal agencies and corporations	
92	Any and all services (unless above designated "no exceptions") performed for the official use of the Government of the United States or of any corporation in which the Federal Government or its representative shall own the entire outstanding capital stock	(1)
	Service rendered away-from-office of after-duty-hours in a foreign country	
93	Except for instances of common disaster (i.e. ship wrecks, air crashes, etc.) or evacuations, a surcharge for services when rendered elsewhere than at a Foreign Service post or afterduty hours at the request of the parties, shall be added to the regular fee for each quarter hour or fraction thereof for: (1) American employee	6.00
	(2) Foreign Service local employee	3.00
	(In addition to the surcharge prescribed above, transportation and other incidental costs actually and necessarily incurred by officers or staff employees of the Foreign Service shall be collected from the persons requesting the performance of such services. Such collections shall not be considered as part of the official fees but shall be recorded as deposit funds and accounted for as such.)	

[1] No fee.
[2] Reciprocal.
[3] Per $100 value.

§ 22.2 Requests for services in the United States.

(a) *Requests for records.* Requests by the file subject or his/her authorized agent for services involving U.S. passport applications and related records, including consular birth and marriage records, shall be addressed to the Passport Office, Department of State, Washington, D.C. 20524. Requests for consular birth records should specify if a Consular Report of Birth (long form) or Certification of Birth (short form) is desired. Requests for certified copies of Report of Death of an American citizen shall be addressed to Office of Special Consular Services, Department of State, Washington, D.C. 20520. Advance remittance of the exact fee is required for each service.

(b) *Authentication services.* Requests for authentication services including documents presented to the Department of State for authentication, accompanied by remittance of the exact total fee chargeable, shall be addressed to the Authentication Officer, Department of State, Washington, D.C. 20520.

§ 22.3 Remittances in the United States.

(a) *Remittances in the United States.* Remittances shall be in the form either of (1) check or bank draft drawn on a bank in the United States, (2) money order, postal, international or bank, or (3) U.S. currency. Remittances shall be made payable to the order of the Department of State. The Department will assume no responsibility for cash which is lost in the mail.

(b) *Exact payment of fees.* Fees must be paid in full prior to issuance of requested documents. If uncertainty as to the existence of a record or as to the number of sheets to be copied precludes remitting the exact fee chargeable with the request, the Department of State will inform the interested party of the exact amount required.

§ 22.4 Requests for services, Foreign Service.

Officers of the Foreign Service shall charge for official services performed abroad at the rates prescribed in this schedule, in coin of the United States or at its representative value in exchange (22 U.S.C. 1202). For definition of representative value in exchange, see § 23.4 of this chapter. No fees named in this schedule shall be charged or collected for the official services to American vessels and seamen (22 U.S.C. 1186). The term "American vessels" is defined to exclude, for the purposes of this schedule, undocumented American vessels and the fees prescribed herein shall be charged and collected for such undocumented vessels. However, the fees prescribed herein shall not be charged or collected for American public vessels, which includes any vessel owned or operated by a U.S. Government department or agency and engaged exclusively in official business on a non-commercial basis. This schedule of fees shall be kept posted in a conspicuous place in each Foregin Service office, subject to the examination of all persons interested therein (22 U.S.C. 1197).

§ 22.5 Remittances to Foreign Service posts.

Remittances to Foreign Service posts from persons in the United States in payment of official fees and charges or for the purpose of establishing deposits in advance of rendition of services shall be in a form acceptable to the post, drawn payable to the "American Embassy (name of city)" (or American Legation, American Consulate General, or American Consulate, as the case may be). This will permit encashment of negotiable instruments for deposit in the Treasury, when not negotiated locally, see § 23.2 of this chapter.

(a) *Time at which fees become payable.* Fees are due and payable prior to issuance or delivery to the interested party of a signed document, a copy of a record, or other paper representative of a service performed.

(b) *Receipts for fees; register of services.* Every officer of the Foreign Service responsible for the performance of services as enumerated in the Schedule of Fees for Consular Services-Department of State and Foreign Service (§ 22.1), shall give receipts for fees collected for the official services rendered, specifying the nature of the service and numbered to correspond with entries in a register maintained for the purpose (22 U.S.C. 1192, 1193, and 1194). The register serves as a record of official acts performed by officers of the Foreign Service in a governmental or notarial capacity, corresponding in this regard with the record which notaries are usually expected or required to keep of their official acts, see § 92.2 of this chapter.

(c) *Deposits to guarantee payment of fees or incidental costs.* When the amount of any fee is determinable only after initiation of the performance of a service, or if incidental costs are involved, the total fee and incidental costs shall be carefully estimated and an advance deposit required, subject to refund of any unused balance to the person making the deposit.

§ 22.6 Refund of fees.

Fees which have been collected for deposit in the Treasury are refundable (a) as specifically authorized by law (see 22 U.S.C. 214a concerning passport fees erroneously charged persons excused from payment, 22 U.S.C. 216 concerning passport fees in cases where the appropriate representative in the United States of a foreign government refuses a visa, and 46 U.S.C. 8 concerning fees improperly imposed on vessels or seamen), (b) when the principal officer at the consular post where the fee was collected (or the officer in charge of the consular section at a combined diplomatic consular post) finds upon review of the facts that the collection was erroneous under applicable law and regulation is made by the Department of State with a view to payment of the refund in the United States in cases in which it is impracticable to have the facts reviewed and refund effected at the direction of the responsible consular office. See § 13.1 of this chapter concerning refunds of fees improperly exacted by consular officers who have neglected to return the same to the Treasury.

§ 22.7 Collection and return of fees.

No fees other than those prescribed in the Schedule of fees, § 22.1, or by or pursuant to an act of Congress, shall be charged or collected by officers of the Foreign Service for official services performed abroad (22 U.S.C. 1201). All fees received by any officer of the Foreign Service for services rendered in connection with the duties of his/her office or as a consular officer shall be accounted for and paid into the Treasury of the United States (22 U.S.C. 99, 1942 Edition, as amended by sec. 1131 (26) of the Foreign Service Act of 1946, 60 Stat. 1037, and as modified by 22 U.S.C. 812 of the 1952 Edition). For receipt, registry, and numbering provisions, see § 22.5(c).

§ 22.8 Effective date.

The charges hereby established will become effective on July 25, 1977 with respect to all services rendered pursuant to requests received in the Department of State and the Foreign Service on or after the effective date.

For the Secretary of State.

Dated: May 11, 1977.

JOAN M. CLARK,
Acting Deputy Under Secretary for Management.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 733-3]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions to Fresno County Air Pollution Control District's Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the Fresno County Air Pollution Control District's Rules and Regulations which were submitted to EPA by the California Air Resources Board for inclusion in the California State Implementation Plan. These revisions were submitted on November 10, 1976. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATE: Comments may be submitted up to 30 days following the date of publication of this notice.

ADDRESS: Send comments to: Regional Administrator, Attn: Air & Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco, Calif. 94111.

Availability of Documents: Copies of the proposed revision are available for public inspection during normal business hours at the EPA Region IX office at the above address and at the following locations:

Fresno County Air Pollution Control District, 1246 "L" Street, Fresno, Calif. 93721.

California Air Resources Board, 1709 11th Street, Sacramento, Calif. 95814.

Public Information Reference Unit, Room 2922 (EPA Library), 401 "M" Street SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section (415-556-7288).

SUPPLEMENTARY INFORMATION: The November 10, 1976 submittal contained revisions to the following rules:

REGULATION IV—PROHIBITIONS

Rule 407—Disposal of Solid and Liquid Wastes.
Rule 408—Fuel Burning Equipment.

Under section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX office.

(Sec. 110, Clean Air Act, as amended (42 U:S.C. 1857c-5).)

Dated: May 11, 1977.

PAUL DE FALCO, JR.,
Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to El Dorado County Air Pollution Control District Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the El Dorado County Air Pollution Control District Rules and Regulations which were submitted to EPA by the California Air Resources Board for inclusion in the California State Implementation Plan. These revisions were received on July 25, 1973, April 10, 1975, and August 2, 1976. Since both the April 10, 1975 and August 2, 1976 submittals represent the most recent set of rules and regulations for this Air Pollution Control District, they will be addressed in this notice. Regulations concerning New Source Review are not being considered in this notice, and will be the topic of a separate FEDERAL REGISTER notice. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to June 27, 1977.

ADDRESS: Send comments to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco, CA 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn: David R. Souten, 100 California Street, San Francisco, CA 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: The April 10, 1975 and August 2, 1976

submittals contained revisions to the following Regulations:

Regulation I—Definitions
Regulation II—Prohibitions
Regulation III—Open Burning
Regulation IV—Permit Systems Conditions
Regulation VI—Fees
Regulation VII—Procedure Before The Hearing Board

Pursuant to Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

El Dorado County Air Pollution Control District, 2850 Cold Springs Road, Placerville, CA 95667.
California Air Resources Board, 1709 11th Street, Sacramento, CA 95814.
Environmental Protection Agency, Region IX, 100 California Street, San Francisco, CA 94111.
Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, SW., Washington D.C. 20460.

(Sec 110, Clean Air Act, as amended. (42 U.S.C. 1857c–5).)

Dated: May 3, 1977.

PAUL DE FALCO, Jr.,
Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to Monterey Bay Unified Air Pollution Control District's Rules and Regulations for Monterey, Santa Cruz, and San Benito Counties in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the Monterey Bay Unified Air Pollution Control District's Rules and Regulations which were submitted to EPA by the California Air Resources Board for inclusion in the California State Implementation Plan. These revisions were received on July 25, 1973, January 22, 1974, October 23, 1974, January 10, 1975, April 10, 1975, July 22, 1975, November 3, 1975, and November 10, 1976. Regulations concerning Emergency Episodes, New Source Review, Vapor Recovery, and In-stack Monitoring are not being considered in this notice, and will be the topic of separate FEDERAL REGISTER notices. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to June 27, 1977.

ADDRESSES: Send comments to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco CA 94111.

Availability of documents: Copies of the proposed revision are available for public inspection during normal business hours at the EPA Region IX office at the above address and at the following locations:

Monterey Bay Unified Air Pollution Control District, 1270 Nativided Road, Room 105, Salinas CA 93901.

California Air Resources Board, 1709 11th Street, Sacramento CA 95814.

Public Information Reference Unit. Room 2922 (EPA Library), 401 "M" Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

David R. Souten, Chief, California SIP Section, 415–556–7288.

SUPPLEMENTARY INFORMATION: On July 25, 1973, January 22, 1974, and July 19, 1974 revisions to the Monterey-Santa Cruz Unified APCD and the San Benito County APCD Rules and Regulations were submitted to EPA. On July 1, 1974, these agencies joined together to form the Monterey Bay Unified APCD. On October 23, 1974, January 10, 1975, April 10, 1975, July 22, 1975, and November 10, 1976 revised Rules and Regulations of the Monterey Bay Unified APCD were submitted to EPA. They include:

REGULATION I

Rule 100, Title
Rule 101, Definitions
Rule 102, Standard Conditions
Rule 103, Effective Date
Rule 104, Arrests and Notices to Appear
Rule 105, Separate Zone
Rule 106, Increments of Progress

REGULATION II

Rule 214, Public Availability of Emission Data

REGULATION III

Rule 300, Permit Fees
Rule 301, Permit Fee Schedules
Rule 302, Analysis Fees
Rule 303, Technical Reports—Charges For

REGULATION IV

Rule 400, Ringelmann Chart
Rule 401, Wet Plumes
Rule 402, Nuisance
Rule 403, Particulate Matter
Rule 404, Sulfur Compounds and Nitrogen Oxides
Rule 405, Exceptions
Rule 406, Additional Exception
Rule 407, Open Outdoor Fires
Rule 408, Incinerator Burning
Rule 409, Burning of Agricultural Wastes
Rule 410, Range Improvement Burning
Rule 411, Forest Management Burning
Rule 412, Sulfur Content of Fuels
Rule 413, Removal of Sulfur Compounds
Rule 414, Reduction of Animal Matter
Rule 415, Circumvention
Rule 416, Organic Solvents
Rule 417, Storage of Petroleum Products
Rule 419, Organic Liquid Loading
Rule 420, Effluent Oil Water Separators
Rule 421, Violation of Other Statutes, etc.
Rule 422, Burning of Wood Wastes
Rule 424, New Source Performance Standards
Rule 425, Emission Standards for Hazardous Air Pollutants

REGULATION V

Rule 500, Definitions
Rule 501, Permits
Rule 502, Approved Orchard Heaters
Rule 503, Condition of Heaters
Rule 504, Classification of Heaters
Rule 505, Non-Complying Heaters
Rule 506, Prohibition of Sale of Heaters
Rule 507, Burning Rubber and Other Substances
Rule 508, Fees

REGULATION VI

Rule 600, General
Rule 601, Filing Petitions
Rule 602, Contents of Petitions
Rule 603, Petitions for Variances
Rule 604, Appeal from Denial
Rule 605, Failure to Comply with Rules
Rule 606, Answers
Rule 607, Withdrawal of Petition
Rule 608, Place of Hearing
Rule 609, Notice of Hearing
Rule 610, Evidence
Rule 611, Record of Proceedings
Rule 612, Preliminary Matters
Rule 613, Official Notice
Rule 614, Continuance
Rule 615, Decision
Rule 616, Effective Date of Decision

REGULATION VII

Rule 700, General
Rule 701, Sampling Stations
Rule 702, Air Sampling
Rule 703, Reports
Rule 704, Continuing Program of Voluntary Cooperation
Rule 705, Plans
Rule 706, Application of Rules and Regulations
Rule 707, Episode Notification
Rule 708, Episode Criteria
Rule 709, First Stage Episode Actions
Rule 710, Second Stage Episode Actions
Rule 711, Third Stage Episode Actions
Rule 712, Termination of Episodes
Rule 713, Enforcement

REGULATION VIII

Rule 800, General
Rule 801, Order for Abatement
Rule 802, Filing Petitions
Rule 803, Contents of Petitions
Rule 804, Scope of Order
Rule 805, Findings
Rule 806, Pleadings
Rule 807, Evidence
Rule 808, Failure to Comply with Rules
Rule 809, Withdrawal of Petition
Rule 810, Place of Hearing
Rule 811, Notice of Hearing
Rule 812, Preliminary Matters
Rule 813, Official Notice
Rule 814, Continuance
Rule 815, Order and Decision
Rule 816, Effective Date of Decision

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Comments received will be available for public inspection at the Region IX office and the EPA Public Information Reference Unit.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to San Joaquin County Air Pollution Control, Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the San Joaquin County Air Pollution Control District Rules and Regulations which were submitted to EPA by the State of California for inclusion in the California State Implementation Plan. These revisions were received on November 10, 1976. Regulations concerning New Source Review and Vapor Recovery are not being considered in this notice, and will be the topic of separate FEDERAL REGISTER notices. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to June 27, 1977.

ADDRESS: Send comments to: Regional Administrator, Attn.: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco, CA 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn.: David Souten, 100 California Street, San Francisco, CA 94111 (415–556–7288).

SUPPLEMENTARY INFORMATION: The November 10, 1976, submittal contained revisions to the following rules:

Rule	
102	Definitions.
103	Confidential information.
103.1	Inspection of public records.
104	Enforcement.
105	Order of abatement.
111	Circumvention.
112	Arrests and notices to appear.
301(f)	Permit fee penalty.
305(a)	Hearing board fees.
402	Exceptions.
411.2	Transfer of gasoline into vehicle fuel tanks.
416.1	Agricultural burning.
501	Applicable provisions of the health and safety code.
504(e)	Contents of petitions.
511	Notice of hearing.

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX Office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attn.: David R. Souten, 100 California Street, San Francisco, CA 94111 (415-556-7288).

SUPPLEMENTARY INFORMATION: The January 10, 1975, July 22, 1975, and August 2, 1976, submittals contained revisions to the following Regulations:

Regulation:
I—Definitions.
II—Prohibitions.
III—Open burning.
IV—Permit systems conditions.
VI—Fees.
VII—Procedure before the hearing board.

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting writting comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

Plumas County Air Pollution Control District, Courthouse Annex, Quincy, CA 95971.
California Air Resources Board, 1709 11th Street, Sacramento, CA 95814.
Environmental Protection Agency, Region IX, 100 California Street, San Francisco, CA 94111.
Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington D.C. 20460.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c-5).)

Dated: May 3, 1977.

PAUL DE FALCO, Jr.,
Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revisions in Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR), to the Rules and Regulations in the State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of, and invite public comments on: The rules and regulations of and their revisions for the Southern California APCD, and for the Counties of Los Angeles, Orange, San Bernardino, and Riverside; and also sections of the California Health and Safety Code. These were submitted to EPA by the California Air Resources Board for inclusion in the California State Implementation Plan on: July 25, 1973; January 22, July 19, and October 23, 1974; January 10, April 10, July 22, and November 3, 1975; February 10, April 21, August 2, and November 10, 1976; and February 10, 1977. Regulations concerning New Source Review, Emergency Episodes, Vapor Recovery, and In-Stack Monitoring are not being considered in this notice and will be the topic of separate FEDERAL REGISTER notices. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to June 27, 1977.

ADDRESS: Send comments to:

Regional Administrator,
Attention: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco, Calif. 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Attention: David R. Souten, 100 California Street, San Francisco Calif. 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: The 1973-1977 submittal contained revisions to the following rules:

Southern California Air Pollution Control District Rules—common to San Bernardino, Riverside, Orange, and Los Angeles Counties and the Metropolitan Los Angeles Intrastate AQCR.

REGULATION I—GENERAL PROVISIONS

Rule
101 Title.
102 Definition of terms.
103 Definition of geographical areas.
104 Reporting of source test data and analysis.
105 Authority to arrest.
106 Increments of progress.

REGULATION II—PERMITS

Those parts of Regulation II not part of New Source Review are:

208 Permit for open burning.
218 Stack monitoring.

REGULATION IV—PROHIBITIONS

401 Visible emissions.
402 Nuisance.
403 Fugitive dust.
404 Particulate matter concentration.
405 Solid particulate matter—weight.
407 Liquid and gaseous air contaminants.
408 Circumvention.
409 Combustion contaminants.
430 Breakdown provisions.
431 Sulfur content of fuels.
432 Gasoline specifications.
441 Research operations.
442 Usage of solvents.
443 Labeling of solvents.
461 Gasoline transfer and dispensing.
462 Organic liquid loading.
463 Storage of organic liquids.
464 Oil-effluent water separator.
465 Vacuum producing devices.
466 Pumps and compressors.
467 Safety pressure relief valves.
468 Sulfur recovery units.
469 Sulfuric acid units.
470 Asphalt air blowing.
471 Asphalt or coal tar equipment.
472 Reduction of animal matter.
473 Disposal of liquid and solid wastes.
474 Fuel burning equipment—oxides of nitrogen.
475 Electric power generating equipment.
476 Steam generating equipment.

REGULATION V—PROCEDURE BEFORE THE HEARING BOARD

501 General.
502 Filing petitions.
503 Contents of petitions.
504 Petitions for variances.
505 Appeal from denial.
506 Failure to comply with rules.
507 Pleadings.
508 Dismissal of petition.
509 Place of hearing.
510 Notice of hearing.
511 Evidence.
512 Preliminary matters.
513 Official notice.
514 Continuances.
515 Decision.
516 Effective date of decision.

Rule
517 Lack of permit.
518 Findings.

Regulation VI has been rescinded and replaced by California Health and Safety Codes, Chapter 957, Division 26, Sections 43210 and 41860.

Regulation VII has been submitted by the Southern California APCD, but is not being considered in this notice and will be the topic of separate FEDERAL REGISTER notices.

REGULATION VII—EMERGENCIES

Rule
701 General.
702 Air monitoring stations.
703 Air monitoring summaries.
704 Episode criteria.
705 Episode notification.
706 Episode declaration.
707 Plans.
708 Radio communications system.
709 First stage episode actions.
710 Second stage episode actions.
711 Third stage episode actions.
712 Interdistrict coordination.
713 Enforcement.
714 Termination of episodes.
715 Scientific advisory committee.

REGULATION VIII—ORDERS FOR ABATEMENT

801 General.
802 Orders for abatement.
803 Filing petitions.
804 Contents of petition.
805 Scope of order.
806 Findings.
807 Pleadings.
808 Evidence.
809 Failure to comply with rules.
810 Dismissal of petition.
811 Place of hearing.
812 Notice of hearing.
813 Preliminary matters.
814 Official notice.
815 Continuance.
816 Order and decision.
817 Effective date of decision.

County APCD Rules not incorporated into Southern California APCD but still part of the Metropolitan Los Angeles AQCR, and contained within the Metropolitan Los Angeles Intrastate AQCR.

SAN BERNARDINO COUNTY APCD

REGULATION I—GENERAL PROVISIONS

Rule
5(a) Public availability of emission data.

REGULATION III—FEES

40 Permit fees.
42 Hearing board fees.

REGULATION IV—PROHIBITIONS

53A Specific air contaminants.
57 Open fires.
57.1 Open burning in agricultural operations.
57.2 Forest management burning.
73 Dry sandblasting.

RIVERSIDE COUNTY APCD

REGULATION III—FEES

42 Hearing board fees.

REGULATION IV—PROHIBITIONS

53 Specific air contaminants.
57 Open fires.

ORANGE COUNTY APCD

REGULATION IV—PROHIBITIONS

53 Specific air contaminants.

LOS ANGELES COUNTY APCD

REGULATION III—FEES

Rule
42 Hearing Board Fees

State of California State Health and Safety Code, Sections 39000 through 43834 as identified by Assembly Bill No. 1758 and approved by the Governor on September 22, 1975.

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX Office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

Southern California Air Pollution Control District, 350 West Mission Blvd., Room 217, Pomona, Calif. 91766.
California Air Resources Board, 1709 - 11th Street, Sacramento, Calif. 95814.
Environmental Protection Agency, Region IX, 100 California Street, San Francisco, Calif. 94111.
Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street SW., Washington, D.C. 20460.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c-5).)

Dated: May 2, 1977.

PAUL DE FALCO, Jr.,
Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to Imperial County Air Pollution Control Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the Imperial County Air Pollution Control District's Rules and Regulations which were submitted to EPA by the California Air Resources Board for inclusion in the California State Implementation Plan. These revisions were received on November 10, 1976. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATES: Comments may be submitted up to June 27, 1977.

ADDRESS: Send comments to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Programs Branch, California SIP Section, EPA, Region IX, 100 California Street, San Francisco CA 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, Region IX, Attn: David R. Souten, Chief, California SIP Section, 100 California Street, San Francisco CA 94111, 415-556-7288.

SUPPLEMENTARY INFORMATION: The November 10, 1976 submittal contained revisions to the following rules:

Rule 100, Definitions
Rule 114.5, Exception
Rule 117, Nuisances
Rule 131.5, Livestock Feed Yards
Rule 148.D, Miscellaneous Exceptions

Pursuant to section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

Imperial County Air Pollution Control District, 940 West Main Street, El Centro CA 92243.
California State Air Resources Board, 1709 11th Street, Sacramento CA 95814.
Environmental Protection Agency, Region IX, 100 California Street, San Francisco CA 94111.
Public Information Reference Unit, Room 2922 (EPA Library), 401 "M" Street, SW., Washington, D.C. 20460.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c-5).)

Dated: May 2, 1977.

PAUL DE FALCO, Jr.,
Regional Administrator.

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to Sacramento County Air Pollution Control Rules and Regulations in State of California

AGENCY: Environmental Protection Agency.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: It is the purpose of this notice to acknowledge receipt of and invite public comments on revisions to the Sacramento County Air Pollution Control District Rules and Regulations which were submitted to EPA by the State of California for inclusion in the California State Implementation Plan. These revisions were received by November 10, 1976. Regulations concerning New Source Review and Vapor Recovery are not being considered in this notice, and will be the topic of a separate FEDERAL REGISTER notice. The EPA solicits comments regarding the desirability of approving or disapproving the rules and regulations being considered, especially as to their consistency with the Clean Air Act.

DATE: Comments may be submitted up to June 27, 1977.

ADDRESS: Send comments to: Regional Administrator, Attn: Air and Hazardous Materials Division, Air Programs Branch, EPA, Region IX, 100 California Street, San Francisco, CA 94111.

FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Material Division, Environmental Protection Agency, Attn: David Souten, San Francisco, CA 94111. 415–556–7288.

SUPPLEMENTARY INFORMATION: The November 10, 1976 submittal contained revisions to the following rules and regulations:

Rule	
1	Title.
2	Definitions.
11	Storage of Petroleum Products.
12	Organic Liquid Loading.
14	Transfer of Gasoline into Vehicle Fuel Tanks.
21	Dust and Condensed Fumes.
22a	Open Fires.
22b	Incinerator Burning.
24	Specific Contaminants.
25	Organic Solvents.
27	Orchard Heaters.
28	Gasoline Storage.
29	Circumvention.
33	Contents of Petition.
39	Notice of Hearing.
44	Decision.
70	Permit Fees.
71	Hearing Board Fees.
90	Agricultural Burning Permits.
92	"No Burn" Days.
93	Preparation of Agricultural Waste.
94	Limitation on Daily Burning Rate.
95	Other Burning Limitations.
96	Emergency Permits.
97	Agricultural Waterway Delivery and Drainage Systems.
98	Permits by Fire Protection Agencies.

Definitions List added to Regulation VII.

Pursuant to section 110 of the Clean Air Act as amended and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as an SIP revision. The Regional Administrator hereby issues this notice setting forth these revisions as proposed rulemaking and advises the public that interested persons may participate by submitting written comments to the Region IX Office. Relevant comments received on or before June 27, 1977, will be considered. Comments received will be available for public inspection at the Region IX Office and the EPA Public Information Reference Unit.

Copies of the proposed revision are available for public inspection during normal business hours at the following locations:

Sacramento County Health Agency, Department of Community Health, 3701 Branch Center Road, Sacramento, California 95827.

California Air Resources Board, 1709 11th St., Sacramento, California 95814.

Environmental Protection Agency, Region IX, 100 California Street, San Francisco, CA 94111.

Public Information Reference Unit, Room 2922 (EPA Library), 401 M Street, SW., Washington, D.C. 20460.

(Sec. 110, Clean Air Act, as amended, (42 U.S.C. 1857c–5).)

Dated: May 3, 1977.

DEPARTMENT OF TRANSPORTATION

Materials Transportation Bureau

[49 CFR Part 171]

[Docket No. HM–150; Notice No. 77–4]

RADIOACTIVE MATERIALS IMPORTED INTO THE UNITED STATES

Quantity Limitations

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Proposed Rule Making.

SUMMARY: This proposed rule would permit the import into the United States of packages of Type A and low specific activity radioactive materials which have been prepared in accordance with the quantity limitations of the most recent International Atomic Energy Agency (IAEA) standards. The proposal would permit such IAEA quantity limitations to be used in place of existing DOT quantity limitations, since differences between the two requirements are small but nevertheless hinder importation of Type A and low specific activity materials.

DATE: Comments must be received on or before June 27, 1977.

ADDRESSES: Comments must be addressed to Docket Section, Office of Hazardous Materials Operations, U.S. Department of Transportation, 2100 2nd Street SW., Washington, D.C. 20590. Five copies of comments are requested but not required.

FOR FURTHER INFORMATION CONTACT:

Dr. C. H. Thompson, Acting Director, Office of Hazardous Materials Operations, 2100 2nd Street SW., Washington, D.C. 20590, phone 202–426–0656.

SUPPLEMENTARY INFORMATION: Many countries and international transport organizations throughout the world have adopted the standards of the International Atomic Energy Agency's Regulations for the Safe Transport of Radioactive Materials, 1973 Revised Edition, and the adoption of these standards by other countries is imminent. Since the allowable quantity limits for Type A quantities and for low specific activity radioactive materials as set forth in the 1973 IAEA Regulations are at variance with the limits established in current DOT Hazardous Materials Regulations, packages of such radioactive materials imported into the United States, while meeting the standards of the originating country or international transport organizations, and meeting U.S. requirements except for quantity, cannot be transported in commerce in the United States without further repacking. Primary drafters are Alfred W. Grella and Douglas A. Crockett.

The Materials Transportation Bureau is considering an amendment to bring U.S. reouirements into closer conformity with 1973 IAEA Standards. However, until final action is taken in that regard, to avoid further interference with import activities involving radioactive materials, the rule proposed herein would authorize the acceptance and transportation of packages meeting the IAEA Standards for Type A or low specific activity radioactive materials.

The proposal would not result in a significant environmental or economic impact, as the net effect of the proposal is to marginally extend domestic quantity limitations for existing packagings. Domestic requirements concerning packaging, marking, labeling and shipping papers are not affected.

In consideration of the foregoing, it is proposed to amend Part 171 of Title 49, Code of Federal Regulations, as follows:

1. In § 171.7 paragraph (d) (10) would be revised to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(10) IAEA "Regulations for the Safe Transport of Radioactive Materials", 1967 Edition and 1973 Revised Edition, Safety Series No. 6.

* * * * *

2. In § 171.12, a new paragraph (e) would be added to read as follows:

§ 171.12 Import and export shipments.

* * * * *

(e) Notwithstanding the quantity limitations of § 173.389(c) and (L) of this subchapter, any package of radioactive materials which otherwise conforms to the requirements of this subchapter applicable to Type A quantities or low specific activity materials may be offered and accepted for transportation, and transported within the United States, under the following conditions:

(1) The package is being imported into the United States or is passing through in the course of being shipped between places outside the United States.

(2) The country or origin has adopted the Type A quantity limitations and low specific activity materials definition set forth in the IAEA Regulations for the Safe Transport of Radioactive Materials, 1973 Revised Edition.

(3) The contents of the package have been assigned as a Type A quantity or a low specific activity material in accordance with the IAEA Type A quantity limitations and low specific activity materials definition adopted by the origin country. (For fissible radioactive materials or Type B quantities, see § 173.393b of this Chapter.)

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e) and paragraph (a)(4) of App. A to Part 102.)

NOTE.—The Materials Transportation Bureau has determined that this document does not contain a major proposal requiring the preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Issued in Washington, D.C., on May 20, 1977.

Dr. C. H. THOMPSON,
Acting Director, Office of Hazardous Materials Operations.

[FR Doc.77–15084 Filed 5–25–77;8:45 am]

National Highway Traffic Safety Administration

[49 CFR Part 571]

[Docket No. 75–16; Notice 11]

AIR BRAKE SYSTEMS

Agricultural Commodity Trailers

AGENCY: National Highway Traffic Safety Administration.

ACTION: Proposal.

SUMMARY: The proposal would extend indefinitely an existing option for specialized agricultural trailers under Standard No. 121, *Air Brake Systems*, of meeting the parking brake requirements of the standard or of the air-actuated "breakaway" requirements of the Bureau of Motor Carrier Safety. The option exists because the working environment of the trailers can lead to disabling of the parking brakes, and a solution to the underlying technical problems has not been perfected.

DATES: Comments must be received on or before June 20, 1977. *Proposed effective date.* Date of publication of the final rule in the FEDERAL REGISTER.

ADDRESSES: Comments should refer to the docket number and be submitted to: Room 5108, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Stephen Sacks, Office of Crash Avoidance, National Highway Traffic Safety Administration, Washington, D.C. 20590, 202–426–21531.

SUPPLEMENTARY INFORMATION: Standard No. 121 (49 CFR 571.121) permits some bulk agricultural commodity trailers the option, until June 30, 1977, of meeting the parking brake requirements of the standard (actuation by an energy source unaffected by air loss in the service brake system) or the air-actuated "breakaway" system that complies with Bureau of Motor Carrier Safety (BMCS) requirements (49 CFR 393.43). Most manufacturers use the stored energy of a compressed spring to apply and maintain the required braking force required by S5.6.3 of Standard No. 121.

Manufacturers petitioned for modification of this parking brake requirement in the case of some agricultural trailers because they often are dropped off near the fields by the highway tractors, and then towed into fields by agricultural tractors. The farm tractors do not have air compressors to recharge the air supply and release the brakes in order to move the vehicles. When the spring brakes are mechanically released to allow movement they are often not reengaged for highway operation, permitting the trailer to operate on the highway without a secondary means of braking. To avoid the hazard of on-highway operation with disengaged spring brakes, the agency adopted the option for a limited period.

Wesco Truck and Trailer Sales has petitioned for extension of the option to December 31, 1978, and Utility Trailer Manufacturing Company has petitioned for its indefinite continuation. The agency has an outstanding proposal to broaden the available means to meet the parking and emergency brake requirements for all trailers (40 FR 56920; December 5, 1975). However, because of the comprehensive nature of the proposed revision, it will not be acted on in the immediate future.

Until the broad proposal is made final or until another solution is available, the agency has tentatively decided that the exclusion for these specialized trailers from the parking and emergency braking requirement should continue, as long as the vehicles are manufactured to comply with the BMCS requirements noted earlier. Accordingly, it is proposed that the temporary exclusion contained in S5.6 and S5.8 of the standard be made permanent. The agency would like to advise commenters that new requirements could be proposed in the future as part of any proposal to modify the standard's parking brake requirements.

Wesco also asked that the option be extended to all trailers to avoid problems of definition between those trailers that are and those that are not allowed the option. The agency believes that a more reasonable way to resolve definitional problems is to make a finding of status in the case of any particular trailer type which is not easily classified. Requests for interpretation of the agricultural trailer definition may be addressed to the Office of Chief Counsel at the address noted above. For this reason, Wesco's petition for expansion of the option to all trailer types is denied.

The economic and inflationary impacts of this rulemaking have been evaluated in accordance with OMB Circular A–107, and an Economic Impact Statement is not required.

Interested persons are invited to submit comments on the proposal. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The NHTSA will continue to file relevant material as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

The program official and lawyer principally responsible for the development of this proposal are Stephen Sacks and Tad Herlihy, respectively.

(Sec. 103, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 49 CFR 601.8).

Issued on May 20, 1977.

ROBERT L. CARTER,
Associate Administrator, Motor Vehicle Programs.

[FR Doc.77–14903 Filed 5–20–77;4:02 pm]

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Determination of Threatened Status for Three Species of Reptiles From Mona Island, P.R., With a Proposal for Critical Habitat

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Proposed rulemaking.

SUMMARY: The Director, U.S. Fish and Wildlife Service (hereinafter, the Director and the Service, respectively), hereby issues a proposed rulemaking, pursuant to the Endangered Species Act of 1973 (16 U.S.C.1531–1543, 87 Stat. 884, hereinafter the Act), which would determine three species of reptiles, the Mona boa (*Epicrates monensis*), the Mona ground iguana (*Cyclura stejnegeri*), and the Mona blind snake (*Typhlops monensis*), to be threatened species and which would determine critical habitat for these species. These species occur on Mona Island, Commonwealth of Puerto Rico.

DATES: All relevant comments and materials with regard to this proposed rulemaking received no later than August 24, 1977, will be considered by the Director, U.S. Fish and Wildlife Service.

ADDRESSES: Comments and materials concerning this proposed rulemaking preferably in triplicate, should be sent to the Director (FWS/OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, Suite 1100, 1612 K Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (202-343-4646).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4(a) of the Act states:

General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) The present or threatened destruction, modification, or curtailment of its habitat or range;

(2) Overutilization for commercial, sporting, scientific, or educational purposes.

(3) Disease or predation;

(4) The inadequacy of existing regulatory mechanisms; or

(5) Other natural or manmade factors affecting its continued existence.

This authority has been delegated to the Director.

The three reptiles that are the subject of this proposed rulemaking are all endemic to Mona Island, a small (13,658 acres) island located midway between the Dominican Republic and Puerto Rico. Because they live in close proximity to one another, the factors affecting the status of these species will be summarized together. It should also be noted that all species of ground iguanas (*Cyclura* sp.) and all species of Caribbean boas (*Epicrates* sp.) are listed as Appendix II species by the Convention on International Trade in Endangered Species of Wild Fauna and Flora.

SUMMARY OF FACTORS AFFECTING THE SPECIES

These findings are summarized herein under each of the five criteria of Section 4(a) of the Act. These factors, and their application to the three reptiles from Mona Island are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* At present, there are extensive plans for the development of Mona Island, which is not now inhabited. Should this development, principally an oil superport, be initiated and completed, a decline in the available habitat, especially those areas required for nesting by these species, would be expected. As such, the populations of these three reptiles would experience a serious decline in numbers.

(2) *Overutilization for commercial, sporting, scientific, or educational purposes.* This is probably not a major threat to the Mona reptiles. However, Mona boas and Mona ground iguanas are occasionally shot by hunters who come to the island to hunt the many species of introduced mammals. Protection as threatened would serve to discourage such activity.

(3) *Disease or predation.* Predation on the eggs, young, and adults of Mona reptiles by introduced mammals, primarily rats, cats, and pigs, have contributed to the scarcity of many species of native Mona animals, including the three species which are the subject of this proposed rulemaking.

(4) *The inadequacy of existing regulatory mechanisms.* There are a few existing regulatory measures to protect the Mona ground iguana. No iguanas or their eggs may be killed or collected without a special permit from the Puerto Rico Department of Natural Resources, and public hunting is not allowed during iguana nesting season. There are no specific regulatory measures regarding the Mona boa or Mona blind snake.

(5) *Other natural or manmade factors affecting its continued existence.* None.

CRITICAL HABITAT

Section 7 of the Act, entitled "Interagency Cooperation," states:

> The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of Endangered species and Threatened species listed pursuant to Section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

An interpretation of the term Critical Habitat was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of April 22, 1975 (40 FR 17764–17765).

The areas delineated below (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) may not necessarily include the entire Critical Habitat of the three species of reptiles in this proposed rulemaking, and modifications to Critical Habitat descriptions may be proposed in the future. In accordance with Section 7 of the Act, all Federal departments and agencies would be required to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat of these species found within the areas delineated below.

Until the promulgation of Section 7 regulations, all Federal departments and agencies should, in accordance with Section 7 of the Act, consult with the Secretary of the Interior with respect to any action which is considered likely to affect Critical Habitat within the delineated areas. Consultation pursuant to Section 7 should be carried out using the procedures contained in the "Guidelines to Assist the Federal Agencies in Complying with Section 7 of the Endangered Species Act of 1973" which have been made available to the Federal agencies by the Service. In addition, proposed provisions for interagency cooperation were published on January 26, 1977, in the FEDERAL REGISTER (42 FR 4868–4875) to assist Federal agencies in complying with Section 7 of the Endangered Species Act of 1973.

CRITICAL HABITAT DETERMINATION

Critical Habitat for the three species of reptiles in this proposed rulemaking includes the following areas (exclusivve of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species):

I. Mona Island, Commonwealth of Puerto Rico, Entire Island.

EFFECT OF THE RULEMAKING

The effects of these determinations and this rulemaking include, but are not necessarily limited to, those discussed below.

Endangered Species regulations already published in Title 50 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all Endangered Species. All of those prohibitions and exceptions also apply to any Threatened Species unless a Special Rule pertaining to that Threatened Species has been published and indicates otherwise. The regulations referred to above, which pertain to Endangered and Threatened Species, are found at §§ 17.21 and 17.31 of Title 50 and, for the convenience of the reader, are reprinted below:

§ 17.21 *Prohibitions.*

(a) Except as provided in Subpart A of this part, or under permits issued pursuant to § 17.22 or § 17.23, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit, or to cause to be committed, any of the acts described in paragraphs (b) through (f) of this section in regard to any endangered wildlife.

(b) *Import or export.* It is unlawful to import or to export any endangered wildlife. Any shipment in transit through the United States is an importation and an exportation, whether or not it has entered the country for customs purposes.

(c) *Take.* (1) It is unlawful to take endangered wildlife within the United States, within the territorial sea of the United States, or upon the high seas. The high seas shall be all waters seaward of the territorial sea of the United States, except waters officially recognized by the United States as the territorial sea of another country, under international law.

(2) Notwithstanding paragraph (c) (1) of this section, any person may take endangered wildlife in defense of his own life or the lives of others.

(3) Notwithstanding paragraph (c) (1) of this section, any employee or agent of the Service, any other Federal land management agency, the National Marine Fisheries Service, or a State conservation agency, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take endangered wildlife without a permit if such action is necessary to:

(i) Aid a sick, injured, or orphaned specimen; or

(ii) Dispose of a dead specimen; or

(iii) Salvage a dead specimen which may be useful for scientific study, or

(iv) Remove specimens which constitute a demonstrable but nonimmediate threat to human safety, provided that the taking is done in a humane manner; the taking may involve killing or injuring only if it has not been reasonably possible to eliminate such threat by live-capturing and releasing the specimen unharmed, in a remote area.

(4) Any taking pursuant to paragraphs (c) (2) and (3) of this section must be reported in writing to the United States Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 19183, Washington, D.C. 20036, within 5 days. The specimen may only be retained, disposed of, or salvaged in accordance with directions from Service.

(5) Notwithstanding paragraph (c) (1) of this section, any qualified employee or agent of a State Conservation Agency which is a party to a Cooperative Agreement with the Service in accordance with section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties take Endangered Species, for conservation programs in accordance with the Cooperative Agreement, provided that such taking is not reasonably anticipated to result in: (i) the death or permanent disabling of the specimen; (ii) the removal of the specimen from the State where the taking occurred; (iii) the introduction of the specimen so taken, or of any progeny derived from such a specimen, into an area beyond the historical range of the species, or (iv) the holding of the specimen in captivity for a period of more than 45 consecutive days.

(d) *Possession and other acts with unlawfully taken wildlife.* (1) It is unlawful to possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any endangered wildlife which was taken in violation of paragraph (c) of this section.

Example. A person captures a whooping crane in Texas and gives it to a second person, who puts it in a closed van and drives thirty miles, to another location in Texas. The second person then gives the whooping crane to a third person, who is apprehended with the bird in his possession. All three have violated the law—the first by illegally taking the whooping crane; the second by transporting an illegally taken whooping crane; and the third by possessing an illegally taken whooping crane.

(2) Notwithstanding paragraph (d) (1) of this section, Federal and State law enforcement officers may possess, deliver, carry, transport or ship any endangered wildlife taken in violation of the Act as necessary in performing their official duties

(e) *Interstate or foreign commerce.* It is unlawful to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, and in the course of a commercial activity, any endangered wildlife.

(f) *Sale or offer for sale.* (1) It is unlawful to sell or to offer for sale in interstate or foreign commerce any endangered wildlife.

(2) An advertisement for the sale of endangered wildlife which carries a warning to the effect that no sale may be consummated until a permit has been obtained from the U.S. Fish and Wildlife Service shall not be considered an offer for sale within the meaning of this subsection.

[40 FR 44415; Sept. 26, 1975 as amended at 40 FR 53400; Nov. 18, 1975; 41 FR 19226; May 11, 1976]

§ 17.31 *Prohibitions*

(a) Except as provided in Subpart A of this Part, or in a permit issued under this Subpart all of the provisions in § 17.21 (a) through (c) (4) shall apply to threatened wildlife.

(b) In addition to any other provisions of this Part 17, any employee or agent of the Service, of the National Marine Fisheries Service, or of a State conservation agency which is operating a conservation program pursuant to the terms of a Co-operative Agreement with the Service in accordance with section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take any threatened wildlife to carry out scientific research or conservation programs.

(c) Whenever a special rule in §§ 17.40 to 17.48 applies to a threatened species, none of the provisions of paragraphs (a) and (b) of this section will apply. The special rule will contain all the applicable prohibitions and exceptions.

[40 FR 44415; Sept. 26, 1975 as amended at 41 FR 19226; May 11, 1976]

Regulations published in the FEDERAL REGISTER of September 26, 1975 (40 FR 44412) provided for the issuance of permits to carry out otherwise prohibited activities involving Endangered or Threatened Species under certain circumstances. Such permits involving Endangered Species are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

Pursuant to Section 4(b) of the Act, the Director will notify the Governor of Puerto Rico with respect to this proposal and request his comments and recommendations before making final determinations.

PUBLIC COMMENTS SOLICITED

The Director intends that the rules finally adopted will be as accurate and effective in the conservation of any Endangered or Threatened species as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interest or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological or other relevant data concerning any threat (or the lack thereof) to these three species of reptiles.

(2) The location of and reasons why any habitat of these three species of reptiles should or should not be determined to be "Critical Habitat" as provided for by Section 7 of the Act;

(3) Additional information concerning the range and distribution of these three species.

Final promulgation of the regulations on the three species of reptiles in this proposed rulemaking will take into consideration the comments and any additional information received by the Director and such communications may lead him to adopt final regulations that differ from this proposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

This proposed rulemaking is issued under the authority contained in the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884), and was prepared by Dr. C. Kenneth Dodd, Jr., Office of Endangered Species (202–343–7814).

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Date: May 17, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter 1, Title 50 of the Code of Federal Regulations, as set forth below:

It is proposed to amend § 17.11 (i) by adding in alphabetical order the following to the list of animals:

§ 17.11 Endangered and Threatened Wildlife.

Species			Range		Status	When listed	Special rules
Common name	Scientific name	Population	Known	Portion of range where endangered or threatened			
REPTILES:							
Boa, Mona	*Epicrates monensis.*	NA	Mona Island	Entire	T		NA
Iguana, Mona ground	*Cyclura stejnegeri*	NA	do	do	T		NA
Snake, Mona blind	*Typhlops monensis.*	NA	do	do	T		NA

It is further proposed to amend 50 CFR Part 17:

2. By adding new paragraph (c) (5), (6), and (7) to proposed § 17.95 to read as follows:

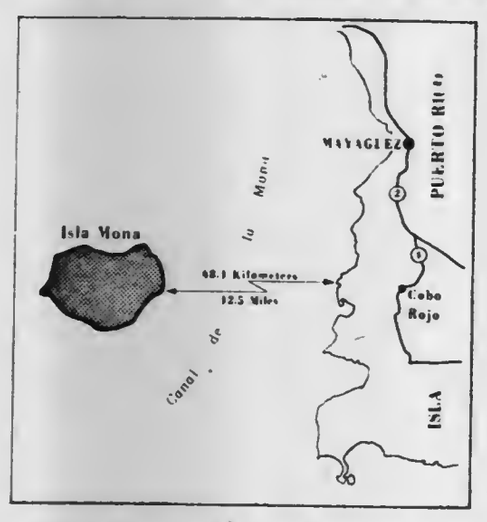
§ 17.95 Critical habitat—fish and wildlife.

* * * * * *

(c) Reptiles. * * *

(5) Mona boa.

(i) The following area (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) is Critical Habitat for the three species of Mona reptiles:



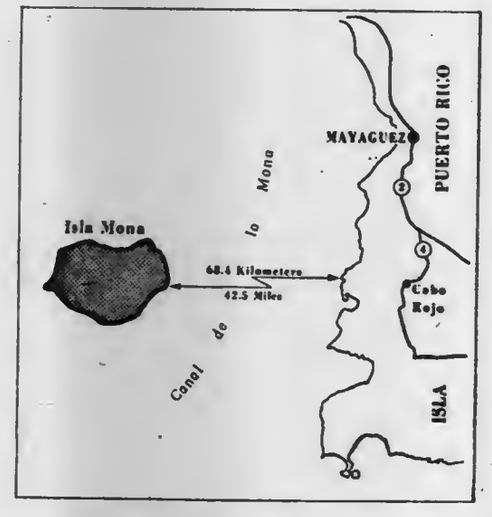
CRITICAL HABITAT FOR THREE REPTILES FROM MONA ISLAND, PUERTO RICO

(A) Mona Island, Commonwealth of Puerto Rico, Entire Island.

(ii) Pursuant to Section 7 of the Act, all Federal agencies must take such action as is necessary to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat area.

(6) Mona ground iguana.

(i) The following area (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) is Critical Habitat for the three species of Mona reptiles:



CRITICAL HABITAT FOR THREE REPTILES FROM MONA ISLAND, PUERTO RICO

(A) Mona Island, Commonwealth of Puerto Rico, Entire Island.

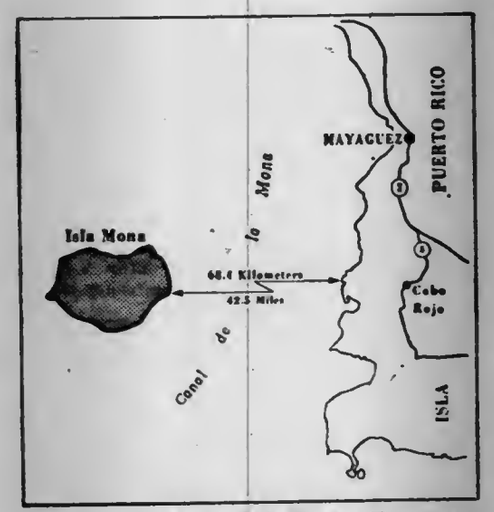
(ii) Pursuant to Section 7 of the Act, all Federal agencies must take such action as is necessary to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat area.

(7) Mona blind snake.

(i) The following area (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) is Critical Habitat for the three species of Mona reptiles:

(A) Mona Island, Commonwealth of Puerto Rico, Entire Island.

(ii) Pursuant to Section 7 of the Act, all Federal agencies must take such action as is necessary to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat area.



CRITICAL HABITAT FOR THREE REPTILES FROM MONA ISLAND, PUERTO RICO

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Endangered Status and Critical Habitat for the New Mexican Ridge-Nosed Rattlesnake

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Proposed rulemaking.

SUMMARY: The Director, U.S. Fish and Wildlife Service (hereinafter, the Director and the Service, respectively), hereby issues a proposed rulemaking, pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531–1543, 87 Stat. 884; hereinafter the Act), which would determine the New Mexican ridge-nosed rattlesnake (*Crotalus willardi obscurus*) to be an endangered species and which would determine Critical Habitat for this species. This species occurs in New Mexico and Chihuahua, Mexico.

DATES: All relevant comments and materials with regards to this proposed rulemaking received no later than August 24, 1977, will be considered by the Director, U.S. Fish and Wildlife Service.

ADDRESSES: Comments and materials concerning this proposed rulemaking preferably in triplicate, should be sent to the Director (FWS/OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240. Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, Suite 1100, 1612 K Street NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240 (202–343–4646).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 4(a) of the Act states:

General.—(1) The Secretary shall by regulation determine whether any species is an endangered species or a threatened species because of any of the following factors:

(1) The present or threatened destruction, modification or curtailment of its habitat or range;

(2) Overutilization for commercial, sporting, scientific, or educational purposes;

(3) Disease or predation;

(4) The inadequacy of existing regulatory mechanisms; or

(5) Other natural or manmade factors affecting its continued existence.

This authority has been delegated to the Director.

SUMMARY OF FACTORS AFFECTING THE SPECIES

The findings are summarized herein under each of the five criteria of Section 4(a) of the Act. These factors, and their application to the New Mexican ridge-nosed rattlesnake are as follows:

1. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The range of the New Mexican ridge-nosed rattlesnake is primarily restricted to two canyons in the Animas Mountains of New Mexico and may involve habitat of approximately one square mile or less. A small population also exists in the Sierra de San Luis, Chihuahua, Mexico. The Playas Valley is experiencing development in the form of a copper ore reduction plant and associated "company town." Evidence indicates that the plant itself will not adversely affect the rattlesnake; however, the increased usage of the Animas Mountains for recreational purposes could severely reduce available habitat and thus be detrimental to the populations of the New Mexican ridge-nosed rattlesnake.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* This is probably the chief danger to the New Mexican ridge-nosed rattlesnake. Although relatively abundant when first discovered in 1961, the attractiveness of this species, coupled with its limited geographic range, has made it a very desirable animal for scientific and commercial purposes. Dealers in live herpetological specimens have priced this species as high as $175 or more for an 18-inch specimen. The value of this animal has led to extreme habitat destruction in the process of collecting, even to the point of using dynamite to blast boulders out of the way. Evidence indicates that the New Mexican ridge-nosed rattlesnake is now rare and will continue to decline unless measures are enacted to restrict collecting.

3. *Disease or predation.* This is probably not a significant factor contributing to the current plight of the species.

4. *The inadequacy of existing regulatory mechanisms.* This species is currently listed an Endangered and protected by State law in New Mexico. The U.S. Fish and Wildlife Service has also entered into agreement with the Pruett-Wray Cattle Company, owners of the canyons where the New Mexican ridge-nosed rattlesnake lives, to close access to collectors. However, this has only been a partial deterrent to those who want a member of this species for their collection.

5. *Other natural or manmade factors affecting its continued existence.* None.

CRITICAL HABITAT

Section 7 of the Act, entitled "Interagency Cooperation," states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purposes of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

An interpretation of the term Critical Habitat was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the FEDERAL REGISTER of April 22, 1975 (40 FR 17764–17765). In addition, proposed provisions for Interagency Cooperation were published on January 26, 1977, in the FEDERAL REGISTER (42 FR 4868–4875) to assist Federal agencies in complying with Section 7 of the Endangered Species Act of 1973.

The areas delineated below do not necessarily include the entire Critical Habitat of the New Mexican ridge-nosed rattlesnake, and modifications to Critical Habitat descriptions may be proposed in the future. In accordance with Section 7 of the Act, all Federal departments and agencies would be required to insure that actions authorized, funded, or carried out

by them do not result in the destruction or modification of the Critical Habitat of the New Mexican ridge-nosed rattlesnake found within the areas delineated below.

It is recognized that the Critical Habitat area may contain manmade structures that are not of primary use to the New Mexican ridge-nosed rattlesnake. It should be stressed, however, that this is only a proposed rulemaking that is setting forth the outer parameters of the Critical Habitat in question, and that based upon data received and additional studies conducted by the Fish and Wildlife Service, the final rulemaking may differ from this proposal.

Until the issuance of additional guidelines or regulations, all Federal departments and agencies should, in accordance with Section 7 of the Act, consult with the Secretary of the Interior wtih respect to any actions which might reasonbly be expected to affect the delineated Critical Habitat.

Critical Habitat Determination

Based upon a study by Dr. Herbert S. Harris of all known localities of the subject species, Critical Habitat for the New Mexican ridge-nosed rattlesnake includes the following:

(1) Elevations above 6,200 feet in the Animas Mountains, Hidalgo County, New Mexico.

Effect of the Rulemaking

The effects of these determinations and this rulemaking include, but are not necessarily limited to, those discussed below.

Endangered Species regulations already published in Title 50 of the Code of Federal Regulations set forth a series of general prohibitions and exceptions which apply to all Endangered species. All of those prohibitions and exceptions also apply to any Threatened species unless a Special Rule pertaining to that Threatened species has been published and indicates otherwise. The regulations referred to above, which pertain to Endangered species, are found at § 17.21 of Title 50 and, for the convenience of the reader, are reprinted below:

§ 17.21 *Prohibitions.*

(a) Except as provided in Subpart A of this part, or under permits issued pursuant to § 17.22 or § 17.23, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit, or to cause to be committed, any of the acts described in paragraphs (b) through (f) of this section in regard to any endangered wildlife.

(b) *Import or export.* It is unlawful to import or to export any endangered wildlife. Any shipment in transit through the United States is an importation and an exportation, whether or not it has entered the country for customs purposes.

(c) *Take.* (1) It is unlawful to take endangered wildlife within the United States, within the territorial sea of the United States, or upon the high seas. The high seas shall be all waters seaward of the territorial sea of the United States, except waters officially recognized by the United States as the territorial sea of another country, under international law.

(2) Notwithstanding paragraph (c)(1) of this section, any person may take endangered wildlife in defense of his own life or the lives of others.

(3) Notwithstanding paragraph (c)(1) of this section, any employee or agent of the Service, any other Federal land management agency, the National Marine Fisheries Service, or a State conservation agency, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take endangered wildlife without a permit if such action is necessary to:

(i) Aid to sick, injured, or orphaned specimen; or

(ii) Dispose of a dead specimen; or

(iii) Salvage a dead specimen which may be useful for scientific study; or

(iv) Remove specimens which constitute a demonstrable but nonimmediate threat to human safety, provided that the taking is done in a humane manner; the taking may involve killing or injuring only if it has not been reasonably possible to eliminate such threat by live-capturing and releasing the specimen unharmed, in a remote area.

(4) Any taking pursuant to paragraphs (c) (2) and (3) of this section must be reported in writing to the United States Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 19183, Washington, D.C. 20036, within 5 days. The specimen may only be retained, disposed of, or salvaged in accordance with directions from the Service.

(5) Notwithstanding paragraph (c)(1) of this section, any qualified employee or agent of a State Conservation Agency which is a party to a Cooperative Agreement with the Service in accordance with section 6(c) of the Act, who is designated by his agency for such purposes, may, when acting in the course of his official duties, take Endangered Species, for conservation programs in accordance with the Cooperative Agreement, provided that such taking is not reasonably anticipated to result in: (i) the death or permanent disabling of the specimen; (ii) the removal of the specimen from the State where the taking occurred; (iii) the introduction of the specimen so taken, or of any progeny derived from such a specimen, into an area beyond the historical range of the species; or (iv) the holding of the specimen in captivity for a period of more than 45 consecutive days.

(d) *Possession and other acts with unlawfully taken wildlife.* (1) It is unlawful to possess, sell, deliver, carry, transport, or ship, by any means whatsoever, any endangered wildlife which was taken in violation of paragraph (c) of this section.

Example. A person captures a whooping crane in Texas and gives it to a second person, who puts it in a closed van and drives thirty miles, to another location in Texas. The second person then gives the whooping crane to a third person, who is apprehended with the bird in his possession. All three have violated the law—the first by illegally taking the whooping crane; the second by transporting an illegally taken whooping crane; and the third by possessing an illegally taken whooping crane.

(2) Notwithstanding paragraph (d)(1) of this section, Federal and State law enforcement officers may possess, deliver, carry, transport, or ship any endangered wildlife taken in violation of the Act as necessary in performing their official duties.

(e) *Interstate or foreign commerce.* It is unlawful to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever, and in the course of a commercial activity, any endangered wildlife.

(f) *Sale or offer for sale.* (1) It is unlawful to sell or to offer for sale in interstate or foreign commerce any endangered wildlife.

(2) An advertisement for the sale of endangered wildlife which carries a warning to the effect that no sale may be consummated until a permit has been obtained from the U.S. Fish and Wildlife Service shall not be considered an offer for sale within the meaning of this subsection.

[40 FR 44415; Sept. 26, 1975, as amended at 40 FR 53400, Nov. 18, 1975; 41 FR 19226, May 11, 1976.]

Regulations published in the Federal Register of September 26, 1975 (40 FR 44412), provided for the issuance of permits to carry out otherwise prohibited activities involving Endangered or Threatened species under certain circumstances. Such permits involving Endangered species are available for scientific purposes or to enhance the propagation or survival of the species. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship which would be suffered if such relief were not available.

Pursuant to Section 4(b) of the Act, the Director will notify the Governor of New Mexico with respect to this proposal and request his comments and recommendations before making final determinations.

Public Comments Solicited

The Director intends that the rules finally adopted will be as accurate and effective in the conservation of any Endangered or Threatened species as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, private interests, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological or other relevant data concerning any threat (or the lack thereof) to the New Mexican ridge-nosed rattlesnake;

(2) The location of and reasons why any habitat of the New Mexican ridge-nosed rattlesnake should or should not be determined to be Critical Habitat as provided for by Section 7 of the Act;

(3) Additional information concerning the range and distribution of the New Mexican ridge-nosed rattlesnake.

Final promulgation of the regulations on the New Mexican ridge-nosed rattlesnake will take into consideration the comments and any additional information received by the Director and such communications may lead him to adopt final regulations that differ from this proposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours. A determination will be made at

the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

This proposed rulemaking is issued under the authority contained in the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884), and was prepared by Dr. C. Kenneth Dodd, Jr., Office of Endangered Species (202–343–7814).

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: May 5, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter 1, Title 50 of the Code of Federal Regulations, as set forth below:

1. It is proposed to amend § 17.11(i) by adding in alphabetical order the following to the list of animals:

§ 17.11 Endangered and threatened wildlife.

(i)

Species			Range		Status	When listed	Special rules
Common name	Scientific name	Population	Known distribution	Portion of range where endangered or threatened			
• • •							
REPTILES:							
Rattlesnake, New Mexican ridge-nosed.	*Crotalus willardi obscurus.*	NA	New Mexico and Chihuahua, Mexico.	Entire	E	NA	
• • •							

2. It is further proposed to amend 50 CFR Part 17 by adding new paragraph (c)(3) to proposed § 17.95 to read as follows:

§ 17.95 Critical habitat—fish and wildlife.

• • • • • •

(c) Reptiles. • • •

(3) New Mexican ridge-nosed rattlesnake.

(i) The following area (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) is Critical Habitat for the New Mexican ridge-nosed rattlesnake (*Crotalus willardi obscurus*):

(A) Elevations above 6200 feet in the Animas Mountains, Hidalgo County, New Mexico.

(ii) Pursuant to Section 7 of the Act, all Federal agencies must take such action as is necessary to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat area.

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Proposed Determination of Critical Habitat for the Houston Toad

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Critical Habitat proposal.

SUMMARY: The Director, U.S. Fish and Wildlife Service (hereinafter, the Director and the Service, respectively) hereby issues a proposed rulemaking which would determine the Critical Habitat of the Houston toad (*Bufo houstonensis*). This proposal is issued pursuant to Section 7 of the Endangered Species Act of 1973 (16 U.S.C. 1531–1543; 87 Stat. 884: hereinafter the Act).

DATES: All relevant comments and materials with regard to this proposed rulemaking received no later than August 24, 1977 will be considered by the Director, U.S. Fish and Wildlife Service.

ADDRESSES: Comments and materials concerning this proposed rulemaking, preferably in triplicate, should be sent to the Director (FWS/OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240.

Comments and materials received will be available for public inspection during normal business hours at the Service's Office of Endangered Species, Suite 1100, 1612 K Street, N.W., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director, Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240, 202–343–4646.

Background

SUPPLEMENTARY INFORMATION: The Houston toad is among the rarest and most critically Endangered amphibians in the United States, and has been officially listed as Endangered since 1970. Much of the hope for the survival and recovery of this species depends upon the maintenance of suitable, undisturbed habitat and breeding sites. The Service recognizes that areas containing such sites may qualify for recognition as Critical Habitat as referred to in Section 7 of the Act. A notice of intent to determine Critical Habitat for the Houston toad was published by the Service in the Federal Register of May 16, 1975 (40 FR 21499–21500). In late 1976, the Albuquerque Regional Office (Region 2), of the Fish and Wildlife Service received a report from Dr. Robert A. Thomas of Texas A & M University recommending that certain areas in central Texas be designated as Critical Habitat for the Houston toad.

After evaluating his recommendation and supporting data, it was determined to proceed with the proposed rulemaking.

The areas delineated below have been used by Houston toads within the last few years, and contain the last remaining habitat and breeding sites for the species. If more populations are discovered in the future, additional areas may be proposed for Critical Habitat designation.

Effect of the Rulemaking

The effects of this determination are involved primarily with Section 7 of the Act, which states:

The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act. All other Federal departments and agencies shall, in consultation with and with the assistance of the Secretary, utilize their authorities in furtherance of the purpcses of this Act by carrying out programs for the conservation of endangered species and threatened species listed pursuant to section 4 of this Act and by taking such action necessary to insure that actions authorized, funded, or carried out by them do not jeopardize the continued existence of such endangered species and threatened species or result in the destruction or modification of habitat of such species which is determined by the Secretary, after consultation as appropriate with the affected States, to be critical.

An interpretation of the term Critical Habitat was published by the Fish and Wildlife Service and the National Marine Fisheries Service in the Federal Register of April 22, 1975 (40 FR 17764–17765). Some of the major points of that interpretation are: (1) Critical Habitat could be the entire habitat of a species, or any portion thereof, if any constituent element is necessary to the normal needs or survival of that species; (2) actions by a Federal agency affecting Critical Habitat of a species would not conform with Section 7 if such actions might be expected to result in a reduction in the numbers or distribution of that species of sufficient magnitude to place the species in fur-

ther jeopardy, or restrict the potential and reasonable recovery of that species; and (3) there may be many kinds of actions which can be carried out within the Critical Habitat of a species which would not be expected to adversely affect that species.

This last point has not been well understood by some persons. There has been widespread and erroneous belief that a Critical Habitat designation is something akin to establishment of a wilderness area or wildlife refuge, and automatically closes an area to most human uses. Actually, a Critical Habitat designation applies only to Federal agencies, and essentially is an official notification to these agencies that their responsibilities pursuant to Section 7 of the Act are applicable in a certain area.

A Critical Habitat designation must be based solely on biological factors. There may be questions of whether and how much habitat is critical, in accordance with the above interpretation, or how to best legally delineate this habitat, but any resultant designation must correspond with the best available biological data. It would not be in accordance with the law to involve other motives; for example, to enlarge a Critical Habitat delineation so as to cover additional habitat under Section 7 provisions, or to reduce a delineation so that actions in the omitted area would not be subject to evaluation.

There may indeed be legitimate questions of whether, and to what extent, certain kinds of actions would adversely affect listed species. These questions, however, are not relevant to the biological basis of Critical Habitat delineations. Such questions should, and can more conveniently, be dealt with after Critical Habitat has been designated. In this respect, the Service in cooperation with other Federal agencies has drawn up a set of guidelines which, in part, establish a consultation and assistance process for helping to evaluate the possible effects of actions on Critical Habitat. Proposed provisions for Interagency Cooperation were published on January 26, 1977, in the FEDERAL REGISTER (42 FR 4868–4875) to assist Federal agencies in complying with Section 7 of the Endangered Species Act of 1973.

PUBLIC COMMENTS SOLICITED

The Director intends that the rules finally adopted will be as accurate as possible in delineating the Critical Habitat of the Houston toad. The Director, therefore, desires to obtain the comments and suggestions of the public, other concerned governmental agencies, the scientific community, or any other interested party on these proposed rules.

Final promulgation of Critical Habitat regulations will take into consideration the comments received by the Director. Such comments and any additional information received may lead the Director to adopt final regulations that differ from this proposal.

An environmental assessment has been prepared in conjunction with this proposal. It is on file in the Service's Office of Endangered Species, 1612 K Street NW., Washington, D.C. 20240, and may be examined during regular business hours. A determination will be made at the time of final rulemaking as to whether this is a major Federal action which would significantly affect the quality of the human environment within the meaning of Section 102(2)(C) of the National Environmental Policy Act of 1969.

This proposed rulemaking was prepared by Dr. C. Kenneth Dodd, Jr., Office of Endangered Species.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: May 18, 1977.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

It is proposed to amend 50 CFR Part 17:

By adding new paragraph (d)(3) to proposed § 17.95 to read as follows:

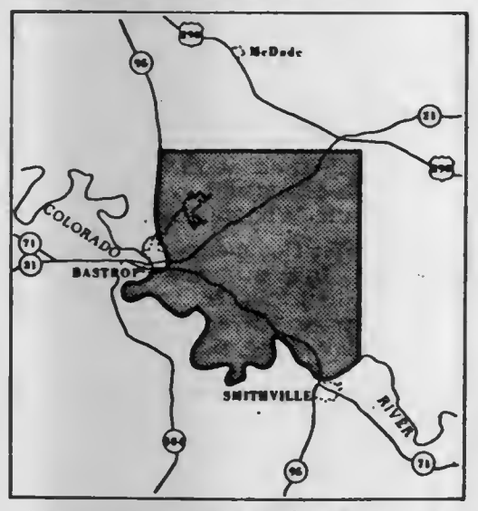
§ 17.95 Critical habitat—fish and wildlife.

(d) Amphabians. * * *

(3) Houston toad.

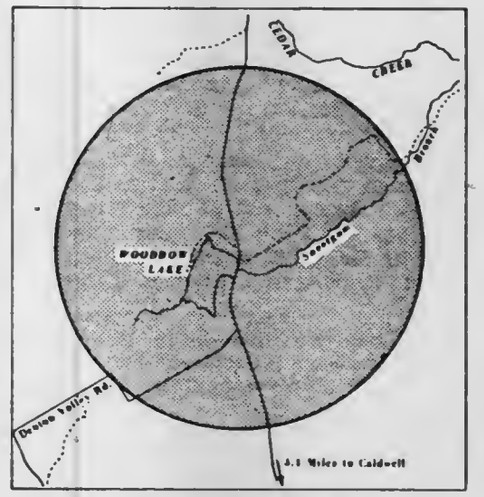
(i) The following areas (exclusive of those existing manmade structures or settlements which are not necessary to the survival or recovery of the species) are Critical Habitat for the Houston toad (*Bufo houstonensis*):

(A) Bastrop County. From the junction of a line corresponding to 30°12'00'' N. and Texas state highway 95 east along a line corresponding to 30°12'00'' N. to where it intersects a line corresponding to 97°7'30'' W. to where it intersects the Colorado River, west and northwest along the north bank of the Colorado River to the City limits of Bastrop, and north thru Bastrop along Texas state highway 95 to where it intersects a line corresponding to 30°12'00'' N.



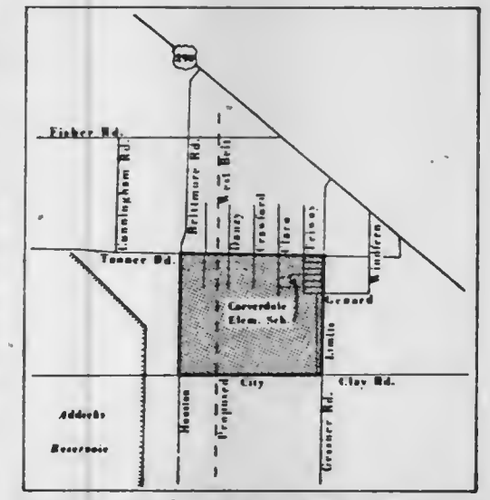
CRITICAL HABITAT FOR THE HOUSTON TOAD IN BASTROP COUNTY

(B) Burleson County—a circular area with a one mile radius, the center being the north entrance to Lake Woodrow from Texas FM 2000.



CRITICAL HABITAT FOR THE HOUSTON TOAD IN BURLESON

(C) Harris County, at the northwest corner of Houston, Texas. From the junction of Tanner and Brittmoore Roads east on Tanner Road to its junction with Gessner Road, south on Gessner Road to its junction with Clay Road, west on Clay Road to its junction with Brittmoore Road, and north on Brittmoore Road to its junction with Tanner Road.



CRITICAL HABITAT FOR THE HOUSTON TOAD IN HARRIS COUNTY

(D) Harris County, six areas in south Houston and Pasadena, Texas.

(1) From the junction of Harwin Drive and Fondren Road east on Harwin Drive to its junction with the Southwest Freeway, southwest on the Southwest Freeway to its junction with Fondren Road, and north on Fondren Road to its junction with Harwin Drive.

(2) From the junction of Hillcroft Avenue and South Main Street northeast on South Main Street to its junction with Holmes Road, northeast on Holmes Road to its junction with Knight Road, south on Knight Road to its junction with Almeda Road, southwest on Almeda Road to its junction with West Orem Drive, west on West Orem Drive to its junction with South Post Oak, south on South Post Oak to its junction with Sims Bayou, west along the north bank of Sims Bayou to where it crosses Hillcroft Avenue, and north on Hillcroft Avenue to its junction with South Main Street.

(3) From the junction of the Gulf Freeway and Shawnee Drive east on Shawnee Drive to its junction with Rodney, south on Rodney to its junction with Edgebrook Drive, southwest on Edgebrook Drive to its junction with the Gulf Freeway, and northwest on the Gulf Freeway to its junction with Shawnee Drive.

(4) From the junction of Vista Road and Maple east on Vista Road to its junction with Watters Road, South on Watters Road to its junction with Crenshaw Road, west on Crenshaw Road to its junction with Young, north on Young to its junction with Snodden Avenue, east on Snodden Avenue to its junction with Maple, and north on Maple to its junction with Vista Road.

(5) From the junction of Carson and Martindale south on Martindale to its junction with Almeda-Genoa Road, east on Almeda-Genoa Road to its junction with Mykawa Road, south on Mykawa Road to its junction with Clear Creek, east along the north bank of Clear Creek to where it crosses Telephone Road, north on Telephone Road to its junction with Fuqua, east on Fuqua to its junction with the Gulf Freeway, northwest on the Gulf Freeway to its junction with Meldrum, west on Meldrum to its junction with Monroe Road, south on Monroe Road to its junction with Lanham, west on Lanham to its junction with Telephone Road, north on Telephone Road to its junction with Brisbane, west on Brisbane until it ends, then continuing due west on a line which would intersect Mykawa Road near its junction with Selinsky Road, south on Mykawa Road to its junction with Carson, and west on Carson to its junction with Martindale.

(6) From the point at which Horsepen Bayou crosses Bayarea Boulevard, northeast on Bayarea Boulevard to the point at which it begins to form the southeastern boundary of the city of Pasadena, north and northwest along the western Pasadena city boundary to where it contacts the Houston city boundary, west along the southern boundary of Houston to where it crosses Horsepen Bayou, and southeast along the north bank of Horsepeno Bayou to where it crosses Bayarea Boulevard.

(ii) Pursuant to Section 7 of the Act, all Federal agencies must take such action as is necessary to insure that actions authorized, funded, or carried out by them do not result in the destruction or modification of the Critical Habitat area.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

[7 CFR Part 58]

MILK AND MILK PRODUCTS

Proposed Amendment to United States Sediment Standards

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Food Safety and Quality Service (FSQS) is proposing to amend the U.S. sediment standards for milk and milk products to provide for sediment standards for use with "universal" sample sizes (4 ounces, 2 ounces and 1 ounce) that are being adopted by the industry in their milk quality programs. A "universal sample" is taken from each producers milk when collected from the farm for use in determining quality and composition. This amendment will expand the use of the universal sample for sediment testing thus eliminating the need of larger special samples for determining sediment in milk. This amendment will provide equivalent standards to those presently used for the one pint mixed sample.

DATE: Comments on or before July 15, 1977.

ADDRESS: Written comments on this proposal may be sent, in duplicate, to the Hearing Clerk, Room 1077, South Building, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Richard W. Webber, Dairy Standardization Branch, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-7473).

SUPPLEMENTARY INFORMATION: The United States Department of Agriculture under authority of the Agriculture Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621) issues official U.S. standards to measure and improve the quality of milk and milk products.

Historically, sediment testing of milk has been a measure of quality ever since milk has been produced and processed. It has been used by industry in quality improvement work as well as by regulatory agencies as a basis for rejecting milk produced or handled under unsatisfactory conditions.

In May, 1964, official U.S. sediment standards were promulgated. These standards were the result of several meetings of the Department and representatives of the National Association of State Departments of Agriculture; International Association of Milk, Food and Environmental Sanitarians; American Public Health Association; U.S. Food and Drug Administration; U.S. Public Health Service; and the National dairy trade associations representing different segments of the dairy industry.

These meetings also unified a common position that there be only one official method of reading or grading the discs. The Department wishes to reaffirm this position and further state that any other method or way of reading the discs would not be official nor would it be of any usefulness to the dairy industry.

During the past few years the dairy industry has increasingly used the "universal" sample system to determine the quality and composition of producer milk. Under this system a small sample of 1, 2, or 4 ounces is taken of the producer's milk each time it is collected from the farm for use in testing for quality and composition.

The Committee on the chapter "Sediment in Fluid Milk", "Standard Methods for the Examination of Dairy Products" (on which the Department is represented) responded to the need for sediment test procedures utilizing small sizes by designing and conducting a collaborative study to determine the feasibility of using "universal" samples to determine sediment. The results of the study were published in the January, 1977 issue of the "Journal of Food Protection". This study also is the basis for including in the upcoming revision of "Standard Methods for the Examination of Dairy Products" procedures for using 4 ounce, 2 ounce and 1 ounce samples for determining sediment in milk.

The amendment will provide standard references for sediment in each sample size and provide official visual aids to facilitate the use of the amended standard.

The proposed addition to 7 CFR, Part 58, Subpart T is as follows:

§ 58.2732 United States sediment standards for milk and milk products: for 0.10", 0.14", and 0.20" diameter filtering areas (fine sediment).

(a) The standards contained in this section consist of three series of four (4) sediment discs prepared as hereinafter indicated, each of which is numbered 0 to 3 representing one of the following amounts of sediment on a 0.10 inch, 0.14 inch, and 0.20 inch filtering area and is equivalent to the respective amounts of sediment of the 1⅛ inch diameter filtering area as described in section 58.2728:

0.10 inch diameter filtering area
- 0—0.0 mg. (0.0 mg. equivalent)
- 1—0.0039 mg. (0.50 mg. equivalent)
- 2—0.0118 mg. (1.50 mgs. equivalent)
- 3—0.0196 mg. (2.50 mgs. equivalent)

0.14 inch diameter filtering area
- 0—0.0 mg. (0.0 mg. equivalent)
- 1—0.0078 mg. (0.50 mg. equivalent)
- 2—0.0235 mg. (1.50 mgs. equivalent)
- 3—0.0391 mg. (2.50 mgs. equivalent)

0.20 inch diameter filtering area
- 0—0.0 mg. (0.0 mg. equivalent)
- 1—0.0156 mg. (0.50 mg. equivalent)
- 2—0.0469 mg. (150 mgs. equivalent)
- 3—0.0781 mg. (2.50 mgs. equivalent)

(b) Each sediment disc was prepared from "fine" sediment in accordance with the procedure set forth in paragraph 15.07 of "Standard Methods for the Examination of Dairy Products", Eleventh Edition, 1960 and paragraph 17.4, thirteenth edition, 1972. To facilitate the use and availability of these standards, a composite visual aid of the three series of four (4) sediment discs is attached hereto and made a part hereof.[1]

All persons who desire to submit written data, views or arguments in connection with the aforesaid proposals shall file the same in duplicate with the Hearing Clerk, Room 1077, South Building, Washington, D.C. 20250 not later than July 15, 1977. All written submissions pursuant to this notice will be made available for the public at the office of the Hearing Clerk during regular business hours. (7 CFR 1.27(b)). Received comments may be seen in the above office between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday.

It is proposed that this addition shall become effective September 1, 1977.

Done at Washington, D.C., this 20th day of May 1977.

WILLIAM T. MANLEY,
Acting Deputy Administrator, Commodity Operations.

Agricultural Marketing Service

[7 CFR Part 918]

[Docket No. AO-162-A5]

FRESH PEACHES GROWN IN GEORGIA

Decision on Proposed Further Amendment of the Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision would amend the Federal marketing agreement and order for fresh peaches grown in Georgia. Georgia peach growers will vote in a referendum to determine if they favor the proposed changes in the order.

The proposed amendment would provide for a public member on the administrative committee, dissolve the advisory committee, change the conditions under which a continuance referendum would be held, end compensation for committee members attending meetings, and provide for establishment of a reserve fund. The proposed amendment would also make a number of minor changes with respect to the terminology and language used in the marketing order.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing—Issued November 19, 1976; published November 24, 1976 (41 FR 51818); Notice of Recommended Decision—Issued March 7, 1977; published March 11, 1977 (42 FR 13557); Corrections published April 6, 1977 (42 FR 18621) and May 6, 1977 (42 FR 23160).

PRELIMINARY STATEMENT

A public hearing was held upon proposed further amendment of the marketing agreement, as amended, and Order No. 918, as amended (7 CFR Part 918), (hereinafter referred to collectively as the "order") regulating the handling of fresh peaches grown in Georgia. The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Fort Valley, Georgia, on December, 9, 1976, pursuant to notice thereof issued on November 19, 1976.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, on March 7, 1977, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto. No exceptions were filed.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein, subject to correction of inadvertent, grammatical or obvious errors.

Material issues. The material issues of record are as follows:

(1) Redefine the term "Secretary".

(2) Update the section pertaining to districts.

(3) Provide for addition of a public member and alternate on the Industry Committee.

(4) Update the section pertaining to apportionment of committee members among districts.

(5) Delete provisions relating to selection of initial committee members.

(6) Delete the provision for compensating committee members for attending committee meetings.

(7) Deleter all provisions relating to the Distributors' Advisory Committee.

(8) Change the provisions on expenses and assessments to conform with the language of the act.

(9) Provide that the committee may establish a reserve fund.

(10) Delete provisions providing for a biennial referendum and provide that a referendum be conducted upon request of growers meeting specified conditions.

(11) Make conforming changes.

Findings and conclusions. The following findings and conclusions on the material issues are based on the record of hearing:

1. The term "Secretary" contained in the order should be amended, as hereinafter set forth, to bring it into conformity with more recent definition of such term, and to recognize change in the titles of positions below that of Secretary. The current definition of "Secretary" in the order contains a reference to the "Under Secretary." The title of that position has been changed to "Deputy Secretary." Hence the definition of such term is incorrect. The term "Secretary" is defined in more recent orders in a manner which avoids the use of titles of position below that of Secretary such as "Secretary means the Secretary of the United States Department of Agriculture, or any officer or employee of the Department of Agriculture to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated to act in his stead." Such definition avoids the necessity for redefinition each time the title of a delegatee is changed. Hence, the term "Secretary" should be revised as hereinafter set forth.

2. The order should be amended, as hereinafter set forth, to revise the term "District" to conform with the realignment previously effected in the rules and regulations (§ 918.111) under the order. The districts subdivide Georgia into geographical areas for purposes of allocating membership on the committee. The districts hereinafter defined provide an appropriate basis for the allocation of committee representation.

3. The order should be amended, as hereinafter set forth, to provide for the nomination and selection of a public member and alternate to serve on the Industry Committee.

The public interest is to be observed in actions taken under marketing orders, hence, the interests of all groups including growers, handlers, and consumers should be considered. Although meetings of the committee are open to the public, there has been little participation by consumers.

Consumers have petitioned the government for a voice in actions which affect them. Both government agencies and private organizations now actively solicit the participation of consumers in

[1] Filed as part of the original document.

their deliberations and decision-making processes. A public representative on the Industry Committee would be in a position to contribute the views of the public, other than that of the industry, to the development of recommendations for regulation designed to serve the interest of both the industry and the public generally. Therefore, it is concluded that the order should provide a position of public member on the Industry Committee with the provisions that persons filling such position shall have the same rights and privileges as other members of the committee. While the public member and alternate should not be involved in the growing and marketing of peaches or have a financial interest in the industry, such persons should reside within the production area so as to be in a position to gain an understanding of the industry's problems. This too would help assure that the travel and other expenses incurred in carrying out duties under the order could be kept within reasonable limits, and that such persons would be available when actions are being considered by the committee.

Provisions of member and alternate member positions on the Industry Committee would increase the number of positions for each from 8 to 9. Nominees to fill public member positions should be nominated by the 8 grower members selected to represent the districts. Such district grower representatives should meet as soon as practicable after their selection, make such nominations and promptly submit the names of such nominees, together with their qualifications, to the Secretary. The provisions of the order relative to term of office, selection, vacancies, qualification, alternates serving for members, reimbursement of expenses and similar provisions should apply to public members and alternates the same as to other members and alternates.

Criteria which the Industry Committee should use in considering nominees to fill the public member and alternate positions should include the following: The nominees should not grow or handle peaches; they should reside in Georgia; they should be interested in the peach industry; they should be able to devote sufficient time to committee activities; they should be willing to attend Industry Committee meetings; and they should indicate a willingness to familiarize themselves with the background, practices, and economics of the peach industry. Membership in consumer organizations, while desirable, should not be an absolute requirement for filling the public member position on the Industry Committee. Persons who should be eligible to serve as public members on the Industry Committee should include Agricultural and Home Economists and Consumer Specialists, as well as those involved in consumer groups.

4. Section 918.16 of the order should be amended, as hereinafter set forth, to bring the district representation of Industry Committee members specified in that section into conformity with the current representation by districts previously effected in the rules and regulation (§ 918.110) issued under the order. Such representation and districts currently are appropriate to the current situation in the peach industry.

5. The order should be amended, as hereinafter set forth, to delete § 918.17. The provisions of that section specify the manner in which the selection of the initial members of the Industry Committee were to be selected. The initial members were selected in 1942, and the section no longer serves any useful purpose. As a conforming change, in § 918.18 the words "after the year 1942" should be deleted from the first sentence and the title of that section revised to read; "Nomination of Members of Industry Committee". Likewise, the reference in § 918.26 to initial members and alternates should be deleted.

6. The order should be amended, as hereinafter set forth, to delete provisions in § 918.27 which allow the Industry Committee to compensate members and alternates up to $5.00 per day when attending committee meetings and other committee functions. This provision is no longer appropriate to program operation. Members and alternate members are concerned about the welfare of the peach industry and attend and participate at industry meetings in the interest of the industry as a whole. Hence compensation is not appropriate or necessary. Provisions of this section which provide for reimbursement of members and alternate members expenses should remain in effect.

7. The order should be amended, as hereinafter set forth, by deleting §§ 918.32, 918.33, 918.34, 918,35, 918.36, 918.37, and 918.38, all which pertain to the Distributors' Advisory Committee, and revising § 918.29 to eliminate provisions relating to such committee. The record indicates that the Distributors' Advisory Committee is no longer essential to the operation of the order and authority for its establishment should be deleted.

Provision for the Distributors' Advisory Committee which is composed of seven handlers and their alternates was included in the order to recognize that an Industry Committee made up of growers solely engaged in the production of peaches needed assistance in the development of recommendations for grade and size regulations. The advice of handlers who marketed the growers' peaches was then made available through a Distributors' Advisory Committee because these handlers could provide information in regard to the grade and size of peaches considered marketable. Since the order has been in effect, the peach industry has changed substantially. In recent years more and more members of the Industry Committee have been growers involved in marketing their own peaches and in some instances in the marketing of peaches of other growers. This development has brought to the Industry Committee a shipper experience and viewpoint. Hence, the need for the Distributors' Advisory Committee under the order has been reduced considerably if not eliminated. Abolishing the Distributors' Advisory Committee will not deprive the Industry Committee of needed information and it should facilitate more timely action in handling matters under the marketing order.

Moreover, the Industry Committee could continue to request advice from shippers, or such advice may be offered at Industry Committee meetings which are open to the public and in the past have been well attended by all segments of the industry, including shippers. Also, information is now available from agencies such as the Crop Reporting Board, the Market News Service, and the Agricultural Extension Service, and such information is readily available to the Industry Committee. In addition, Industry Committee meetings are open to the public as well as to growers and handlers. Notice of such meetings is well publicized throughout Georgia. All persons present at these meetings are invited to participate in the discussion. All views expressed at these meetings are considered by the Industry Committee when it makes decisions affecting the peach industry and the public.

8. The order should be amended, as hereinafter set forth, to conform the provisions contained in the section pertaining to expenses and assessments to the Agricultural Marketing Agreement Act of 1937, as amended. The current language in the Act pertaining to committee expenses and assessments uses the words "reasonable and likely" rather than "reasonable and necessary" in specifying expenses which may be incurred and it is appropriate whenever possible that provisions of the order use the language of the Act.

9. The order should be amended, as hereinafter set forth, to authorize the Industry Committee to carry over into subsequent fiscal periods excess assessment funds remaining at the end of any fiscal period as a reserve. Currently, assessments not used during a fiscal period are carried over into the next fiscal period as handler credits, which are available to finance marketing order operations early in the season prior to the collection of assessments. However, the order requires refund of such assessments on request of handlers, in which case the fund is not available to finance such early season operations.

Peaches grown in Georgia are not shipped in volume until the end of April or the beginning of May, about two months after the start of the fiscal period. The period prior to the shipping season is one of considerable activity. During such period the Industry Committee must survey the crop and market condition; develop a marketing policy and budget for the coming season; and hold meetings to consider regulations for the insuing season. Without an operating reserve, the committee may find it necessary to either borrow funds or bill assessments in advance of shipment of the peaches to cover expenses prior to the time assessment income is available for

such purpose. In addition, if the peach crop is overestimated or the crop unexpectedly reduced, the committee assessment income may not be sufficient and this may necessitate a retroactive increase in the assessment rate to cover the deficit. This is objectionable and could be avoided through the establishment of a reserve fund.

Such a reserve fund should be available to the Industry Committee to defray expenses incurred early in the season before assessment income is received; to cover deficits incurred during any season when crop failure reduces assessment income; to cover expenses when assessment income for the fiscal period is insufficient; to defray expenses when a budget deficit is deliberately incurred to reduce the size of the reserve; to defray costs incurred during any period of suspension of part or all of the marketing order; to cover any expenses authorized by the order; and to cover expenses incurred in terminating the order.

The records indicate that the reserve fund should not exceed approximately $20,000, and the reserve should be accumulated in such manner that producers and handlers will not be unduly burdened. To keep the fund within the specified limit, if the amount approaches $20,000, the assessment rate for the next fiscal period should be fixed at a level which would likely result in a deficit. Reserve funds should be used to cover any such deficit.

Establishment of a reserve fund would be equitable to all concerned. Most growers and handlers under the order consider the growing and handling of peaches to be a lifetime pursuit, and production of peaches is a long term investment. Thus, there are few changes in the composition of the industry over time. Hence, those handlers whose assessments are transferred into the reserve fund should benefit from the later expenditure of these funds.

Establishing an adequate reserve fund should minimize the need to borrow funds, and enable the Industry Committee to avoid the expense of returning excess assessments. Also, such establishment should enable a more stable assessment rate from year to year as the rate would not need to reflect the size of the peach crop. The reserve fund should provide funds to defray the costs of liquidation should the order be terminated, and this would relieve handlers of the need to pay additional assessments to cover such liquidation costs. Similarly, the reserve fund could be used to cover necessary expenses in the event of a temporary suspension of the order.

If the order is terminated, reserve funds not needed for liquidation should be returned on a pro rata basis to those handlers who contributed such funds; used in a way which would benefit the Georgia peach industry, such as peach research; or disposed of in a manner deemed appropriate by the Secretary.

10. The order contains a provision which requires the conduct of a referendum every other year to ascertain if growers wish to continue the order in effect. This provision has been observed during the past 34 years and each time growers have favored retention of the order.

The conduct of referenda is time consuming and disrupts normal activities. It was advanced without opposition that unless conditions arise which indicate that growers are questioning the desirability of continuing the order that a referendum is unwarranted. It was indicated that growers will request a referendum if it is felt one should be held. It is therefore concluded that the provisions in the order which require a biennial referenudum to ascertain grower sentiment with respect to continuance should be deleted. It is further concluded that it is undesirable to eliminate provision for a referendum altogether, and that an optional provision should be provided whereby growers can obtain a referendum upon request. To assure that such request is concurred in by a reasonable proportion of the industry, such a provision should require that the request be supported by at least 6 growers who produced 10 percent of the inspected peaches shipped in the previous season. Furthermore, it should require that such a request be tendered no later than December 1, so that the committee and the Department can take action on it and have the action completed before the start of the following season. Therefore, the order should be amended consistent with the foregoing, as hereinafter set forth.

11. A number of conforming changes were found to be necessary. Most changes were covered in the discussion of material issues numbered 1–10, and appropriate changes made in the affected sections of the order, as hereinafter specified. The following additional changes should be made to conform the order to the recommended amendment:

(a) In § 918.19 the first sentence thereof should be revised to read: "At each meeting held to elect nominees for grower member and alternate grower member positions on the Industry Committee, the growers eligible to participate therein shall select a chairman and secretary therefor". This will make it clear that the meetings alluded to are not applicable to the nomination of individuals for the public member positions.

(b) In § 918.21 the phrase "subsequent to the initial members and alternates" should be deleted, and the section number 918.38 appearing in the text changed to 918.26.

(c) In § 918.22 the section number 918.38 appearing in the text should be changed to 918.26.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Further Amended, Regulating the Handling of Fresh Peaches Grown in Georgia", and "Order Amending the Order, as Amended, Regulating the Handling of Fresh Peaches Grown in Georgia", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the annexed order which is published with this decision.

Referendum order. It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 et seq.), to determine whether the issuance of the annexed order as amended and as hereby proposed to be amended, regulating the handling of fresh peaches grown in Georgia is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production area in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be calendar year 1976.

The agents of the Secretary to conduct such referendum, jointly or severally, are hereby designated to be William C. Knope and John R. Toth, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, P.O. Box 9, Lakeland, Florida 33802.

Signed at Washington, D.C., on May 20, 1977.

ROBERT H. MEYER,
Assistant Secretary for Marketing Services.

Order[1] amending the order, as amended, regulating the handling of fresh peaches grown in Georgia

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 918, as amended (7 CFR Part 918), regulating the handling of fresh peaches grown in Georgia.

Upon the basis of the record it is found that: (1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of fresh peaches grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of fresh peaches grown in the production area; and

(5) All handling of fresh peaches grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof the handling of fresh peaches shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended as follows:

The provisions of the proposed marketing agreement and order, amending the order, contained in the recommended decision issued by the Deputy Administrator on March 7, 1977, and published in the FEDERAL REGISTER on March 11, 1977 (42 FR 13557; FR Doc. 77-7214), and corrections published on April 8, 1977 (42 FR 18621) and on May 6, 1977 (42 FR 23160), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

1. Section 918.1 is revised to read as follows:

§ 918.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

2. Section 918.10 is revised to read as follows:

§ 918.10 District.

"District" means the applicable one of the following described geographical subdivisions of the area:

(a) "South Georgia District" shall include the counties of Quitman, Coffee, Miller, Jeff Davis, Baker, Toombs, Terrell, Ware, Mitchell, Pierce, Worth, Evans, Brooks, Liberty, Turner, Glynn, Irwin, Echols, Atkinson, Early, Wheeler, Decatur, Montgomery, Randolph, Bacon, Dougherty, Wayne, Crisp, Charlton, Thomas, Bryan, Tift, McIntosh, Ben Hill, Berrien, Lanier, Clay, Telfair, Seminole, Clinch, Calhoun, Appling, Lee, Tattnall, Grady, Brantley, Colquitt, Long, Cook, Chatham, Wilcox, Camden, Lowndes, Stewart, Pulaski, Webster, Dodge, Sumter and Dooly;

(b) "Central Georgia District" shall include the counties of Muscogee, Bleckley, Marion, Laurens, Schley, Johnson, Macon, Candler, Houston, Glascock, Bullock, Twiggs, Wilkinson, Taylor, Washington, Crawford, Emanual, Peach, Jefferson, Burke, Effingham, Chattahoochee, Treutlen, Bibb, Jenkins, and Screven; and

(c) "North Georgia District" shall include the counties of Harris, Talbot, Upson, Monroe, Jones, Baldwin, Hancock, Warren, McDuffie, Polk, Troup, Gwinnett, Lamar, Jackson, Fayette, Forsyth, Jasper, Franklin, Douglas, Gordon, Henry, Dade, Greene, Whitfield, Lincoln, Haralson, Paulding, Cobb, De Kalb, Rockdale, Walton, Oconee, Oglethorpe, Floyd, Richmond, Cherokee, Pike, Clarke, Coweta, Elbert, Butts, Banks, Carroll, Chattooga, Clayton, Dawson, Morgan, Catoosa, Wilkes, Gilmer, Fannin, Lumpkin, Union, White, Towns, Haversham, Stephens, Rabun, Columbia, Bartow, Meriwether, Barrow, Heard, Madison, Spalding, Hall, Putnam, Hart, Fulton, Pickens, Newton, Walker, Taliaferro, and Murray.

3. Section 918.15 is revised to read as follows:

§ 918.15 Establishment of Industry Committee.

An Industry Committee, consisting of nine members, and alternates is hereby established to administer the terms and provisions of this part. Eight members and alternates shall be growers of peaches and one member and alternate shall be individuals who are neither growers nor handlers of peaches. The 8 members who shall be growers shall be known as "grower members" and the remaining member shall be known as a "public member". The members of said Industry Committee and their respective alternates, shall be selected in accordance with the provisions of this part.

4. Section 918.18 is revised to read as follows:

§ 918.18 Nomination of members of Industry Committee.

(a) The Industry Committee shall hold or cause to be held prior to January 31 of each year a meeting or meetings of growers in each of the districts designated in § 918.10, or as redesignated pursuant to § 918.29(k), for the purpose of designating nominees for grower member and alternate member positions on the Industry Committee. The Committee shall give adequate notice of any such meeting or meetings to all growers in the respective district. (b) Members of the committee, selected pursuant to § 918.21, may nominate individuals for the public member and alternate member positions on the Industry Committee, and promptly send the names of these nominees, along with their qualifications, to the Secretary.

5. Section 918.25 is revised to read as follows:

§ 918.25 Eligibility for membership on Industry Committee.

Any person nominated or selected to serve as a member or as an alternate member of the Industry Committee, except for the public member and alternate, shall be an individual grower of peaches in the respective district for which selected, or an officer, employee, or agent of a corporate grower or corporate growers in such district. The public member and alternate shall reside in Georgia, but neither person shall be a grower or handler of peaches.

6. Section 918.16 is revised to read as follows:

§ 918.16 Representation by grower members by districts on Industry Committee.

(a) Two members of the Industry Committee shall be selected from among growers in the South Georgia District.

(b) Four members of the Industry Committee shall be selected from among growers in the Central Georgia District.

(c) Two members of the Industry Committee shall be selected from among growers in the North Georgia District.

§ 918.17 [Deleted]

7. Section 918.17 is deleted.

8. Section 918.26 is revised to read as follows:

§ 918.26 Term of office.

The members of the Industry Committee and their respective alternates shall serve for the fiscal period for which they have been selected and if their successors have not been selected and qualified prior to the end of the respective fiscal period, each such member or alternate shall continue to serve until his respective successor shall have been selected and qualified.

9. Section 918.27 is revised to read as follows:

§ 918.27 Reimbursement for expense.

Each member of the Industry Committee and each alternate member when acting for a member or when designated by the committee to attend, may be reimbursed for expenses incurred while attending committee meetings; while attending to committee business authorized by the committee; and while attending each consultation or conference with any committee, or representatives thereof, established under any marketing agreement and order program pursuant to the act, with respect to the handling of peaches grown in Georgia or in any other State.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

§ 918.29 [Amended]

10. In § 918.29 paragraph (q) is deleted; paragraph (h) is amended by deleting the words "and to authorize members and alternate members of the Distributors' Advisory Committee to attend such conferences and consultations;"; paragraph (r) is redesignated as paragraph (q).

§ 918.32 [Revoked]

§ 918.33 [Revoked]

§ 918.34 [Revoked]

§ 918.35 [Revoked]

§ 918.36 [Revoked]

§ 918.37 [Revoked]

§ 918.38 [Revoked]

11. Sections 918.32 through 918.38 are deleted.

12. Sections 918.40 and 918.41 are revised to read as follows:

§ 918.40 Expenses.

The Industry Committee is authorized to incure such expenses as the Secretary finds are reasonable and likely to be incurred by the committee for its maintenance and functioning and to enable it to exercise its powers and perform its duties in accordance with the provisions of this part during each fiscal period. The funds to cover such expenses shall be acquired by the levying of assessments as prescribed in § 918.41.

§ 918.41 Assessments.

Each handler who first ships peaches shall pay upon demand, to the Industry Committee, such handler's pro rata share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee for its maintenance and functioning during each fiscal period: *Provided*, That no assessment shall be levied against peaches that are exempt from regulation pursuant to § 918.71 or against peaches that are exempt from inspection pursuant to § 918.64. Such handler's pro rata share of such expenses shall be equal to the ratio between the total assessable quantity of peaches shipped by such handler as the first shipper thereof, during the applicable fiscal period, and the total assessable quantity of peaches shipped by all handlers as the first shippers thereof during the same fiscal period.

13. Section 918.44 is revised to read as follows:

§ 918.44 Accounting.

If at the end of a fiscal period the assessments collected are in excess of expenses incurred, the Industry Committee, with the approval of the Secretary, may carry over such excess into subsequent fiscal periods as a reserve up to an amount of $20,000. Such reserve funds may be used to cover any expenses authorized by this part and to cover necessary expenses of liquidation in the event of termination of this part. If any such excess is not retained in a reserve, each handler entitled to a proportionate refund shall be credited with such refund against the operations of the following fiscal period or be paid such refund. Upon termination of this part, any funds not required to defray the necessary expenses of liquidation shall be disposed of in such mannar as the Secretary may determine to be appropriate: *Provided*, That, to the extent practical, such funds shall be returned pro rata to the persons from whom such funds were collected.

14. Section 918.81 is revised to read as follows:

§ 918.81 Termination.

(a) The Secretary shall terminate or suspend the operation of this part or any provision thereof whenever he finds that the part or any provision thereof does not tend to effectuate the declared policy of the act.

(b) The Secretary shall terminate the provisions of this part whenever he finds by referendum or otherwise that such termination is favored by the majority of the growers: *Provided*, That such majority has, during the current marketing season, produced more than 50 percent of the peaches which were produced for market within the area. Such termination shall become effective on the last day of February following the announcement thereof by the Secretary.

(c) The Secretary shall conduct a referendum among growers to ascertain whether continuance of this part is favored by growers, when requested to do so by the committee, or upon the request of 6 or more growers who produced 10 percent or more of the inspected peaches shipped during the then current fiscal period: *Provided*, That such request is received prior to December 1.

(d) The provisions of this part shall, in any event, terminate whenever the provisions of the act authorizing them cease to be in effect.

15. Section 918.19 is revised to read as follows:

§ 918.19 Conduct of nomination meetings.

At each meeting held to elect nominees for grower member and alternate grower member positions on the Industry Committee, the growers eligible to participate therein shall select a chairman and secretary therefor. The chairman of each meeting shall announce at such meeting the name of each person for whom a vote has been cast, whether as member or alternate member, and the number of votes cast for each such person, and the chairman or the secretary of the meeting shall forthwith transmit such information to the Secretary or the designated representative of the Secretary. At each such meeting at least two nominees shall be desgnated for each position as member and at least two nominees shall be designated for each position as alternate member on the committee as representative or representatives of the respective district.

16. Section 918.21 is revised to read as follows:

§ 918.21 Selection of members of Industry Committee.

The Secretary may select the members of the Industry Committee and their respective alternates from nominations made by growers as provided in §§ 918.15 through 918.26 or the Secretary may select such members and alternates from among other persons.

17. Section 918.22 is revised to read as follows:

§ 918.22 Vacancies.

In the event nominations are not made for membership on the Industry Committee, pursuant to the provisions of §§ 918.15 through 918.26 by February 15 of the respective fiscal period, the Secretary may select such members and their respective alternates without waiting for nominees to be designated. To fill any vacancy occasioned by the failure of any person, selected as a member of the Industry Committee or as an alternate member thereof, to qualify, or in the event of the death, removal, resignation, or disqualification of any qualified member or alternate, a successor for his unexpired term shall be selected by the Secretary.

[7 CFR Part 1004]

MILK IN THE MIDDLE ATLANTIC MARKETING AREA

Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed Suspension of Rules.

SUMMARY: This notice invites written comments on a proposal to suspend certain provisions of the Middle Atlantic milk marketing order relating to the regulatory status of distributing plants. Suspension of the provisions was requested by cooperative associations to continue the association of members' milk with the order. The proposed suspension would be for May, June, July and August 1977.

DATE: Comments are due 5 days from publication in the FEDERAL REGISTER.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, U.S. Department of Agriculture, Room 1077, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Martin J. Dunn, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-7311).

SUPPLEMENTARY INFORMATION: Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et. seq.), the suspension of certain provisions of the order regulating the handling of milk in the Middle Atlantic marketing area is being considered for the months of May, June, July and August 1977.

All persons who desire to submit written data, views, or arguments in connection with the proposed suspension should file the same with the Hearing Clerk, Room 1077 South Building, United States Department of Agriculture, Washington, D.C. 20250, not later than May 31, 1977. All documents filed should be in quadruplicate.

All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The provisions proposed to be suspended are as follows:

§ 1004.7 [Amended]

In § 1004.7(a), the language which reads "not less than 50 percent."

STATEMENT OF CONSIDERATION

The proposed action would suspend for the months of May through August 1977, the requirements that at least 50 percent of the receipts of milk at pool distributing plants be disposed of as Class I milk. The suspension was requested by Maryland Cooperative Milk Producers, Inc. and Lehigh Valley Cooperative Farmers.

The cooperative associations indicate that they are having to divert unusually large quantities of milk from pool distributing plants to manufacturing outlets due to increasing milk production.

In addition, a major milk dealer supplied by one of the cooperatives went out of business. The closing of the pool distributing plant, which was a major supplier of fluid milk sales in the marketing area, has resulted in a substantial increase in the volume of milk that the cooperative must divert to manufacturing plants.

In addition to the increased need for diversion, the plant closing has limited the cooperative's ability to divert milk. This occurs because diversions must be associated with distributing plants for pooling purposes. The number of other plants from which the cooperative can divert is limited. Additional diversions from such plants would result in their loss of pool plant status since less than 50 percent of receipts would be disposed of as Class I milk.

The cooperative associations anticipate a need for the suspension through August until the supply-demand situation improves.

Signed at Washington, D.C., on May 24, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Notice of Designation Number A478]

COLORADO

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Coloradio Counties as a result of severe blizzard conditions March 10 through March 13, 1977, in all 17 counties and also high winds February 22 and 23, 1977, in Prowers County:

Baca	Lincoln
Bent	Logan
Cheyenne	Otero
Crowley	Phillips
Elbert	Prowers
El Paso	Sedgwick
Kiowa	Washington
Kit Carson	Yuma
Las Animas	

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Richard D. Lamm that such designation be made.

Applications for emergency loans must be received by this Department no later than July 5, 1977, for physical losses and February 6, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of May 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

[FR Doc.77–15003 Filed 5–25–77;8:45 am]

[Notice of Designation Number A479]

IDAHO

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Bonneville County, Idaho, as a result of frosts June 14 and 26, August 27, and September 8 and 9, 1976.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor John V. Evans that such designation be made.

Applications for emergency loans must be received by this Department no later than July 7, 1977, for physical losses and February 6, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of May 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

[FR Doc.77–15004 Filed 5–25–77;8:45 am]

[Notice of Designation Number A477]

MICHIGAN

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Michigan Counties as a result of drought July 15 through September 15, 1976, in Branch County; tornadoes April 2, 1977, in Eaton County; and drought April 1 through October 31, 1976, and early frosts August 29 and September 1, 1976, in Presque Isle County.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor William G. Milliken that such designation be made.

Applications for emergency loans must be received by this Department no later than July 5, 1977, for physical losses and February 6, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of May 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

[FR Doc.77–15005 Filed 5–25–77;8:45 am]

[Notice of Designation Number A480]

MISSISSIPPI

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in Smith County, Mississippi, as a result of tornadic-like winds and a severe thunderstorm March 28, 1977.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor Cliff Finch that such designation be made.

Applications for emergency loans must be received by this Department no later than July 7, 1977, for physical losses and February 6, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of May 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

[FR Doc.77–15006 Filed 5–25–77;8:45 am]

[Notice of Designation Number A476]

OKLAHOMA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Oklahoma Counties as a result of drought July 1, 1976, to April 15, 1977, in Beaver County; drought July 1, 1976, through April 15, 1977, and blizzard March 11, 1977, in Cimarron County;

drought June 15, 1976, to April 4, 1977, in Ellis County; drought October 1, 1976, to April 15, 1977, and wind erosion February 1, 1977, to April 15, 1977, in Harper County; drought and wind January 1, 1976, through April 15, 1977; and blizzard March 11, 1977, in Texas County.

Therefore, the Secretary has designated this areas as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor David L. Boren that such designation be made.

Applications for emergency loans must be received by this Department no later than July 5, 1977, for physical losses and February 3, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C., this 18th day of May 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

Forest Service

PROPOSED LAND USE PLAN FOR DEERFIELD RIVER AREA GREEN MOUNTAIN NATIONAL FOREST

Availability of Final Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement on the Proposed Land Use Plan for the Deerfield River Area on the Green Mountain National Forest, USDA–FS–R9–FES–(ADM)–76–02.

The environmental statement concerns a proposed land use plan for approximately 2,860 acres of land within the Green Mountain National Forest in the southcentral part of Vermont.

This final environmental statement was transmitted to CEQ on May 16, 1977.

Copies are available for inspection during regular working hours at the following locations.

USDA, Forest Service, South Agriculture Bldg., Room 3231, 12th St. and Independence Ave., SW., Washington, D.C. 20250.

USDA, Forest Service, Eastern Region, 633 West Wisconsin Avenue, Milwaukee, WI 53203.

USDA, Forest Service, Green Mountain National Forest, Federal Building, 151 West Street, Box 519, Rutland, VT 05701.

A limited number of single copies are available upon request to Forest Supervisor, Green Mountain National Forest, Federal Building, 151 West Street, Box 519, Rutland, Vermont 05701.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ Guidelines.

HAROLD FRITZ,
Acting Planning, Programming, and Budgeting.

CIVIL AERONAUTICS BOARD

[Dockets 30607, 30639, 30549; Order 77–5–111]

KLM ROYAL DUTCH AIRLINES, ET AL.

Transatlantic Specific Commodity Rates; Order Vacating Suspensions

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 20th day of May, 1977.

By Order 77–4–67, adopted April 5, 1977, and Order 77–3–35, adopted February 25, 1977, the Board suspended and instituted investigations of specific commodity rates on books from Amsterdam and Brussels proposed by KLM Royal Dutch Airlines (KLM) and Societe Anonyme Belge D'Exploitation De La Navigation Aerienne (Sabena), and from London, Manchester, and Glasgow proposed by British Airways.[1]

On April 25, 1977, Sabena filed a petition for reconsideration of the aforementioned action. Sabena asserts, inter alia, that the Board has permitted Seaboard World Airlines, Inc. (Seaboard), Compagnie Nationale Air France (Air France), and KLM to provide Paris to New York transportation of books at rates identical to those suspended for Sabena from Brussels. Further, Sabena assumes that if the allegations set forth in Seaboard's complaint against the lawfulness of the book rates of KLM and Sabena are true, such allegations would be applicable with equal force to Seaboard's own tariff on the same commodities applicable between Paris and New York. On the other hand, Sabena contends the Board should reconsider and rescind Order 77–4–67. No answers to Sabena's petition have been received.

The Board believes that in order to treat all carriers' filings in an equitable manner, and since virtually identical low book specific-commodity rates already exist in the Paris to New York market, the suspensions ordered in Orders 77–4–67 and 77–3–35 should be vacated in order to permit such rates from Amsterdam, Brussels, London, Manchester and Glasgow to become effective pending investigation.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 102, 204(a), 403, 404, 801, and 1002(j) thereof,

It is ordered That: 1. The suspensions ordered in Order 77–4–67 and Order 77–3–35 be vacated;

2. The petition of Societe Anonyme Belge D'Exploitation De La Navigation Aerienne in Dockets 30607 and 30639 is granted; and

3. Copies of this order shall be filed with the tariffs and be served upon British Airways, KLM Royal Dutch Airlines, Societe Anonyme Belge D'Exploitation De La Navigation Aerienne, Seaboard World Airlines, Inc., Pan American World Airways, Inc., and Trans World Airlines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Docket 30905; Order 77–5–110]

PROFIT BY AIR, INC.

Increased C.O.D. Rates; Order of Suspension and Investigation

Adopted by the Civil Aeronautic Board at its office in Washington, D.C. on the 19th day of May, 1977.

By tariff revision[1] issued April 22 and marked to become effective May 22, 1977, Profit By Air, Inc. (Profit), an air freight forwarder, proposes to increase its domestic C.O.D. collection service minimum charge from $3.00 to $7.50 per shipment and the rate from $.01 to $.03 per $1.00 (or fraction thereof) of the C.O.D. amount to be collected.

In support of its proposal, Profit asserts, inter alia, that during calendar year 1976, it handled an aggregate C.O.D. amount of about $1,815,000 and received total service charges amounty to $21,200, with an average service fee of $8.43; that during the same period, its additional costs of handling such shipments were $55,300 (or approximately 2.6 times its revenue for providing the service); that

[1] Revisions to Air Tariffs Corporation, Agent, Tariff C.A.B. No. 50, and John M. Sampson, Agent, Tariff C.A.B. No. 19.

[1] Revisions to Profit By Air, Inc., Tariff C.A.B. No. 18.

the total costs of handling C.O.D. shipments, including allocation of other costs, amounted to well over $100,000; that the above added costs were based upon the additional clerical effort at both the station and general accounting levels, which required 2.2 man-hours per shipment at $10 per hour; that based on contractual increases the basic labor cost will rise by a minimum of 10 percent in calendar 1977; that C.O.D. service is offered only as an accommodation when required and should at least cover direct costs; and that the proposed revision would raise Profit's domestic charges to the level of its international charge, making them uniform.

Upon consideration of all relevant factors, the Board finds that the increased C.O.D. minimum charge proposed by Profit may be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and should be investigated. The Board further concludes that the proposal, should be suspended pending investigation.

By Order 75–11–43, adopted November 12, 1975, the Board suspended the same proposals by Profit that it is now filing. In that order, we stated that the forwarder's justification was inadequate and contained little indication of how its estimated cost of $25 per C.O.D. service was determined.[2]

In support of its current proposal, Profit lists certain functions that must be performed for C.O.D. shipments at the station and at the general accounting office, and asserts that these functions require one man-hour per C.O.D. shipment at the station and 1.2 man-hours at the general accounting office (not including additional delivery and handling costs), for a total of 2.2 man-hours at $10 per hour.[3] However, Profit does not indicate how its cost estimates were made nor describe the surveys upon which they might have been based. Although the forwarder presents a detailed list of C.O.D. service functions and two overall estimates of the labor-hours required, it does not describe how these estimated times were arrived at. There is no full description of how the survey was conducted. Supporting details are not presented, details which, in our opinion, are necessary to justify the proposed tripling of the C.O.D. rate per $1.00 collected and raising the minimum charge 2½ times.

[2] "The forwarder merely states that this estimated cost is based on 'at least 2 man-hours at $6.50 per hour of general accounting time, a total of 1 man-hour processing time at $6.50 per hour between the origin and destination station, additional banking expense, and additional telephone expense as it is necessary to notify the consignee that the shipment is C.O.D.' Profit does not indicate how the foregoing estimates were reached, nor does it describe any surveys upon which they might have been based."

[3] These functions may be summarized as follows:

Additional steps at the station level

1. Rating and auditing of shipment.
2. Stamping of shipment.
3. Marking of each package.
4. Sending special tele to destination station.
5. Follow-up by origin station.
6. Notification of consignee.
7. Additional delivery time—not counted by forwarder.
8. Additional time if C.O.D. shipment refused.
9. Special precautions in handling cash or certified checks.

Additional steps required at general accounting office

1. Special report from stations.
2. Special reports by computer.
3. Continuous follow-up.
4. Claims payment due to failure to collect C.O.D.'s.

Furthermore, certain of the functions listed, e.g., that C.O.D. shipments must be fully rated and audited, are required for all types of shipments. Also, the "long explanation" to consignee of how "the whole procedure works", which the forwarder indicates is additional justification for the increase, would not seem to be required more than once for the same consignee.

The proposal would result in C.O.D. minimum charges and rates per $1.00 of money collected, much above those in effect for either direct carriers or forwarders. In fact, Profit's current C.O.D. minimum charge of $3.00 is already higher than that of the direct carriers and many forwarders, and its proposed $7.50 charge would be almost double the highest minimum charge in effect for any airline or forwarder. Practically all direct carriers have a domestic minimum charge for C.O.D. service of $1.00 per shipment and most forwarders have charges between $2.00 and $4.00. Profit's proposed rate of 3 cents per $1.00 collected would be 6 times as much as the 50 cents per $100 in effect domestically for direct carriers and three times as high as the 1 cent per $1.00 now in effect for many forwarders; in fact, some forwarders charge less.

Finally, inflation in recent years has significantly raised the value of shipments and thus has increased the forwarder's C.O.D. collections without any increase in the rate per $1.00. For example, a shipment valued at $500 ten years ago might be valued at $1,000 today, and the C.O.D. charge would be increased from $5.00 to $10.00 at Profit's current rate of 1 cent per $1.00 collected.

The Board has consistently suspended increases in C.O.D. charges and rates proposed by both forwarders and direct carriers in the absence of full and adequate justification.[4] We shall suspend Profit's proposal for the same reason.

Accordingly, pursuant to the Federal Aviation Act of 1958, and particularly sections 204(a), 403, 404, and 1002 thereof,

[4] For example, Order 77–4–104, 76–7–120, 76–6–9, 75–11–43, and previous orders.

It is ordered That: 1. An investigation is instituted to determine whether the charge and provisions in Rule No. 4(j)(1)(a) and the proposed cancellation in Rule No. 4(J)(1)(b) on 13th Revised Page 10 of C.A.B. No. 18, issued by Profit By Air, Inc., and rules, regulations, or practices affecting such charge and provisions, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, unduly prejudicial, or otherwise unlawful, and if found to be unlawful, to determine and prescribe the lawful charge and provisions, and rules, regulations, or practices affecting such charge and provisions;

2. Pending hearing and decision by the Board, the charge and provisions in Rule No. 4(J)(1)(a) and the proposed cancellation in Rule No. 4(J)(1)(b) on 13th Revised Page 10 of C.A.B. No. 18, issued by Profit By Air, Inc., are suspended and their use deferred to and including August 19, 1977, unless otherwise ordered by the Board, and that no changes be made therein during the period of suspension except by order or special permission of the Board; and

3. Copies of this order shall be filed with the tariff and served upon Profit By Air, Inc., which is hereby made a party to Docket 30905.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

National Bureau of Standards

GRADING OF ABRASIVE GRAIN ON COATED ABRASIVE PRODUCTS

Voluntary Product Standard Action on Proposed Withdrawal

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10), notice is hereby given of the withdrawal of Voluntary Product Standard PS 8–67, "Grading of Abrasive Grain on Coated Abrasive Products."

It has been determined that this standard is technically inadequate and that revision would serve no useful purpose. The subject matter of PS 8–67 is adequately covered by the American National Standards Institute's standard ANSI B74.18, "Specification for Grading of Certain Abrasive Grain on Coated Abrasive Products." This action is taken in furtherance of the Department's announced intentions as set forth in the public notice appearing in the FEDERAL REGISTER of April 12, 1977 (42 FR 19169) to withdraw this standard.

The effective date for the withdrawal of this standard will be July 25, 1977. This withdrawal action terminates the authority to refer to the standard as a voluntary standard developed under the Department of Commerce procedures.

Dated: May 23, 1977.

ERNEST AMBLER,
Acting Director.

National Oceanic and Atmospheric Administration

PRE-ACT ENDANGERED SPECIES PRODUCTS

Issuance of Certificates of Exemption

On April 7, 1977, notice was published in the FEDERAL REGISTER (42 FR 18421) that applications had been filed with the National Marine Fisheries Service by J. L. Houston, Inc. of Seattle, Washington and Robert Bruce Hartman of Lahaina, Maui, Hawaii for Certificates of Exemption to engage in certain commercial activities with respect to their declared inventories of pre-Act endagered species products.

Notice is hereby given that on May 26, 1977, as authorized by the provisions of the Endangered Species Act of 1973, as amended, (Pub. L. 94–359), and the regulations issued thereunder (50 CFR Part 222, Subpart B), the National Marine Fisheries Service issued Certificates of Exemption to J. L. Houston, Inc., 1408 12th Avenue, Seattle, Washington 98122 and Robert Bruce Hartman, d/b/a Whaler's Locker, P.O. Box 842, Lahaina, Maui, Hawaii 96761.

The Certificates of Exemption are available for review during normal business hours in the Office of the Enforcement Division, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20007.

Dated: May 20, 1977.

JACK W. GEHRINGER,
Deputy Director, NMFS.

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

MAY 16, 1977.

The USAF Scientific Advisory Board Electronic Systems Division Advisory Group, AFSC, will hold meetings on June 14, 1977 from 8:30 a.m. to 5:00 p.m. and June 15, 1977 from 8:30 a.m. to 12:00 p.m., at Hanscom Air Force Base, Massachusetts in the Command Management Center, Building 1606.

The Group will receive classified briefings and hold classified discussions on selected Air Force Command, Control and Communications Programs.

The meetings concern matters listed in section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, the meetings will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at 202–697–8404.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

Department of the Army

CHEMICAL PROPULSION ADVISORY COMMITTEE PROPELLANT CHARACTERIZATION WORKING GROUP

Closed Meeting

Pursuant to the provisions of section 10 of Pub. L. 92–463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Chemical Propulsion Advisory Committee (Propellant Characterization Working Group) will be held on Tuesday, Wednesday, and Thursday, June 7–9, 1977 at 9 a.m. at the U.S. Air Force Academy, Colorado Springs, CO.

The Committee's primary responsibilities are to provide technical advice to the Joint Army, Navy, NASA, Air Force (JANNAF) Interagency Propulsion Committee and to promote the exchange of technical information in the field of propulsion. At this meeting the Committee will exchange technical information on methods for ahe analyses of solid and liquid missile propellants.

Under the provision of section 10(d) of Pub. L. 92–463, the Federal Advisory Committee Act, meetings may be closed to the public when they are concerned with matters listed in section 552(b) of Title 5, United States Code. One of the matters so listed is that specifically required by Executive order to be kept secret in the interest of the national defense or foreign policy.

Accordingly, this meeting will be closed to the public because the matters concerned are related to the design, development and production of classified rocket motors (5 U.S.C. 552(b)(1)). However, those individuals who possess a personal security clearance of at least confidential and a certified need-to-know in the area of chemical rocket propulsion may attend, provided they have notified the Advisory Committee Chairman in writing at least five (5) days prior to the meeting.

Members of the public who may wish to do so are invited to submit material in writing to the Chairman concerning matters believed to be deserving of the Committee's attention. All communications regarding this Advisory Committee should be addressed to the Chairman, Mr. B. J. Alley, U.S. Army Missile Research and Development Command, Attn: DRDMI–TKC, Redstone Arsenal, AL 35809.

B. J. ALLEY,
Chairman.

FORT ORD COMPLEX, CALIF.

Filing of Final Environmental Impact Statement

In compliance with the National Environmental Policy Act of 1969, the Army, on 23 May 1977 provided the Council on Environmental Quality with a Final Environmental Impact Statement (EIS) concerning Ground Squirrel Control at the Fort Ord Complex in California.

The control of the squirrels is required to reduce the existence of an ecological situation having high potential for a plague epizootic.

The EIS indicates the preferred action to be the use of the chemical 1080 to control the ground squirrels. However, based on our review of the FEIS; comments on the Draft EIS; and advice received from Federal agencies as part of the consultation process under Executive Order 11870, the Department of the Army prefers the alternative that would substitute the use of zinc phosphide for the pesticide 1080. It was concluded that the Army could serve the overall public interest best and at the same time protect the health of the troops and others through the use of an alternative that would not require the application of 1080 for ground squirrel control.

In the Washington area, inspection copies may be seen, during normal duty hours, in the Environmental Office, Office of the Assistant Chief of Engineers, Room 1E676, Pentagon, Washington, DC 20310 (phone 202–694–1163).

BRUCE A. HILDEBRAND,
Deputy For Environmental Affairs, Office of the Assistant Secretary of the Army (Civil Works).

Defense Civil Preparedness Agency

PRIVACY ACT OF 1974

Amendment of a Record System

In FR Doc. 75–21075 published in the FEDERAL REGISTER 40 FR 35337 (August 18, 1975), the Defense Civil Preparedness Agency set forth a record system as prescribed by subsection of 3(e) (4) and (11) of the Privacy Act of 1974 (Pub. L. 93–579, 5 U.S.C. 552a) within the Defense Civil Preparedness Agency. This record system is identified as "DCPA LEG 5—Interest-Conflict Review."

Notice is hereby given that the Defense Civil Preparedness Agency is amending this record system. The proposed changes therein are not deemed to fall within the provisions of Office of Management and Budget (OMB) Circular No. A–108, Transmittal Memorandum No. 1, dated September 30, 1975, and Transmittal Memorandum No. 3, dated May 17, 1976, which provide supplemental guidance to Federal agencies regarding the preparation and submission of reports of their intention to establish or alter systems of personal records as required by the Privacy Act of 1974. This OMB guidance was set forth in FEDERAL

REGISTER (40 FR 45877) on October 3, 1975.

Following a brief identification of the record system and the changes made therein, the complete revised record system as amended, is published in its entirety.

Interested persons are invited to submit comments, including written data, views or arguments, concerning the proposed changes to the Assistant Director for Administrative Services, Defense Civil Preparedness Agency, Room 1D487, The Pentagon, Washington, D.C. 20301 on or before June 25, 1977. The record system will be effective as proposed without further notice, on or before June 25, 1977, unless comments are received which result in a contrary determination requiring republication for further comments.

CLEG 5

System name: DCPA LEG 5–Interest-Conflict Review

Changes:

Categories of records in the system: In the second and third lines the reference to Form 1555–1 is deleted and the name of the form is changed to read "Confidential Statement of Affiliations and Financial Interests."

Routine uses of records maintained in the system, including categories of uses and the purpose of such uses: After "Supervisor", delete the sentence "DD Form 1555 or 1555–1 is not shown supervisor."

Others: Revise to read as follows: "Reports on receipt of gratuities submitted to designee of Secretary of Defense (DCPA Inst. 5860.1). DD Form 1555 not disclosed outside Defense Civil Preparedness Agency except as Director or Civil Service Commission may determine."

Administrative Services: Revise to read as follows: "Maintains records of persons who need to submit DD Form 1555 and postemployment and defense related employment statements.

Record source categories: Delete "and 1555–1."

CLEG 5

System name:

DCPA LEG 5–Interest-Conflict Review

System location:

Defense Civil Preparedness Agency Headquarters (DCPA), The Pentagon, Washington, D.C. 20301.

Categories of individuals covered by the system:

All DCPA employees, headquarters and field, including full time permanent, part time, temporary, consultants, military and civilian, and former employees.

Categories of records in the system:

Files contain for those employees required to submit same, a DD Form 1555, "Confidential Statement of Affiliations and Financial Interests," and documents connected with review thereof, and for any DCPA employee documents accumulated in connection with enforcement of standards of conduct, review of conflicts of interest, reports of receipts of gratuities, entertainment, etc., disqualifications, reports of defense related employment and outside employment. For former employees, documents include those relating to conflict of interest and postemployment and defense related employment.

Authority for maintenance of the system:

Executive Order 11222 of May 8, 1964, "Prescribing Standards of Ethical Conduct for Government Officers and Employees." Civil Service Regulation, "Employee Responsibilities and Conduct," 5 CFR Part 735 and 5 U.S.C. 301. For former employees, Sec. 410, Pub. L. 91–121.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

General Counsel: To ascertain if there are conflicts of interest between employees private interest and official duties, or if there are violations of standards of conduct or postemployment restrictions. If such conflict or violation is identified, reports may be used in informal conferences with employee, report to Director and enforcement authorities, and in connection with appeals. Disclosure of any investigatory matter may be made to any Federal agency with jurisdiction.

Supervisor: Documents are used to determine if employee has a disqualifying interest or for enforcement of standards of conduct.

Others: Reports on receipt of gratuities submitted to designee of Secretary of Defense (DCPA Inst. 5860.1). DD Form 1555 not disclosed outside Defense Civil Preparedness Agency except as Director or Civil Service Commission may determine.

Administrative Services: Maintains records of persons who need to submit DD Form 1555 and postemployment and defense related employment statements.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Paper records in file folders.

Retrievability:

Filed alphabetically by name.

Safeguards:

Building employs security guards. Records are retained in areas accessible only to authorized personnel who are properly screened, cleared and trained.

Retention and disposal:

Files kept for two years after final decision or after employee leaves DCPA, whichever is later, then destroyed.

System manager(s) and address:

Director, DCPA, The Pentagon, Washington, D.C. 20301.

Notification procedure:

Information may be obtained from: Headquarters, DCPA, The Pentagon, Washington, D.C. 20301, Telephone: Area Code 202/695–6498.

Record access procedures:

Requests from individuals should be addressed to: Headquarters, DCPA, Room 1D511, The Pentagon, Washington, D.C. 20301.

Written requests for information should contain the full name of the individual and current address.

For personal visits, the individual should be able to provide some acceptable identification, that is, driver's license, employing office's identification card, and give some verbal information could be verified with his case folder.

Contesting record procedures:

The agency's rules for contesting contents and appealing initial determinations may be obtained from Management Division, DCPA, Pentagon Building, Washington, D.C. 20301.

Record source categories:

DD Form 1555 reports on defense related employment and reports on receipts of gratuities are prepared and submitted by employee. Other sources include supervisors, informants.

Systems exempted from certain provisions of the act:

Parts of this system may be exempt under 5 U.S.C. 552a(k)(2), as applicable. For additional information, contact the Systems Manager.

MAURICE W. ROCHE,
Director, Correspondence and Directives OASD (Comptroller).

MAY 23, 1977.

[FR Doc.77–15002 Filed 5–25–77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of March 14–March 18, 1977

Notice is hereby given that during the week of March 14 through March 18, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Abco Fuel Oil Service, Inc.; Pride Utilities, Inc.; Plainview, N.Y.; FRA–1070; FRA–1080; No. 2 Fuel Oil

Abco Fuel Oil Service, Inc. (Abco) and Pride Utilities, Inc. (Pride), filed Appeals from Remedial Orders which were issued to them by FEA Region II. The Remedial Orders found that the firms had sold No. 2 fuel oil at unlawful price levels during the period November 1, 1973, through November 30, 1974. The Abco and Pride Appeals, if granted, would relieve the firms of the obligation to refund the amount of the previous overcharges plus interest. The Appeals were consolidated since they involved similar factual and legal questions and the two firms are under common ownership. In considering the Appeals, the FEA rejected the contention that Abco and Pride should have been permitted to pass through their costs of transporting heating oil to their customers on a dollar-for-dollar basis. The FEA determination was based on the finding that those costs were non-product costs as delineated in FEA Ruling 1975–10 and were therefore subject to the limitations specified in Section 212.93(b). With respect to the firms' claims that they would incur a serious hardship or gross inequity if they were required to immediately refund the overcharges, the FEA held that these allegations would be considered only in the context of an Application for Exception. Although both firms had previously filed exception applications with FEA Region II, those applications had been dismissed or denied on their merits. The FEA found no basis to depart from the previous determinations which had been reached in this matter. Consequently, since Abco and Pride failed to demonstrate the existence of any error in the Remedial Orders, their Appeals were denied.

Amtane, Inc.; Tulsa, Okla.; FXA–1107; Propane

Amtane, Inc. (Amtane), filed an Appeal from a Decision and Order which the FEA had issued to Small's LP Gas Co. (Small's) on December 3, 1976. *Small's LP Gas Co.*, 4 FEA Par. 83,219 (December 3, 1976). In that determination, the FEA granted an Application for Exception which Small's had filed on the grounds that adherence to its base period supplier/purchaser relationship with Amtane resulted in a serious hardship to the firm. Based upon that determination, the Regional Administrator of FEA Region VII was directed to assign Small's a new supplier with respect to its base period use of propane. The Amtane Appeal, if granted, would have resulted in the rescission of the December 3, 1976, Decision and the reinstatement of Small's base period supplier/purchaser relationship with Amtane. In its Appeal, Amtane contended that the December 3 Decision erred in finding that Small's competitive position had declined as a result of the higher prices which it had been paying for propane. Amtane further contended that the December 3 Decision was incorrect in the findings reached as to Amtane's propane prices and Small's freight costs. Amtane also contended that the exception relief granted to Small's was based upon an erroneous calculation of Small's base period use of propane. Finally, Amtane claimed that the December 3 Decision was procedurally defective because Amtane failed to receive formal notification of the Small's exception application as required by the provisions of 10 CFR 205.53 and was therefore improperly deprived of an opportunity to comment on the Application. In considering the Amtane Appeal, the FEA found that the December 3 Decision was correct in finding that Small's competitive position had deteriorated as a result of the prices which it was paying Amtane for propane. In this regard, the FEA observed that although Small's sales volume had increased between 1974 and 1976, the firm did not realize any financial benefits from the increased sales, and in fact the firm's financial position had deteriorated during this time. However, the FEA concluded that Amtane was correct in contending that the FEA used an erroneous calculation in computing Small's base period use. The FEA therefore ordered that appropriate adjustments be made in any future extensions of exception relief granted to Small's. The FEA also found that Amtane was partially correct in its assertion that the FEA used erroneous price information in calculating Small's delivered cost of propane. However, the FEA concluded that any such error was harmless because even if the correct data had been used in the December 3 determination, the result reached would not have been different. Finally, the FEA rejected Amtane's claim that the previous determination was procedurally defective since in the present proceeding Amtane was afforded an opportunity to challenge the factual and legal basis of the December 3 Decision and Order. Accordingly, the Amtane Appeal was denied.

Beren Corp.: Kansas City, Mo.: FRA–1059; Crude Oil

Beren Corporation filed an Appeal from a Remedial Order which the Deputy Regional Administrator of FEA Region VIII issued to the firm on November 15, 1976. In the Remedial Order, the FEA found that during the period November 16, 1973, through December 31, 1974, Beren had erroneously classified eight properties as stripper well leases and had sold the crude oil produced from those properties at uncontrolled market prices. On the basis of these findings, Beren was directed to refund with interest to the affected purchasers the revenues it derived from charging unlawful price levels for the crude oil involved. The Remedial Order further directed Beren to recalculate the average daily production of crude oil from the leases and determine if the properties qualified for stripper well status during 1975 or 1976 in accordance with the principles set forth in the Remedial Order. In its Appeal, Beren contended that the Remedial Order erroneously calculated crude oil production from the properties by misconstruing the phrase "average daily production." Beren contended that for purposes of measuring average daily production from a property, a well which produced crude oil for any portion of the 12 calendar month measurement period should be counted as a producing well for the entire measurement period. Beren had reactivated wells on five properties in late 1973 and by applying its interpretation of average daily production, the first asserted that the properties qualified for stripper well status in 1974. In considering Beren's Appeal, the FEA reviewed the legislative history of the stripper well exemption and concluded that the principal purpose of the exemption was to prevent the premature shutdown of stripper wells on marginal properties. In view of this background, the FEA concluded that the downward adjustment mechanism adopted in Ruling 1975–12 for wells that did not produce crude oil during the entire year was consistent with the purpose of the stripper well exemption, and Beren's interpretation of "average daily production" was therefore rejected as unreasonable. Moreover, the FEA determined that that there was no merit to Beren's further contention that a producer which did not keep adequate records of crude oil production should be permitted to use crude oil "sold" rather than "produced" for purposes of determining a property's eligibility for stripper well status. Finally, the FEA determined that the assessment of interest on the overcharges was a proper exercise of the agency's authority. Since Beren had failed to demonstrate that the Remedial Order was erroneous in fact or law or was arbitrary or capricious, the firm's Appeal was denied.

Edmond Oil Co.; Pawtucket, R.I.; FEA–1002; No. 2 Fuel Oil

The Emond Oil Company (Emond) appealed from a Remedial Order which was issued to the firm by FEA Region IX. In the Remedial Order, the Regional Office found that Emond had previously charged unlawful price levels for the No. 2 heating oil which it had sold. The Remedial Order directed Emond to immediately refund to its customers the amount of the overcharges plus interest. In its Appeal Emond raised a number of general issues regarding the FEA's authority to audit and take compliance action against firms which are in violation of the FEA Regulations. In considering the Appeal, the FEA held that it is not required to disclose its audit selection process as a precondition to enforcing the FEA Regulations in a compliance proceeding. The FEA further held that, contrary to Emond's assertion, May 15, 1973, is not an arbitrary and unreasonable date for the purpose of calculating maximum permissible selling prices. See *Frank Dupuis Co.*, 4 FEA Par. 80,583 (December 10, 1976). In addition, the FEA determined that it was not estopped from enforcing the Remedial Order on the grounds that it had not notified Emond that it was in violation during the period when the overcharges were occurring. In this regard the FEA noted that firms in the petroleum industry have an affirmative obligation to be cognizant of the application of the FEA Regulation to their business operations. Finally, the FEA found that Emond had failed to demonstrate that the enforcement of the Remedial Order would cause the firm to experience a serious financial hardship and the Appeal was accordingly denied.

Getty Oil Co.; New York, N.Y.; FEA–0978; Crude Oil

The Getty Oil Company filed an Appeal from a Remedial Order which the FEA Deputy Assistant Administrator for Compliance issued to the firm on August 12, 1976. The Remedial Order concerns certain crude oil transactions which occurred between Getty and the Standard Oil Company (Sohio) during the period October 1973 through January 1976. According to the Remedial Order, Getty agreed to sell 25,000 barrels per day (BPD) of predominantly old domestic crude oil to Sohio pursuant to the terms of two agreements which the firms had executed. In return, Sohio agreed to sell 25,000 BPD of foreign crude oil to Getty. The domestic crued oil which Sohio received from Getty was processed in its domestic refineries. The foreign crude oil which Getty received from Sohio was delivered to Getty in the Persian Gulf and was transferred in due course to a Getty affiliate in Japan. The Remedial Order found that Sohio treated the transactions summarized above as an exchange, and accordingly accounted for the old domestic crude oil which it received from Getty at the price at which Sohio acquired the foreign crude oil which it transferred to Getty. The FEA found that Getty improperly treated the crude oil transactions which occurred pursuant to the two agreements between the firms as independent purchases and sales, whereas it should have treated the transactions as an exchange. As a result of Getty's failure to treat the Getty/Sohio crude oil transactions as an exchange, the Remedial Order concluded that Getty had overcharged Sohio for the crude oil involved during the period October 1973 through October 1974, had improperly excluded the 25,000 BPD of old domestic crude oil which it transferred to Sohio from the crude oil receipts which it reported to the FEA, and thereby received excess entitlement sales revenues during the period November 1974 through January 1976. Getty was therefore directed to refund the overcharges to Sohio and to account for the previously unreported old crude oil over a six month period beginning with the effective date of the Remedial Order.

In its Appeal, Getty contended that an August 1, 1975, Notice of Probable Violation (NOPV) and the Remedial Order would not have been issued if the Senate Subcommittee on Administrative Practice and Procedure had not exerted improper pressure on the FEA to find Getty liable for the regulatory violations alleged with respect to the Getty/Sohio transactions. Getty contended that any administrative agency action which is based even in part on pressures emanating from Congressional sources is invalid under the precedent established in *Pillsbury Co. v. FTC*, 354 F. 2d 952 (5th Cir. 1966). In a related argument, Getty contended that the FEA's refusal to release certain documents which it previously requested under the Freedom of Information Act will frustrate its ability to fully understand and prepare a defense to the charges advanced in the Remedial Order. In connection with these arguments, Getty addressed a set of written Interrogatories to the Deputy Assistant Administrator for Compliance, in which it requested two distinct categories of material. The first category consists of information and documents which Getty claims are necessary as a threshold matter to enable the firm within the context of its administrative appeal to effectively raise the issues of Congressional interference with the FEA adjudicative process. The second category consists of information of a very broad scope which Getty states will generally support certain arguments which the firm has already raised in defense to the charges of the Remedial Order.

In considering the Interrogatories which Getty submitted, the FEA held that under the precedent established in *Petrolane, Inc.*, 2 FEA Par. 80,615 (June 17, 1975), a determination must be made as to whether access to the material which Getty requested is in fact essential to enable the firm to pursue its Appeal effectively. With respect to the information pertaining to Congressional interference, the FEA reviewed the applicable case law and noted that the federal courts have only invoked the "*Pillsbury* doctrine" in a limited number of situations where the following showing has been made: (i) there has been a final agency action which adversely affects the person seeking judicial review; (ii) the agency's action was based in part on pressure emanating from Congressional sources; and (iii) the agency changed its position in response to the Congressional pressures.

Based on a review of the entire record in this proceeding, the Office of Exceptions and Appeals concluded that Getty failed to make a prima facie showing of Congressional interference under the *Pillsbury* doctrine. Unlike the *Pillsbury* line of cases, none of the agency actions which Getty alleges were subject to Congressional influence was a final agency action. In addition, there is no evidence to indicate that the FEA changed its position in response to Congressional pressures. However, in order to avoid even the appearance of improper Congressional influence, the Office of Exceptions and Appeals determined that any agency officials who participated in the preliminary stages of the overall compliance proceeding would be recused from any participation in the agency's appellate review process with respect to the Getty Appeal. With respect to the other category of information which Getty requested in its Interrogatories which is unrelated to the issue of Congressional interference, the FEA found that Getty understands the charges in the Remedial Order and has been able to prepare an adequate defense to those charges. The request for discovery which Getty submitted in connection with its Appeal was accordingly denied.

Murphy Oil Corp., El Dorado, Ark.; FEA–0934; Crude Oil

Murphy Oil Corporation appealed from a Decision and Order which the FEA issued to it on July 16, 1976. *Murphy Oil Corp.*, 4 FEA Par. 83,009 (July 16, 1976). In that Decision, the FEA denied Murphy's request for exception relief from the provisions of 10 CFR Part 214 (the Mandatory Canadian Crude Oil Allocation Program). In its Appeal, Murphy contended that the FEA erred in determining that the application of the Canadian Crude Oil Allocation Program did not result in a serious hardship to the firm. In support of its Appeal, Murphy also submitted new financial data which the firm had not previously furnished. That data revealed that Murphy would not experience significant financial or operating difficulties in 1977 as a result of the Program. Moreover, although Murphy projected that its Superior refinery would incur a net operating loss in 1978, the FEA found that this projection was based upon erroneous assumptions regarding the quantity of Canadian crude oil that will be available to the Superior refinery. The FEA noted that the Canadian Government recently announced plans to license the exportation of heavy crude oil separately from light crude oil and to increase the volume of heavy crude oil for export into the United States. Murphy's projections as to the impact on its operations did not take these recent developments into account and were therefore significantly lower than current facts would appear to warrant. In view of these findings the FEA concluded that Murphy had not demonstrated that it will incur a serious financial hardship as a result of the operation of the Canadian Crude Oil Allocation Program. Murphy also contended on Appeal that the FEA erred in determining that the firm's Superior refinery is not unusually or disproportionately affected by the provisions of Part 214 of the FEA Regulations. The FEA found that the additional material which Murphy submitted on Appeal reaffirms the finding made in the prior Decision and Order. Although Murphy deliberately reduced the quantity of crude oil which it imported for use at its Superior refinery during the base period, it did so in reaction to economic conditions to which all other domestic refiners were subject. Consequently, the FEA found that Murphy had again failed to demonstrate that its Superior refinery was uniquely affected or placed in a position substantially different from other refineries. The FEA also affirmed the conclusion reached in the prior Decision that the crude runs at the Superior refinery during the base period were not so far below historical levels as to result in a serious distortion which would constitute a gross inequity. Accordingly, Murphy's Appeal was denied.

Petrochemical Energy Group; Washington, D.C.; FEA–1100; Butane

The Petrochemical Energy Group (PEG), an ad hoc group of independent petrochemical companies, appealed from a Decision and Order which the FEA Office of Regulatory Programs issued to Brooklyn Union Gas Company (Brooklyn Union) on October 18, 1976. The October 18 Order assigned Brooklyn Union a base period use of butane which the firm may utilize to increase the British thermal unit (Btu) heat value of the synthetic natural gas (SNG) which it produces. The butane would be used when the plant's methanator equipment is out of operation. Prior to reaching the substantive merits of the Appeal, the FEA rejected a challenge by Brooklyn Union to PEG's standing as an "aggrieved person" eligible to file an Appeal of the October 18 Order. The FEA found that although PEG had not shown that the allocation of butane granted in the Order will have an immediate impact upon the petrochemical industry, it could affect that industry adversely in the future. Consequently pursuant to prior precedents it was appropriate for the FEA to permit PEG to file an Appeal. In considering the PEG Appeal, the FEA determined that it was also proper for the FEA to have acted under Subpart C of the FEA Procedural Regulations in assigning Brooklyn Union a base period allocation of butane. The FEA noted that Section 211.12(e)(3) specifically designates the procedures in Subpart C to be used for the assignment of a base period supplier and base period volume to a firm which has no base period use. The FEA also rejected PEG's contention that Brooklyn Union's use of butane for Btu enrichment was improperly classified as an "industrial use" and should instead have been regarded as "peak shaving." The FEA found that Brooklyn Union's use of butane was not included within the regulatory definition of "peak shaving" since the firm does not inject butane into its SNG product stream for the purpose of increasing the Btu heating value and improving the flame characteristics of the SNG. The PEG Appeal was therefore denied.

Waterbury Petroleum Products, Inc., Waterbury, Conn., FFA–1192; Freedom of Information

Waterbury Petroleum Products, Inc. (Waterbury) appealed from a determination in which the FEA Information Access Officer denied in part a Request for Information that the firm had filed under the Freedom of Information Act, 5 U.S.C. 552 (the Act). In his Decision, the Information Access Officer withheld from disclosure to Waterbury an Issue Letter sent by the FEA Region IX Office to the Atlantic Richfield Company (ARCO) on October 1, 1976 and the text of ARCO's October 27, 1976 response to the Issue Letter dated October 27, 1976. The documents were withheld on the grounds that they were exempt from mandatory public disclosure pursuant to the provisions of Sections 552(b)(7)(A) and Section 552(b)(7)(B) of the Act. In considering Waterbury's Appeal, the FEA determined that the Issue Letter involved is a discovery device rather than a formal statement of violations based on the conclusion of a significant stage of the FEA's investigation of ARCO. Since formal allegations of violation had not yet been issued to ARCO by the FEA, it was determined that release of the Issue Letter and ARCO's response would lead to the premature crystallization of adversary positions thereby inhibiting the FEA's efforts to secure voluntary compliance from ARCO. The FEA therefore determined that the documents were exempt from mandatory public disclosure under Section 552(b)(7)(A) because their release would interfere with an integral part of the FEA's enforcement proceeding. The FEA further determined that the premature crystallization of adversary positions would not interfere with ARCO's right to an impartial adjudication and therefore that particular finding provides no basis for withholding the documents under Section 552(b)(7)(B). However on the basis of its findings with regard to Section 552(b)(7)(A) the FEA determined that the Information Access Officer had properly withheld the Issue Letter and ARCO's response from public disclosure and Waterbury's Appeal was therefore denied.

Weber County Commission; Ogden, Utah; FEA–0993
Phillips Petroleum Co., Bartlesville, Okla.; FEA–0996
Arizona Fuels Corp.; Salt Lake City, Utah; FMR–0071; Crude oil

W. S. Hatch Company, Phillips Petroleum Company and nine other parties from the State of Utah (the Utah Appellants) filed Appeals from a Decision and Order which the FEA issued to the Arizona Fuels Corporation on August 27, 1976. Arizona Fuels Corp., 4 FEA Par. 83,061 (August 27, 1976). Arizona Fuels also filed an Application for Modification of the August 27 Order and all of these submissions were consolidated in a single proceeding. In the August 27 Decision and Order, the FEA approved exception relief which permitted Arizona Fuels to purchase additional quantities of crude oil produced from the Upper Valley Escalante Field in Garfield County, Utah. The Appeals, if granted, would result in the issuace of an Order rescinding that Decision. With regard to the Hatch Appeal, the FEA found that the data which the firm submitted merely indicated that the August 27 Decision would cause Hatch to experience offsetting decreases in both revenues and expenses and therefore the firm's profitability would be substantially unaffected by the approval of exception relief for Arizona Fuels. The FEA also found that since most of Hatch's employees were simply reassigned to other trucking routes, Hatch had not demonstrated that the alleged reduction in its payroll expenses associated with the transportation of Escalante crude oil would result in an economic loss to the citizens of the State of Utah. Accordingly, Hatch's claims that the August 27 determination caused it to experience serious adverse consequences were unsupported. In addition, the FEA found that in the prior Decision, the FEA sought to achieve the significant statutory objective of encouraging the expansion of domestic refinery capacity, and that in view of this purpose, even if Hatch were to experience some adverse consequences as a result of the August 27 Decision and Order, it had not demonstrated that the FEA abused its discretion or acted in an arbitrary or capricious manner.

Phillips contended in its Appeal that its Woods Cross refinery is more efficient in the production of asphalt than Arizona Fuels' Predonia refinery, and that the FEA therefore acted arbitrarily in granting exception relief to Arizona Fuels which permitted it to use crude oil which Phillips would otherwise be authorized to purchase. Phillips also asserted that the August 27 Order will cause municipalities in the State of Utah to incur additional costs in purchasing asphalt that had been produced in other states. In considering these contentions, the FEA noted that the most efficient possible use of energy resources is only one of the FEA's statutory goals and that these goals are often mutually exclusive. The FEA found that Phillips had failed to demonstrate that the FEA abused its discretion in attempting to strike a balance between the competing statutory goals involved. Moreover, the FEA also found that Phillips had not convincingly demonstrated that it could not purchase additional supplies of asphaltic crude oil from other locations and thereby maintain its previous level of asphalt deliveries to the State of Utah. Accordingly, the Phillips Appeal was denied. The Appeals of the Utah Appellants, which merely reiterated the arguments advanced by Phillips and presented no data in support of their other claims, were also denied since they had failed to provide any basis to warrant rescission of the August 27 Order. Finally, with respect to the Arizona Fuels request for modification, the FEA found that the language of the August 27 Order was sufficiently clear and that the modification which Arizona Fuels requested was unnecessary. Accordingly, its Application for Modification was denied.

REQUESTS FOR EXCEPTION

Belcher Oil Co., Miami, Fla., FEE–3892, Residual fuel oil

Belcher Oil Company (Belcher) filed an Application for Exception from the provisions of 10 CFR 211.67(d)(4) which, if granted, would permit certain domestic refiners to sell to Belcher up to 1,000,000 barrels of residual fuel oil for sale into the "East Coast Market" during the months of March and April 1977, without incurring any additional entitlement obligations. In its Application, Belcher stated that 75 percent of the residual fuel oil sold in the Southeast historically has been supplied by domestic refineries. Belcher claimed that the provisions of Section 211.67(d)(4) have reduced the competitive advantage which was formerly enjoyed by these domestic refineries and that as a result, domestic refiners have reduced residual fuel oil supplies available for sale in the Southeast. Belcher further claimed that this situation has created supply shortages in the Southeast, and has increased the firm's reliance upon higher priced imported residual fuel oil. Belcher contended that this increase in its residual fuel oil costs constitutes a gross inequity for the firm and its customers. In considering the Belcher exception request, the FEA noted that the firm had failed to provide any documentation in support of the assertions it advanced, and that unsupported assertions do not form the basis for the approval of exception relief. The FEA also observed that the contentions advanced by Belcher concerning the effect of 10 CFR 212.67(d)(4) upon the market for residual fuel oil in the Southeast did not focus exclusively upon the firm, but instead challenged the FEA's generic considerable impact upon the East Coast residual fuel oil market. The FEA therefore concluded that the exceptions process was not the appropriate forum for considering Belcher's contentions, and that if Belcher believes that a change in FEA policy is desirable, it should seek such change through a rulemaking proceeding. In addition, the FEA noted that the FEA is already considering regulatory amendments which would have a considerable impact upon the East Coast residual fuel oil market, and that Belcher has had ample opportunity to present its views in that rulemaking proceeding. Accordingly, the Belcher exception request was denied.

Cities Service Co.; Tulsa, Okla.; FEE–3546; Motor gasoline

Cities Service Company (Cities) filed an Application for Exception from the provisions of 10 CFR 211.9 which, if granted, would have resulted in the assignment of the firm as the new base period supplier of motor gasoline for a retail sales outlet currently operated by Research Fuels, Inc. (RFI). In considering the Cities application, the FEA determined that contrary to the firm's allegation, the FEA regulations in no way hampered its ability to execute a contract with RFI under which Cities would lease the outlet. The FEA also found that Cities had submitted no material in support of its contention that RFI would incur a serious hardship in the future if Cities was not assigned as the outlet's base period supplier. On the basis of the record in the proceeding the FEA also concluded that Cities had failed to establish that the continuation of RFI's base period supplier/purchaser relationship with the Peacock Oil Company, its current base period supplier, resulted in a serious hardship or a gross inequity either to Cities or RFI. The Cities exception application was therefore denied.

Great Southern Oil & Gas Co., Inc.; Lafayette, La.; FXE–3584; Crude oil

Great Southern Oil & Gas Company, Inc (Great Southern) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would have resulted in an extension of the exception relief previously granted to Great Southern and would have permitted Great Southern to sell the entire working interest share of the crude oil produced from the Elizabeth Longman No. 1 well (Longman well) at upper tier ceiling prices. See Great Southern Oil & Gas Co., Inc., 4 FEA Par. 83,041 (August 11, 1976); and Great Southern Oil & Gas Co., Inc., 3 FEA Par. 83,124 (March 9, 1976). In considering the exception application, the FEA found that the Longman well was still incurring increased operating costs and the working interests continued to lack the incentive to produce crude oil from the property at the lower tier ceiling price. However, the FEA also determined that Great Southern had not demonstrated that it should be permitted to sell 100 percent of the working interest share of the production at upper tier ceiling prices. In this connection, the FEA pointed out that exception relief of the nature that had been granted to the firm in that past had been generally designed to provide the firm with an economic incentive to continue crude oil recovery activities. The Great Southern Application for Exception on the other hand was designed to permit the firm to recover operating costs which it had incurred in the past as a result of high workover expenses and would have no bearing on whether the firm would find it economically advantageous to operate the property in the future. However in order to permit Great Southern to recover workover expenses which it would incur in the future and therefore assure that the firm would continue to have an incentive to continue production from the Longman well, the FEA stated that Great Southern could file an Application for further exception relief at the time it is able to formulate with a reasonable degree of accuracy estimates of the expenses it will incur in Longman well. With respect to the present request, however, the FEA determined that under the procedures generally utilized in granting exception relief to producers from the lower their ceiling price rule Great Southern should be permitted to sell 94.36 percent of the crude oil produced from the Longman well at upper tier ceiling prices.

Kenco Refining, Inc.; Tesoro Petroleum Corp.; San Antonio, Tex; FEE–3627; Crude oil refined petroleum products

Kenco Refining, Inc. (Kenco) and Tesoro Petroleum Corporation (Tesoro) jointly requested various types of administrative relief relating to Kenco's acquisition from Tesoro of a refinery and related marketing assets located at Wolf Point, Montana (the Wolf Point refinery). Since the Mandatory Petroleum Allocation and Price Regulations are not specifically designed to apply to the

unusual conditions arising from the purchase and sale of a refinery, the FEA in accordance with previous Decisions involving similar circumstances consolidated the issues which the firms raised for evaluation through the exceptions process. With respect to the request for various types of retroactive relief, the FEA found that Kenco and Tesoro had made no showing that an exception application could not have been filed sufficiently in advance of the date of closing to afford adequate prospective relief. The FEA also noted that no explanation had been provided as to why the closing date of the refinery acquisition could not have been delayed until a determination was reached in this proceeding, and it therefore determined that any relief in this case should be granted on a prospective basis only. The FEA also determined that Kenco's acquisition of the Wolf Point refinery was not devised solely for the purpose of taking undue advantage of the FEA regulatory program.

In considering the firms' Application for Exception, the FEA found that since the Wolf Point refinery currently does not produce any refined products which are subject to the Mandatory Petroleum Allocation and Price Regulations, the portion of the firms' Application which requests exception relief with respect to the pricing and allocation of products produced at the Wolf Point refinery should be dismissed. With respect to the sale of the crude oil inventories at the refinery, the FEA determined that Tesoro and Kenco should be permitted to transfer the crude oil inventories at the prices which they agreed upon in their Sales Agreement.

However, since Tesoro will not be using the crude oil inventories which it is selling to Kenco, Tesoro was required to reduce its current "total cost of crude oil purchased" as that term is used in Section 212.83(c)(2)(iii) by the amount of revenues which it will receive from Kenco pursuant to the Agreement for that crude oil. Correspondingly, Kenco was required to include that amount in its "total cost of crude oil purchased." Kenco also requested that the FEA determine that it is eligible to participate as a refiner-buyer in the Crude Oil Buy/Sell Program beginning with the March–May 1977 allocation quarter. The FEA noted that the March–May 1977 Buy/Sell List had already been issued and published and the approval of Kenco's request could therefore require a complete revision of the List and thereby present a substantial administrative burden to the implementation of the Buy/Sell Program. Moreover, since the revision of the List might interfere with the business decisions which other firms may have made in reliance on the Buy/Sell List and Kenco had not made a strong showing that it would be adversely affected in a serious and substantial manner unless the List is revised, the FEA determined that Kenco's request should be denied in the form submitted. However, in order to assure an orderly transition in the ownership and operation of the refinery as well as afford Kenco the opportunity to submit a timely application to the FEA for an allocation of crude oil for the Wolf Point refinery under the Crude Oil Buy/Sell Program, the FEA permitted Kenco to purchase from Tesoro a portion of Tesoro's crude oil allocation under the Buy/Sell List for the March–May 1977 allocation quarter. Accordingly, the Application for Exception submitted by Kenco and Tesoro was granted in part and denied in part.

Midland Cooperatives,- Inc.; Minneapolis, Minn.; FEE–3194; Crude oil

Midland Cooperatives, Inc. (Midland) filed an Application for Exception from a "Notice of Proposed Adjustments to 1975 Exception Relief Under Domestic Crude Oil Allocation Program" which the FEA published on August 30, 1976. 41 Fed. Reg. 36540 (August 30, 1976). On November 5, 1976, the FEA issued a Supplemental Order which resolved the issues discussed in the August 30 Notice pursuant to the provisions of 10 CFR 211.67. Beacon Oil Co., et al., 4 FEA Par. 87,024 (November 5, 1976). Pursuant to the November 5 Supplemental Order Midland is required to purchase entitlements during each month of the period November 1976 through October 1977 in order to offset the excessive exception relief which the firm received from the provisions of 10 CFR 211.67 during calendar year 1975. Midland's exception request, if granted, would have relieved the firm of its obligation to purchase those entitlements. In considering Midland's exception request, the FEA noted that exception relief from the Entitlements Program was granted to small refiners such as Midland during 1975 for the sole purpose of mitigating the projected adverse impact the Entitlements Program would have during that year which would otherwise have precluded the firms from operating at a level of profitability for 1975 that was consistent with their historical operations. The FEA found that Midland would have attained a level of profitability for 1975 which exceeded its historical profit margin even if no exception relief had been granted from the Entitlements Program. Therefore, in view of the additional profits which Midland actually attained during 1975 as a result of entitlements exception relief, the FEA determined that the firm had failed to provide any material which indicated that its ongoing business activities would be seriously or adversely affected by the requirement that it purchase entitlements to account for the excess 1975 benefits. The exception request was accordingly denied.

Northwest Propane, Inc.; Farmington, Mich.; FXE–3894; Propane

On December 22, 1977 the FEA issued a Supplemental Order to Northwest Propane, Inc. (Northwest) which approved an extension of the exception relief which had been previously granted to the firm on April 2, 1976. Northwest Propane, Inc., 4 FEA Par. 87,021 (December 22, 1977). The December 22 Order directed the Regional Administrator of REA Region V to assign to Northwest for the quarter beginning on January 1, 1977 and ending on March 31, 1977, a supplier or suppliers whose wholesale price for propane was within the range of prices paid for that product by major marketers in the area in which Northwest operates. The Order also specified that upon receiving a written request from Northwest, the Regional Administrator of FEA Region V to assign to Northwest for the any month subsequent to March 1977 as to whether Northwest would continue to experience a serious hardship unless further exception relief were approved. Northwest requested an extension of exception relief in accordance with the terms of that Order. Based on the data which Northwest submitted to the Regional Administrator, and the recommendation of the Regional Administrator, the FEA determined that if Northwest were required to purchase its propane supplies from its base period supplier, Northwest would continue to incur the type of serious financial hardship which led to the approval of exception relief in the past. The exception relief was therefore extended through June 30, 1977.

Nothstein Ford, Inc.; Kutztown, Pa.; FEE–3634; Motor gasoline

Nothstein Ford, Inc. (Nothstein) filed an Application for Exception from the provisions of 10 CFR 211.9 which, if granted, would result in the assignment of the Exxon Company, U.S.A. (Exxon) as Nothstein's base period supplier of motor gasoline to replace its present base period supplier, Texaco, Inc. In its submission, Nothstein stated that it was experiencing a serious hardship as a result of its base period supplier's unwillingness to replace Nothstein's gasoline storage tanks with larger storage tanks and to install an additional storage tank and pump island which would allow the firm to offer premium gasoline for sale as well as regular and unleaded grades. In considering the exception request, the FEA initially noted that exception relief was not necessary to permit Nothstein and Exxon to enter into a new supply relationship. The FEA also determined that the capital improvements which Nothstein desires to make were not necessary to enable the firm to continue its operations, but were intended to increase its sales volume which had already more than doubled since the firm began operating the station in 1975. The FEA also found that Nothstein had adequate financial resources to purchase and install the new equipment itself. Finally, the FEA determined that if Nothstein were to install its own storage tanks, it would save at least two cents per gallon in equipment rental costs and might well be able to recover the cost of the equipment in a period of only two years. The FEA therefore concluded that no showing had been made that Nothstein was experiencing a serious hardship or gross inequity as a result of the application to it of FEA regulatory requirements and the exception application was denied.

Quaker State Oil Refining Corp.; Oil City, Pa.; FEE–3630; Crude Oil

Quaker State Oil Refining Corp. (Quaker State) filed an Application for Exception from the provisions of 10 CFR 212.67 which, if granted, would increase the number of entitlements which the firm is permitted to sell each month in order to offset the increased crude oil costs which it is experiencing as a result of the exemption of stripper well property crude oil from price controls. In its Application, Quaker State pointed out that all of the crude oil which the firm processes in its four refineries consists of Penn-Grade crude oil, a paraffin-based crude oil which is primarily obtained from stripper well properties. Quaker State further stated that as a result of the September 1, 1976 regulatory amendments exempting the first sale of stripper well property crude oil from price controls, the firm has incurred a substantial increase in its crude oil costs. Quaker State argued that its increased crude oil costs have not been adequately offset by the increased entitlements benefits which the firm realized as a result of the November 3, 1976 amendments to the regulations governing the Entitlements Program. In considering the Quaker State exception application, the FEA observed that a showing by Quaker State that the Entitlements Program does not fully equalize its cost of crude oil as compared to other refiners does not in and of itself demonstrate that a gross inequity exists. The FEA also found that the increase in crude oil costs which Quaker State is incurring is not a result of the FEA regulatory program, but is instead a result of the high quality of the crude oil which it refines, and the anomolous pricing patterns which exist in the market for Penn-Grade crude oil. Furthermore, the FEA concluded that Quaker State had failed to make a showing that it is adversely affected by the FEA regulatory program in a grossly inequitable manner. In this connection, the FEA found that Quaker State's profitability has increased significantly since the September 1 stripper well property exemption as compared to the same time period of the firm's previous fiscal year. Accordingly, the Quaker State exception application was denied.

REQUEST FOR MODIFICATION OR RESCISSION

New England Petroleum Corp.; New York, N.Y.; FMR–0070; Crude Oil

The New England Petroleum Corporation (Nepco) filed an Application for Modification of a Decision and Order which the FEA issued to the firm on November 17, 1975. *New England Petroleum Corp.*, 3 FEA Par. 83,015 (November 17, 1975). In the November 17, 1975 Decision, the FEA approved an Application for Exception which Nepco had filed from the provisions of 10 CFR 211.67 and permitted the firm to earn entitlements with respect to certain imports of residual fuel oil in the month of September 1975. However, Nepco was unable to sell $116,971.56 of the entitlements which it had been issued pursuant to the November 17 Decision and Order because of the refusal of the Arizona Fuels Corporation to consummate its full entitlement purchase obligations as specified in the September 1975 Entitlement Notice. Nepco therefore requested that the FEA issue the firm entitlements which are equal in value to the entitlements which it had been unable to sell in accordance with the November 17 Order. In evaluating Nepco's contention, the FEA determined that at the time the November 17 Order was issued, Arizona Fuels' refusal to purchase entitlements was certainly not contemplated and consequently, Nepco had shown that a substantial change in the facts and circumstances surrounding the issuance of the November 17 Order had taken place. However, the FEA also determined that a showing of a significantly changed circumstance did not in and of itself justify a modification of the November 17 Order. After examining the basis of the November 17 Order, the FEA found that Nepco had not shown that the relief which it requested was necessary to ensure that the intent of the exception relief extended in the initial Order would be implemented. The FEA noted that the November 17 determination and all other Decisions granting exception relief to Nepco were intended to protect the firm's position as a visible competitor in the East coast residual fuel market on a temporary basis. The FEA found that the intent of these orders had been accomplished through Nepco's sale of nearly $31 million in entitlements and thus, the firm's inability to locate a purchaser for less than one-half of one percent of its total benefits had only a minimal impact upon the firm's total operations during the year. On the basis of this analysis and a further finding that Arizona Fuels had been issued further Orders requiring it to purchase the entitlements, the FEA denied Nepco's Application for Modification or Rescission.

REQUEST FOR STAY

Atlantic Richfield Co.; Philadelphia, Pa.; FRS–1209 Motor Gasoline

Atlantic Richfield Company (Arco) requested that a Remedial Order for Immediate Compliance issued to the firm by the Director of Regulatory Programs of FEA Region I on February 11, 1977 be stayed pending a determination of the firm's Appeal. In the Remedial Order, the Regional Office determined that subsequent to January 31, 1977, Arco had refused to supply motor gasoline to Mr. Dennis J. Blandin (Blandin), a base period customer of Arco. The FEA further found that Blandin operated a retail outlet which was owned by Arco and Arco had ceased supplying him as a result of its decision not to renew Blandin's lease on the Arco station. The Remedial Order therefore required Arco to continue its supplier/purchaser relationship with Blandin. However the Remedial Order further require Arco to provide FEA Region I with a full list of all wholesale/purchaser-resellers to whom Arco had given or intended to give notice of the termination of the supplier/purchaser relationship. In denying the portion of Arco's request relating to its refusal to supply Blandin the FEA found that Arco had provided no information which demonstrated that Blandin was not entitled to receive his adjusted base period allocation of motor gasoline. However, the FEA also found that Arco's request should be approved with regard to the requirement in the Remedial Order that it furnish FEA Region I with a list of all wholesale/purchaser-resellers to whom Aroco had given or intended to give notice of the termination of the supplier/purchaser relationship. The FEA noted that the Remedial Order did not contain any findings with respect to any of Arco's customers other than Blandin. It was therefore determined that there was no factual basis which would justify the requirement specified in the Remedial Order that Arco provide a list to the FEA of wholesale purchaser/resellers other than Blandin to whom it had given or intended to give notice of termination. Accordingly, that portion of the Remedial Order was stayed.

SUPPLEMENTAL ORDERS

Air Transport Association of America; Washington, D.C.; FEX–0133; Crude Oil

The Air Transport Association of America (ATA) filed a submission in which it requested that it be permitted to intervene in an Appeal proceeding which is currently pending before the Office of Exceptions and Appeals. The Appeal referred to in the ATA submission was filed by the Getty Oil Company from a Remedial Order which was issued to Getty by the FEA Deputy Assistant Administrator for Compliance on August 12, 1976 (Case Nos. FEA–0078 and FRA–1230). The Remedial Order found that Getty charged unlawful price levels for certain crude oil which it delivered to The Standard Oil Company (Sohio) during the period October 1973 through October 1974. The Remedial Order further found that Getty had understated its old crude oil receipts which were used to calculate its entitlement sales obligations during the period November 1974 through January 1976 and as a result, Getty had received a very substantial amount of excess entitlement revenues during that period. Getty was therefore directed to refund the previous overcharges to Sohio and to account for the previously unreported old crude oil in the reports which it submits to the FEA under the provisions of the Entitlements Program over a six month period beginning with the effective date of the Order.

In order to ensure that the refunds which Getty is required to make to Sohio are passed through to Sohio's purchasers of covered products, the Deputy Assistant Administrator for Compliance also issued an Ancillary Order to Sohio pursuant to the provisions of 10 CFR 205.195(b). Paragraph (3) of the Ancillary Order directs Sohio to submit a "statement of alternative remedy" which could be implemented in order to pass through the refunds. In considering the Application to Intervene, the FEA found that the domestic scheduled air carriers who are members of the ATA have been affected by the Remedial Order and the Ancillary Order, and will also be affected by the determination reached with respect to the Getty Appeal, and the Appeal which Sohio filed from the Ancillary Order (Case No. FEA–1057). A number of ATA members purchased kerosene base jet fuel from Sohio during the period covered by the Getty/Sohio compliance proceeding. These carriers were therefore directly subjected to the passthrough of additional costs by Getty's alleged crude oil overcharges. In addition, the nationwide increased cost of crude oil generated by Getty's alleged entitlement violations arguably subjected all ATA members to increased cost passthroughs. The FEA therefore determined that the ATA represents a group of consumers of covered products which have an interest in the final determination of the pending administrative appeals arising out of the Getty/Sohio compliance proceeding. Based on the precedent established in *Consumers Union of United States, Inc.*, 5 FEA Par. 87,014 (February 18, 1977), the FEA concluded that the ATA had made a sufficiently strong showing that intervention on behalf of consumer interests should be granted in the Getty/Sohio appellate proceedings to represent opposing points of view, and the request was granted.

Consumers Union of United States, Inc., Washington, D.C.; FEX–0129; Refined Petroleum Products

Consumers Union of United States, Inc. (Consumers Union) filed an application in which it requested that it be permitted to intervene in three exception proceedings which had been initiated by the Exxon Company, U.S.A., the Continental Oil Company and the Southland Oil Company and which are currently pending before the FEA Office of Exceptions and Appeals. Consumers Union also requested that it be permitted to receive financial assistance to enable it to participate in the proceedings which related to the passthrough of increased non-product costs by refiners during the period January 1, 1975 through January 31, 1976. The Consumers Union application was submitted pursuant to a Decision and Order which the FEA issued to the organization on February 18, 1977 in response to a Petition for Special Redress which it had filed. *Consumers Union of U.S., Inc.*, 5 FEA Par. 87,014 (February 18, 1977). In that determination, the FEA concluded that, in view of the fact that agency officials had played a significant role in prompting the submission of exception applications involving the recovery of increased non-product costs by refiners and in view of the highly significant monetary value of the type of exception relief being sought, it would be most desirable to provide necessary financial assistance to ensure that intervenors who represent the interests of consumers are able to fully participate in the exception proceedings. In order to secure consumer representation in a manner which the Comptroller General of the United States had determined to be proper, the FEA stated in the Febbruary 18 Decision that it would permit any non-profit organization whose principal function involves the protection of consumer interests to file an application to intervene and that any such organization could submit appropriate documentation to establish that financial assistance would be necessary to enable it to participate in the exception proceedings. After reviewing the material which Consumers Union had submitted, the FEA concluded that the Consumers Union application made a sufficiently strong showing that intervention on behalf of consumer interests is necessary to adequately represent opposing points of view and that the application established that the organization itself could not bear the full financial costs of participation. The FEA therefore granted the application to intervene in the three exception proceedings and directed the FEA Associate Administrator for Management to take all reasonable and necessary measures to provide reasonable and appropriate financial assistance to Consumers Union to enable it to participate.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product costs increases:

Company	Case No.	Plant	Amount of price increase in dollars per gallon
Beacon Gasoline Co.	FXE-3648	Minden	0.0995
Getty Oil Co.	FXE-3700	Vermillion	.0306
	FXE-3701	West Bernard	.0487
	FXE-3702	Yates	.0937
Halliburton Co. and Vessels Gas Processing Co.	FXE-3699	Irondale	.0799
McCulloch Gas Processing Corp.	FXE-3650	Belle Fourche	.0384
	FXE-3651	Fairview	.0460
	FFE-3652	Gillette	.0155
	FXE-3653	Jamison Prong	.0999
	FXE-3654	Oedekoven	.0314
	FXE-3655	Well Draw	.1158
Sanford P. Fagadau	FXE-3641	Bluegrove	.10832
	FXE-3644	Maryetta	.02215

SUMMARY DECISION

In the following summary decision, the Regional Administrator of FEA Region VI was permitted an additional 15 days in which to issue a revised Remedial Order:

Shell Oil Co.; Houston, Tex.; FEX–0132

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Cotton Petroleum Corp.; Denver, Colo.; FES–0088

Flying Tiger Line, Inc.; Los Angeles, Calif.; FEA–1109

General Distributors, Inc.; Snow Hill, Md.; FES–0078

Inexco Oil Co.; Houston, Tex.; FEE–3456

Texas Pacific Oil Co. Inc.; Dallas Tex.; FEE–3657

The following submission was dismissed on the ground that the request is now moot:

Texaco, Inc.; Atlanta, Ga.; FRA–1054

RESCISSIONS

The stays granted to the following firms were rescinded following a determination by FEA that the relief requested was no longer necessary:

Flying Tiger Line, Inc.; Los Angeles, Calif.; FES–1109

Inexco Oil Co.; Houston, Tex.; FES–3456

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.d.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77–14941 Filed 5–25–77;8:45 am]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of March 21 Through March 25, 1977

Notice is hereby given that during the week of March 21 through March 25, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Capitol oil Co.; Baltimore, Md.; FEA–0908, FEA–0951, No. 2 Fuel oil

Capitol Oil Company filed an Appeal from a Remedial Order in which the FEA determined that Capitol had charged unlawful prices for the No. 2 fuel oil which it sold during the period November 8, 1973 through July 31, 1975. Capitol also filed an Appeal from a previous Decision and Order in which FEA Region III had denied the firm's Application for Exception from 10 CFR 212.93. Since the two Appeals involve similar issues, they were consolidated. In its Appeals, Capitol contended that the application of FEA Price Regulations to its sales of No. 2 fuel oil to its principal customer, the U.S. Coast Guard, was unlawful because it abrogated a contract between the two parties. Contrary to Capitol's contention, the FEA found that it has been authoritively determined that the agency's regulations may legitimately affect existing contracts by limiting the prices which may be charged under those contracts. The FEA also held that there was no merit to Capitol's claim that FEA's authority to abrogate the pricing provisions of existing contracts does not extend to contracts in which the U.S. Government is a party. It was pointed out that those same contentions had been considered and rejected by the Temporary Emergency Court of Appeals. With respect to Capitol's claim that the Remedial Order incorrectly determined its May 15, 1973 price to the Coast Guard the FEA found that since no transaction had occurred between the parties on May 15, 1973 the Remedial Order had correctly referred to the price which Capitol charged the Coast Guard in an actual transaction which took place on May 14, 1973. The FEA found that Capitol had not established the existence of certain oral agreements which it alleged occurred on or prior to May 15, 1973. Therefore those agreements could not be considered in determining Capitol's May 15, 1973 price. *See FEA Ruling 1977–5*, 42 Fed. Reg. 15302 (March 21, 1977). With respect to the prior exception proceeding the FEA determined that, contrary to the contentions that Capitol raised in its Appeal, the price which it charged the Coast Guard on May 14, 1973 was not unrepresentative of the firm's historic pricing practices. The FEA also sustained the determination in the prior Capitol exception proceeding that the firm had failed to make a compelling showing that retroactive exception relief was warranted. The FEA found that Capitol has maintained a moderately healthy financial position and refunding the revenues which it realized through overcharges would not cause a severe and irreparable injury to Capitol or preclude the firm from continuing its essential operations. Nevertheless, the FEA concluded that in view of the financial strain which refunding the overcharges within 60 days would place on Capitol, the refund period should be extended to require that Capitol repay no more than one-third of the overcharges in any fiscal year.

City of Los Angeles; Los Angeles, Calif.; FEA–0981 crude oil

The City of Los Angeles filed an Appeal from a Decision and Order which the FEA had issued to the Damson Oil Corporation. *Damson Oil Corp.*, 4 FEA Par. 83,064 (August 27, 1976). In that Order the FEA granted Damson an exception from the provisions of 10 CFR, Part 212, Subpart D, thereby permitting the firm to sell at upper tier ceiling prices 100 percent of the crude oil produced for its benefit as the working interest owner from the Venice Beach Lease. The City's Appeal, if granted, would permit it, as the royalty interest owner, to share in the revenues accruing to Damson as a result of the exception relief. Consequently, if the City's Appeal was sustained that portion of the crude oil produced from the Venice Beach Lease for the benefit of the City would be sold at upper tier prices. In considering the City's Appeal, the FEA found that the City was not responsible for any of the costs associated with the production of crude oil from the Venice Beach Lease. The FEA therefore determined that the decision reached in *U.S. Geological Survey, et al.*, 5 FEA Par. 80,537 (January 26, 1977), was controlling and that the limitation of exception relief to the working interest owner was properly within the agency's authority and did not constitute arbitrary or capricious action. The FEA also determined that the City had failed to demonstrate that it was experiencing a gross inequity or a serious hardship as a result of the FEA Price Regulations and that there was consequently no basis for granting the City exception relief in its own right. Finally the FEA determined that the City had failed to demonstrate that the limitation of exception relief to Damson interfered with its State sovereignty as established by the Tenth Amendment of the United States Constitution. The FEA therefore denied the City's Appeal.

General Crude Oil Co.; Houston, Tex.; FXA–1061 crude oil

General Crude Oil Company (General Crude) filed an Appeal from a Decision and Order which the FEA issued to the firm on September 21, 1976. *General Crude Oil Company*, 4 FEA Par. 83,104 (September 21, 1976). In the prior determination, the FEA permitted the working interest owners of the Banning Lease of the West Newport Field to sell at upper tier price levels 100 percent of the additional quantities of crude oil which would be produced from the property in 1977 and 1978 as a result of the implementation of an accelerated thermal in-situ combustion project. General Crude was also permitted to sell at upper tier ceiling prices 79.06 percent of the additional quantity of crude oil which would be produced as a result of the project during 1979. The General Crude Appeal, if granted, would result in the issuance of a further Order which would permit it to sell the entire Banning Lease production at upper tier prices without any time limitation. In its Appeal General Crude contended that the level of exception relief approved in the September 21 Decision does not provide a sufficient economic incentive to justify undertaking the accelerated thermal in-situ combustion project. The General Crude argument was based on the firm's contention that the Banning Lease would qualify as a stripper well property if it terminated entirely the enhanced recovery activities which it now conducts at the Lease in favor of primary production activities. General Crude asserted that as a stripper well property, the Banning Lease would generate substantially greater profits than its present operations or those which it could conduct under the exception decision. In considering this contention, the FEA determined that, contrary to the position advanced by General Crude, the stripper well exemption was not intended to apply to firms which alter existing crude oil production patterns at a property solely to produce less than 10 barrels of crude oil per well per day and thereby attempt to qualify the property for stripper well status. The FEA therefore concluded that it is by no means clear that the Banning Lease would qualify as a stripper well property under current FEA requirements if General Crude terminates its thermal in-situ combustion operations. With respect to General Crude's further contention that the Decision failed to adequately consider the risks associated with the accelerated thermal in-situ project at the Banning Lease, the FEA held that the firm had failed to submit any factual material which established that it would in fact experience significant future difficulties at the Banning Lease and noted that the agency would certainly take into account any such difficulties which General Crude might experience in subsequent reviews of the matter. With respect to General Crude's claim that G. E. Kadane & Sons, Inc. (Kadane), the owner of 50 percent of the working interest in the Banning Lease lacks sufficient financial resources to contribute its portion of the capital necessary to undertake the accelerated thermal project, the FEA found that in view of the substantial amount of exception relief which was approved in the September 21 Decision, even if Kadane is unable to finance its portion of the additional investment through its own resources, it certainly would appear that the firm could readily obtain outside financial assistance which would enable it to undertake the project. The FEA therefore denied the General Crude Appeal.

Good Hope Industries, Inc.; Springfield, Mass.; FEA–1048 crude oil

Good Hope Industries, Inc. (Good Hope) filed an Appeal from a Decision and Order which the FEA issued to the firm on November 5, 1976. *Beacon Oil Co., et al.*, 4 FEA Par. 87,024 (November 5, 1976). The November 5 Decision was issued in conjunction with the FEA's review of exception relief which had been granted to small refiners during 1975 from their obligations under 10 CFR 211.67 (the Old Oil Entitlements Program). In Good Hope's particular case, the FEA determined that the firm had obtained excessive entitlement benefits as a result of the exception relief which it had received and accordingly required the firm to purchase additional entitlements during the period November 1976 through April 1977. The Appeal, if granted, would result in the rescission of the provisions of the November 5, 1976 Decision and Order which imposed an entitlement purchase obligation upon the firm. In considering Good Hope's Appeal, the FEA first noted that Good Hope had realized the excessive benefits for 1975 as a direct result of its sale of entitlements pursuant to the February 1975 Entitlements Notice. The FEA also pointed out it has been the consistent policy of the agency to prevent a firm which had been granted exception relief from its obligation during 1975 to purchase entitlements to retain any benefits from its sale of entitlements which were greater than the firm's actual entitlements expenditure in that year. Consequently, the FEA determined that Good Hope had properly been required to purchase entitlements equivalent in value to its net entitlement sales benefit. Since Good Hope had failed to establish that the previous determination was erroneous in fact or law and the firm's Appeal was accordingly denied.

Pasco, Inc.; Denver, Colo.; FXA–1068; Crude oil

Pasco, Inc. appealed from a Decision and Order which the FEA issued on November 5, 1976. *Beacon Oil Co., et al.*, 4 FEA Par. 87,024 (November 5, 1976). In the November 5 Decision and Order, the FEA determined on the basis of the financial and operating data which Pasco submitted that the firm had been granted an excessive measure of exception relief from its obligations under the Entitlements Program in 1975. The November 5 Order accordingly required Pasco to purchase additional entitlements valued at $4,587,902 during the months of November and December 1976 in order to offset the excessive benefits which the firm had received. The November 5 Order further stated, however, that if Pasco established an interest-bearing escrow account in an amount equal to its total entitlement purchase obligation, the firm would only be required to purchase entitlements equal in value to one-twelfth of its total entitlement obligation during each month of the period November 1976 through October 1977. Pasco did establish such an account within the required time period. The Appeal, if granted, would result in certain adjustments being made to Pasco's 1975 profitability, thereby decreasing the amount of the excessive exception benefits which the FEA previously determined that Pasco received in 1975, and accordingly reducing the entitlement purchase obligation imposed on Pasco by the November 5 Decision. In considering the Pasco Appeal, the FEA rejected the firm's contention that in changing from the cash to accrual method of accounting for entitlements expenses in the analysis of exception applications, the FEA effectively reduced the period of the small refiner exemption under Special Rule No. 6 from the six months envisioned by Congress in Section 403 of the Energy Policy and Conservation Act to a period of only four months. The FEA pointed out that Pasco and other small refiners were exempt from purchase requirements which would have been specified in Entitlement Notices for the six month period December 1975 through May 1976. The FEA concluded therefore, that Pasco and other small refiners did in fact receive a benefit under Special Rule No. 6 for a six month period of time. The Pasco Appeal was therefore denied.

Ditlev Thyssen; Corona Del Mar, Calif.; FXA–1154 crude oil

Ditlev Thyssen appealed from a Decision and Order which the FEA issued to Pennzoil Producing Company on December 23, 1976. *Pennzoil Producing Co.*, 5 FEA Par. 83,012 (December 23, 1976). In that Decision, the FEA granted Pennzoil exception relief which permitted the firm to sell at upper tier ceiling prices 30.87 percent of the crude oil produced for the benefit of the working interest owner of the Perry Sand Waterflood Unit, North Segment, located in Yazo County, Mississippi. The Appeal, if granted, would permit Ditlev Thyssen, as owner of a royalty interest in the Unit, to share in the exception relief which was granted to the working interest owners. In considering the Appeal, the FEA noted that in several prior decisions, the FEA has considered the factors which led it to conclude that exception relief in cases of this type should be extended only to the working interest owners of crude oil producing properties. In *U.S. Geological Survey, et al.*, 5 FEA Par. 80,537 (January 26, 1977), the FEA held that since the royalty interest owners do not provide any of the funds necessary to meet the operating expenses of the properties, they have not established that they are experiencing any hardship or inequity as a result of the exception relief granted to the working interest owners. The FEA concluded that the precedent established in previous Decisions are equally applicable to the present Appeal. Accordingly, since Thyssen failed to demonstrate that the Decision and Order issued to Pennzoil was erroneous in fact or was arbitrary or capricious, his Appeal was denied.

REQUESTS FOR EXCEPTION

Apco Oil Corp.; Oklahoma City, Okla.; FEE–3399

Exxon Co., U.S.A.; Houston, Tex.; FEE–3417

Southland Oil Co.; Washington, D.C.; FEE–3448

Tosco Corp.; Los Angeles, Calif.; FEE–3467

Continental Oil Co.; Houston, Tex.; FEE–3520

Shell Oil Co.; Houston, Tex.; FEE–3545

Champlin Petroleum Co.; Fort Worth, Tex.; FEE–3590

Standard Oil Co. of Indiana; Chicago, Ill.; FEE–3708

Time Oil Co.; Seattle, Wash.; FEE–3893

Quaker State Oil Refining Corp.; Oil City, Pa.; FEE–3898 refined petroleum products

The ten firms listed above filed Applications for Exception from the provisions of the FEA Regulations which specified the order of recoupment of product and nonproduct cost increases during 1975 and January 1976. In reviewing those exception applications, the FEA found that certain unusual aspects of those submissions warranted a modification in the procedures to which the FEA Office of Exceptions and Appeals generally adheres. The FEA therefore determined that initial proceedings would be conducted with respect to the Applications filed by Continental Oil Company, Exxon Company, U.S.A., and Southland Oil Company. Following the issuance of a Decision and Order with respect to those three submissions, further proceedings would be conducted with respect to the other exception application listed above as well as any other exception applications that may be submitted with respect to these particular regulatory provisions.

The FEA also determined that to the extent material and substantial disputes exist

as to matters of fact in the Continental, Exxon, and Southland exception applications, direct testimony under oath which is subject to cross examination by other parties and the FEA will be required.

Boston Gas Co.; Washington, D.C.; FXE–3997 propane

The Boston Gas Company submitted an Application in which it requested an extension of exception relief which had been granted to the firm by FEA Region I on March 8, 1974, and which would terminate on March 31, 1977. The firm asserted that the extension was necessary in order to ensure that Boston Gas would be able to retain and utilize its current allocation of propane for use as an SNG feedstock for the remainder of the current heating season. In considering the Boston Gas request, the FEA noted that on February 7, 1977, the FEA Office of Specialty Fuels had requested additional information from Boston Gas with regard to its Application for Assignment of SNG feedstock. Boston Gas submitted the requested information to the FEA on February 11, 1977. The FEA Office of Regulatory Programs informed the FEA Office of Exceptions and Appeals that additional time would be required to analyze this information and that a final determination would not be rendered on the Boston Gas assignment application until shortly after March 15, 1977. Consequently, in order to ensure that Boston Gas would have access to an adequate supply of SNG feedstock pending a determination on its Application for Assignment, the FEA extended the exception relief granted on March 8, 1974 until April 21, 1977.

The Eagle Oil Co.; Columbus, Ohio; FXE–3906 motor gascline

On December 15, 1976, the FEA issued a Decision and Order to The Eagle Oil Company granting the firm an exception from the provisions of 10 CFR 211.9. *The Eagle Oil Co.*, 4 FEA Par. 87,033 (December 15, 1976). In the December 15 Decision, the FEA determined that Eagle was experiencing a serious financial hardship as a result of the prices which its base period supplier, the Tressler Oil Company, was charging for motor gasoline. In order to alleviate the hardship which Eagle was experiencing as a result of the high cost of the motor gasoline which Tressler was furnishing, the December 15 Order directed the Regional Administrator of FEA Region V to assign to Eagle for the months of January, February and March 1977, a supplier or suppliers whose wholesale price for motor gasoline was within the range of prices paid for that product by major marketers in Eagle's marketing area. The December 15 Order provided that the assigned supplier(s) would furnish Eagle with 65 percent of its base period use during those months. Eagle requested an extension of exception relief in accordance with the terms of that Order. In considering the exception request, the FEA determined that in the absence of exception relief assigning Eagle a new supplier of motor gasoline during 1976, Eagle would still have attained a level of profitability which was considerably greater than the average level of profitability which the firm realized in previous fiscal years. Since it appeared on the basis of the financial data submitted that Eagle would be able to maintain a profitable and viable business if it purchsed its entire supply of motor gasoline from Tressler, the FEA determined that Eagle had failed to demonstrate that the application of FEA regulations would cause it to experience a serious financial hardship. Accordingly, Eagle's request for an extension of the exception relief granted in the December 15 Decision and Order was denied.

Phillips Petroleum Co.; Bartlesville, Okla.; FEE–3206; Motor gasoline

The Phillips Petroleum Company (Phillips) filed an Application for Exception from the provisions of 10 CFR 212.83(h) (the Equal Application Rule). The exception request, if granted, would permit Phillips to allocate exclusively to the prices of motor gasoline which the film sells in Puerto Rico the increased costs which it incurs as a result of a tax on imports levied by the Commonwealth of Puerto Rico. In considering the Phillips Application, the FEA noted that although the Puerto Rican tax was intended only as a local revenue measure, under the provisions of Section 212.83(c) Phillips is not permitted to reflect the entire amount of the Puerto Rican tax in its prices of the motor gasoline which it sells in Puerto Rico. In addition, under the FEA regulations, Phillips may not "bank" the unrecovered taxes for future recovery except to the limited extent which is permitted under the provisions of Section 212.83(h)(2)(i). The FEA therefore determined that the application of the provisions of Section 212.83 resulted in the same type of inequitable situation for which exception relief was granted in *Commonwealth Oil Ref. Co., Inc.*, 3 FEA Par. 83,625 (July 9, 1976). Accordingly, the FEA determined the Phillips should be permitted to recoup the entire amount of the Puerto Rican tax in the prices of the motor gasoline which it sells in Puerto Rico. In its exception application, Phillips also requested that exception relief be approved retroactive to August 1, 1976. The FEA noted that in order to sustain a request for retroactive exception relief a firm must present compelling reasons why retroactive relief is warranted or why it would experience a severe and irreparable injury in the absence of such relief. After analyzing the facts presented in the case, the FEA held that Phillips failed to make the requisite showing that would have entitled the film to relief retroactive to August 1, 1976. However, the FEA further noted that in previous Decisions the FEA has approved retroactive relief for the interval between the date of filing of the exception request and the date of issuance of the Decision and Order to alleviate the adverse effects which result from a significant administrative delay in reaching a decision on the merits of an Application for Exception. Based on the precedent established in these cases and in view of the protracted period of time involved in processing Phillips' exception request, the FEA determined that Phillips was entitled to relief retroactive to October 5, 1976, the date on which it filed the Application for Exception.

REQUESTS FOR STAY

Zenith Oil Co., Inc.; Minneapolis, Minn.; FRS–0073 No. 2 fuel oil

Zenith Oil Company requested that a Remedial Order which was issued to the firm on October 28, 1976 be stayed pending a final determination of the firm's Appeal from that Order. In the Remedial Order, the FEA determined that Zenith had sold No. 2 heating oil at unlawful price levels and directed the firm to issue credit memoranda to the customers it overcharged. In addition, Zenith was directed to maintain its current selling price for No. 2 heating oil to each customer until the previous overcharges to each customer have been refunded. In considering the request, the FEA noted that it had previously approved a stay of the same Remedial Order, but had conditioned the relief on Zenith's placing the amount of the refunds into an escrow account. *Zenith Oil Co., Inc.*, 4 FEA Par. 85,048 (December 8, 1976). However, the FEA had subsequently revoked the stay since Zenith failed to establish the escow account in accordance with that Order. *Zenith Oil Co., Inc.*, 5 FEA Par. 87,005 (January 7, 1977). The FEA determined that in its present application, Zenith had submitted new financial data which showed that its continued operations would be seriously imperiled if it were required to place the refunds in an escrow account as a condition of a stay. In view of this new material, the FEA concluded that the stay previously granted to Zenith on December 8, 1976 should be reinstated without requiring the firm to establish an escrow account.

REQUESTS FOR MODIFICATION OR RESCISSION

Boyd Oil Co.; Contoocook, N.H.; FMR–0092 middle distillates

Boyd Oil Company (Boyd) filed a submission which, if granted, would result in the modification of a previous Decision and Order which was issued to the firm. *Boyd Oil Company*, 5 FEA Par. ——— (March 4, 1977). The March 4 Decision had stayed the provisions of a Remedial Order issued by FEA Region I on February 4, 1977. However, as an express condition of the stay which was approved on March 4, 1977, Boyd was required to establish an irrevocable escrow account and desposit approximately 36% of the total overcharges specified in the Remedial Order into the account. In its present submission, Boyd claimed that as a result of a recent transfer of its assets to the Agway Petroleum Corporation (Agway), it lacks sufficient financial resources to deposit the required amount into the escrow account. In considering its request for modification, the FEA found that Boyd had failed to submit any factual material with respect to its current financial position or regarding the compensation which it receives from Agway as a result of the transfer of its assets. The FEA further found that strong public policy considerations militate against approval of Boyd's present request since the escrow account was required in order to ensure prompt and efficient restitution of its overcharges to the customers involved. With respect to Boyd's further request that the March 4 Decision be modified to relieve the firm of its obligation to maintain records sufficient to identify the customers for whose protection the escrow account is to be established, the FEA held that Boyd had made no showing that it would be adversely affected in any significant manner by compliance with the recordkeeping requirements of the Remedial Order. Boyd's request for modification of the March 4 Stay Order was therefore denied.

Sun Co., Inc.; Philadelphia, Pa.; FMR–0094 petroleum products

On March 23, 1977, Sun Company, Inc. (Sun) requested that the FEA modify a Decision and Order which had been issued to Amtel, Inc. on February 25, 1977. *Amtel, Inc.*, 5 FEA Par. 83,091 (February 25, 1977). A provision of that Decision requires Sun to submit certain pricing data to FEA Region III within 30 days of the date of issuance of the Order. After considering Sun's assertions that it and Amtel are planning to file timely Appeals from the Order, the FEA modified Paragraph (4) of the February 25, 1977 Decision and Order to grant Sun an additional 30 days in which to submit the data specified.

Tenneco Oil Co.; Washington, D.C.; FMR–0087 gasoline

Tenneco Oil Company filed a request for modification of a Decision and Order which was issued to the firm on February 28, 1977. *Tenneco Oil Co.*, 5 FEA Par. 85,038 (February 28, 1977). In the previous Decision, the FEA stayed the refund provisions of a Remedial Order issued to Tenneco by FEA Region VI, but conditioned the stay upon the establishment of an escrow account into which Tenneco would place a portion of the disputed funds. In its request for modification, Tenneco requested that it be permitted to acquire a letter of credit instead of establishing an escrow account. In considering the request, the FEA observed that the amount which Tenneco was required to secure was approximately $7.5 million and that the diversion of a sum of this magnitude from productive use should be avoided if there was an alternative satisfactory means of guaranteeing payment. In view of Tenneco's showing that it possesses the financial capability to meet the refund requirements, the FEA concluded that it was reasonable to permit Tenneco to acquire a letter of credit, and the provisions of the February 28 Order were modified accordingly.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Amount of price increase in dollars per gallon
Aminoil U.S.A., Inc	FXE–3933	Aline	0.0291
	FXE–3934	Fox	.0060
	FXE–3935	Huntington Beach	.0375
	FXE–3936	Inglewood	.0364
	FXE–3937	Talega	.0121
	FXE–3938	Tioga	.0164
	FXE–3746	Kern County	.1107
Belridge Oil Co	FXE–3703	Gulf Plains	.0626
Champlin Petroleum Co	FXE–3704	Witcher	.0155
	FXE–3695	Rincon	.0258
Coline Gasoline Corp	FXE–3705	McKee	.0126
Diamond Shamrock Corp	FXE–3710	Altonah	.0424
Mapco, Inc	FXE–3711	Tyrone	.02518
	FXE–3734	No. 1 and No. 2 in Martin County, Tex.	.01759
Northern Natural Gas	FXE–3676	Molino	0.04544
Shell Oil Co	FXE–3780	Bayou Boula	.0281
	FXE–3781	Block Bayou	.01969
	FXE–3782	Camargo	.03430
	FXE–3783	Conley	.0278
	FXE–3784	Elk City	.03577
	FXE–3785	Grand Chenier	(1)
	FXE–3786	Halley	.00714
	FXE–3787	KNDU	.0878
	FXE–3788	Lake Washington	.0106
	FXE–3789	Lirette	.0091
	FXE–3790	Mermentau	.0271
	FXE–3791	Norco	.0883
	FXE–3792	O'Keene	.02427
	FXE–3793	Prentice	.05532
	FXE–3794	Red Fish Bay	.0215
	FXE–3795	Sea Robin	.0179
	FXE–3796	Seiling	.02917

[1] Denied.

TEMPORARY STAY

The following Application for Temporary Stay was denied on the grounds that the applicant had failed to make a compelling showing that temporary stay relief was necessary to prevent an irreparable injury:

Gary Western Co.; Fruita, Colo.; FST–0037

SUMMARY DECISION

The FEA Office of Exceptions and Appeals issued a Decision and Order rescinding the Stay which had been granted to the following firm after a finding was made that the relief granted was no longer necessary:

Grier Oil Co.; Baltimore, Md.; FEX–0134

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Baltimore Gas & Electric Co.; Baltimore, Md.; FMR–0091
Dow Chemical Corp.; Houston, Tex.; FEE–3643
Grier Oil Co.; Baltimore, Md.; FES–0080, FRA–1218
I.C.P., Inc.; Washington, D.C.; FFA–1213

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.d.t., except Federal holidays. They are also available in "Energy Management: Federal Energy Guidelines," a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc.77–14940 Filed 5–25–77;8:45 am]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of March 28 Through April 1, 1977

Notice is hereby given that during the week of March 28 through April 1, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Mobile Oil Corp.; New York, N.Y.; FEA–1094
Union Oil Co. of California; Los Angeles, Calif; FEA–1079
Caldo Oil Co.; FEA–1084
Ramco Oil Co.; FEA–1086
Rinehart Oil Co.; FEA–1087
Major Oil Co.; FEA–1088
Miles Oil Co., Olympia Oil Co.; San Francisco, Calif.; FEA–1089, FEA–1090
Shell Oil Co.; Houston, Tex.; FEA–1182
Red Triangle Oil Co.; San Francisco, Calif; FEA–1188; Motor Gasoline

On November 5, 1976, the Office of Regulatory Programs of the Federal Energy Administration approved an Application which the Gulf Oil Corporation had filed pursuant to the provisions of 10 CFR 211.14(d) of the FEA Regulations. Under the terms of the November 5 Order, Gulf was permitted to withdraw from all marketing and distribution activities in the northwestern portion of the United States, including Washington, Oregon, Northern Nevada and Northern California. The November 5 Order, as amended by a Supplemental Decision and Order issued to Gulf on December 30, 1976, reduced Gulf's total motor gasoline supply obligation in the affected area from an average of 18,940 barrels per day. Ten firms submitted Appeals of the November 5 Order to the FEA Office of Exceptions and Appeals. In considering two of those Appeals filed by the Mobile Oil Corporation and the Union Oil Company of California, the FEA found that since neither firm had received any Assignment Orders as a result of the November 5 Order, those two firms were not aggrieved by that Order. They therefore lacked the requisite standing to file an Appeal of the November 5 Order, and their Appeals were dismissed.

The FEA found that the eight other appellants had sufficient standing to challenge the November 5 Order. In their submissions, these appellants contended that in the November 5 Order the FEA Office of Regulatory Programs failed to adequately consider the adverse impact which Gulf's withdrawal from the market areas in the northwestern United States would have on competition in those areas and on distributors and marketers of petroleum products which had previously received motor gasoline from Gulf. The FEA concluded that there was substantial merit to the firms' position. The FEA observed that the Emergency Petroleum Allocation Act of 1973, as amended, directs the agency to restore and foster competition in the distribution and marketing sectors of the petroleum industry and to preserve the competitive viability of independent marketers of petroleum products. The FEA found that the course of action for which Gulf sought FEA approval would certainly have had an immediate and direct impact on the class of independent marketers in the northwestern United States and on competition in the petroleum industry in that section of the country. Under these circumstances, the FEA determined that it was incumbent upon the FEA Office of Regulatory Programs to make particular findings of fact which are supported by the record in the proceeding as to the impact of the requested approval on the economic viability of the independent

marketing segment of the petroleum industry and on competition in that region. The FEA therefore remanded the November 5 Order to the FEA Office of Regulatory Programs for further findings of fact with respect to these issues.

Patton, Boggs & Blow; Washington, D.C.; FEA–1219; Freedom of Information

Patton, Boggs & Blow (Patton) appealed from a partial denial by the FEA Information Access Officer of a Request for Information which the firm had submitted under the Freedom of Information Act (the Act). In its request, Patton sought information which the FEA obtained in order to administer the energy consumption reporting program for the paper industry. The program itself was established under Part D of Title III of the Energy Policy and Conservation Act. In the Order which he issued, the FEA Information Access Officer released certain information to Patton and withheld other material on the grounds that it was exempt from mandatory public disclosure under Exemption 4 of the Act. In analyzing the Patton Appeal, the FEA determined that the total energy consumption figures which the firms reported for 1975 and the percentage of that consumption which constituted electricity usage were not confidential information as that term is used in Exemption 4 of the Act. Accordingly, the FEA directed that these figures and a report which the FEA produced which utilized these figures as a basis for determining the 55 largest energy consuming corporations in the paper industry during 1975 should be released to Patton. The FEA also determined that it was erroneous to withhold certain material from Patton which illustrates the allocation of energy consumption of a jointly-owned firm to its parent corporations. Since the remainder of the memorandum which contained this illustration had already been released to Patton by the Information Access Officer no purpose would be served by withholding the example and the FEA directed that it be released to Patton pursuant to 10 CFR 202.1. The FEA also found that certain detailed information regarding energy usage which several firms voluntarily submitted with their Energy Usage Reports was properly withheld from Patton since release of that information could cause substantial competitive harm to the reporting firms. The Patton Appeal was therefore granted in part.

Peters Fuel Corp.; Oakland, Md.; FEA–1005; FEE–3369; Diesel Fuel, Kerosene, No. 2 Fuel Oil

Peters Fuel Corporation (Peters) filed an Appeal from a Remedial Order which FEA Region III had issued to the firm on October 6, 1976. In the Remedial Order the FEA Regional Office found that during the period November 1, 1973, through August 28, 1975, Peters had charged its customers prices for No. 2 fuel oil, diesel fuel, and kerosene which were in excess of the maximum permissible price levels for those products specified in 10 CFR 212.93. Peters also filed an Application for Exception in which it requested that it be relieved of any obligation to refund the overcharges which it received for those products during that period. In considering Peters' request for retroactive exception relief, the FEA noted that even before the issue of the propriety of that type of exception relief is addressed, an applicant must initially demonstrate that it would have been entitled to prospective exception relief if it had filed an application on a timely basis. The FEA determined that Peters had failed to make this initial demonstration since the financial data which the firm submitted did not establish that the firm's overall operations would have been adversely affected in a significant manner during the 1973–75 period if it had computed its prices in accordance with the applicable FEA price regulations. Based on the same data, the FEA also determined that Peters would not incur a serious hardship if it were required to refund the overcharges specified in the Remedial Order. Consequently, the Peters request for retroactive exception relief was denied. With respect to the Peters Appeal of the Remedial Order, the FEA noted that the contentions which the firm advanced merely reiterated the arguments that it presented in support of its request for exception relief. Since Peters did not contend that the Remedial Order was either erroneous in fact or law or that it was arbitrary or capricious, the FEA concluded that the firm had failed to establish any basis upon which its Appeal could be granted.

Quincy Oil, Inc.; Quincy, Mass.; FEA–1031; No. 6 Fuel Oil

Quincy Oil, Inc., appealed from a Remedial Order which the Federal Energy Administration Region I issued to the firm on November 2, 1976. In the Remedial Order the FEA found that during the period November 1, 1973 through September 30, 1975, Quincy sold No. 6 fuel oil to the Taunton Municipal Lighting Plan (Taunton) at prices which exceeded the maximum permissible price levels specified in 6 CFR 150.359 and 10 CFR 212.93. The Remedial Order also found that these overcharges resulted because Quincy had improperly established its May 15, 1973 selling price to Taunton by reference to a contract which Quincy and Taunton entered into on April 23, 1973, rather than on the basis of the price at which Quincy actually delivered fuel oil to Taunton on May 15, 1973. In considering the Quincy Appeal, the FEA observed that under Ruling 1975–5 a "transaction" occurs, in the case of a written variable-price contract at the time the price is fixed with respect to a particular delivery of a covered product. Since Quincy's April 1973 contract with Taunton was a variable-price contract under which deliveries did not begin until August 1973, the FEA concluded that the Remedial Order was correct in determining that the April 1973 contract was not a transaction for purposes of calculating Quincy's May 15, 1973, prices. The FEA further determined that on May 15, 1973, Quincy delivered fuel oil to Taunton under the terms of a variable-price contract which the parties had entered into in April 1972. The FEA therefore concluded that the Remedial Order was correct in finding that Quincy's deliveries to Taunton on May 15, 1973, pursuant to the April 1972 contract constituted a transaction on that date and that Quincy was therefore required to use the prices fixed for those deliveries in determining its maximum allowable selling prices. In rejecting Quincy's contention that the FEA lacks statutory authority to direct a firm to pay interest on refunds which a Remedial Order requires it to make, the FEA observed that it had thoroughly considered a similar argument in *Koch Industries, Inc.*, 2 FEA Par. 80,580 (May 2, 1975), and that the reasoning used in that case applies to Quincy as well. Finally, the FEA rejected Quincy's assertion that the position taken by the agency with respect to calculation of the firm's May 15, 1973, selling prices has a confiscatory effect upon Quincy. The FEA noted that it had previously considered similar contentions raised by Quincy in an Application for Exception and that the firm had presented no new evidence which would contradict the findings made in the exception proceeding. The Quincy Appeal was therefore denied.

Tenneco Oil Co.; Washington, D.C.; FEA–1018; Motor Gasoline

The Tenneco Oil Company appealed from a Decision and Order in which the FEA denied an Application for Exception from the price regulations for refiners which Tenneco had previously filed. *Tenneco Oil Co.*, 4 FEA Par. 83,117 (October 1, 1976). The Appeal, if granted, would have resulted in the issuance of an Order permitting Tenneco to increase, on a prospective and retroactive basis, its selling prices for motor gasoline above the maximum allowable levels specified in the under FEA Regulations. In the October 1 Decision, the FEA denied Tenneco's request that it be permitted to adjust the cost and quantity of gasoline which it purchased in May 1973 for purposes of determining its maximum allowable selling prices. In arriving at that Decision, the FEA found that the substantial profit which Tenneco realizes on its sales of gasoline produced in its refinery more than offsets any loss which Tenneco may sustain on its sales of purchased gasoline. The FEA therefore found that, contrary to a contention advanced by Tenneco, the firm was not entitled to exception relief on the basis of the gross inequity standards used in a prior decision issued in *Kerr-McGee Corp.*, 2 FEA Par. 80,533 (February 1, 1975). In considering Tenneco's Appeal of the October 1 Decision, the FEA observed that the firm had presented no new evidence which would lead to the conclusion that these findings were incorrect. The FEA noted that Tenneco, unlike Triangle Refineries, Inc., the Kerr-McGee subsidiary, was not incurring a loss on its overall sales of gasoline, and since Tenneco had failed to demonstrate that its May 1973 margin on its overall sales of gasoline was distorted, the firm had not satisfied the standards which were applied in the *Kerr-McGee* Decision. In response to Tenneco's contention that the FEA erred in considering the firm's gasoline sales operations as a whole rather than solely its activities involving the resale of purchased gasoline, the FEA observed that the method which had been used in the prior analysis was correct because Tenneco's purchased gasoline operations were not distinguishable and independent from the other parts of the firm. The FEA also determined that Tenneco's claim that it had relied on an interpretation which it allegedly received from a Cost of Living Council official was insufficiently substantiated and did not constitute a proper basis for the approval of retroactive exception relief. In this regard the FEA reaffirmed its earlier finding that Tenneco did not receive approval of a specific plan for adjusting its May 1973 cost figures, and the firm was therefore clearly not justified in actually implementing the plan which it has used. Accordingly, the FEA denied the Tenneco Appeal.

REQUESTS FOR EXCEPTION

Champlin Petroleum Co.; Fort Worth, Tex.; FEE–3574; Crude Oil

Champlin Petroleum Company filed an Application for Exception from the provisions of 10 CFR Part 212, Subpart D, which, if granted, would permit the firm to charge upper tier ceiling prices for the crude oil which it produces from Fault Blocks II, III, and IV of the Wilmington Field, located in Long Beach, California. In its exception application, Champlin stated that it has been ordered to install pollution control devices on its Wilmington Field project at a cost of $2,569,100. Champlin claimed that the requirement that it expend this sum while being able to charge only lower tier ceiling prices for the crude oil which it produces constitutes a gross inequity to the firm and causes it to assume an unfair distribution of burdens. In considering Champlin's exception request, the FEA found that the financial and producion projections which the firm submitted for the Wilmington Field project demonstrated that even in the absence of exception relief the project would generate a rate of return far in excess of 15 percent during the first three years after installation of the required pollution control devices. The FEA therefore concluded that Champlin has an ample economic incentive to make the required investment without the approval of exception relief. The FEA also determined that Champlin failed to establish that the environmental problems which it faces at its Wilmington Field operations are unique among crude oil producers and accordingly its contention that it is incurring an unfair distribution of burdens has no merit. The firm's request for exception relief was therefore denied.

Commonwealth of Virginia; Richmond, Va.; FPI–0109; No. 2 Fuel Oil

The Commonwealth of Virginia filed an Application for Exception from the provisions of 10 CFR 213.35(c) which, if granted, would permit the Commonwealth to receive refunds of license fees paid on 180,000 barrels of No. 2 fuel oil which it imported into the United States during the current allocation period. The FEA noted that an applicant seeking a refund of license fees already paid must generally demonstrate that it will incur a severe and irreparable injury before exception relief is approved. However, the FEA concluded that it would be unreasonable to apply this criterion in cases involving a supply emergency where an applicant files its Application as expeditiously as possible. Accordingly, the criteria which are utilized to evaluate requests for prospective exception relief were applied in this proceeding. In analyzing the Commonwealth Application, the FEA found that the supply of No. 2 fuel oil within Virginia was exceedingly low and that the Commonwealth had taken extraordinary measures to assure that adequate supplies of No. 2 fuel oil were available in Virginia for residential use and other priority needs. The FEA also found that the No. 2 fuel oil which the Commonwealth has imported will have a minimal effect on domestic supplies and markets of No. 2 fuel oil, and that the Commonwealth plans to pass through to its customers any benefits which it may derive from the requested exception relief. On the basis of these findings, the FEA concluded that exception relief should be approved which will enable the Commonwealth to recover the fees which it paid. Its Application for Exception was therefore granted.

Dixie Gas, Inc.; Marks, Miss.; FEE–3669; Propane

Dixie Gas, Inc. (Dixie) filed an Application for Exception from the provisions of 10 CFR 212.93. Its Application, if granted, would have relieved the firm of any obligation to refund revenues which it realized as a result of charging prices for propane during the period September 1, 1973, through March 31, 1974, which were in excess of the firm's maximum allowable selling prices. In its Application, Dixie acknowledged that it had overcharged its customers but contended that retroactive exception relief was appropriate because the firm had misconstrued its obligations under the applicable FEA regulations and would experience a serious financial hardship if it were required to refund the overcharges. In considering the Dixie exception request, the FEA noted that firms such as Dixie have an affirmative obligation to be cognizant of the correct application of FEA regulations to their business operations, and that Dixie's failure to meet this obligation is not a proper basis for granting the exception relief which the firm requested. After reviewing the firm's financial statements for its most recently completed fiscal year, the FEA further determined that Dixie had failed to make a showing that it would experience an irreparable financial injury in the absence of retroactive exception relief. The FEA therefore determined that Dixie had failed to establish compelling reasons which would warrant the approval of a retroactive exception. The Dixie request was accordingly denied.

Eason Oil Co.; Oklahoma City, Okla., FEE–3994; Crude Oil

Eason Oil Company (Eason) filed an Application for Exception from the provisions of 10 CFR Part 212, Subpart D, which, if granted, would permit the firm to sell all of the crude oil produced from the Weiner Property, Madison County, Mississippi, at upper tier ceiling prices. In considering the exception request, the FEA found that the cost of producing crude oil from the Weiner Property had increased since 1973 to a level where those costs now exceed the revenues which the firm may realize from the sale of the crude oil at lower tier ceiling price levels. The FEA concluded that under these circumstances Eason does not have an economic incentive to continue to produce crude oil from the Weiner Property. The FEA also found that it was highly unlikely that the crude oil from the reservoir underlying the lease would be recovered by any other firm in the absence of exception relief. On the basis of previous precedents involving similar factual situations, the FEA concluded that the application of the lower tier ceiling price rule under these circumstances resulted in a gross inequity to Eason. Accordingly, on the basis of the operating data which the firm submitted for its most recently completed fiscal period Eason was granted exception relief which permit the firm to sell at upper tier ceiling prices 59.91 percent of the crude oil produced and sold from the Weiner Property for the benefit of the working interest owners.

Estate of George Parker; Lafayette, La.; FEE–3925; Crude Oil

The Estate of George Parker (Parker) filed an Application for Exception from the provisions of 10 CFR Part 212, Subpart D, which, if granted, would permit Parker to sell the crude oil produced from the Morgan Plantation No. 1 well located in Jefferson Davis Parish, Louisiana, at upper tier ceiling prices. In considering the exception application, the FEA determined that the costs of producing crude oil from the Morgan well have increased significantly since 1973, and that the firm's current production costs per barrel substantially exceed the lower tier ceiling price which Parker is permitted to charge for the crude oil. Consequently, the FEA found that Parker does not have an economic incentive to continue to operate the Morgan well. The FEA also determined that if Parker ceased production of crude oil from the property, a significant quantity of otherwise recoverable domestic crude oil would not be produced. On the basis of a number of previous precedents involving similar factual situations, the FEA granted exception relief to Parker which permits the firm to sell at upper tier ceiling prices 26.26 percent of the crude oil produced and sold from the Morgan well for the benefit of the working interest owners.

Mar-Low Corp.; Lafayette, La.; FXE–3586 crude oil

Mar-Low Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of the exception relief previously granted to Mar-Low and would permit the firm to sell the crude oil which it produces from the West Tepatate Field (the Field) at exempt prices. In the prior exception Decision, Mar-Low had been permitted to sell at upper tier ceiling prices all of the crude oil which it produced from the Field for the benefit of the working interest. *Mar-Low Corp.*, 4 FEA Par. 83,048 (August 17, 1976). In considering the exception request, the FEA found that the firm continued to incur increased operating costs at the Field and that in the absence of continued exception relief, the working interest would lack an economic incentive to continue to produce crude oil from the Field. The FEA also found that an extension of the prior exception relief, which would permit the sale of all of the crude oil produced from the Field at upper tier ceiling prices, would still be insufficient to warrant Mar-Low's continued operation of the Field. In view of this situation and on the basis of the operating costs for the Field for the previous six months, the FEA concluded that Mar-Low should be permitted to sell at exempt prices 62.26 percent of the crude oil produced and sold from the Field for the working interest and that the remainder of the crude oil produced from the Field for the working interest should be sold at upper tier ceiling prices.

Minard Run Oil Co.; Bradford, Pa., FEE–3444 crude oil

Minard Run Oil Company (Minard Run) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit it to sell at prices in excess of the upper tier ceiling price the crude oil which it projects it will produce from 10 wells to be drilled on the Minard Run Venture Property. In considering the Minard Run submission, the FEA found that a substantial investment is necessary to drill the 10 wells and install the equipment necessary to initiate production from the property. The FEA further determined that the crude oil production estimates provided by the firm indicate that the investment would be uneconomic if the crude oil which will be produced from the property prior to its qualification as a stipper well property were sold at upper tier ceiling prices. Moreover, the FEA found that 30,000 barrels of crude oil which are otherwise unrecoverable could be extracted if the ten wells are drilled. On the basis of these findings, the FEA concluded that exception relief should be granted to Minard Run which would provide it with a sufficient economic incentive to undertake the capital investment required to develop the Minard Run Venture property. Based on an analysis of the financial and operating data that the firm submitted, the FEA concluded that if Minard Run were permitted to sell 14,130 barrels of crude oil at a price not to exceed $13.82 per barrel for the first twelve months of production from the property this objective would be achieved.

W. A. Moncrief, et al. Houston, Tex.; FEE–3504 crude oil

W. A. Moncrief et al. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted would permit Moncrief to sell crude oil produced from the Aneth Field underlying the McElmo Creek Unit at upper tier ceiling prices. In considering Moncrief's exception request, the FEA found that crude oil will be recovered from the field regardless of whether Moncrief continues his ownership interest in the Unit and that consequently Moncrief is not

entitled to relief on the basis of the criteria applied in previous cases. The FEA also observed that the difficulties which Moncrief alleges he is experiencing were caused primarily by events which occurred prior to the inception of the FEA regulatory program and that, contrary to Moncrief's claim, the substantial royalty payments which he must make reflect the considerably reduced risk factor associated with investing in the Unit at the time Moncrief decided to participate. The FEA therefore concluded that Moncrief had failed to demonstrate that the application of the Mandatory Petroleum Price Regulations to his interest in the Unit constitutes the principal cause of any financial difficulties which he may be experiencing. Accordingly, Moncrief's exception request was denied.

Moran Pipe and Supply Co.; Seminole, Okla.; FEE-3327 crude oil

Moran Pipe and Supply Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit Moran to sell the crude oil produced from the Cozar Lease at upper tier ceiling prices. In considering the Application, the FEA found that the net operating income which the firm derived from the Cozar lease during 1976 represented a return of more than 20 percent on the leases' operating revenues and was equivalent to a return of more than 19 percent on the net salvage value of the well equipment on the Cozar lease. The FEA further found that the firm had made no showing that if it liquidated the well equipment it could realize a greater rate of return on the proceeds than that which it could obtain by continuing to operate the Cozar lease. The FEA therefore determined that there was no economic incentive for Moran to abandon its production activities on the Cozar Lease, and its exception request was denied.

Pennzoil Producing Co.; Washington, D.C.; FXE-3888 crude oil

The Pennzoil Producing Company (Pennzoil) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would result in an extension of the exception relief previously granted to the firm and would thereby permit Pennzoil to continue to sell a portion of the crude oil produced from the Perry Sand Waterflood Unit, North Segment (the Unit) at upper tier ceiling prices. Pennzoil Producing Co., 5 FEA Par. 83,012 (December 23, 1976). In considering the Pennzoil request, the FEA determined that the Unit was continuing to experience increased operating costs and that the working interest owners consequently lacked an incentive to maintain the production and sale of crude oil from the property if they were permitted to charge only the lower tier ceiling price. In view of this determination and on the basis of the operating data which the firm submitted for its most recently completed fiscal period, the FEA concluded that the exception relief previously granted should be extended for an additional six month period and that Pennzoil should be permitted to sell at upper tier ceiling prices 76.01 percent of the crude oil produced from the Unit for the benefit of the working interest owners.

Rickelson Oil and Gas Co.; Tulsa, Okla.; FEE-3527 crude oil

Rickelson Oil and Gas Company (Rickelson) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit it to sell at exempt price levels the crude oil which is produced for the benefit of the working interest owners of the Vanbuskirk Lease (the Lease). In considering the exception application, the FEA found that Rickelson ceased crude oil production operations at the Lease when the firm determined that the Lease could not properly be classified as a stripper well property. At the time the Lease was shut-down, the operating expenses associated with the production of a barrel of crude oil from the property exceeded the revenues which could be derived at applicable lower tier ceiling price levels. Accordingly, the FEA found that Rickelson has no economic incentive to resume crude oil production from the Lease. The FEA further found that if the Lease were permanently abandoned a subtantial quantity of domestic crude oil would not be recovered. On the basis of the criteria applied in similar cases, the FEA concluded that exception relief should be granted and that Rickelson should be permitted to sell all of the crude oil produced from the Vanbuskirk Lease for the benefit of the working interest owners at upper tier ceiling prices.

TOSCO Corp.; Los Angeles, Calif.; FEE-2684 motor gasoline

The TOSCO Corporation (TOSCO) filed an Application for Exception from the provisions of 10 CFR 212.83. The TOSCO submission, if granted, would result in the issuance of an Order by the FEA confirming that TOSCO had correctly computed the May 15, 1973 selling prices which it utilized in determining the maximum allowable prices for motor gasoline to its wholesale rack and reseller classes of purchaser. In the alternative, TOSCO requested that it be granted an exception which would relieve it of any obligation to refund overcharges resulting from its use of incorrectly calculated May 15, 1973 selling prices. Under the terms of the relief which it requested, TOSCO would be permitted to continue to utilize those prices in determining its maximum allowable prices for covered products. In its submission, TOSCO indicated that prior to May 15, 1973, its subsidiary, the Toscopetro Corporation, had entered into a written variable price contract to sell gasoline to one of its wholesale rack purchasers, and had also entered into an oral agreement which provided for the sale of gasoline to a particular reseller at a price that was two cents per gallon below the California dealer tankwagon price. Both the written contract and the oral agreement applied to deliveries beginning on specified dates after May 15, 1973. In its exception application TOSCO contended that the variable price contract and the oral agreement constitute the "transactions" which establish its May 15, 1973 prices to its wholesale rack and reseller classes of purchaser, notwithstanding the fact that deliveries did not occur under these contracts until after May 15, 1973.

In considering that contention, the FEA observed that under Ruling 1977-5 the time when a price is set for a particular delivery pursuant to a variable price contract is the date when a "transaction" occurs. The FEA found that since TOSCO did not make any deliveries pursuant to its variable price contract until after May 15, 1973, it may not include transactions under that contract in calculating its May 15, 1973 prices. The FEA also found that since TOSCO did not make any deliveries under the oral agreement until after May 15, 1973, the prices charged pursuant to that oral agreement may not be included in the determination of TOSCO's weighted average May 15, 1973 price to its reseller class of purchaser. Thus, the FEA declined to affirm that the prices which TOSCO utilized as its May 15, 1973 prices for purposes of the refiner's price rule had been correctly calculated.

In its exception application, TOSCO also contended that its decision to acquire a refinery which had previously been owned by the Phillips Petroleum Company (the Avon refinery) was based on its reasonable belief that its May 15, 1973 prices had been calculated in accordance with the FEA Regulations. TOSCO claimed that its conviction that it had correctly calculated those prices was a result of its reliance on an opinion given by the Regional Counsel of the FEA Region IV. TOSCO asserted that the opinion had the force of an "interpretation" as that term is defined in the FEA Procedural Regulations. The FEA found that the Regional Counsel's opinion did not appear to support TOSCO's construction of the term "transaction". However, the FEA also determined that the opinion, which merely provided internal guidance to FEA employees and did not include the notice to aggrieved parties of their right to appeal as required by the FEA Procedural Regulations, did not constitute an Interpretation issued pursuant to 10 CFR, Part 205, Subpart F.

Although the FEA concluded that TOSCO had failed to demonstrate that it could reasonably have construed the opinion as an interpretation, the FEA also found that the firm's submission indicated that it might not have proceeded with its acquisition of the Avon refinery if it had known that the FEA might challenge the calculation of the firm's May 15, 1973 prices. In this regard, the FEA pointed out that, generally, even if a firm acted in reliance on erroneous advice given by FEA officials, exception relief would not be warranted unless the firm could show that the actions which it had taken in reliance upon that advice had a serious adverse effect on the firm. While the financial data furnished by TOSCO generally indicated that the firm may experience some adverse effects upon its profitability during 1976 as a result of its acquisition of the Avon refinery, the FEA determined that TOSCO failed to demonstrate that it would continue to experience those adverse effects in future periods or that the acquisition of the Avon refinery would be detrimental to the TOSCO's long-term overall operations. Based on an analysis of TOSCO's financial data, the FEA also concluded that TOSCO had failed to establish that it would experience a serious hardship or gross inequity if it were prospectively required to reduce its prices for gasoline. The FEA acknowledged however that these findings were based largely on projected data and indicated that it would reconsider its denial of exception relief if TOSCO files another application for exception containing new financial data.

Triad Oil and Gas Co., Inc.; Jackson, Miss.; FEE-3679; crude oil

Triad Oil and Gas Co., Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would permit Triad to sell the crude oil produced from the W. J. Ainsworth No. 1 well at upper tier ceiling prices. In considering the exception application, the FEA found that Triad's production costs per barrel exceeded the prices which it is permitted to charge for the crude oil which it sells and, consequently, that Triad does not have an economic incentive to continue to operate the Ainsworth well. The FEA further found that if Triad abandoned the Ainsworth well, a substantial quantity of domestic crude oil would not be recovered. On the basis of the criteria which applied in previous similar cases, the FEA concluded that exception relief should be granted and that Triad should be permitted to sell at upper tier ceiling prices 100 percent of the crude oil produced from the Ainsworth well for the benefit of the working interest owners.

Twin-Tech Oil Co.; Garza County, Tex.; FEE-3225; natural gas liquid products

Twin-Tech Oil Company (Twin-Tech) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart K. The exception request, if granted, would permit Twin-Tech to increase the prices which it charges for natural gas liquids and natural gas liquid products (NGL's) produced at its plant above the maximum permissible price levels specified in Subpart K. After adjusting the non-product costs which Twin-Tech incurred in the base period by excluding certain non-recurring costs, the FEA found that Twin-Tech's actual non-product costs had increased substantially subsequent to the base period. In accordance with the precedent established in *Superior Oil Co.*, 2 FEA Par. 83,271 (August 29, 1975), the FEA therefore granted exception relief which permitted the firm to increase its selling prices to reflect a specified amount of increased non-product costs. In its submission, Twin-Tech also requested that it be permitted to measure the increased cost of the natural gas shrinkage which it may reflect in its selling prices by calculating a value for its natural gas shrinkage based on the contract prices for residual natural gas established by another firm in the vicinity. In considering Twin-Tech's request, the FEA observed that under FEA Ruling 1975-7, the "cost of natural gas shrinkage" of a gas processor means the reduction in its sales revenues for natural gas which it could otherwise have received pursuant to a contract under which the gas would be sold. The FEA pointed out that, since Twin-Tech does not sell natural gas, it does not actually incur any reduction in sales revenues as a result of extracting the liquids. Additionally, in view of the exception relief which was being granted to permit Twin-Tech to pass through its increased non-product costs, the FEA found that the firm's contention that it had no economic incentive to continue to operate its plant was no longer valid. On the basis of these considerations, the FEA concluded that Twin-Tech's request for exception relief with respect to shrinkage costs should be denied. Finally, Twin-Tech requested that it be permitted to calculate its maximum permissible selling prices for NGL by reference to prices which were specified in a contract which it entered into in June 1973, instead of by reference to the imputed or adjusted prices as specified in Subpart K. With respect to this request, the FEA found that Twin-Tech had failed to provide any material which indicates that it is experiencing a serious hardship or gross inequity as a result of the manner in which it is required to determine its prices under Subpart K. Accordingly, that portion of the firm's Application was denied.

Wagner Oils, Inc.; Fairborn, Ohio; FEE-3931; No. 2 heating oil

Wagner Oils, Inc. filed an Application for Exception from the requirement that it file FEA Form P112-M-1, "No. 2 Heating Oil Supply/Price Monitoring Report." In considering the exception application, the FEA determined that the firm had failed to submit any material in support of its claim that it is unable to devote the time and effort necessary to complete and file the Form. The FEA further concluded that Wagner failed to demonstrate that the alleged inconvenience of supplying the information outweighs the benefits to be derived from the use of the aggregate data which the FEA collects from a sample for firms, including Wagner, as to the supply and price of No. 2 heating oil. Wagner's request for except relief was therefore denied.

REQUESTS FOR MODIFICATION OR RESCISSION

H&K Oil Co.; Yankton, S. Dak.; FMR-0093 No. 2 heating oil

On March 1, 1977, the Federal Energy Administration denied an Application for Stay filed by H&K Oil Company (H&K). *H&K Oil Co.*, 5 FEA Par. ---- (March 1, 1977). In that proceeding H&K had requested that the refund provisions contained in a Remedial Order which had been issued to it by FEA Region VIII be stayed pending a determination on H&K's Appeal of the Order. On March 15, 1977 H&K filed an Application for Modification in which it requested that the FEA reconsider its March 1, 1977 determination. In considering H&K's Application, the FEA reaffirmed its previous finding that the Remedial Order does not require H&K to make any refunds until July 1977 and that consequently H&K would not experience an immediate injury in the absence of a stay. Since H&K had failed to show that any substantial change had occurred in the circumstances under which the March 1, 1977 determination was made, its Application for Modification was denied.

Litchfield Oil Co.; Dracut, Mass.; FMR-0090 motor gasoline

On March 8, 1977, the Litchfield Oil Company filed a request for reconsideration of a Decision and Order which the FEA issued to the firm on January 25, 1977. *Litchfield Oil Co.*, 5 FEA Par. 80,533 (January 25, 1977). In considering the request the FEA found that the sole basis on which Litchfield sought to reopen the prior proceeding is the firm's unsubstantiated assertion that a May 15, 1973 delivery of gasoline was made pursuant to a prior supply agreement which the firm alleged qualifies as a "transaction" within the meaning of 10 CFR 212.31, as clarified by Ruling 1977-5. The FEA determined that Litchfield had failed to submit any evidence whatsoever which supports this claim. Consequently, the FEA concluded that there was no basis for reconsidering the determination reached in the prior Appeal and Litchfield's request for reconsideration was therefore dismissed.

The Standard Oil Co.; Findlay, Ohio; FMR-0081 Refined Petroleum Products

The Standard Oil Company (Sohio) filed an Application for Modification or Rescission of three Decisions and Orders which the FEA issued to it during 1975. *The Standard Oil Co.*, 2 FEA Par. 83,111 (April 8, 1975); *The Standard Oil Co.*, 2 FEA Par. 80,654 (August 12, 1975); and *The Standard Oil Co.*, 2 FEA Par. 87,014 (October 14, 1975). In the April 8, 1975 determination the FEA denied Sohio's request for an exception from the provisions of 10 CFR 212.87 which, if granted, would have permitted the firm to increase its selling prices for refined petroleum products to reflect increased refinery depreciation expenses. The August 12, 1975 Decision denied Sohio's Appeal from the April 8 Order. The October 24, 1975 determination denied Sohio's request that the two prior orders be modified or rescinded. The present Sohio Application for Modification or Rescission, if granted, would result in the rescission of the three prior Decisions and Orders and the approval of the exception relief originally requested. Sohio also requested that the exception relief be made retroactive to December 1974 when it initially filed its Application for exception. In considering Sohio's request for modification or rescission, the FEA observed that recent regulatory amendments which permit refiners to pass through increased refinery depreciation expenses appear to afford the type of prospective exception relief which Sohio sought in the prior proceedings. Consequently, the FEA determined that further consideration of Sohio's request for prospective exception relief was unnecessary. With respect to the firm's request for retroactive relief, the FEA determined that the Sohio had failed to show that there had been undue administrative delay in the processing of its prior applicatons. The FEA also found that new data collected by the FEA in a survey of other major refiners indicated that no factual basis exists for Sohio's contention that it has been disproportionately affected in an adverse manner by FEA regulatory requirements involving depreciation expenses. The FEA therefore concluded that since Sohio would not have been granted prospective relief even if this data had been available at the time of the prior proceedings, retroactive exception relief was unwarranted Accordingly, Sohio's Application for Modification or Rescission was denied.

REQUEST FOR STAY

Luke Bros., Inc.; Calera, Okla.. FES-0083 Propane

Luke Brothers, Inc. (Luke) requested that a Remedial Order which the FEA Region VI issued to the firm on October 5, 1976 be stayed pending both judicial review and a final determination of an Application for Modification and Rescission which Luke states that it plans to file with the FEA in the near future. In the Remedial Order, the FEA found that Luke's selling prices for propane during the period November 1, 1973 through September 1975 exceeded the maximum selling prices which the firm was permitted to charge under the FEA Regulations. In order to remedy this violation, the Deputy Regional Administrator of FEA Region VI directed Luke to immediately reduce the prices which is charges for propane to a level which did not exceed the maximum lawful selling prices permissible under the FEA Price Regulations. In considering Luke's request that the Remedial Order be stayed the FEA found that the firm's Application failed to satisfy any of the criteria set forth in Section 205.125(b) for the approval of a stay. Although the firm asserted that in the absence of a stay it would experience a severe financial hardship and a more serious hardship and gross inequity than would be experienced by its customers if the stay were granted, Luke presented no evidence whatever to support the assertion. Since Luke had in addition failed to demonstrate that it would encounter any unusual difficulty if it is required to comply with the Remedial Order, the FEA concluded that a stay was clearly not warranted and Luke's request was denied.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Amount of price increase in dollars per gallon
Atlantic Richfield Co	FXE-3747	Covington	0.0098
Do	FXE-3748	Crane	.0221

(1) Denied.

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Genie Oar Wash; San Diego, Calif.; FEE–3569
Gulf Energy & Development Corp., Washington, D.C.; FEE–3521, FEE–3522

The following submission was dismissed on the grounds that the request is now moot:

Litchfield Oil Co., Inc., Dracut, Mass.; FES–0090

The following submission was dismissed on the grounds that the request for stay was premature:

Joe E. Sharber; Wewoka, Okla.; FES–0084

The following submission was dismissed after a determination by FEA that the relief requested was no longer necessary:

Tenneco Oil Co.; Washington, D.C.; FST–0038

The following submission was dismissed following a determination by FEA that there was no basis for further administrative review of the firm's claims:

Merwin L. Hoxsey, d.b.a. Hoxsey's Shell Service, San Diego, Calif.; FEE–3967

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of April 4 Through April 8, 1977

Notice is hereby given that during the week of April 4 through April 8, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Beeco, Ltd.; Washington, D.C.; FEA–1046; Crude oil

Beeco, Ltd. filed an Appeal from a Decision and Order which the Federal Energy Administration issued to the General Crude Oil Company (General Crude) on September 21, 1976. *General Crude Oil Co.*, 4 FEA Par. 83,104 (September 21, 1976). The Appeal was filed on behalf of the twenty-three royalty interest owners of the Banning Lease in the West Newport Field, Orange County, California. In the September 21, 1976 Decision and Order, exception relief was granted which permitted General Crude to charge upper tier ceiling prices for a portion of the crude oil which it produces for its benefit from the Banning Lease. The exception was intended to provide the firm with an economic incentive to undertake an investment in an accelerated recovery project. Beeco sought to have the royalty interest owners share in the additional revenues produced as a result of that Decision. In considering the Beeco Appeal, the FEA noted that in a recent Decision and Order, U.S. Geological Survey, 5 FEA Par. 80,537 (January 26, 1977), the FEA determined that the agency has the authority to limit exception relief only to the working interest owners of crude oil producing properties since only those owners are responsible for the operating and investment costs associated with the production of crude oil. The FEA concluded that the U.S. Geological Survey Decision was controlling in the present case. The FEA also found that contrary to Beeco's contention, the September 21, 1976 Decision and Order did not constitute an unlawful regulation of real property rental terms by the FEA since it was not designed to regulate the property rights of royalty interest owners but rather to grant exception relief in a manner which was consistent with applicable statutes and FEA regulations. Finally the FEA determined that while the royalty payments in 1960, the nature of their royalty payments in 1960 the nature of their interest in the property continues to be a passive one and they have no responsibility for any of the operating costs or additional capital expenditures which are necessary in order to maintain or accelerate the enhanced recovery projects at the Banning Lease. In view of these considerations the FEA determined that the Beeco Appeal should be denied.

Cheyenne Exploration, Inc.; Wichita, Kans., FRA–1180; Crude oil

Cheyenne Exploration, Inc. filed an Appeal of a Remedial Order which the Director of the Compliance Division, Fea Region VII issued to the firm on January 12, 1977. In the Remedial Order, the FEA found that during the period March 1974 through December 1975 Cheyenne improperly sold certain volumes of crude oil which were produced from the Sipes A–3 property at uncontrolled market prices in violation of the provisions of 10 CFR 212.73. On the basis of this finding, the Remedial Order directed Cheyenne to refund $68,065.00 plus interest to Clear Creek, Inc., the purchaser of the crude oil produced from the Sipes A–3 property. In considering the Appeal, the FEA observed that Cheyenne did not challenge the factual or legal findings of the Remedial Order or contend that the Remedial Order was in any way arbitrary or capricious. Instead, Cheyenne contended that the application to the firm of the provisions of 10 CFR, Part 212, Subpart D in the Remedial Order, results in a serious financial hardship to the firm. The FEA noted that the arguments which Cheyenne presented did not form the proper basis for an Appeal of a Remedial Order, since the issues which the firm raised can properly be considered only in the context of an Application for Exception. Furthermore, the FEA determined that Cheyenne failed to make the type of showing which the FEA had previously held to be necessary for the FEA to consider such issues in the context of an Appeal of a Remedial Order. See, e.g., *Mobil Oil Corp.*, 4 FEA Par. 80,451 (September 24, 1976). Moreover, the FEA noted that counsel for Cheyenne had advised the FEA that the firm intends to file an Application for Exception in which the firm will raise its allegations of serious hardship. In view of these factors, the Cheyenne Appeal was denied.

Gulf Oil Corp.; Houston, Tex.; FEA–0925; No. 2 fuel oil

The Gulf Oil Corporation filed an Appeal from a revised Remedial Order which the Regional Administrator of FEA Region III issued to the firm on July 12, 1976. In the revised Remedial Order, the Regional Administrator found that Gulf had improperly calculated the May 15, 1973 base price for the No. 2 fuel oil which it sold to the Virginia Electric Power Company (Vepco), and as a result, had sold that product at price levels

which exceeded the maximum allowable prices specified in 6 CFR 150.355 and 10 CFR 212.82. Gulf was therefore directed to refund $2,030,035 in overcharges made in sales of fuel oil to Vepco during the period October 1, 1973 through April 30, 1975, and to calculate the overcharges which occurred during the period May 1, 1975 through June 30, 1976. In its Appeal, Gulf contended that the revised Remedial Order was based on an erroneous interpretation of the term "transaction" as defined in 10 CFR 212.31. Since no transaction occurred between Gulf and Vepco on May 15, 1973, the Remedial Order required Gulf to determine its May 15, 1973 base price for the fuel oil which it sold to Vepco by reference to the price at which a delivery of fuel oil was made to Vepco on May 3, 1973. In its Appeal Gulf alleged that a new contract into which the firms had entered on May 10, 1973 constituted the transaction to which the FEA should have referred in determining the May 15, 1973 prices. In considering the Appeal, the FEA found that the May 3, 1973 delivery was made pursuant to a written contract executed in June of 1972 in which Gulf agreed to supply No. 2 fuel oil to Vepco at specified fixed prices for a one-year period from July 1, 1972 through June 30, 1973. The FEA also found that on May 10, 1973 Gulf and Vepco had entered into a new variable price contract for the supply of No. 2 fuel oil for a one-year period that extended from July 1, 1973 through June 30, 1974. The FEA observed that under the clarification of the regulation issued in FEA Ruling 1977-5 (42 Fed. Reg. 15302 (March 21, 1977)), a transaction occurs, with respect to written, fixed-price contracts, at the time both parties have signed the written agreement. However, in the case of a written variable-price contract, a transaction is considered to occur at the time the price is fixed with respect to a particular delivery of a covered product pursuant to that contract. In applying the Ruling to Gulf's Appeal, the FEA determined that since Gulf's deliveries of fuel oil to Vepco under the May 10, 1973 variable price contract did not commence until after May 15, 1973, the execution of that contract did not constitute a transaction during the base period and was properly excluded from Gulf's calculations of its May 15, 1973 weighted average price for fuel oil. However, the FEA also found that the manner in which the revised Remedial Order had applied the term transaction in calculating the Gulf overcharges was incorrect. The FEA determined that the date of entry into the June 1972 fixed price contract, not the delivery of fuel oil on May 3 under that contract, constitutes the relevant base period transaction under Ruling 1977-5. Since the overcharges had been calculated on this basis in the original Remedial Order, the revised Remedial Order was amended accordingly, and the Gulf Appeal was therefore denied.

Mar-Low Corp.; Lafayette, Ind.; FXA-1228; Crude oil

The Mar-Low Corporation appealed from a Decision and Order issued to it by the FEA on February 24, 1977. *Mar-Low Corp.*, 5 FEA Par. 83,077 (February 24, 1977). In that order, the FEA approved exception relief from the provisions of 10 CFR, Part 212, Subpart D, and permitted Mar-Low to sell 60.14 percent of the crude oil which it produces from the Maxie Broussard No. 1-D well at upper tier ceiling prices. The Appeal, if granted, would permit the firm to sell an increased amount of the crude oil produced from the Broussard well at upper tier ceiling prices. In considering the Appeal, the FEA noted that subsequent to the issuance of the February 24 exception decision, the FEA amended its regulations and reduced by 45 cents per barrel the maximum allowable upper tier ceiling price of crude oil. Consequently, a greater percentage of the Broussard well crude oil must now be sold at the upper tier ceiling price in order to maintain the level of exception relief granted to Mar-Low in the February 24 Order. The FEA concluded that the adverse impact on Mar-Low which resulted from the recent reduction in the upper tier ceiling price constituted a significantly changed circumstance which warrants modification of the exception relief granted to the firm. The Appeal was therefore granted.

Monoco Oil Co., Inc.; Pittsford, N.Y.; FEA-1013; Residual fuel oil

Monoco Oil Company, Inc. appealed from a Decision and Order which was issued to the firm on September 24, 1976. *Monoco Oil Co., Inc.*, 4 FEA Par. 83,107 September 24, 1976). In that Decision, the FEA found that Monoco, a reseller of residual fuel oil, was experiencing a gross inequity and serious hardship because several of its competitors in its marketing area were domestic refiners whose effective cost of crude oil was reduced by benefits received under the Old Oil Entitlements Program. In contrast, the residual fuel oil sold by Monoco is purchased from foreign refineries which receive no entitlements. The FEA further found that the competitive disadvantage that Monoco was experiencing was the same as that experienced by marketers of imported residual fuel oil in the Bureau of Mines East Coast Refining District before the enactment of Section 211.67 (a)(3) and (d)(4). On the basis of the findings which it reached the FEA granted the Application for Exception which Monoco had filed and permitted Monoco to receive 30 percent entitlements benefits pursuant to 10 CFR 211.67(a)(3). In its Appeal, Monoco contended that the exception relief granted in the September 24, 1976 Decision was insufficient. In analyzing this claim, the FEA found that Monoco was still unable to compete effectively with domestic refiners in its marketing area. In particular, the FEA noted that despite the relief that had been granted the delivered cost to Monoco for the residual fuel oil which it sells was still substantially greater than the delivered price that one of its primary competitors paid for the same product. Monoco's high and relatively noncompetitive price, it was found, was the result of the failure of the September 24, 1976 Decision to take account of the substantial benefits which East Coast marketers other than domestic refiners indirectly derive from Section 211.67(d)(4). That regulation provides for a 50 percent reduction in the entitlements benefits received by domestic refiners with respect to runs of crude oil attributable to production of residual fuel oil for sale in the East Coast market. The FEA therefore concluded that the relief afforded in the September 24 Order was insufficient to alleviate the serious hardship or gross inequity experienced by Monoco. The Appeal was accordingly granted and additional exception relief was approved which increased the entitlements benefits which Monoco received in the previous Decision to 80 percent of the entitlement value of a barrel of crude oil for each barrel of residual fuel which it resells.

Southland Oil Co./VGS Corp.; Memphis, Tenn.; FXA-1066; Crude oil.

Southland Oil Company appealed from a Decision and Order which the Federal Energy Administration issued to the firm on November 5, 1976. *Beacon Oil Co. et al.*, 4 FEA Par. 87,024 (November 5, 1976). In the November 5 Decision and Order, the FEA determined on the basis of financial and operating data which Southland submitted that the firm had been afforded an excessive measure of exception relief from its obligations under the Entitlements Program in 1975. The November 5 Order accordingly requires Southland to purchase entitlements valued at $3,464,670 during the period November 1976 through October 1977 in order to offset the excessive benefits which the firm had received. The Appeal, if granted, would result in the rescission of that portion of the November 5 Decision and Order which imposes an entitlement obligation on Southland. In its Appeal, Southland contended that the FEA did not have the authority to recapture exception relief which it previously granted unless a showing could be made that the decision to approve the exception relief was erroneous when it was made. In rejecting this contention, the FEA found that a similar issue had been fully considered and ultimately rejected in a previous decision, *Delta Refining Co.*, 5 FEA Par. 80,530 (January 26, 1977).

Southland also argued that certain unusual expense items should have been deleted by the FEA from the firm's 1974 financial statement for purposes of calculating its historical profit margin. Contrary to Southland's claim, the FEA found that the effects of the firm's change during its historical period from a FIFO to a LIFO method of inventory valuation, should not be eliminated because such an adjustment would result in all of the historical years being reported on a basis different from the current year. It was also held that the FEA correctly determined in the November 5 Order that no adjustment should be made for a 1974 bad debt expense which the firm alleged was unrepresentative of its current operations. In this regard, the FEA noted that almost any firm could claim that its current operations differ in some respect from its historical operations and that, if a general policy of allowing such adjustments in historical profitability were adopted, the calculation of historical profitability would become an arbitrary process. However, with respect to one of the requested adjustments to the firm's 1974 financial statement relating to a former subsidiary of Southland's parent firm, the FEA observed that Southland had presented detailed information outlining its corporate structure and indebtedness which demonstrated that the item was wholly unrelated to any of the firm's refining and marketing operations. The FEA therefore made an adjustment to the firm's 1974 financial statement which necessitated a recalculation of Southland's historical profit margin.

Southland also claimed that in order to provide the firm with the full six month exemption from entitlement purchases afforded by Special Rule No. 6, the firm's operating results for the months of October, November and December 1975 should be excluded from the FEA's review of the exception relief granted to Southland during 1975. In rejecting this argument with respect to the months of October and November, the FEA pointed out that Southland and other small refiners were exempt from purchase requirements which would have otherwise been specified in Entitlement Notices for the six month period from December 1975 through May 1976. The FEA therefore concluded that Southland and the other small refiners did in fact receive the intended benefits under Special Rule No. 6 during that period of time. The FEA found however, that Southland's argument had considerable merit with regard to the month of December 1975, and therefore excluded the firm's operating results for that month from its review of the exception relief granted to the firm in 1975. Finally, Southland's claim that the payback of the excessive benefits which it received should be delayed until the completion of FEA audits currently in progress was rejected. The FEA observed that Southland had received exception relief to which it was not entitled, that the approval of that relief had adversely affected other firms, and that the outcome of any pending FEA audit of Southland remained speculative. The exclusion of December 1975 operating results resulted in a reduction in the entitlements purchase obligation specified in the November 5 Decision by $807,266. The Southland Appeal was denied in all other respects.

Texas American Oil Corp. Midland, Tex.; FXA-1115; Crude oil

Texas American Oil Corporation (TAO) filed an Appeal from a Decision and Order which was issued to it and the United Refining Company on December 16, 1976. *United Ref. Co.; Texas American Oil Corp.*, 4 FEA Par. 83,262 (December 16, 1976). The December 16 Decision involved the application of the FEA regulations to TAO's proposed acquisition of United's refinery located in Osceola, Michigan (the Osceola refinery). Under the provisions of the Old Oil Entitlements Program, United would ordinarily have been eligible to receive entitlements for crude oil receipts and runs to stills for all months prior to December, the month in which it actually sold the refinery to TAO. However, the FEA determined in the December 16 Order that United should remit to TAO the revenues which it received from the sale of entitlements that are attributable to the Osceola refinery during the months of September, October and November 1976. However, the FEA found that TAO had improperly been listed on the November and December 1976 Entitlement Lists as the firm that was eligible to earn entitlements attributable to crude oil receipts and runs at the Osceola refinery, and accordingly directed that adjustments be made on future Entitlement Lists in order to recoup the excessive benefits which TAO had realized under the small refiner bias of Section 211.67(e). TAO's Appeal, if granted, would permit the firm to receive additional entitlements under the small refiner bias for the period between September and November 1976. In considering the Appeal, the FEA rejected the firm's contention that any firm which owns, operates or controls a refinery is automatically eligible to earn entitlements since under the specific criteria set forth in Section 211.67(a)(2), a firm is not eligible to participate in the Entitlements Program prior to the certification of its refining capacity. Accordingly, the FEA found that TAO was not permitted as a matter of law to earn entitlements until the FEA certified its refining capacity in January 1977. The FEA also rejected the contention that TAO's alleged equitable ownership interest in the Osceola refinery as of September 1, 1976, the effective date of its Purchase Agreement with United, provided a sufficient basis for entitlements to be issued to TAO. In this regard, the FEA held that the real property doctrine of equitable conversion was a matter of state contract law which did not govern the rights and obligations of parties under the FEA regulatory program. Moreover, the FEA found that even if TAO had acquired an equitable interest in the refinery prior to December 1976, there was no basis to issue entitlements to TAO instead of to United as the legal owner. The FEA also determined that the evidence presented by TAO failed to substantiate the firm's claim that it assumed primary responsibility over the Osceola refinery operations on September 1, 1976. Under these circumstances, the FEA affirmed its previous finding that the entitlements for the September through November 1976 period were properly issued to United. The FEA also held that it was not erroneous to have considered the firm's exception request under the standards which govern retroactive exception relief since the firm was requesting relief for a period of time preceding the issuance of the FEA's Decision. Finally, the FEA found that TAO failed to establish that its request became retroactive in nature as a result of any undue administrative delay attributable to the FEA. In view of the firm's overall financial viability and its recent profitable operations at the Osceola refinery, the FEA affirmed its finding that TAO had failed to establish that retroactive exception relief was appropriate. Accordingly, the TAO Appeal was denied.

APPLICATIONS FOR EXCEPTION

Colonial Oil Co. Jacksonville, Fla.; FXE-4022; Motor Gasoline

On July 3, 1975, the FEA granted exception relief to Colonial Oil Company (Colonial) on the ground that the Application to it of the provisions of 10 CFR, Part 211, which require adherence to the base period supplier/purchaser relationship, resulted in a serious hardship to the firm. *Colonial Oil Co.*, 2 FEA Par. 83,201 (July 3, 1975). In that Order the Regional Administrator for the FEA, Region IV, was directed to assign to Colonial a supplier whose wholesale prices for motor gasoline, No. 2 fuel oil and kerosene were within the range of prices paid for those products in Colonial's marketing area by wholesale marketers. The Order further provided that upon the submission of certain financial and operating data Colonial could request that the exception relief granted to the firm be extended for an additional period of time. On the basis of the data submitted by Colonial in connection with its present Application and the recommendation of the Regional Administrator, the FEA determined that: (i) the serious hardship which Colonial experienced in the past as a result of the provisions of 10 CFR 211.9 would continue to exist unless further exception relief were granted with respect to its motor gasoline supplies; and (ii) in order to alleviate this hardship Colonial should be assigned a lower-cost supplier for the months of April, May and June 1977 for the entire volume of gasoline which it is entitled to receive from its principal base period supplier.

Mar-Low Corp.; Lafayette, La.; FEE-3665; Crude Oil

Mar-Low Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D which, if granted, would permit the firm to sell at upper tier prices the crude oil it produces from three wells on the Grand Lake Field. Mar-Low claimed that in the absence of exception relief it would not have any economic incentive to rework those wells and the crude oil which it seeks to produce would not be recovered. In considering the Application, the FEA found that Mar-Low's data indicated that under the general FEA regulatory program the firm will realize substantial revenues from the wells which it proposes to operate on the Field. In this regard, the FEA observed that in its submission Mar-Low itself stated that even after taking into account the payment of severance taxes the firm will have recouped its total investment to rework the wells within the first four years of the operation of the Field. Moreover, the FEA estimated that Mar-Low's rate of return on this investment would exceed the rate of return which the FEA has used as a measure for granting exception relief in previous cases of this type. The FEA therefore concluded on the basis of this record that Mar-Low needs no additional economic incentive to engage in the crude oil recovery project at the Grand Lake Field. Accordingly, the firm's Application for Exception was denied.

Read & Stevens, Inc.; Roswell, N. Mex.; FEE-3326; Crude Oil

Read & Stevens, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would relieve the firm of the obligation to refund any revenues which it might have received during the period January 1, 1975 through December 31, 1975 as a result of charging prices for the crude oil produced and sold from the firm's Federal "C" Lease which exceeded applicable ceiling price levels. Read & Stevens also requested prospective exception relief to permit it to sell the crude oil produced from the Federal "C" Lease at upper tier ceiling prices. In considering the firm's request for retroactive exception relief the FEA applied the criteria set forth in *Bobcat Oil Co.*, 3 FEA Par. 80,631 (May 18, 1976) and determined that Read & Stevens failed to even allege that in the absence of retroactive exception relief the firm would suffer an irreparable injury and be forced to discontinue its current business operations. Under these circumstances the FEA determined that retroactive exception relief should be denied. In considering the firm's request for prospective exception relief the FEA determined that the costs of producing crude oil from the Federal "C" Lease have increased significantly since 1973 and as a result now exceed the price levels which Read & Stevens may charge for the crude oil which it produces and sells. The FEA therefore concluded that Read & Stevens had no apparent economic incentive to continue to operate the Federal "C" Lease. The FEA also found that there was little likelihood that the recoverable crude oil from the lease's reservoir would be produced by any firm if exception relief is not granted. On the basis of previous precedents involving similiar factual situations, the FEA concluded that the application of the lower tier ceiling price rule resulted in a gross inequity to Read & Stevens. Based on operating data which the firm submitted for its most recently completed fiscal period, Read & Stevens was granted exception relief which permits it to sell at upper tier ceiling prices 33.80 percent of the crude oil produced and sold from the Federal "C" Lease for the benefit of the working interest owners.

REQUEST FOR MODIFICATION OR RESCISSION

Cotton Petroleum Corp.; Denver, Colo.; FMR-0088; Crude Oil

Cotton Petroleum Corporation filed an Application for Modification or Rescission of a Decision and Order issued to it by the FEA on February 4, 1977. *Cotton Petroleum Corp.*, 5 FEA Par. 80,540 (February 4, 1977). In the February 4 Order, the FEA granted Cotton an exception to the provisions of 10 CFR, Part 212, Subpart D and permitted the firm to sell at upper tier ceiling prices 15.9021 percent of the crude oil which it produces from the North Goose Lake Unit for the benefit of the working interests. In its Request for Modification, Cotton contended that, the relief granted in the February 4 Order had failed to include an allowance for future workover and well conversion expenses. Cotton also contended that the relief granted in the February 4 Order should be increased to provide the firm with additional revenues to offset any refunds which it might be required to make in order to remedy apparent past violations of FEA pricing regulations which were cited in a Notice of Probable Violation (NOPV) issued to the firm. In considering Cotton's modification

request, the FEA determined that the firm's claim with respect to future workover and well conversion expenses had been advanced by Cotton during the prior exception proceeding and had been implicitly rejected by the FEA in the February 4 Decision. Accordingly the FEA found that that claim could not form the basis for the modification of the February 4 Order. The FEA further determined that the matters raised in the NOPV were unrelated to the determination reached in the February 4 Decision and that the issuance of the NOPV was therefore not a "changed circumstance" within the meaning of 10 CFR 205.135(b)(2). The FEA concluded that the Cotton modification request failed to meet the regulatory criteria for the approval of Applications for Modification or Rescission and therefore denied the request.

REQUESTS FOR STAY

Jack W. Grigsby d/b/a Grigsby Oil & Gas; Shreveport, La.; FES–0082; Crude Oil

Jack W. Grigsby d/b/a Grigsby Oil & Gas filed an Application for Stay of a Decision and Order which was issued to the firm on March 8, 1977. *Jack W. Grigsby d/b/a Grigsby Oil & Gas*, 5 FEA Par. 80,567 (March 8, 1977). In the March 8 Decision, the FEA denied an Appeal that Grigsby had filed from a Remedial Order which had previously been issued to it by FEA Region VI. The March 8 determination also directed the immediate disbursement of funds which Grigsby had placed in an escrow account. The present request, if granted, would stay the refund provisions of the Remedial Order pending judicial review of a complaint which the firm filed in the United States District Court for the Western District of Louisiana on March 15, 1977. In considering the request for stay, the FEA found that Grigsby's claim that it would be irreparably injured because of the potential difficulty in recovering refunds if the firm were to succeed in its lawsuit did not provide a basis for further delaying the implementation of the required refunds to the marketplace. The FEA also found that since Grigsby's substantive claim of error in the Remedial Order had been rejected in a final agency determination that was consistent with previous FEA decisions, there was little likelihood that Grigsby would ultimately prevail on the merits of its judicial action. Accordingly, the Grigsby Application for Stay was denied.

Uranich Coal and Oil; LaSalle, Ill.; FRS–1224; No. 2 Fuel Oil

Uranich Coal and Oil filed an Application for Stay of a Remedial Order which the FEA Region V issued to the firm on February 4, 1977. In the Remedial Order the FEA determined that during the period November 1, 1973 through December 31, 1974, Uranich sold No. 2 heating oil at prices which were in excess of the maximum permissible prices specified in 10 CFR 212.93 and 6 CFR 150.359. Uranich was therefore directed to refund the overcharges to its customers. In considering the Application for Stay, the FEA concluded that if Uranich were required to refund the overcharges specified in the Remedial Order and ultimately were to prevail on its Appeal, it could incur an irreparable injury because of the difficulty it would experience in recovering the refunds. The FEA further determined that Uranich had raised significant issues concerning the accuracy and procedural propriety of the Remedial Order. The FEA therefore held that Uranich had satisfied the criteria set forth in *General Crude Oil Co.*, 3 FEA Par. 85,040 (June 25, 1976), modified, 3 FEA Par. 85,040 (July 8, 1975). However, the FEA also determined that in accordance with the considerations discussed in the General Crude, Decision the stay should be conditioned upon Uranich's establishment of an escrow account in which it places designated portions of the refunds required by the Remedial Order.

SUPPLEMENTAL ORDERS

Algonquin Gas Transmission Co.; Boston, Mass.; FEX–0098; Crude Oil & Unfinished Oils

Texas Asphalt & Refining Co.; Houston, Tex.; FEX–0099; Crude Oil & Unfinished Oils

Time Oil Co.; Los Angeles, Calif.; FEX–0100; Finished Products

On November 17, 1976, the Federal Energy Administration formally notified the Algonquin Gas Transmission Company (Algonquin), Texas Asphalt & Refining Company (TARCO) and Time Oil Company (Time) that it was proposing to revoke as of April 30, 1977, exceptions from the import license fee requirements which each of the firms had previously been granted by the Oil Import Appeals Board (the Board). In comments submitted in opposition to the proposed terminations, Time and TARCO contended that the FEA is not authorized to terminate pre-existing orders of the Board. In considering this contention, the FEA noted that under the terms of the Orders issued by the Board, the fee-exempt authorizations were expressly subject to further review and modification. Moreover, the Board has been abolished and the Office of Exceptions and Appeals of the FEA is authorized to exercise the adjudicatory functions which it previously exercised. Consequently, the FEA certainly has the authority to review, and if warranted to modify or revoke, the prior determinations of the Board. The FEA also determined that substantial changes in the regulatory framework underlying the Board's original determination had taken place since 1970. In particular, the FEA observed that a separate adjudicatory determination is now made for each allocation period for which a firm seeks fee-exempt authority, and that the FEA has previously stated that it will not consider any previous grant of such authority as a presumption in favor of continuing the fee-exempt status of a firm. Consequently, TARCO's contention that there has not been a change in the underlying factual and legal basis of its fee-exempt award was rejected.

With respect to the assertion advanced by Time and TARCO that the proposed revocation of their fee-exempt authority would cause them to experience inordinate hardship, the FEA determined that Time had not presented any evidence which indicated that the proposed termination would subject it to an inordinate burden or cause it to be treated differently from all other firms seeking fee-exempt authority. The FEA also concluded that the present proceeding was not the appropriate forum in which to reach a conclusion with respect to the substantive validity of claims that the proposed termination would cause the firms and their customers to experience an unusual competitive disadvantage, supply problems or financial difficulties. According to the FEA Decision those claims should be raised in specific applications for exception from the license fee requirements. The FEA also rejected Time's claim that the proposed termination violated the firm's right to due process of law. The FEA noted that the November 17 communication was forwarded to Time more than five months before the proposed termination date and that it clearly set forth the basis for the proposed termination. Accordingly, the FEA determined that the fee-exempt authority of Algonquin, Time and TARCO would be rescinded as of April 30, 1977. However, since TARCO received the November 17 communication on a date which was too late for it to take action during 1976 which would have qualified it for an automatic license-fee exemption for the 1977–78 allocation period under 10 CFR, Part 213, TARCO was granted a temporary exception which permits it to qualify under limited circumstances for a license-fee exemption.

Cotton Petroleum Corp.; Denver, Colo., FEX–0138 crude oil

On February 4, 1977, the FEA issued a Decision and Order to the Cotton Petroleum Corporation denying the firm's Appeal from an earlier Decision and Order but granting the firm an exception to the FEA Mandatory Petroleum Price Regulations. *Cotton Petroleum Corp.*, 5 FEA Par. 80,540 (February 4, 1977). The February 4 Order provided that Cotton could request an extension of the exception relief which was approved by filing certain data with the FEA in accordance with the provisions of paragraph (5) of the Order. The FEA found that paragraph (5) of the February 4 Order contained certain errors relating to the reference dates to be used for the filing of the data. The FEA therefore ordered that the February 4 Order be amended to correct those errors.

Pennzoil Producing Co.; Washington, D.C.; FEX–0144 crude oil

On April 7, 1977, the FEA issued a Supplemental Order to the Pennzoil Producing Company which permitted the firm to sell at upper tier ceiling prices a portion of the crude oil produced from the Perry Sand Waterflood Unit, North Segment (the Unit) for the benefit of the working interest owners. *Pennzoil Producing Co.*, 5 FEA Par. ——— (April 7, 1977). Upon a review of that Order, the FEA determined that the amount of relief granted to Pennzoil had been based on an erroneous calculation of the upper tier ceiling price for crude oil produced from the Unit. Accordingly, the FEA modified the Supplemental Order to include the correct upper tier ceiling price in calculating the amount of relief which the firm should be granted.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Amount of price increase in dollars per gallon
Standard Oil Co. of California	FXE–3085	Carpinteria	(1)
Do	FXE–3086	Colonia Booster	(1)
Do	FXE–3087	Greeley System	0.0520
Do	FXE–3088	S. E. Marietta	(1)
Do	FXE–3089	Wilson Creek	.1008
Do	FXE–3090	Yates	.0267
Do	FXE–3087	Wakita	.01672
Sun Co., Inc	FXE–3889	Carney	.07657
Do	FXE–3890	Tonkawa	.07886
Do	FXE–3900	Burnell	.0152
Do	FXE–3901	Canales	.0207
Do	FXE–3902	Conebo	.0582
Do	FXE–3903	Maurice	.06620
Do	FXE–3904	Mermentau	.0838
Do	FXE–3905	Peoria	.0214
Do	FXE–3911	Cowden	.0050
Do	FXE–3912	Dragon Trail	.0133

SUMMARY DECISIONS

The FEA Office of Exceptions and Appeals has issued Decisions and Orders vacating stays which had been granted to the following firms after a finding was made that the firms had failed to comply with the express conditions of the Stay Order:

Bonray Oil Co.; Oklahoma City, Okla., FEX–0140

Boyd Oil Corp.; Contoocook, N.H.; FEX–0143

Mackellar, Inc.; Oklahoma City, Okla.; FEX–0137

The FEA Office of Exceptions and Appeals has issued a Decision and Order vacating the Stay which had been granted to the following firm after it requested that the Stay be rescinded:

Buck Drilling and Exploration; Oklahoma City, Okla.; FEX–0139

The FEA Office of Exceptions and Appeals has issued a Decision and Order rescinding the Decision and Order which had granted exception relief to the following firm after a finding was made that the relief was no longer required:

Mobridge Gas Co.; Mobridge, S. Dak.; FEX–0135

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Atlantic Richfield Co.; Dallas, Tex.; FXE–3754
Major Oil Products; Rome, Ga.; FEE–3622
Robert Olsen; Gillette, Wyo.; FXA–1170
Standard Oil Co. of Indiana; Chicago, Ill.; FEA–1216

The following submission was dismissed on the grounds that the firm had presented no new evidence or information which had not been included in its prior Application for Stay which was denied:

Luke Bros., Inc.; Oklahoma City, Okla.; FST–0039

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., expect Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

[FR Doc 77–14938 Filed 5–25–77;8:45 am]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of April 18 Through April 22, 1977

Notice is hereby given that during the week of April 18 through April 22, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

John H. Cathey; Kimball, Nebr.; FRA–1244 crude oil

John H. Cathey (Cathey) filed an Appeal from a Remedial Order which the Director of Compliance of FEA Region VII issued to the firm on March 14, 1977. In the Remedial Order, Cathey was required to refund the revenues which it received by charging prices which were in excess of the maximum levels permitted under the FEA Mandatory Petroleum Price Regulations. In considering the Appeal the FEA found that Cathey had failed to even allege that the March 14 Remedial Order was erroneous in fact or law or arbitrary or capricious. Consequently, the FEA summarily denied the Appeal in accordance with the provisions of 10 CFR 205.106(b)(1)(ii).

Earl W. Sauder; Emporia, Kans.; FRA–1108 crude oil

Earl W. Sauder (Sauder) filed an Appeal from a Remedial Order which was issued to the firm by the Regional Administrator for FEA Region VII on November 4, 1976. The Remedial Order found that during the period November 1973 through December 1975, Sauder had unlawfully obtained certain revenues from the sale of crude oil. The Remedial Order directed Sauder to immediately refund $342,589 plus interest for the past overcharges. The present Appeal, if granted, would result in a rescission of the Remedial Order and would relieve Sauder of his refund obligations. In considering the Appeal, the FEA found that Sauder's contention that the Remedial Order was procedurally defective was without merit. The FEA determined that contrary to Sauder's assertions, the Remedial Order properly considered the August 26, 1976 regulatory provision which clarified the manner in which the term "property" should be applied to crude oil operations. In his Appeal, Sauder further contended that the Remedial Order had incorrectly failed to consolidate the leases which he owns into a single property. The FEA determined that Sauder's assertion constituted an equitable argument which was properly raised only in the context of an exceptions proceeding and would be resolved in Sauder's pending Appeal of a Decision which denied an Application for Exception that Sauder had previously submitted on that matter. Furthermore, the FEA concluded that the Regional Administrator had not abused his administrative discretion in holding Sauder solely liable for the overcharges set forth in the Remedial Order. However, in light of the adverse financial impact of an immediate refund of the excessive revenues on Sauder's operations the FEA permitted Sauder to complete his refund obligations over an extended period of time. On the basis of these considerations, the FEA denied Sauder's Appeal of the November 4 Remedial Order.

General Distributors, Inc.; Snow Hill, Md.; FRA–1250, FRS–1250, FMR–0098, propane

General Distributors, Inc. filed an Appeal and an Application for Stay of a Remedial Order which had been issued to the firm by FEA Region III on February 23, 1977. In the Remedial Order, the FEA found that General had charged prices for propane that were in excess of maximum allowable levels specified in 10 CFR 212.93. The Remedial Order therefore directed General to refund the total amount of the overcharges. General also filed an Application for Modification of a Decision and Order which the FEA had previously issued with respect to an Application for Exception that the firm had filed. *General Distributors, Inc.*, 5 FEA Par. ——— (March 10, 1977). In the March 10, 1977 Decision exception relief was approved which permitted General to increase its maximum permissible selling prices for propane on a prospective basis. In its Application for Modification, General requested that the relief be accorded on a retroactive basis as well. Since these submissions involved similar issues, they were consolidated for decision in a single proceeding.

In considering General's Application for Modification, the FEA concluded that there was some merit to the firm's contention that undue administrative delay had occurred in the processing of its application for exception relief. The FEA found that over four months after the date upon which General first filed an Application for Exception with FEA Region III, FEA Region III incorrectly forwarded the firm's exception request to the National Office of Exceptions and Appeals. The FEA further determined that FEA Region III's incorrect referral of the exception application resulted in an unwarranted delay in processing General's application for exception. Accordingly, the FEA approved General's Application

for Modification and directed the Regional Administrator of FEA Region III to issue a revised Remedial Order which contains a computation of the amount of revenues which General would have obtained if the exception relief had been approved in a more timely manner. The FEA further directed that the refunds which General is required to make pursuant to the February 23, 1977 Remedial Order be reduced by the amount of revenues which General lost as a result of the delay in processing its request for exception. Consequently, the FEA also stayed the provisions of the February 23, 1977 Remedial Order pending the issuance of the revised Remedial Order and dismissed General's Appeal of the February 23, 1977 Remedial Order without prejudice to a refiling subsequent to the issuance of the revised Remedial Order.

Tesoro Petroleum Corp.; Washington, D.C.; FRA-1245; FRS-1245; Crude oil

The Tesoro Petroleum Corporation filed an Appeal from a Remedial Order which was issued to the firm on March 1, 1977. In the Remedial Order, the Deputy Regional Administrator of FEA Region VI determined that Tesoro had failed to submit consolidated Forms FEO-96 (the Monthly Cost Allocation Report) for the period February 1974 through August 1975 as required by Section 212.126 of the FEA Regulations and the instructions to Form FEO-96. The Remedial Order directed Tesoro to refile consolidated Forms FEO-96 for the period December 1973 through August 1975 and to refile its Forms FEO-96 and FEA P110-M-1 for all months subsequent to August 1975 to reflect the adjustments in banked costs. In considering the Tesoro Appeal, the FEA determined that the FEA Regulations unambiguously provide that a firm must consolidate its refining operations in determining the increased costs which it has incurred and the prices which it may charge for covered petroleum products. The FEA therefore found that the relevant provisions of the FEA Regulations, as well as the instructions to Form FEO-96, clearly required that each refiner submit a single consolidated Form FEO-96 for each month. The FEA concluded that the March 1, 1977, Remedial Order properly found that Tesoro's failure to submit a single, consolidated Form FEO-96 for each month during the December 1973 through August 1975 period constituted a violation of explicit provisions of the FEA Regulations. Moreover, the FEA also determined that contrary to Tesoro's claim, its submission of a certification which states that the amended forms have been prepared in a manner which is correct, complete, and in accordance with the provisions of the FEA Regulations would not constitute an admission by the firm that the forms which it previously submitted were falsely prepared. The Tesoro Appeal was therefore denied.

REQUESTS FOR EXCEPTION

EDCO Research Associates; Newcastle, Wyo.; FEE-3561; Crude Oil

EDCO Research Associates filed an Application for Exception which, if granted, would permit the firm to terminate its crude oil supplier/purchaser relationship with the National Cooperative Refinery Association (NCRA). In its submission, EDCO, a small and independent crude oil producer, alleged that for a fifteen month period, NCRA had paid it 15 cents per barrel less than the maximum lawful price for crude oil produced from the Zerbst Lease. In order to obtain a higher price, EDCO took appropriate steps under the provisions of Section 211.63(d)(iii) to locate another purchser for the crude oil. However, prior to EDCO's obtaining a written agreement from a new purchaser of the crude oil, NCRA notified EDCO that it was willing to pay the maximum permissible price for the crude oil produced from the Zerbst Lease. Accordingly, EDCO requested an exception from the provisions of Section 211.63 in order to terminate its relationship with NCRA. In considering the firm's exception request, the FEA noted that in previous cases the FEA permitted the termination of a supplier/purchaser relationship upon a finding that the relationship had deteriorated to such a significant extent that the applicant's operations would be seriously affected by a continuation of the base period relationship. Termination of a base period supply relationship has also been approved where a strong showing has been made that the firm's operations would be seriously impaired as a result of the FEA regulatory requirements. No such showing was made on the basis of the facts presented in this case and the EDCO exception application was accordingly denied.

Getty Oil Co.; Washington, D.C.; FEE-3368; Refined Petroleum Products

The Getty Oil Company filed an Application for Exception from the provisions of 10 CFR 212.83(c)(2) which, if granted, would permit the firm to deduct the volume of fluid petroleum coke that it produces from the total volume of all petroleum products it produces in computing the amount of its increased costs of crude oil allocable to covered products. In its Application for Exception Getty stated that, as a result of the low value of the fluid petroleum coke it produces at its Delaware City refinery, it has not been able to reflect in its sales price for that product a cost factor which is equivalent to the increased crude oil costs which it was required to allocate to the coke under the allocation formula set forth in 10 CFR 212.83(c)(2). Getty stated that in response to that situation it has stockpiled coke and refrained from selling the product. In considering Getty's Application for Exception, the FEA noted that identical contentions had previously been advanced by the firm in a similar submission and that exception relief had been granted in the past. *Getty Oil Co.*, 2 FEA Par 83.231 (August 4, 1975). However, the FEA noted that Getty's current submission was significantly different from the earlier proceeding since an amendment to the crude oil cost allocation formulae which became effective on January 19, 1977, had eliminated the inequity which led to the previous approval of exception relief. That amendment requires Getty and all other refiners to allocate increased crude oil costs on the basis of the volume of produced refined rather than on the basis of the volume of products sold. As a result of this regulatory change, Getty is now required to allocate increased crude oil costs to all of the products it refines, including fluid petroleum coke, regardless of whether it sells those products. Consequently, the FEA concluded that the two factors upon which its prior determination was predicated—the existence of a disincentive for Getty to market its production of petroleum coke and the disproportionate burden to the purchasers of covered products from Getty—had been eliminated by the January 19, amendment. Accordingly, Getty's Application for Exception was denied.

Power Test Corp.; Washington, D.C.; FPI-0106; FPI-0111; Motor Gasoline

Power Test Corporation filed an Application for Exception from the provisions of 10 CFR 213.35(c) which, if granted, would permit the firm to import an average of 4,552 barrels per day of motor gasoline into Districts I-IV on a license fee-exempt basis during the 1976-1977 allocation period. Power Test also filed a similar Application for Exception in which it requested the same daily average fee-exempt authority for the 1977-1978 allocation period. In considering these exception requests and the data submitted by Power Test, the FEA found that although the profitability of the firm's marketing division had declined in recent periods, the profitability of its total petroleum-related operations had not been appreciably below historic levels. The information submitted by Power Test further demonstrated that the primary reason for the decline in the firm's profitability was the increase in prices for motor gasoline of the firm's suppliers. The FEA therefore concluded that Power Test had not demonstrated that it was experiencing the type of financial hardship and competitive difficulty which had supported the approval of exception relief from the payment of license fees in previous cases. In addition, the FEA found that Power Test had not submitted any evidence which supported its claim that its customers would experience supply shortages if the firm did not obtain exception relief. Based on these considerations, the FEA denied Power Test's exception requests.

F. H. Rhees; Tulsa, Okla.; FEE-3526; Crude Oil

F. H. Rhees (Rhees) filed an Application for Exception which, if granted, would permit Rhees to sell the crude oil produced from the Glass-Paxton, Glass-Newcomb, Glass-Hart and University Leases without regard to the maximum price levels specified in 10 CFR Part 212, Subpart D. The exception request, if granted, would also permit Rhees to retroactively increase the price for the crude oil which he has already produced and sold from these leases. In his exception application, Rhees specifically requested that the leases be considered as qualifying as "stripper well properties," as that term is defined in Section 212.54. In his Application, Rhees stated that the leases had not been in operation for twelve consecutive months as would generally be required. In applying the precedent established in *Great Southern Oil & Gas Co., Inc.*, 3 FEA Par. 83,111 (February 27, 1976), the FEA determined that Rhees had presented no financial materials to show that it had an insufficient economic incentive to continue production from the Paxton, Hart and University Leases until these leases qualified as stripper well properties. The FEA also found that any economic disincentive which Rhees might experience with regard to the continued production of crude oil from the Newcomb Lease did not result from the FEA Regulations and would consequently not be alleviated by exception relief. Furthermore, the FEA determined that Rhees had submitted no data to support his contention that the FEA Regulations had created an economic disincentive for the drilling of additional wells on the properties. On the basis of these considerations, Rhees' exception request was denied.

Teche Production Co., Inc.; Lafayette, La.; FEE-3658; Crude Oil

Teche Production Company, Inc., filed an Application for Exception from the provisions of 10 CFR Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil produced from the Johnson Heirs No. 2 well (the Johnson well) at upper tier ceiling prices. According to the Teche submission, the firm would have no economic incentive to repair the tubing and resume production from the Johnson well in the absence of exception relief. In considering the Teche submission, the FEA determined that a substantial quantity of crude oil could be recovered from the Johnson well if Teche were to make the capital investment necessary to repair the well. The FEA also determined that since Teche was limited to charging the lower tier ceiling price for the crude oil produced from the Johnson well, the firm would receive a negative return on the capital investment necessary to restore production from the lease. In order to encourage the firm to recover the crude oil underlying the lease, the FEA determined that exception relief should be granted. The FEA concluded that in this particular case these objectives could be achieved by permitting Teche to sell 10,836 barrels of crude oil which it produces for the benefit of the working interest owner from the Johnson well at upper tier ceiling prices over the remaining three and one-half year life of the project.

Texaco, Inc.; Houston, Tex.; FEE-4844; Natural Gas Liquid Products

Texaco, Inc. filed an Application for Exception from the provisions of 10 CFR 212.165 which, if granted, would permit the firm to increase the total non-product costs which are available for recovery through the prices it charges for general refinery products. The requested price increases are designed to enable Texaco to pass through non-product cost increases incurred at Texaco's Lignite Gas Plant prior to Texaco's sale of that plant on December 31, 1976. In a Decision and Order which it issued to Texaco on October 29, 1976, the FEA found that Texaco's non-product costs at the Lignite Plant had increased between the fiscal quarter that included the month of May 1973 and Texaco's most recently completed fiscal period by an amount substantially in excess of the $0.005 per gallon passthrough permitted under Section 212.165. On the basis of this finding, the FEA granted Texaco exception relief which permitted the firm to increase in each month from the date of the Order until December 31, 1976, the total non-product costs available for recovery in the prices it charged for general refinery products. The specific cost passthrough amount was to be calculated by multiplying the volume in gallons of natural gas liquids produced at the Lignite Plant in that month by $0.0683. *Texaco, Inc.*, 4 FEA Par. 83,150 (October 29, 1976). In a Decision and Order which it issued to Texaco on December 29, 1976, the FEA extended that exception relief for the period January 1, 1977, through March 30, 1977. *Texaco, Inc.*, 5 FEA Par. 83,031 (December 29, 1976). In its Application for Exception, Texaco requested that the exception granted to the firm with respect to the Lignite Plant be modified. Texaco stated that because it sold the plant on December 31, 1976, and consequently has had no production from the plant since that date, it is not able to increase the non-product costs available for recovery during the period January through March 1977 to reflect the non-product cost increases which it had incurred at the Lignite Gas Plant. Texaco claimed that this result is grossly inequitable, and contrary to the intent of the prior Decisions. In considering the Texaco request, the FEA noted that the exception relief which it grants to gas plant owners is intended to provide an incentive for continued and possibly increased production from gas plants. The FEA further observed that this type of relief is generally not designed to permit a firm to recover through increased prices the total value of the increased costs which it has incurred in a prior period. Since Texaco did not provide any arguments which indicated that the FEA should depart from these precedents, the Texaco request for exception was denied.

REQUESTS FOR MODIFICATION OR RESCISSION

Getty Oil Co.; New York, N.Y.; FMR-0095; Crude oil

The Getty Oil Company filed an Application for Modification or Rescission of a Decision and Order which the FEA issued to the firm on March 16, 1977. *Getty Oil Co.*, 5 FEA Par. ------ (March 16, 1977). In the March 16 determination the FEA denied a request for discovery which the firm had submitted in connection with Getty's pending Appeal of an August 12, 1976 Remedial Order. The discovery request consisted of two distinct categories of material. The first category consisted of information and documents which Getty claimed were necessary in order to properly enable the firm to substantiate its argument that improper Congressional interference had occurred with the FEA adjudicative process. The second category consisted of information which Getty asserted would generally support certain arguments which the firm has previously raised in connection with its Appeal. In considering the request, the FEA first found that Getty had failed to demonstrate that the FEA's previous determination with respect to discovery of documents relating to the allegations of Congressional interference should be modified. As to the remainder of the material which Getty sought in its Interrogatories, the FEA determined that most of the firm's request was overly broad and unnecessary to enable Getty to prepare an adequate Appeal of the Remedial Order. However, in view of the magnitude of the ceiling price violation specified in the Remedial Order, and in view of the fact that Getty cannot effectively challenge the "transfer price" values used to calculate that violation unless it is given access to the data base and assumptions which were used to derive the "transfer prices," the FEA concluded that the Office of Compliance should be required to furnish certain of the information in Getty's Interrogatory No. 11 pertaining to the "transfer price" issue. The Request for Modification was therefore granted in part and denied in part.

REQUESTS FOR STAY

Braden-Zenith, Inc.; Wichita, Kans.: FRS-1258; Crude Oil

Braden-Zenith, Inc (B-Z), filed an Application for Stay of a revised Remedial Order which the Director of the Compliance Division of FEA Region VII issued to the firm on March 30, 1977. On September 31, 1976, the Regional Administrator of FEA Region VII had issued a Remedial Order to B-Z in which he found that during the period November 1973 through December 1975, B-Z sold the crude oil which it produced from the Zenith Waterflood Unit (the Unit) at prices which were in excess of the maximum permissible price levels determined in accordance with the provisions of 6 CFR 150.354 and 10 CFR 212.73. In a Decision and Order which was issued on January 13, 1977, the FEA partially granted an Appeal which B-Z had filed from the Remedial Order and remanded the Remedial Order to the Regional Administrator of FEA Region VII for further consideration as to whether a revised Remedial Order should be issued to B-Z which assesses an overcharge liability against each of the working interest owners of the Unit. *Braden-Zenith, Inc.*, 5 FEA Par. 80,522 (January 14, 1977). In response, FEA Region VII issued a Remedial Order to B-Z on March 30, 1977, which requires the firm to refund the full amount of the overcharge liability. The present stay request, if granted, would relieve B-Z of its obligations to make the specified refunds pending a determination on its Appeal of the revised Remedial Order. In considering the request for stay, the FEA concluded that B-Z had raised substantial issues concerning the proprietary of the Remedial Order. B-Z also made a strong showing that it could incur an irreparable injury as a result of the requirement that it make the specified refunds. The FEA therefore held that B-Z satisfied the criteria set forth in *General Crude Oil Co.*, 3 FEA Par. 85,040 (June 25, 1976) for the approval of a stay of the refund requirements of a Remedial Order. The FEA also determined on the basis of the material presented, that it would be inappropriate to require the establishment of an escrow account in this case.

Robert E. Davis; Great Bend, Kans.; FES-4072; Crude Oil

Robert E Davis (Davis) filed an Application for Stay in which he requested that the FEA refrain from issuing a Remedial Order to him pending a determination on an Application for Exception which he also filed. In considering the Application for Stay, the FEA noted that at the present time, Davis has received only an NOPV and is therefore not required to refund any overcharges or take any other action. The FEA also found that Davis' submission did not satisfy any of the criteria for granting an application for stay such as demonstrating that he would incur an irreparable injury in the absence of stay relief. Accordingly, the Davis request for stay was dismissed.

Quincy Oil, Inc.; Quincy Mass.; FRS-4060; No. 6 Fuel Oil

On November 26, 1976, the Federal Energy Administration issued a Decision and Order to Quincy Oil. Inc. (Quincy) staying the refund provisions of a November 2, 1976 Remedial Order pending the FEA's determination with respect to an Appeal that Quincy filed from the Remedial Order. *Quincy Oil, Inc.*, 4 FEA Par. 85,037 (November 26, 1976). The Stay was granted on the condition that Quincy deposit the overcharges set forth in the Remedial Order in an escrow account. On March 31, 1977, the FEA issued a Decision and Order denying Quincy's Appeal of the Remedial Order. *Quincy Oil, Inc.*, 5 FEA Par. ------ (March 31, 1977). The March 31 Order provided for the termination of the Stay and contained a directive that the funds be disbursed to the Taunton Municipal Lighting Plant (Taunton) on April 30, 1977. On April 11, 1977, Quincy filed an Application for Exception which, if granted, would result in the elimination of the overcharge violations set forth in the Remedial Order. The FEA concluded that if the escrow funds were to be distributed to Taunton prior to a determination on Quincy's Application for Exception, Quincy might encounter an inordinate degree of difficulty in recovering the funds in the event that it is ultimately successful on the merits of its Application. The FEA therefore issued an Order providing that the November 26, 1976, Stay shall remain in effect pending the FEA's determination of Quincy's exception request.

SUPPLEMENTAL ORDERS

Austral Oil Co., Inc.; Houston, Tex.; FEX-0141; Crude Oil

On March 2, 1977 the Federal Energy Administration issued a Decision and Order to Austral Oil Company, Inc. (Austral), which granted the firm prospective exception relief from the provisions of 10 CFR Part 212, Subpart D. *Austral Oil Co., Inc.*, 5 FEA Par.

------ (March 2, 1977). Since the exception relief granted in the March 2 Order was based in part on the upper tier ceiling price which has substantially changed since the Order was issued and since the FEA also failed to take into account the revenues which Austral had realized from the property during 1975 and 1976, the FEA determined that it was appropriate to modify the exception relief to correct these errors. The FEA therefore recalculated the exception relief to permit Austral to sell sufficient amounts of crude oil produced from the property at upper tier price levels to obtain a 15 percent return on the firm's investments.

David Crow; Shreveport, La.; FEX–0150; Crude Oil

On February 17, 1977, the Federal Energy Administration issued a Decision and Order to David Crow (Crow) which granted in part an Appeal which Crow had filed from a Remedial Order issued to him by the Deputy Regional Administrator of FEA Region VI. *David Crow*, 5 FEA Par. 80,549 (February 17, 1977). In the February 17 determination, the matter was remanded to the Regional Administrator of FEA Region VI who was instructed to reconsider the level of overcharges assessed and issue a revised Remedial Order to Crow within 45 days. On April 15, 1977, the Deputy Regional Administrator of FEA Region VI notified the Office of Exceptions and Appeals that 60 additional days would be required for the preparation and issuance of a revised Remedial Order. After reviewing the record in this matter, the FEA determined that the February 17, 1977, Order should be modified to specify that a revised Remedial Order shall be issued by the Regional Administrator within 105 days of the issuance of the February 17 Order.

Husky Oil Co. of Delaware; Denver, Colo.; FEX–0145 crude oil

On June 21, 1976 and December 15, 1976, the FEA granted an exception to the Husky Oil Company of Delaware which relieved the firm of any obligation to purchase entitlements during the period June through December 1976. Both the June 21 and December 15 Orders stated that a review of Husky's actual financial operating results would be conducted at the end of the firm's December 31, 1976 fiscal year, to determine whether Husky received excessive benefits as a result of the exception relief which had been approved. The Orders further stated that if Husky did receive excessive entitlements exception relief during its 1976 fiscal year, an adjustment would be made and the firm would be required to purchase additional entitlements to account for the excessive benefits. In reviewing the entitlements exception relief provided to Husky during its 1976 fiscal year, the FEA determined that Husky did not attain either its historical profit margin or its historical return on invested capital during its entire 1976 fiscal year. Since Husky had received 100 percent exception relief from the Entitlements Program and had not exceeded its historical profit margin or historical return on invested capital, the FEA concluded that no adjustment to the firm's 1976 entitlements exception relief was necessary.

OKC Corp.; Washington, D.C.; FEX–0109 crude oil

On June 21, 1976 the FEA granted an Application for Exception which the OKC Corporation had filed thereby permitting the firm to offset its entitlements purchase obligation during the months of April, May, and June 1976 against its entitlements sales obligation during the July through September 1976 period. The June 21 Order stated that a review of OKC's actual financial operating results would be conducted at the end of the firm's fiscal year to determine whether OKC had received excessive benefits as a result of the exception relief which had been approved. In reviewing the entitlements exception relief granted to OKC, the FEA noted that the relief granted to the firm in the June 21 Order was intended to alleviate the disruptive impact that the Entitlements Program would have on the firm's operations as a result of the change in its crude oil supply. Since the financial data submitted by OKC appeared to indicate that this result had been achieved, the FEA concluded that no adjustment to OKC's 1976 entitlements exception relief was necessary.

Sunland Refining Corp.; Los Angeles, Calif.; FEX–0149 crude oil

On December 15, 1976, the FEA granted Sunland Refining Corporation exception relief which reduced by $798,180 per month the firm's obligation to purchase entitlements under the provisions of the Entitlements Program during each month of the period December 1976 through May 1977. On April 1, 1977, the FEA informed Sunland of its intention to rescind the exception on the grounds that the factual basis underlying the approval of exception relief had changed to a substantial extent. In the present Supplemental Order the FEA determined that, as a result of a new contract which Sunland entered into subsequent to the issuance of the December 15 Order for the purchase of crude oil, Sunland now anticipates it will be a net seller of entitlements for its entire 1977 fiscal year (i.e., the period January 1 through December 31, 1977), and will not incur any obligation to purchase entitlements during the period January 1 through March 31, 1977. The December 15 Order was therefore modified and the exception was revoked with respect to the months of January through March 1977.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The exceptions granted permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases:

Company	Case No.	Plant	Amount of price increase in dollars per gallon
Cabot Corp	FEE–3026	Beaver	0.0058
	FEE–3027	Estes	.01556
	FEE–3028	North Terrebone	.0173
	FEE–3029	Prentice	.01775
	FEE–3030	Walton	.01119
Dorie Petroleum, Inc	FXE–4011	Hennessey	.01500
	FXE–4012	Newcastle	.0172

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

George A. Barnard; Eureka, Kans.; FEE–3970
Louis Kahan; Washington, D.C.; FRT–0041

The following submission was dismissed for failure to correct deficiencies in the firm's filing as required by the FEA Procedural Regulations:

C & K Oil Co.; Beckley, W. Va.; FEE–3993

The following Petition for Special Redress and Application for Stay were dismissed for failure to demonstrate that in accordance with the provisions of 10 CFR 210.91(d) the circumstances concerning a Special Report Order issued to the firm were so exceptional that an immediate review was warranted to correct substantial errors of law, or to prevent substantial injury to legal rights or cure a gross abuse of administrative discretion:

Phillips Petroleum Co.; Bartlesville, Okla.; FSG–0041, FES–0085

The following submission was dismissed on the grounds that the issues raised are currently being considered in a more appropriate proceeding pending before the Office of Exceptions and Appeals:

Southland Oil Co.;/VGS Corp.; Washington, D.C.; FMR–0086

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.d.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

Week of April 11 Through April 15, 1977

Notice is hereby given that during the week of April 11 through April 15, 1977, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Gulf Oil Corp.; Tulsa, Okla.; FEA–1053; motor gasoline

Gulf Oil Corporation appealed from a Decision and Order which the FEA issued to Mid-Michigan Truck Service, Inc. on October 6, 1976. *Mid-Michigan Truck Service, Inc.*, 4 FEA Par. 87,016 (October 6, 1976). In that Order the FEA approved an extension of the exception relief which it had initially granted on February 13, 1976. *Mid-Michigan Truck Service, Inc.*, 3 FEA Par. 83,100 (February 13, 1976), *modified, Mid-Michigan Truck Service, Inc.*, 3 FEA Par. 83,197 (May 20, 1976). In the February 13 determination, the FEA directed Gulf to cease supplying Mid-Michigan with motor gasoline through an unaffiliated firm pursuant to the supplier substitution provisions of 10 CFR 211.25 and to begin supplying Mid-Michigan directly. The FEA found that Gulf's use of a substituted supplier caused Mid-Michigan to pay substantially higher prices for gasoline and resulted in a serious financial hardship to Mid-Michigan. The May 20, 1976 Supplemental Order required Gulf to calculate the terms and conditions of its sale of motor gasoline to Mid-Michigan by using the actual selling price and credit terms which were in effect on May 15, 1973 between Gulf and Mid-Michigan. In considering the Gulf Appeal, the FEA rejected Gulf's contention that it could not determine the basis for the conclusion which the FEA reached in the prior decision that Mid-Michigan would incur an additional cost of at least 6.84 cents per gallon for motor gasoline purchased from the substituted supplier. The FEA observed that the price data contained in the October 6 Decision came from Mid-Michigan's application, that Gulf had received a copy of that application and therefore had an appropriate opportunity to contest the matter. The FEA also found that, in determining the financial impact on Mid-Michigan of Gulf's use of a substituted supplier, it is appropriate to compare the price which Mid-Michigan would have to pay for the motor gasoline it purchased from the Bestrom Oil Company, the substituted supplier, with the price at which it would be able to obtain that product directly from Gulf. The FEA therefore concluded that Gulf failed to demonstrate that the October 6 Decision was erroneous in fact or law, or was arbitrary or capricious and accordingly denied the firm's Appeal.

Louisiana Land and Exploration Co.; Washington, D.C.; FEA–1049; Refined Petroleum Products

The Louisiana Land and Exploration Company (LL&E) appealed from a Decision and Order which the FEA issued to it on October 15, 1976. *Louisiana Land and Exploration Co.*, 4 FEA Par. 83,149 (October 15, 1976). In the October 15 Decision, exception relief was granted which permitted LL&E to establish prices for its covered products during January 1976 which exceeded the firm's maximum allowable price levels. In approving this relief, the FEA noted that in January 1976, the first full month in which LL&E operated its new refinery, the firm would be required to sell refined products at or near May 15, 1973 price levels. The FEA found that this situation would cause LL&E to incur a substantial operating deficit and affect the competitive market equilibrium. On the basis of an analysis of those factors, the FEA concluded that exception relief was warranted. However, as a condition of the exception relief, LL&E was required to deduct from its bank of unrecouped increased costs the revenues which it realized in January 1976 as a result of charging prices that were in excess of its May 15, 1973 prices. In considering the LL&E Appeal, the FEA found that, contrary to LL&E's claim, the requirement that LL&E reduce its banks by the amount of costs which it actually passed through had not denied the firm the opportunity to pass through all of its increased costs nor did the requirement constitute a departure from precedents involving refinery acquisitions. Nevertheless, the FEA determined that this requirement would result in a gross inequity to the firm. In arriving at this determination, the FEA noted that LL&E was technically classified as a refiner in existence on May 15, 1973 by virtue of its natural gas processing activities and was therefore subject to the new item rule applicable to existing refiners when it sold refined products for the first time from its Mobile refinery. However, the application of that rule in LL&E's case resulted in the firm being required to sell its products at May 15, 1973 price levels. In contrast, new refiners which were not previously operating natural gas plants are permitted to charge prevailing market prices in their first month of operation. The FEA determined that if LL&E were nottreated as a new refiner and were required to refund the revenues which it realized from charging market prices in January 1976, a significant disincentive could be created to the construction of new refineries by natural gas processors, and LL&E would experience a gross inequity by virtue of the application of the new item rule to its circumstances. The FEA therefore granted the Appeal and rescinded the requirement that LL&E reduce its bank of unrecouped increased costs in the manner specified in the October 15 Decision and Order.

M. J. Mitchell; Campbell County, Wyo.; FXA–1167; Crude Oil

M. J. Mitchell (Mitchell) appealed from a Decision and Order which the FEA issued on December 17, 1976. *M. J. Mitchell*, 4 FEA Par. 83,250 (December 17, 1976). In that determination, the FEA granted the firm's request for an extension of exception relief and permitted Mitchell to sell 21.612 percent of the crude oil which it produces from the Mitchell State Minnilusa Sand Unit located in Campbell County, Wyoming (the Unit) at upper tier ceiling prices for a period of six months. The Mitchell Appeal, if granted, would permit Mitchell to sell 41.24 percent of the crude oil production at upper tier prices. In its Appeal, Mitchell claimed that the FEA had failed to reflect in its computation of the level of exception relief the increased depreciation costs which Mitchell had incurred. In addition, Mitchell contended that, in calculating the level of electricity costs experienced in the operation of the Unit, the FEA utilized an inappropriate reference period.

In considering Mitchell's arguments with respect to depreciation expenses, the FEA noted that it had considered and rejected this type of contention on a number of previous occasions. The FEA determined that Mitchell had not submitted any material which would indicate that the FEA should depart from its customary treatment of depreciation expenses in this particular case. In considering Mitchell's argument with respect to the reference period utilized in calculating the Unit's current electricity expenses, the FEA observed that in similar cases it has used the fiscal period immediately preceding the date of the exception application for the purpose of measuring the current level of costs. Although other reference periods have been utilized where a showing has been made that anomalous events occurred during the usual reference periods which distorted the use of those periods in the exceptions analysis, Mitchell's assertion that one expense item was somewhat lower than usual during the reference period did not constitute that type of a showing. The FEA therefore denied Mitchell's Appeal.

New York City Transit Authority; Brooklyn, N.Y.; FFA–1235; Freedom of Information

The New York City Transit Authority (NYCTA) appealed from an Order issued by the Information Access Officer of the FEA which denied in part a Request for Information which NYCTA had filed under the Freedom of Information Act, 5 U.S.C. 552. In its Request for Information, NYCTA sought certain documents pertaining to an FEA investigation of a Complaint which NYCTA had filed against Standard Oil Company (Indiana). The FEA found that the NYCTA Appeal failed to identify with particularity the alleged errors in fact or law which occurred in the determination being appealed, or to advance specific arguments in support of those contentions. The NYCTA Appeal was therefore dismissed and NYCTA was given leave to file an amended Appeal which corrects these deficiencies within 15 days.

OKC Corp. Washington, D.C.; FXA–1101; Crude Oil

The OKC Corporation filed an Appeal from a Decision and Order which the FEA issued to the firm on November 22, 1976. *OKC Corp.*, 4 FEA Par. 83,208 (November 22, 1976). In that determination, the FEA denied an Application for Exception from the provisions of 10 CFR 211.67 in which OKC requested that it be relieved of its obligation to purchase entitlements. According to the information which OKC provided in connection with its exception application, the firm's position under the Entitlements Program changed drastically between the third and fourth quarter of its 1976 fiscal year ending on September 30, 1976. OKC indicated in its original exception filing that it incurred a significant entitlement purchase obligation based on its operations during the third quarter and would be a seller of a substantial number of entitlements based on its operations during the fourth quarter of its 1976 fiscal year. Since the material which OKC had provided indicated that the firm would be a net seller of entitlements during that fiscal year, the FEA found that OKC's operations were not adversely affected by the Entitlements Program. In denying the exception application, the FEA concluded that it would not be appropriate to grant exception relief which would enhance the benefits which OKC was already realizing under the Entitlements Program.

In its Appeal, OKC contended that it had been injured as a result of the rescission of Special Rule No. 6. The firm noted that it would not have incurred an entitlement purchase obligation during the third quarter of its 1976 fiscal year if Special Rule No. 6 had remained in effect. OKC further contended that the FEA had given assurances to the Congress that no small refiner would be adversely affected by the revocation of the Special Rule. In considering this argument, the FEA held that the record in this matter did not lead to the conclusion that small refiners such as OKC would occupy the same advantageous position subsequent to the rescission of Special Rule No. 6 that they occupied during the period in which the Special Rule was in effect. Rather, the material on which OKC relied indicated that small refiners who could show that they would experience a serious hardship as a result of the modifications which the FEA had proposed to make in the Entitlements Program would be eligible to receive exception relief on an expedited basis. Although OKC's particular position with respect to the Entitlements Program was less favorable than the position it would have occupied if Special Rule No. 6 had remained in effect, the firm's position as a net seller of entitlements was nevertheless more favorable than it would have been in the absence of the Entitlements Program. Thus, the FEA held there was no basis for a conclusion that OKC was incurring a serious hardship as a result of the Entitlements Program.

The FEA also determined that there was no proper basis for the approval of OKC's request that exception relief be afforded only on the basis of the firm's financial position during the third quarter of its 1976 fiscal

year. The FEA therefore concluded that OKC had failed to establish that the November 22 Decision and Order was erroneous in fact or law or was arbitrary or capricious and the firm's Appeal was accordingly denied.

Powerine Oil Co.; Sante Fe Springs, Calif.; FXA-1074; Crude Oil

Powerine Oil Company filed an Appeal from a Decision and Order which the FEA issued to the firm on November 5, 1976. *Beacon Oil Co., et al.*, 4 FEA Par. 87,024 (November 5, 1976). The November 5 Decision was issued in connection with the FEA's review of the exception relief which had been granted to small refiners from the obligations under the Entitlements Program during 1975 and specified the FEA's determination as to whether each small refiner that had received exception relief during 1975 had been afforded an excessive or insufficient measure of exception relief. Powerine's Appeal, if granted, would result in a determination by the FEA that Powerine received insufficient exception relief from the Entitlements Program in 1975 and the issuance of an Order permitting the firm to sell additional entitlements. In considering the Powerine Appeal, the FEA determined that there was considerable merit to Powerine's contention that it should have received additional exception relief under the standards set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975). The FEA noted that during its fiscal year ending January 31, 1976 Powerine failed to achieve either its historical profit margin or its historical return on invested capital. Since the proper application of the *Delta* standards would entitle Powerine to exception relief from entitlements purchases which would impede the firm in achieving the lesser of these amounts, the FEA concluded that Powerine should be permitted to sell additional entitlements valued at $243,687.

Standard Oil Company of Ohio; Cleveland, Ohio; FXA-1142; Crude Oil

The Standard Oil Company of Ohio (Sohio) filed an Appeal from a Decision and Order which the FEA issued to the firm on December 3, 1976. *Standard Oil Co. of Ohio*, 4 FEA Par. 83,220 (December 3, 1976). The Appeal, if granted, would have resulted in the rescission of the December 3 Decision and Order and the issuance of an Order granting Sohio exception relief to permit it to compute its maximum permissible selling prices for the covered products which it refines by reference to an imputed May 1973 per barrel cost of crude oil which is lower than the actual per barrel cost incurred by Sohio during that month. In its Appeal, Sohio stated that the expansion of its Marcus Hook refinery was not completed prior to the month of May 1973, and as a result the provisions of Section 212.83 prevented the firm from recovering on a dollar-for-dollar basis all of the increased crude oil costs which it incurred, as provided by the Emergency Petroleum Allocation Act (EPAA, Pub. L. 93-159). Sohio further claimed that it is experiencing substantial losses in its operation of the Marcus Hook refinery which may force the firm to close the facility at some time in the future. In considering the Sohio Appeal, the FEA determined that, while the Marcus Hook gross refinery margin has declined, this factor has not impaired Sohio's ability to pass through its increased crude oil costs on a dollar-for-dollar basis. The FEA further determined that Sohio had failed to support its claim that it was incurring losses as a result of its operations at the Marcus Hook refinery. In this connection, the FEA observed that any large firm such as Sohio could narrowly define a single facet of its operation so as to present that operations in an unfavorable light. The FEA noted that the Marcus Hook facility accounts for 40 percent of Sohio's refinery capacity, and the firm's petroleum related operation have recently been producing near-record levels of profits. The FEA observed that it would be highly unlikely that Sohio could achieve these levels of profitability if in fact 40 percent of its refinery capacity was not operating on a profitable basis. Accordingly, the Sohio Appeal was denied.

Standard Oil Co. of Ohio; Cleveland, Ohio; FEA-1034; Residual Fuel Oil

The Standard Oil Company of Ohio (Sohio) filed an Appeal from a Decision and Order in which the FEA denied an Application for Exception that Sohio had filed from the provisions of 10 CFR 211.67(d)(4) (the Entitlements Program). *Coastal States Gas Corp.; Standard Oil Co. of Ohio*, 4 FEA Par. 83,139 (October 8, 1976). The appeal, if granted, would permit Sohio to earn entitlements with respect to that portion of its crude oil runs to stills which is attributable to the residual fuel oil that it sells in the East Coast market. In its Appeal, Sohio contended that the FEA failed to consider the arguments which the firm presented in its exception application. The FEA determined that contrary to the firm's claim, an analysis had been made of all of the material which Sohio presented in its Application for Exception. Since Sohio merely reiterated these arguments in its Appeal, the FEA determined that Sohio had not demonstrated that the October 8, 1976 Decision and Order was erroneous. The firm's Appeal was accordingly denied.

Tenneco Oil Co.; Houston, Tex.; FEA-1225; Freedom of Information

Tenneco Oil Company appealed from a determination that had been issued to the firm by the FEA Information Access Officer. The Appeal, if granted, would have resulted in the release of two documents which the Information Access Officer had determined to be exempt from mandatory disclosure pursuant to exemptions (b)(4) and (b)(5) of the Freedom of Information Act, 5 U.S.C. 552. In considering Tenneco's Appeal, the FEA determined that portions of one of the two documents which the Information Access Officer withheld because it contained confidential financial information should be released since the only person who could be adversely affected by the release of the information had notified the FEA that it had no objection to its release. The FEA found that the other document which had been withheld was a pre-decisional intra-agency memorandum which reflected the FEA's group thinking in formulating its policy and legal position as to the appropriate action to take with respect to the issues raised in a Notice of Probable Violation which had been issued to the firm. The FEA concluded that this document was therefore properly withheld under the Section 552(b)(5) exemption. The Tenneco Appeal was therefore denied with respect to this memorandum.

Warrior Asphalt Co. of Alabama, Inc.; Tuscaloosa, Ala.; FXA-1067; Crude Oil

Warrior Asphalt Company of Alabama, Inc. appealed from a Decision and Order which the Federal Energy Administration issued to the firm on November 5, 1976. *Beacon Oil Co., et al.*, 4 FEA Par. 87,024 (November 5, 1976). In the November 5 Decision and Order, the FEA determined that Warrior had been afforded an insufficient measure of exception relief from its obligations under the Entitlements Program in 1975 and should therefore be permitted to sell entitlements valued at $23,350 during the period November 1976 through January 1977 in order to offset those insufficient benefits. Warrior's Appeal, if granted, would result in certain adjustments to both the firm's 1975 profitability and its historical profitability, thereby increasing the level of additional exception relief granted to the firm.

In considering the Warrior Appeal, the FEA rejected the firm's contention that its historical profitability should be adjusted to reflect a more representative posture of the Warrior operation. The FEA found that Warrior had not demonstrated that it would be unable to attain a reasonable operating posture in the absence of the requested adjustment nor did Warrior's submission indicate other compelling reasons which would warrant approval of the adjustment sought by the firm. The FEA also rejected Warrior's contention that net profits realized by the firm during 1975 from the rental of fuel oil storage tanks should be excluded from the firm's financial results. The FEA held that items of income or expense which are alleged by a firm to be unrelated to its refining and marketing operations could be excluded from financial data submitted in support of an Application for Exception only when that firm makes a showing that the items are directly related to activities undertaken by an operating entity whose operations are distinct from the firm's refining and marketing operations. The FEA found that Warrior had not made that showing.

The FEA sustained Warrior's remaining contention that it should not have included the firm's operating results for the month of December 1975 in its review of the exception relief granted to the firm in 1975. After excluding Warrior's operating results for the month of December 1975, the FEA determined that Warrior's entitlement sales obligation specified in the November 5 Decision should be increased by $47,582.

REQUESTS FOR EXCEPTION

A & N Producing Services, Inc.; Jackson, Miss.; FXE-3969; crude oil

A & N Producing Services, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would result in an extension of the exception relief previously granted to A & N and would permit A & N to continue to sell a portion of the crude oil produced from the USA well No. 2 lease (USA well) at upper tier ceiling prices. *See A & N Producing Services, Inc.*, 4 FEA Par. 83,166 (October 29, 1976). In considering the exception application, the FEA found that the USA well continued to incur increased operating costs and that, in the absence of continued exception relief, the working interests would lack an incentive to produce crude oil from the property. In view of this situation and on the basis of the operating data presented for the previous six months, the FEA concluded that the working interest owners should be permitted to sell 100 percent of the crude oil produced from the well at upper tier ceiling prices.

Commonwealth Oil Refining Co., Inc.; Penuelas, Puerto Rico; FEE-3573 crude oil; naptha

The Commonwealth Oil Refining Company, Inc. (Corco) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Entitlements Program) in which it requested that the FEA issue it a sufficient number of additional entitlements so as to enable it to achieve the earnings level which it achieved prior to 1974. As an alternative Corco requested that exception relief be granted which would provide the firm with a feedstock cost advantage of $1.25 per barrel for crude oil and naphtha as compared with refiners and petrochemical manufacturers on the United States mainland. Corco further requested that the FEA issue it a sufficient number of additional entitlements so as to eliminate certain inequities which it experienced as a result of particular provisions in the Entitlements Program.

In considering the Corco exception application, the FEA rejected Corco's contention that the Government was obligated to provide Corco with a naphtha cost advantage as compared with domestic petrochemical companies on the mainland. The FEA found that no such obligation accrued from a prior commitment which the Department of Interior approved pursuant to which Corco was permitted to import naphtha into Puerto Rico.

However, the FEA did find substantial merit in Corco's contention that it is experiencing a gross inequity because of the impact on the firm of the provisions of 10 CFR 211.67(1)(4) and 10 CFR 211.67(d)(5). The FEA noted that the purpose of the 21 cent reduction in entitlement price that is specified in Section 211.67(1)(4) is to preserve incentives for refining domestic crude oil and that this objective is not served by the application of that regulatory provision to Corco. The FEA noted that Corco does not have any feasible economic alternative to importing the crude oil it uses from foreign sources. Since the Federal Government's Operation Bootstrap Program substantially contributed to Corco's decision to conduct its refining operations in a location in which it would be required to depend upon foreign crude oil as a feedstock, the FEA held that it would be incongruous for the Government to impose on Corco an effective penalty on the firm's continued reliance on crude oil imports. In regard to Section 211.67(d)(5), the FEA noted that the formula prescribed in that Section for calculating the number of entitlements to be issued to each Puerto Rican petrochemical producer with respect to its imports of naphtha is based upon the weighted average cost per barrel of naphtha imported into Puerto Rico as a petrochemical feedstock. The data furnished by Corco indicated that the imported naphtha which it uses weighs considerably more than the imported naphtha used by other Puerto Rican petrochemical producers. As a result the volumetric basis used in the formula within the Section produces a situation in which Corco's naphtha import costs significant exceed the weighted average costs of naphtha imported into Puerto Rico. On the basis of those findings, the FEA determined that Section 211.67(d)(5) as applied to Corco's situation failed to achieve the underlying regulatory objective of substantially equalizing Corco's imported naphtha costs with the domestic naphtha costs of its mainland competitors.

In addition, the FEA found that the data submitted by Corco and the Government of the Commonwealth of Puerto Rico strongly demonstrated the firm's precarious financial position and the potentially deleterious impact upon the Puerto Rican economy of a curtailment or termination of Corco's operations. While the FEA noted that Corco's financial difficulties are not primarily attributable to the application to the firm of the FEA Regulations since Corco is a substantial beneficiary of the Entitlements Program, it nevertheless concluded that the adverse, anomalous manner in which Section 211.67(1)(4) and Section 211.67(d)(5) apply to Corco certainly exacerbates the severe financial difficulties which the firm is currently experiencing. The FEA therefore granted Corco exception relief which restores to the firm the revenues which it would otherwise receive under the Entitlements Program if its particular entitlement sales were not reduced by the 21 cent figure specified in Section 211.67(1)(4). The FEA also approved exception relief which permits Corco, for purposes of applying the formula set forth in Section 211.67(d)(5)(iii), to substitute the actual naphtha import costs which it incurs for the weighted average per barrel cost of all naphtha imported into Puerto Rico for use as a petrochemical feedstock.

In its Application Corco also contended that it was experiencing a gross inequity as a result of the provisions of the Jones Act which allegedly result in its incurring significantly greater shipping costs than its competitors in the Virgin Islands and the Caribbean. 46 U.S.C. Section 883 (1970). However, the FEA found that, since the competitive disadvantage of which Corco complained is not attributable to the FEA Regulations, Corco had failed to establish that exception relief from the Entitlements Program should be granted to alleviate those problems. Corco further contended that additional exception relief should be granted in order to restore the benefits of which it had been deprived by several amendments to the overall FEA regulatory program which allegedly have reduced the value of the entitlements that are issued to Corco with respect to its crude oil runs to stills. In considering Corco's contention, the FEA observed that the firm had not presented any arguments as to why the application to it of those regulations creates a gross inequity or places a burden upon Corco which is substantially disproportionate to the burdens which other firms bear. The FEA also stated that the fact that certain regulatory amendments have diminished Corco's benefits under the Entitlements Program does not in itself furnish adequate grounds for the approval of exception relief.

Corco had also requested retroactive exception relief based on the claim that until February 1976 the Entitlements Program did not take into account the price difference between the imported crude oil that Corco refined and the domestic new or released crude oil refined by other firms. With respect to this contention, the FEA observed that the identical claim had been rejected as a ground for exception relief in a previous Decision which the FEA issued to Corco and which was controlling in this proceeding.

The FEA did find substantial merit, however, in Corco's contention that retroactive exception relief should be approved with respect to the 21 cent entitlement price adjustment and the naphtha entitlements formula. Although several months elapsed between the dates on which those regulatory provisions were adopted and the date on which Corco filed the present exception request, the FEA noted that the firm had submitted Applications for Exception before those provisions were adopted in which it described the basic circumstances upon which its present request for relief from those provisions is based. The FEA accordingly determined that substantial grounds existed for finding that Corco had not unduly delayed in seeking exception relief from those regulations. The FEA further determined that the financial and operating data presented by Corco indicated that the firm's continued existence would be in serious jeopardy despite the approval of prospective exception relief and established a sound foundation for concluding that the firm is experiencing a severe and irreparable injury. The FEA therefore ordered that the same type of prospective relief which it determined should be provided from the provisions of Section 211.67(1)(4) and Section 211.67(d)(5) be extended to Corco on a retroactive basis to the dates those regulatory provisions became effective. The FEA indicated that this measure of relief would accomplish the objective of mitigating the adverse impact on Corco of the general regulatory requirements without conferring on the firm excessive, windfall benefits.

Finally, the FEA noted that as a result of the prospective exception relief granted in the present Decision and Order with respect to Section 211.67(d)(5) Corco will not be receiving entitlement benefits for the naphtha that it imports into Puerto Rico on the basis of the average costs of all firms that import naphtha into the Island as a petrochemical feedstock. Nevertheless, under the express application of that regulatory provision, the other two firms that currently import naphtha as a petrochemical feedstock into Puerto Rico would continue to receive entitlement benefits on the basis of the average of all such naphtha imports, including those applicable to the Corco operations. Since the Corco costs significantly exceed those of the other two firms, the FEA tentatively determined that the continued use of an average figure that includes the Corco costs would produce excessive benefits for those two firms. In view of the fact that these benefits would result as a direct consequence of the exception relief approved in this proceeding, the FEA concluded that a further hearing would be held to determine whether a Supplemental Order should be issued directing that the average costs which Corco incurs for naphtha imports be excluded from the calculation of the average cost figure specified in Section 211.67(d)(5)(iii).

J & W Refining, Inc.; Tucker, Tex.; FXE-3591 crude oil

J & W Refining, Inc. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of April 1977. In considering J & W's exception request, the FEA noted that J & W's operations have been conducted under Chapter XI of the Federal Bankruptcy Act since July 1975 and, although the firm's entitlements obligation did not create its continuing financial difficulties, any entitlement purchases which the firm makes will reduce the amount of cash available to the firm to pay its outstanding debts. Since J & W is currently experiencing a deficit in its working capital balance even prior to any entitlement purchases and will continue to operate with an insufficient cash flow, the FEA determined that any entitlement purchases which the firm is required to make would be likely to extend the time necessary for the firm to return to a competitively viable status. The FEA therefore determined that J & W should be relieved of its entitlement purchase obligations during the period April 1977 through September 1977.

PETITION FOR SPECIAL REDRESS

Consumer Federation of America; Washington, D.C.; FSG-0040 middle distillates

The Consumer Federation of America (CFA) filed a Petition for Special Redress in which it requested that it be permitted to intervene in a rulemaking which it proposed be initiated to consider whether allocation and price controls should be reimposed with respect to middle distillates. The CFA also requested that the FEA Office of Private Grievances and Redress direct that financial assistance be provided to the CFA to ensure that it would be able to fully participate in the proposed rulemaking proceeding. In addition, CFA requested that the Office of Private Grievances and Redress direct that the hearing date for the proposed rulemaking be set no earlier than 30 days from the date of

notice of the hearing in order to afford the CFA and other consumer representatives an opportunity to make an adequate presentation. In considering the CFA request that the tentative hearing date be postponed the FEA concluded that the Office of Private Grievances and Redress did not have the jurisdiction to take the action which the CFA sought. The FEA therefore dismissed this portion of the CFA Petition, but referred the issue to the FEA Office of General Counsel for a prompt determination. The FEA reached a similar conclusion with respect to the CFA request that the FEA Office of Private Grievances and Redress specify that certain types of procedures be implemented at the hearing which the FEA will conduct in this matter. The FEA also referred this request to the FEA Office of General Counsel for its consideration. Finally, the FEA found that, in view of the dismissal of those portions of the CFA Petition discussed above, the request for financial assistance which CFA submitted could not be fully analyzed at the present time. The FEA therefore determined that this portion of the CFA Petition should be held in abeyance pending the formal establishment of the requested rulemaking proceeding and the response of the FEA Office of General Counsel to the CFA request for intervention in that proceeding.

REQUESTS FOR STAY

Exxon Co., U.S.A.; Houston, Tex.: FES–0091 refined petroleum products

The Exxon Company, U.S.A. filed an Application for Stay in which it requested that the FEA suspend all exception proceedings relating to the order of recovery of increased non-product costs by refiners during the period January 1, 1975 through January 31, 1976. Exxon specifically requested that those exception proceedings be stayed pending (i) the conclusion of a rulemaking proceeding pertaining to the recovery of increased non-product costs which Exxon claimed had never been completed, or (ii) a judicial determination as to whether the FEA Regulations that were in effect prior to February 1, 1976 prescribed a particular method pursuant to which refiners were permitted to recoup their increased non-product costs. Exxon based its request in large part on the contention that it would be premature to conduct the exception proceedings before the FEA concluded an outstanding rulemaking proceeding relating to the order of recovery of increased non-product costs by refiners during the period January 1, 1975 through January 31, 1976. In response to that contention, the FEA stated that there is no current rulemaking proceeding involving the recovery of increased non-product costs. Although the FEA did indicate at one point that it was aware of the problems that certain refiners could experience as a result of the regulatory requirement that increased non-product costs be recovered prior to February 1, 1976 only after all increased product costs had been passed through, the FEA stated that it had specifically decided not to attempt to resolve those possible difficulties through a rulemaking proceeding. The FEA also noted that it had encouraged refiners to file exception applications from the regulations governing the recovery of increased non-product costs prior to February 1, 1976. Consequently, the FEA rejected Exxon's contention that it would be inappropriate to conduct the exception proceedings at the present time.

In considering Exxon's further contention that the FEA had neglected to establish adequate procedures to ensure fundamental due process in the exception proceedings, the FEA enumerated the steps which it had taken to ensure due process. The FEA pointed out that it had described the general procedures that would be followed in *Apco Oil Corp., et al., supra*, and had held a hearing in which Exxon participated to discuss in greater detail the manner in which the initial proceedings would be conducted and to consider the views of the parties involved. The FEA also noted that Exxon was afforded an opportunity to file formal motions setting forth objections which it had expressed as to the scope of the proceedings and the participation of the FEA Office of Regulatory Programs in the proceedings and to have those motions considered by the Office of Exceptions and Appeals. Exxon was also being given an opportunity during the proceedings to develop the factual assertions which, if proven, would establish that it is entitled to exception relief, to file motions to strike factual assertions made by opposing parties that are unduly vague, and to introduce evidence and conduct discovery. In view of these measures, the FEA concluded that it did not appear that any denial of due process had occurred. In considering the Application for Stay, the FEA also rejected Exxon's assertion that the presence of the Office of Regulatory Programs as a party to the exception proceedings casts doubt upon the integrity of the proceedings. The FEA emphasized that the participation by the Office of Regulatory Programs would not be the type of participation in which a party adopts a view at the outset as to the ultimate disposition that it believes should be reached and then directs its conduct toward achieving that disposition. Instead, the participation of the Office of Regulatory Programs would consist of making independent analyses of factual data and would be useful in producing a full administrative record. After evaluating the arguments advanced by Exxon, the FEA concluded that Exxon's contention that the exception proceedings should be stayed was unpersuasive. The Exxon Application for Stay was accordingly denied.

Texas American Oil Corp.: Midland, Tex.: FES–0092 crude oil

On January 18, 1977, the Texas American Oil Corporation (TAO) filed an Appeal from a Decision and Order which the Federal Energy Administration issued to the firm on December 16, 1976. United Refining Co.; Texas American Oil Corp., 4 FEA Par. 83,262 (December 16, 1976). The TAO Appeal related to those portions of the December 16 Decision which specified the manner in which the provisions of the Entitlements Program (10 CFR 211.67) should apply to a refinery which TAO acquired from United Refining Company. On January 18, 1977, the FEA issued a Decision and Order to TAO which stayed certain provisions of the December 16 Order. Texas American Oil Corp., 5 FEA Par. 85,017 (January 18, 1977). On April 5, 1977, the FEA issued a Decision and Order to TAO denying the Appeal which the firm had filed. In addition, the April 5 Order vacated the stay which had previously been granted. Texas American Oil Corp., 5 FEA Par. ____ (April 5, 1977). On April 13, 1977 TAO filed with the FEA a request for a hearing in connection with the firm's Appeal from the December 16, 1976 Decision and Order. According to the TAO submission, the firm had requested a hearing during the course of the Appeal proceding, but such a hearing was never convened. After reviewing the record in the previous proceedings, the FEA determined that a hearing should be granted. In view of that determination, the FEA further determined that it would be appropriate to stay the provisions of the April 5 Decision and Order. Accordingly, the April 5, 1977 Order was stayed pending further order of the FEA.

The following Application for Temporary Stay was denied on the grounds that the applicant had failed to make a compelling showing that temporary stay relief was necessary to prevent an irreparable injury:

Braden-Zenith, Inc.; Wichita, Kans.; FST–0040

SUMMARY DENIAL

The following Application for Modification or Rescission was summarily denied on the grounds that the firm made no showing that it was incurring significantly changed circumstances:

The Refinery Corp.; Washington, D.C.; FMR–0099

DISMISSALS

The following submissions were dismissed for failure to correct deficiencies in the firm's filing as required by the FEA Procedural Regulations:

Betty Gardner; Quincy, Ill. FXA–1215
Paul H. Williams; Plainville, Kans.; FEE–3932

The following submission was dismissed on the grounds that the request for exception relief was premature:

Southland Oil Co.; Washington, D.C.; FEE–3448

The following submission was dismissed on the grounds that it consists only of a restatement of an argument which is presently under consideration in another proceeding:

Beacon Oil Co.; Washington, D.C.; FES–0086

The following submission was dismissed on the grounds that alternative regulatory procedures existed under which relief might be obtained:

Small's LP Gas Co.; Wyatt, Mo.; FXE–3737

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.s.t., except Federal holidays. They are also available in Energy Management: Federal Energy Guidelines, a commercially published loose leaf reporter system.

Dated: May 20, 1977.

ERIC J. FYGI,
Acting General Counsel.

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact re the Minnesota Energy Conservation Plan

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of Minnesota, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321 et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for Minnesota are available upon request from the FEA Office of Communications and Public Affairs, Room 2134, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plan are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessment to Executive Communications, Box MX, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Minnesota Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m., e.d.s. t., June 6, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., May 23, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact re the California and Massachusetts Energy Conservation Plans

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the States of California and Massachusetts, of their State Energy Conservation Plans. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for either of these plans.

Single copies of the environmental assessments of the State Plans for California and Massachusetts are available upon request from the FEA Office of Communications and Public Affairs, Room 2134, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessments will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plans are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessments to Executive Communications, Box MU, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—(Name of State) Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by June 6, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., May 23, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

INDUSTRY SUPPLY ADVISORY GROUP TO INTERNATIONAL ENERGY AGENCY

Meeting Regarding Voluntary Agreement and Plan of Action to Implement International Energy Program

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (Pub. L. 94–163), notice is hereby provided of a meeting of the Industry Supply Advisory Group (ISAG) of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) to be held at the offices of Gulf Oil Corporation, 439 Seventh Avenue, Pittsburgh, Pennsylvania on June 1 and 2, 1977 beginning at 9:30 a.m. on June 1, 1977. The agenda is as follows:

1. Opening Remarks.
2. Administrative Matters.
A. ISAG Organization.—Position Descriptions; Group Responsibilities; Company, Country, and Regional Assignment.
B. Emergency Management Organization.—Facilities and Staffing; Work Profile.
C. Adequacy of U.S. Government Clearance for Future Activities of U.S. ISAG Members.
3. Report on April 19–20 Subcommittee A Meeting.
A. Proposed ISAG Formats.
B. Status Report.—Data Transmission, Data Processing; Data Bank; Computer Applications.
4. Discussion of Future Tests.
A. Data and Communications Test.
B. Allocation Systems Test.—Scope; ISAG Participation; Contact With NESO's and Companies; Data Base.
5. ISAG Reference Handbook.
6. Handling of Costs of ISAG Meetings.
7. Closing Remarks/Future Meetings.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public. Unanticipated circumstances have required the notice period as contained in § 209.32(b) of FEA regulations to be shortened.

Issued in Washington, D.C., May 25, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

[FR Doc.77–15301 Filed 5–25–77;10:52 am]

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

PROCUREMENT POLICY ADVISORY COMMITTEE

Meeting

MAY 20, 1977.

In accordance with provisions of Pub. L. 92–463 (Federal Advisory Committee Act) the Procurement Policy Advisory Committee will hold its next meeting from 9:00 a.m. to 5:00 p.m., Tuesday, June 14, 1977, in Room 2010, New Executive Office Building, 726 Jackson Place, NW., Washington, D.C. This meeting will be open to the public. The purpose

of the meeting is to discuss those subjects included on the following agenda:

9:00–9:10 Call to Order—Review of Minutes of Meeting of March 24, 1977
9:10–10:00 Status Review of Current Projects
(a) Excessive Reporting Requirements
(b) Contract Funding Problems
(c) Cost Sharing
(d) Patent Policy Development
10:00–10:15 Break
10:15–11:30 How ERDA Looks upon the Proposed Energy Reorganization and the President's Message. ERDA's Role and Mission.
11:30–12:45 Lunch
12:45–1:45 ERDA Procurement Practices—Implementing Problems at the Working Level
1:45–2:45 ERDA Proposed Organizational Conflict of Interest Policy
2:45–3:00 Break
3:00–4:00 Grants versus Contracts—ERDA Implementation of OMB A–110
4:00–5:00 Agenda Items for Next Meeting
5:00 Adjournment

Practical considerations may dictate unannounced alterations in the agenda or schedule.

Mr. Stephen W. Rowen, Chairman of the Committee, will preside.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof post-marked no later than June 6, 1977, to the Director of Procurement, Room C–167, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Comments shall be directly relevant to the above agenda items. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on June 10, 1977, to Mr. Harry Tayloe, Division of Procurement, on 301–353–5526 between 8:30 a.m. and 5:00 p.m., e.s.t.

(c) Questions at the meeting may be propounded only by members of the committee and ERDA officials assigned to participate with the committee in its deliberations.

(d) Seating will be made available to the public on a first-come, first-served basis.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Copies of minutes will be made available for copying, following their certification by the chairman, in accordance with the Federal Advisory Committee Act, at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue, NW., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY L. PEEBLES,
Deputy Advisory Committee Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–180121; FRL 734–6]

IDAHO DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Benomyl To Control Foot Rot on Winter Wheat

The Environmental Protection Agency (EPA) has granted a specific exemption to the Idaho State Department of Agriculture (hereafter referred to as the "Applicant") to use a maximum of 10,000 pounds active ingredient benomyl in aerial ground applications to control *Cercosporella* foot rot of winter wheat in 6 counties in northern Idaho. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M Street, SW., Room E–315, Washington, D.C. 20460.

According to the Applicant, approximately 420,000 acres of wheat will be grown in the counties of Benewah, Clearwater, Kootenai, Latah, Lewis and Nez Perce in northern Idaho during the year of 1977. Only early-planted wheat (approximately 15,000–20,000 acres) not previously planted to legumes would likely require treatment with benomyl. *Cercosporella* foot rot infects much of the wheat crop when the wheat is seeded early and the winters are mild; the environmental conditions during the fall and winter of 1976–1977 appear to be highly favorable for the development of this disease. The Administrator, EPA, granted specific exemptions for use of benomyl to control *Cercosporella* foot rot on wheat on about 515,000 acres in the States of Idaho, Oregon, and Washington last year. Again this year, the Administrator granted specific exemptions for this use of benomyl in January and February, 1977, to Oregon and Washington, respectively.

No registered pesticide or alternative methods of control are available to suppress this pathogen. Resistant varieties of wheat are not available for the area involved; later seeding, which reduces losses, is not economically practical.

The Applicant proposed to use Benlate (benomyl) fungicide (Methyl 1-(butylcarbamoyl)-2-benzimidazolecarbamate), EPA Reg. No. 352–354. The benomyl will be applied at a rate of one-half (0.5) pound active ingredient in 5–10 gallons of water per acre and in 20–30 gallons of water per acre by air and ground, respectively. One application will be made before May 15, 1977. All applications will be made by State-licensed commercial applicators.

The Fish and Wildlife Service, U.S. Department of the Interior, has advised EPA that no serious adverse effects on fish and wildlife resources are anticipated from the application as described. Without the application of benomyl, the Applicant estimated the potential crop loss due to this outbreak at 20 to 25 percent of the yield from infested fields. EPA calculated that the value of the fields is approximately $75,000.

Formal tolerances for benomyl residues on wheat grain and green forage have not been established. However, the EPA has determined that the application of this fungicide to winter wheat at these application rates will result in residue levels of less than 0.2 ppm (parts per million) in or on the harvested wheat grain, which would not constitute a hazard to the public health. Based on evaluation of existing data, EPA has determined that a residue level on wheat straw not exceeding 15 ppm would be adequate to protect the public health. Green forage will not be used as a feed item. Meat, milk, poultry, and egg tolerances are already established for residues of benomyl resulting from the feed use of various raw agricultural commodities and processed feed commodities. It has been concluded that secondary benomyl residues transferring to meat, milk, poultry, or eggs as a result of feed use of the treated wheat grain and straw would be adequately covered by the existing tolerances.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of *Cercosporella* foot rot disease has occurred; (b) there is no pesticide presently registered and available for use to control this pest in northern Idaho; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic, environmental or health problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until May 15, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. Wheat acreage to be treated is limited to 20,000 acres in the six counties listed at the beginning of this notice;

2. One (1) pound of Benlate (0.5 pound active ingredient benomyl) per acre will be applied by ground (in 20–30 gallons of water) or air (in 5–10 gallons of water);

3. A maximum of 10,000 pounds A. I. benomyl will be applied;

4. A single application will be made;

5. Application will be made by licensed commercial applicators, licensed and tested by the Applicant;

6. A residue level not to exceed 0.2 ppm in or on harvested wheat grain and 15 ppm in or on wheat straw has been determined to be adequate to protect the public health. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

7. Green forage will not be used as a feed item;

8. If benomyl is applied by aircraft, all precautions will be taken to avoid or minimize drift;

9. A final report will be submitted listing the counties and acreage for applications, benefits realized from this use of benomyl, and any losses due to phytotoxicity; and

10. All applicable directions, restrictions, and precautions on the EPA-registered label are to be followed.

STATUTORY AUTHORITY: Sec. 18, Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*).

Dated: May 17, 1977.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[OPP–180119; FRL 734–5]

MINNESOTA DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Benomyl To Control Blackleg on Cabbage Seeds

The Environmental Protection Agency (EPA) has granted a specific exemption to the Minnesota Department of Agriculture (hereafter referred to as the "Applicant") to use benomyl on commercial cabbage seeds to control blackleg, which is caused by the fungal pathogen *Phoma lingam*. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Room E–315, Washington, D.C. 20460.

According to the Applicant, *Phoma lingam*, the cause of blackleg in crucifers, is present in much of the crucifer seeds produced for resale. This organism reduces germination and results in poor stands, both in home gardens and in commercial production for canning purposes. Treatment was requested for up to thirty-three (33,000) pounds of cabbage seed obtained from fields that were infested with *P. lingam*, dependent upon determination of the presence of the organism. In 1976, the State of Washington was issued a specific exemption by EPA for the use of benomyl to treat up to one million pounds of blackleg-infested cabbage and other crucifer seeds (see FEDERAL REGISTER of January 27, 1977, p. 5123). The Applicant stated that most of the seed now present in Minnesota originated in Washington State.

P. lingam is frequently present on seed, but epidemic outbreaks are dependent on weather in seed growing, transplant and production growing areas. The organism may remain viable on infected debris for up to four years, and may be introduced into new fields by seed transmission; disease control requires treatment of both stock seed used for seed production as well as treatment of commercial seed lots.

The Applicant proposed to use benomyl (Benlate 50 percent Wettable Powder, EPA Reg. No. 352–354) applied at the rate of eight (8) ounces of the product, four (4) ounces active ingredient, in sufficient water to treat one hundred pounds of seed. A single application will be made to each seed lot. Seed treatment will be made by seed companies or seed contractors with seed-treating personnel. There are currently no alternative registered pesticides nor practical control methods available to treat fungal infestation on cruciferous seed. The Applicant stated that these cabbage seeds, valued at $660,000, would be unacceptable to commercial cabbage growers unless they were treated with benomyl to eradicate *P. lingam*.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak has or is about to occur; (b) there is no pesticide presently registered and available for use to control blackleg on cruciferous seed in Minnesota; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the pest is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until June 30, 1977, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. A benomyl product, Benlate 50 percent Wettable Powder (EPA Reg. No. 352–354), will be used;

2. Benomyl will be applied at the rate of eight (8) ounces of the product, four (4) ounces active ingredient, in sufficient water to treat one hundred pounds of seed;

3. Each seed lot will receive no more than a single application of benomyl;

4. A maximum of thirty-three thousand (33,000) pounds of cabbage seed, intended for commercial planting will be treated;

5. Treated seed will not be used for food, feed, or any other use except planting;

6. EPA has determined that residues of benomyl resulting from this use are not likely to exceed 0.20 ppm in cabbage, which will not pose a hazard to the public health. The Food and Drug Administration of the U.S. Department of Health, Education, and Welfare has been advised of this action;

7. The Applicant is responsible for ensuring that the restrictions pursuant to this specific exemption are met;

8. All packages containing benomyl-treated seed will be clearly labeled as such; and

9. All applications will be made by seed-treating personnel of the seed companies or seed contractors.

STATUTORY AUTHORITY: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*).

Dated: May 17, 1977.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

NATIONAL LIME ASSOCIATION

Open Meeting

Notice is hereby given that a meeting between the Emission Standards and Engineering Division, Office of Air Quality Planning and Standards of the Environmental Protection Agency (EPA) and the Air Quality Committee of the National Lime Association will be held at 1:00 p.m. on June 16, 1977, at the auditorium of the EPA Office of Administration Annex (Beaunit Building), Alexander Drive, Research Triangle Park, North Carolina.

This meeting is being held at the request of the National Lime Association to allow them to present their comments on the standards of performance for lime manufacturing plants which were proposed in the FEDERAL REGISTER on May 3, 1977 (42 FR 22506). The standards were proposed under the authority of section 111 of the Clean Air Act and would limit emissions of particulate matter from new, modified, and reconstructed facilities at lime manufacturing plants.

This meeting is open to the public. Anyone wishing to attend or submit a presentation should contact Mr. Don R. Goodwin, Director, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 688–8146, extension 271.

Dated: May 18, 1977.

EDWARD F. TUERK,
Assistant Administrator for Air and Waste Management.

[OPP-180120; FRL 737-4]

STATE OF MONTANA

Issuance of a Specific Exemption To Use Strychnine To Control Rabid Skunks

The Environmental Protection Agency (EPA) has granted a specific exemption to the State of Montana (hereafter referred to as the "Applicant") to use strychnine-treated lard and eggs to reduce rabid skunk populations and thereby reduce the probability of exposure of man and domestic animals to rabies in twenty-three (23) counties of eastern Montana. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., S.W., Room E-315, Washington, D.C. 20460.

The section 18 regulations provide that the Administrator may grant an emergency exemption to a Federal or State agency when the following conditions exist:

(a) A pest outbreak has or is about to occur and no pesticide registered for the particular use, or alternative method of control, is available to eradicate or control the pest, (b) significant economic or health problems will occur without the use of the pesticide, and (c) the time available from discovery or prediction of the pest outbreak is insufficient for a pesticide to be registered for the particular use.

(40 CFR 166.1.)

The exemption is also subject to the provisions of 40 CFR Part 164, specifically, Subpart D, published in the FEDERAL REGISTER on March 18, 1975 (40 FR 12261). In cases such as the one presented by this Applicant, if the request is for the use of a pesticide which has been finally cancelled or suspended, then the application constitutes a petition for reconsideration of such cancellation or suspension order. On March 9, 1972, Administrator Ruckelshaus cancelled and suspended the registration of strychnine, sodium cyanide, and 1080 (sodium fluoroacetate) for predator control. However, the Administrator's order banned the use of these pesticides for predator control without distinguishing between rabid and non-rabid predators, the former a human health problem and the latter an economic problem. Therefore, the exemption cannot be granted without the requirement of a prior public hearing, unless certain conditions are found to exist.

Subpart D of the section 3 regulations provides that in emergency circumstances the Administrator may rule on the application without convening a formal hearing and without making a finding as to the question of substantial new evidence when he determines:

(1) That the application presents a situation involving need to use the pesticide to prevent an unacceptable risk: (i) to human health, or (ii) to fish or wildlife populations when such use would not pose a human health hazard; and

(2) That there is no other feasible solution to such risk, and

(3) That the time available to avert the risk to human health or fish and wildlife is insufficient to permit convening a hearing as required by section 164.131; and

(4) That the public interest requires the granting of the requested use as soon as possible.

(40 CFR 164.133.)

It should also be noted that a rebuttable presumption exists against registration of rodenticide products containing strychnine which are registered for outdoor, above-ground use (see FEDERAL REGISTER of December 1, 1976, p. 52810); however, no decision has yet been made by EPA as to appropriate regulatory action in this matter.

Since 1973, the Applicant has found it necessary to employ annually strychnine baits in an effort to reduce the exposure of man and domestic animals to rabid skunks. The latest exemption issued to the Applicant for the above purpose expired on November 16, 1976; the original specific exemption authorized only the use of strychnine-treated lard baits, but was amended to include the use of strychnine-treated eggs. The Applicant has again found it necessary to apply for a specific exemption in 1977. Two additional counties have been added to the request, as compared to last year's request. The affected counties are: Big Horn, Blaine, Carter, Chouteau, Custer, Daniels, Dawson, Fallon, Fergus, Garfield, Hill, Judith Basin, Liberty, Phillips, Powder River, Prairie, Richland, Roosevelt, Rosebud, Sheridan, Valley, Wibaux, and Yellowstone.

The program calls for the use of (1) a maximum of 500 strychnine-treated paraffin lard baits to be placed within a five-mile radius per positive rabies case where skunks are determined as the vector species, or (2) a maximum of 500 strychnine-treated eggs to be placed within a five-mile radius per positive rabies case where skunks are determined as the vector species. A maximum of two strychnine lard baits or two strychnine-treated eggs per setting may be placed in the following skunk habitats: skunk dens, holes, garbage dumps, road culverts, junk piles, and under unoccupied buildings. At the end of a 30-day treatment period, treated bait and/or eggs will be collected and destroyed. Strychnine-treated lard baits or eggs will be placed only on those lands where premise entry agreements are signed by the landowner, lessee, or administrator, and warning signs will be posted at entries to all premises and other visible positions near locations where treated baits or eggs have been placed.

All retrieved or excess baits and eggs will be disposed of in an approved sanitary landfill. The Applicant will observe and supervise the destruction of treated baits/eggs. Containers to be destroyed will be handled in a similar manner. Animals destroyed in the control program will be buried to prevent possible secondary poisonings. Every animal killed by baits/eggs or other methods (shooting, trapping) will be submitted to laboratories for fluorescent antibody analysis for the rabies virus. Specimens which were shot in the head or have deteriorated from excessive heat are excluded from analysis. State personnel will check all bait stations at least once a week and more often, every four days. Property owners or residents are not permitted to approach the bait stations.

In light of the above and pursuant to the controlling regulations, the Administrator, EPA, determined that: (a) A pest outbreak of rabid skunks had occurred; (b) There was no pesticide presently registered for use in suppressing populations of rabid skunks in Montana; (c) The application presented a situation involving a need to use the pesticide as requested to prevent an unacceptable risk to human health; (d) There was no other feasible solution to such human health risk; (e) The time available to avert the risk to human health was not sufficient to convene a hearing; and (f) The public interest required the granting of the requested use as soon as possible. Accordingly, the Applicant was granted a specific exemption to use strychnine baits in twenty-three counties in eastern Montana. The specific exemption is also subject to the following conditions:

1. The areas to be treated are presently limited to a circle with a five (5) mile radius around a confirmed rabid skunk found within a two (2) mile radius of areas of human habitation in Blaine, Carter, and Powder River Counties;

2. When the Applicant receives a report of a skunk, cat, or raccoon which is behaving abnormally and located within two (2) miles of an area of human habitation, personnel may place a maximum of one hundred (100) strychnine-treated baits within a five (5) mile radius of the area of human habitation, pursuant to taking specimens of skunks to determine whether rabid skunks are present in the area. If no rabid skunks are found, the unconsumed strychnine baits will be retrieved. If one or more rabid skunks are found, a maximum of four hundred (400) additional baits may be placed in areas of skunk habitation within the five (5) mile radius circle around the location of the rabid skunk;

3. The Applicant, upon receipt of notification of issuance of this specific exemption, shall send an appropriate map of the State showing the location of currently active skunk rabies cases. Subsequently, the Applicant shall send a short telegram to the Registration Division, Office of Pesticide Programs, EPA, at any time that (1) one hundred or less strychnine baits are distributed to determine the presence of rabid skunks and (2) four hundred additional baits are distributed to suppress skunk populations in which the presence of rabies has been confirmed, giving adequate location data to permit the location of the bait treatment areas on the map. There are twenty-three counties where strychnine baits may be applied following establishment of the presence of rabid skunks near areas of human habitation;

4. Exposure of any bait station within a five (5) mile radius circle (to survey for presence of rabid or suppress rabid skunk populations) may not exceed thirty (30) days;

5. Each strychnine lard bait will contain approximately 0.012 grams of actual strychnine alkaloid. Each strychnine egg bait will contain approximately 0.035 grams of actual strychnine alkaloid;

6. The Applicant's personnel are responsible for preparing the strychnine baits, selecting bait stations, posting warning signs, securing premise entry agreements, checking bait stations periodically for kills, and retrieving all unconsumed baits at the termination of the control program;

7. A maximum of two strychnine lard or egg baits per setting will be placed in the following skunk habitats: skunk dens, holes, garbage dumps, road culverts, junk piles, and unoccupied buildings;

8. Strychnine-treated lard or egg baits will be placed only on those lands where premise entry agreements have been signed by the landowner, lessee, or administrator;

9. Warning signs will be posted at entries to all premises and other visible positions near locations where treated baits have been placed;

10. Each bait station will be checked as often as possible for kills, but, in any case, no less than once a week;

11. All retrieved or excess strychnine baits will be disposed of by burial at least 18 inches deep in an approved sanitary landfill. Containers to be destroyed will be handled in a similar manner;

12. Animals poisoned in the control program will be submitted for laboratory analysis for presence of rabies virus if possible. Otherwise, they will be buried on the premises to prevent possible secondary non-target species poisonings;

13. The Applicant must follow any more stringent requirements imposed by State law or regulation or applied by the State pesticide regulatory authority; and

14. The specific exemption expires on March 31, 1978.

Statutory authority: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

Dated: May 19, 1977.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

SCIENCE ADVISORY BOARD ENVIRONMENTAL HEALTH ADVISORY COMMITTEE STUDY GROUP ON MUTAGENICITY TESTING

Open Meeting

Notice is hereby given that a meeting of the Study Group on Mutagenicity Testing of the Science Advisory Board's Environmental Health Advisory Committee will be held at 9:00 a.m. on June 15, 1977, in Conference Room A (Room 1112), Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia.

The purpose of the meeting will be to continue the discussion of Agency approaches to the evaluation of test data relating to mutagenicity in the context of section 3, Registration of Pesticides, of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

The meeting will be open to the public. Any member of the public wishing to attend or submit a paper should contact the Secretariat, Science Advisory Board (A-101), U.S. Environmental Protection Agency, Washington, D.C. 20460, by c.o.b. June 10, 1977. Please call Ms. Barbara Robinson on (703) 557-7720.

Dated May 19, 1977.

LLOYD T. TAYLOR,
Acting Staff Director, Science Advisory Board.

WASHINGTON

Extension of Contingent Approval of State Plan for Certification of Pesticide Applicators

In accordance with the provisions of section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (86 Stat. 973; 7 U.S.C. 136 et seq.) and 40 CFR Part 171 (39 FR 36445 (October 9, 1974) and 40 FR 11698 (March 12, 1975)), the Honorable Daniel J. Evans, Governor of the State of Washington, submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingent basis, pending promulgation of implementing regulations. On January 7, 1976, the Regional Administrator, EPA Region, X, approved the plan on a contingent basis for a fifteen month period. Notice of the approval was published in the FEDERAL REGISTER on February 18, 1976 (41 FR 7449). Legal authority for the program is contained in the Washington Pesticide Control Act, Washington Pesticide Application Act, and Washington Regulations.

On April 7, 1977, the State of Washington requested an extension of the Washington contingent approval pending promulgation of the regulations as described in the State Plan. The Agency finds that there is good cause for approving the request, and has granted an extension until September 1, 1977.

Dated: May 16, 1977.

DONALD P. DUBOIS,
Regional Administrator, U.S. Environmental Protection Agency, Region X.

[FR Doc.77-14949 Filed 5-25-77;8:45 am]

[FRL 733-2 PP7G1883/T105]

N-CHLOROACETYL-N-(2,6-DIETHYLPHENYL)GLYCINE ETHYL ESTER

Establishment of Temporary Tolerances

Hercules, Inc., Wilmington, DE 19899, has submitted a pesticide petition (PP 7G1883) to the Environmental Protection Agency (EPA). This petition requests that temporary tolerances be established for combined residues of the herbicide *N*-chloroacetyl-*N*-(2,6-diethylphenyl) glycine ethyl ester and its major metabolites *N*-chloroacetyl-*N*-(2,6-diethylphenyl) glycine ethyl ester glutathione conjugate and *N*-chloroacetyl-*N*-(2,6-diethylphenyl) glycine ethyl ester cysteine conjugate in or on the raw agricultural commodities soybeans and soybean forage at 0.2 part per million (ppm) and sugar beet roots and tops at 0.05 ppm.

Establishment of these temporary tolerances will permit the marketing of the above raw agricultural commodities when treted in accordance with an experimental use permit that is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material has shown that the requested tolerances are adequate to cover residues resulting from the proposed experimental use, and it has been determined that the temporary tolerances will protect the public health. The temporary tolerances are established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Hercules, Inc., must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire April 11, 1978. Residues not in excess of 0.2 ppm remaining in or on soybeans and soybean forage and 0.05 ppm in or on sugar beet roots and tops after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Libby Zink, Registration Division (WH-567), Office of Pesticide Programs, Room 315,

East Tower, 401 M St., SW, Washington DC 20460 (202/755-4851).

Dated: May 13, 1977.

(Sec. 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j).)

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FR Doc 77-14955 Filed 5-25-77;8:45 am]

[FRL 732-8; PP 4G1469/T107]

PROCYAZINE

Renewal of Temporary Tolerances

On May 12, 1976, the Environmental Protection Agency (EPA) announced (41 FR 19376) a renewal of temporary tolerances for residues of the herbicide procyazine (2-[[4-chloro-6-(cyclopropylamino) - 1,3,5 - triazin - 2 - yl]amino]-2-methylpropanenitrile) in or on the raw agricultural commodities fresh corn, including sweet corn (kernels plus cob with husk removed), corn grain, and corn fodder and forage (except sweet corn fodder and forage) at 0.1 part per million (ppm). These tolerances were established (39 FR 39906) in response to a pesticide petition (PP 4G1469) submitted by Ciba-Geigy Corp., Agricultural Div., PO Box 11422, Greensboro NC 27409. This renewal expired April 30, 1977.

Ciba-Geigy Corp. has requested a three-month renewal of these temporary tolerances both to permit continued testing to obtain additional data and to permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of an experimental use permit that has been renewed under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

The scientific data reported and all other relevant material have been evaluated, and it has been determined that renewal of the temporary tolerances will protect the public health. Therefore, the temporary tolerances are renewed on condition that the pesticide is used in accordance with the experimental use permit with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.

2. Ciba-Geigy Corp. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire July 30, 1977. Residues not in excess of 0.1 ppm remaining in or on fresh corn including sweet corn (kernels plus cob with husk removed) and corn grain, fodder, and forage (except sweet corn fodder and forage) after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicate such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to Ms. Libby Zink, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M St., SW, Washington DC 20460 (202/755-4851).

(Sec. 408(j), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j).))

Dated: May 13, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

[FR Doc.77-14954 Filed 5-25-77;8:45 am]

[FRL 735-4; PP 6G1863/T104]

ESTABLISHMENT OF TEMPORARY TOLERANCES

Ethyl 3-methyl-4-(methylthio)phenyl (1-methylethyl) phosphoramidate

Mobay Chemical Corp., Chemagro Agricultural Div., PO Box 4913, Kansas City MO 64120, has submitted a pesticide petition (PP 6G1863) to the Environmental Protection Agency (EPA). This petition requests that temporary tolerances be established for combined residues of the nematocide ethyl 3-methyl-4-(methylthio) phenyl (1-methylethyl) phosphoramidate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodities apples, cherries, and peaches at 0.2 par per million (ppm).

Establishment of these temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with experimental use permits that are being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) *et seq.*):

An evaluation of the scientific data reported and other relevant material has shown that the requested tolerances are adequate to cover residues resulting from the proposed experimental uses, and it has been determined that the temporary tolerances will protect the public health. The temporary tolerances are established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permits.

2. Mobay Chemical Corp. must immediately notify the EPA of any findings from the experimental uses that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire April 11, 1978. Residues not in excess of 0.2 ppm remaining in or on apples, cherries, and peaches after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permits and temporary tolerances. These temporary tolerances may be revoked if the experimental use permits are revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health.

Specific inquiries concerning this notice should be directed to Mr. Don Stubbs, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St. SW, Washington, DC 20460, or by telephone at 202/755-4851.

(Section 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j).))

Dated: May 18, 1977.

PESTICIDE PROGRAMS

Receipt of Applications to Register Pesticide Products Containing New Active Ingredients

Applications have been submitted to the Environmental Protection Agency (EPA) to register pesticide products containing active ingredients which have not been included in any previously registered pesticide products. Applications were made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the regulations thereunder (40 CFR 162). Notice of receipt of these applications is made in accordance with the provisions of Sections 3(c)(4) of FIFRA [40 CFR 162.6(b)(6)] and does not indicate a decision by the Agency on the applications.

Any Federal agency or other interested persons are invited to submit written comments on any applications referred to in this notice to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M St. SW., Washington, DC 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting them. The comments must be received by June 27, 1977, and should bear a notation indicating the EPA File Symbol number of the application to which the comments pertain. Comments received within the specified time period will be considered before a final decision is made with respect to the pending applications. Comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Notice of approval or denial of the applications to register pesticide products listed will be announced in the FEDERAL REGISTER. The labels furnished by each applicant as well as all written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: May 18, 1977.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

APPLICATIONS RECEIVED

EPA File Symbol 40219-R. The International Nickel Co., Inc., One New York Plaza, New York, NY 10004. NOVAMET 632. Active Ingredients: *Copper (cuprous) sulfide* 93%. Application proposes that this product be classified for general use in the manufacture of antifouling paints. PM24.

EPA File Symbol 876-EAR. Velsicol Chemical Corp., 341 East Ohio St., Chicago, IL 60611. RAVAGE 75WP. Active Ingredients: *Buthidazole* 75.0%. Application proposes that this product be classified for general use as a non-crop herbicide. PM24.

[FRL 735-6; OPP-30000/12A]

REBUTTABLE PRESUMPTION AGAINST REGISTRATION AND CONTINUED REGISTRATION OF CERTAIN PESTICIDE PRODUCTS CONTAINING AMITRAZ

Extension of Period for Submission of Rebuttal Evidence and Comments

On March 30, 1977, the Environmental Protection Agency (EPA) issued a notice of presumption against registration and continued registration of pesticide products containing the ingredient Amitraz [N-[[(2,4-dimethylphenyl)iminolmethyl] - N - methylmethanimidamide]. This notice was published in the FEDERAL REGISTER on April 6, 1977 (42 FR 18299). The regulations governing rebuttable presumptions provide that the applicant or registrant of such pesticide products shall have forty-five (45) days from the date such notice is sent to submit evidence in rebuttal of the presumption. However, for good cause shown, an additional sixty (60) days may be granted in which such evidence may be submitted [40 CFR 162.11(a)(1)(i)].

A request for an additional 60 days in which to present evidence to the Agency has been received from Upjohn Co. Upjohn has a registration application pending with the Agency for an Amitraz product, and has a registration for a manufacturing use only product containing Amitraz. The Upjohn application and registration were the only application and registration affected by the notice of presumption.[1] Upjohn has specified a need for additional time to retrieve, review, and consolidate available data to adequately respond to the issues raised in the notice of presumption.

The Agency agrees that additional time would be beneficial to ensure the submission of a complete and accurate response to the notice of presumption. Therefore, because good cause has been shown, Upjohn and other interested persons shall have until July 18, 1977, to submit rebuttal evidence and other comments or information. Such evidence, comments, or other information relevant to the presumption against registration and continued registration should be submitted to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Room 401, East Tower, 401 M St. SW., Washington, DC 20460. Three copies of the comments should be submitted to facilitate the efforts of the Agency and of others interested in them. All comments should bear the identifying "OPP-30000/12A." Comments and information received on or before July 18, 1977, shall be considered before it is determined whether a notice shall be issued in accordance with 40 CFR 162.11(a)(5)(ii) and 7 U.S.C. 136(a)(c)(6) or 7 U.S.C. 136(d)(b)(i). Comments received after July 18, 1977, shall be considered only to the extent feasible consistent with the time limits imposed by 40 CFR 162.11(a)(5)(ii). All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section at the above address from 8:30 a.m. to 4 p.m. on normal business days. The file supporting the Agency's presumption against this pesticide is available for public inspection in the Office of Special Pesticide Review, Rm. 447, East Tower, during the same time period.

Dated: May 17, 1977.

JAMES W. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FRL 735-5; OPP-33000/505]

RECEIPT OF APPLICATION FOR PESTICIDE REGISTRATION

Data To Be Considered in Support of Applications

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its interim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ["Interim Policy Statement"]. On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product—Consideration of Data by the Administrator in Support of an Application" [41 FR 3339]. This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the recent amendments to FIFRA on November 28, 1975 [Pub. L. 94-140], and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 [40 CFR Part 162].

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, S.W., Washington DC 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Washington DC 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, & 13—202/755-9315
PM 21 & 22—202/426-2454
PM 24—202/755-2196

[1] EPA Registration No. 1053-58, Amitraz and EPA File Symbol 1053-LO. BAAM EC.

PM 31—202/426-2635
PM 33—202/755-9041
PM 15, 16, & 17—202/426-9425
PM 23—202/755-1397
PM 25—202/755-2632
PM 32—202/426-9486
PM 34—202/426-9490

The Interim Policy Statement requires that claims for compensation be filed by July 25, 1977. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquiries and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made by June 27, 1977.

Dated: May 18, 1977.

DOUGLAS D. CAMP,
Acting Director,
Registration Division.

APPLICATIONS RECEIVED (OPP-33000/505)

EPA Reg. No. 275-18, Agricultural & Veterinary, Products Div., Abbott Laboratories, North Chicago IL 60064. DIPEL WORM KILLER. Active Ingredients: Bacillus thuringiensis, Berliner 16,000 International Units of Potency per mg. (726 billion International Units per pound). Method of Support: Application proceeds under 2(a) of interim policy. Republished: Added uses with data. PM17.

EPA Reg. No. 464-402. Dow Chemical, PO Box 1706, Midland MI 48640. DOWPON M GRASS KILLER. Active Ingredients: Sodium salt of dalapon 72.5%; Magnesium salt of dalapon 12.0%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added uses. PM25.

EPA Reg. No. 616-75. Merck & Co., Inc., PO Box 2000, Rahway NJ 07065. MERTECT 340-F. Active Ingredients: 2-(4-thiazolyl) benzimidazole 42.8%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Significant new use pattern. PM21.

EPA Reg. No. 901-37. Airosol Co., Inc., PO Box 240, Neodesha KS 66757. 6840-753-4963 INSECT REPELLENT TYPE 11A. Active Ingredients: N,N - Diethylmetatoluamide 71.25%; Other Diethyl Toluamides 3.75%. Method of Support: Application proceeds under 2(a) of interim policy. PM17.

EPA Reg. No. 1239-60. Industrial Chemical Laboratories, Inc., 1015 N. 14 St., Omaha NB 68102. D/S/D II READY TO USE. Active Ingredients: n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides 0.082%; n-Alkyl (50% C12, 30% C14, 17% C16, 3% C18) dimethyl ethylbenzyl ammonium chlorides 0.082%; Trisodium phosphate 0.027%. Method of Support: Application proceeds under 2(b) of interim policy. PM31.

EPA File Symbol 1769-EIE. National Chemsearch, Div. of USA Chem, Inc., 2727 Chemsearch Blvd., Irving TX 75062. NATIONAL CHEMSEARCH PATHFINDER INSECTICIDE. Active Ingredients: Chlorpyrifos [0,0-diethyl 0 - (3,5,6-trichloro-2-pyridil) phosphorothioate] 6.6%. Method of Support: Application proceeds under 2(b) of interim policy. PM12.

EPA File Symbol 2724-ETU. Zoecon Industries, Inc. 12200 Denton Dr., Dallas TX 75234. GOLDEN MALRIN RF-128 FLY KILLER. Active Ingredients: Methomyl (s-methyl N-[methylcarbamoyl]oxy) thioacetimidate 1.000%; (Z)-9-Tricosene 0.025%. Method of Support: Application proceeds under 2(b) of interim policy. PM12.

EPA Reg. No. 3125-163. Chemagro Agricultural Div., Mobay Chemical Corp., PO Box 4913, Kansas City MO 64120. DASANIT SPRAY CONCENTRATE INSECTICIDE-NEMATICIDE. Active Ingredients: O,O-Diethyl O-[4-(methylsulfinyl) phenyl] phosphorothioate 63%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM15.

EPA Reg. No. 3125-164. Chemagro Agricultural Div. DASANIT 10% GRANULAR INSECTICIDE-NEMATICIDE. Active Ingredients: O,O-Diethyl O-[4-(methylsulfinyl) phenyl] phosphorothioate 10%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM15.

EPA Reg. No. 3125-213. Chemagro Agricultural Div. DASANIT 15% GRANULAR INSECTICIDE-NEMATICIDE. Active Ingredients: O,O-Diethyl O-[4-methylsulfinyl) phenyl] phosphorothioate 15%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM15.

EPA File Symbol 3125-GRN. Chemagro Agricultural Div. DASANIT 8 EMULSIFIABLE INSECTICIDE-NEMATICIDE. Active Ingredients: O,O-Diethyl O-[4-(methylsulfinyl) phenyl] phosphorothioate 80%. Method of Support: Application proceeds under 2(b) of interim policy. Republished: Added use. PM15.

EPA File Symbol 3125-GRU. Chemagro Agricultural Div. SENCOR 4 FLOWABLE HERBICIDE. Active Ingredients: 4-Amino-6-(1,1-dimethylethyl)-3-(methylthio) - 1,2,4-triazin-5(4*H*)-one 41%. Method of Support: Application proceeds under 2(b) of interim policy. PM25.

EPA File Symbol 3286-EI. Ferd Staffel Co., 331 Burnet St., San Antonio TX 78298. STAFFEL'S BIO ECOLOGICAL COMPATIBLE SPRAY. Active Ingredients: Bacillus thuringiensis, Berliner 0.68%. Method of Support: Application proceeds under 2(c) of interim policy. PM17.

EPA File Symbol 3837-UU. Lubar Co., 1708 Campbell, Kansas City MO 64108. MINOR. Active Ingredients: Poly (oxyethylene) (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride) 1.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34.

EPA File Symbol 3837-UL. Lubar Co. MAJOR. Active Ingredients: Poly(oxyethylene dimethyliminio) ethylene (dimethyliminio) ethylene dichloride) 10.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM34.

EPA Reg. No. 5204-11. M & T Chemicals, Inc., PO Box 1104, Rahway NJ 07065. BIOMET 611 DISINFECTANT. Active Ingredients: Diisobutylphenoxyethoxyethyl dimethyl benzyl ammonium chloride monohydrate 39.35%; Isopropanol 14.85%; Tri-n-butyltin benzoate 5.30%. Method of Support: Application proceeds under 2(a) of interim policy. PM33.

EPA File Symbol 5204-AN. M & T Chemicals, Inc. BIOMET ANTIFOULING PAINT. Active Ingredients: Triphenyltin Fluoride 15.0%. Method of Support: Application proceeds under 2(b) of interim policy. PM24.

STATE-FEDERAL WATER PROGRAMS ADVISORY COMMITTEE

Renewal

Pursuant to section 7(a) of the Office of Management and Budget Circular No. A-63, Transmittal Memorandum No. 1, dated July 19, 1974, it is hereby determined that renewal of the State-Federal Water Programs Advisory Committee is in the public interest in connection with the performance of duties imposed on the Agency by law. The charter which continues the State-Federal Water Programs Advisory Committee through June 27, 1979, unless otherwise sooner terminated, will be filed at the Library of Congress.

DOUGLAS M. COSTLE,
Administrator.

MAY 19, 1977.

FEDERAL COMMUNICATIONS COMMISSION

[TIAS-2594]

CANADA-U.S.A. TELEVISION AGREEMENT OF 1952

Amendment of Table A

Supplement No. 2

(To the table of Canadian television

(To the table of Canadian television channel assignments and allocations within 250 miles of the Canada-U.S.A. border, dated May 10, 1977, as revised to April 12, 1977.)

Pursuant to exchange of correspondence between the Department of Communications of Canada and the Federal Communications Commission, Table A of the Canada-U.S.A. Television Agreement has been amended as set forth in the attached list. It is to be noted that those representing assignments will indicate call signs plus parameters.

The allocation below has been deleted from Table A.

Location	*Channel No.*
Sept Iles, Quebec	11-

The assignment below has been deleted however the allocation for this location will remain in Table A.

Location and call letters	*Channel No.*
Haliburton, Ontario, CKVR-TV-	
3	5

Further additions, changes, and deletions will be issued as reported to the Commission by the Canadian Department of Communications.

Copies of the basic Table of Allocations may be obtained from Downtown Copy Center, 1730 K Street NW., Washington, D.C. 20036, telephone 202-452-1422.

WALLACE E. JOHNSON,
Chief, Broadcast Bureau,
Federal Communications Commission.

FEDERAL POWER COMMISSION

[Docket No. CI61-323, et al.]

UNION OIL CO. OF CALIFORNIA

Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates[1]

MAY 13, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before June 10, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

FEDERAL POWER COMMISSION

[Docket No. RI77-67]

BILL J. GRAHAM

Petition for Special Relief

MAY 19, 1977.

Take notice that on May 2, 1977, Bill J. Graham (Petitioner), P.O. Box 5321, Midland, Texas 79701, filed in Docket No. RI77-67 a petition for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Petitioner seeks to collect a rate of $7.66 per Mcf for the sale of natural gas to The Permian Corporation, which resells the gas to El Paso Natural Gas Company, from the University 12 No. 1 Well and the University 1 No. 1 Well located in Crockett County, Texas. Petitioner states that in order to recover the remaining reserves of approximately 121,000 Mcf from these properties, it will be necessary to install pumping equipment on one well and periodically swab the other well. Petitioner further states that it will also be necessary to install a gas compressor, separator, water tank, and an electrical power system to run the compressor and pumping unit.

Any person desiring to be heard or to make any protest with reference to said petition should on or before June 10, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance wth the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-14975 Filed 5-25-77;8:45 am]

[Docket No. RP74-100 (PGA77-5 and PGA77-5a)]

NATIONAL FUEL GAS SUPPLY CORP.

Order Accepting PGA Rate Filing

MAY 18, 1977.

On April 19, 1977, National Fuel Gas Supply Corporation (National Fuel) tendered for filing proposed tariff sheets[1] containing: an increase of 0.50 cents per Mcf or $856,002 annually in rates under National Fuel's purchase gas cost adjustment (PGA) provision to track pipeline supplier rate increases; and a special surcharge of 2.36 cents per Mcf proposed to be charged over an eleven month period from May 1, 1977 through March 31, 1978, to recover additional gas costs of $4,169,868 incurred through purchases of 1,686,504 Mcf in emergency supplies during February and March 1977. National Fuel also tendered an alternate sheet[2] which would track its suppliers' rate increases without an additional emergency purchase surcharge. An effective date of May 1, 1977, is requested. For the reasons stated below, the Commission will accept for filing the proposed rate increase including the emergency surcharge, and permit it to become effective on May 1, 1977.

Public notice of the filing was issued on May 4, 1977. It provides for protests or petitions to intervene to be filed on or before May 19, 1977. None has been filed at this time.

This filing replaces an earlier filing on April 1, 1977 which contained a tracking increase of 0.51 cents per Mcf, and a surcharge of 13.31 cents per Mcf then proposed to be collected over five months. National Fuel states that the replacement filing accepted herein was submitted to track a subsequent rate adjustment by Consolidated Gas Supply Corporation and to provide for an extended and more equitable surcharge collection period of eleven months.

National Fuel's special surcharge reflects costs incurred in four emergency transactions. Three of these have been authorized by previous Commission orders: a sixty-day purchase from Paragon Resources Inc. the subject of an order issued February 8, 1977, in Docket No. CP77-38; the importation by Trans Canada Pipelines, Ltd., of supplies from Gaz Metropolitan, approved by order issued February 20, 1977, in Docket No. CP77-232; and importation of additional volumes from Trans Canada made available by the exchange exportation of electric energy by Niagara Mohawk Power Company, as authorized by orders issued February 5, 1977, and March 7, 1977, in Docket No. CP77-188. These three purchases also required transportation services by Tennessee Gas Pipeline Company. The fourth transaction involved the borrowing of volumes from Pacific Lighting Service Company under arrangements similar to those approved by the Administrator of the Emergency Natural Gas Act of 1977.

In this particular docket, due to the unusual circumstances, the Commission will permit National Fuel to recover through its PGA provision the costs of these transactions which were prudently incurred but are not limited to the simple purchase prices. Given National Fuel's additional supply requirements during the unprecedented emergency conditions that prevailed this past winter, these unusual arrangements appeared necessary and the majority were approved by the Commission. The costs to be recovered are clearly and directly associated with the receipt of the emergency volumes by National Fuel. These abnormal and non-recurring transactions could not have been affectuated without incurrence of these costs, such as the charges paid to Tennessee for special transportation services.

National Fuel also requests waiver of the terms of its PGA provision and of the Commission's notice requirements to permit this filing to become effective on May 1, 1977. Its tariff, §§ 17.3 and 17.5 of the General Terms and Conditions, provides for semi-annual adjustments on April 1st and October 1st to recover deferred purchased gas costs and for thirty days notice of filing. National Fuel states that immediate recovery of its significant emergency expenditures is necessary to prevent irreparable harm and severe cash flow problems. Again, in light of the unusual circumstances here, the appropriate waivers will be granted in this case. However, the Commission expects that in Docket No. RP77-57, the most recent general rate filing by National Fuel, the Staff will investigate carefully the possibility that any increases in sales resulting from these emergency transactions may have resulted in excess earnings.

Having reviewed National Fuel's filing, the Commission finds that the proposed PGA rate increase and surcharge are just and reasonable and are not unduly discriminatory or otherwise unlawful. Therefore, Twelfth Revised Sheet No. 4 will be accepted for filing and made effective as of May 1, 1977.

The Commission finds: It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act, and good cause has been shown, to accept for filing and make effective as of May 1, 1977, National Fuel's proposed PGA rate increase and surcharge tendered on April 19, 1977, and to grant, as appropriate, waiver of the terms of National Fuel's tariff and of the Commission's regulations, as hereafter ordered.

The Commission orders. (A) Twelfth Revised Sheet No. 4 to Original Volume No. 1 of National Fuel's FPC Gas Tariff, as tendered by National Fuel on April 19, 1977, in these dockets, is hereby accepted for filing and made effective as of May 1, 1977.

(B) Waiver of the terms of National Fuel's FPC Gas Tariff, particularly §§ 17.3 and 17.5 thereof, and of the requirements of the Commission's Regulations is hereby granted to the extent necessary to carry out the provisions of ordering paragraph (A) above.

(C) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14976 Filed 5-25-77;8:45 am]

[1] Twelfth Revised Sheet No. 4 to Original Volume No. 1 of National Fuel's FPC Gas Tariff.

[2] Alternate Twelfth Revised Sheet No. 4 to Original Volume No. 1 of National Fuel's FPC Gas Tariff.

[Docket No. CS71-636]

OCCIDENTAL PETROLEUM CORP. AND PERMIAN CORP.

Petition for Declaratory Order

MAY 19, 1977.

Take notice that on February 28, 1977, Occidental Petroleum Corporation (Occidental) pursuant to § 1.7 (a) and (c) of the Federal Power Commission's rules of practice and procedure filed a petition for declaratory order. The petition states that Occidental and Permian Corporation (Permian) are affiliated producers within the meaning of § 157.40(a)(2) insofar as Permian has been a wholly owned subsidiary of Occidental since 1966. Permian sells casinghead gas from its Todd Ranch Plant in Crockett County, Texas, to El Paso Natural Gas Company (El Paso) as successor in interest to Continental Oil Company by order issued January 7, 1970, in Docket No. CI61-1653. Occidental filed an application for a small producer certificate in Docket No. CS71-636 on May 3, 1971. However, the application on its face did not purport to include Permian. A small producer certificate was issued to Occidental in Docket No. CS71-629 on November 17, 1971. Aggregate jurisdictional sales of Occidental and Permian did not exceed the statutory limit in 1971, the year in which the small producer certificate was granted to Occidental. Occidental and Permian request issuance of an amended small producer certificate which would include the Permian Todd Ranch Plant sales prospectively with the Commission order.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 15 days for the filing of protests and petitions to intervene. Therefore, any person desiring to be heard or to make any protest with reference to said application should on or before May 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-14973 Filed 5-25-77;8:45 am]

[Docket No. ER77-236]

PUBLIC SERVICE CO. OF OKLAHOMA

Contract

MAY 19, 1977.

Take notice that the Public Service Company of Oklahoma (Okie) on May 5, 1977, tendered for filing a Contract (New Contract) with the City of Pawhuska (City). Okie states that the New Contract will run concurrently with the existing Contract (Old Contract) entered into on February 13, 1968 (FPC Rate Schedule No. 176), until September 1, 1978, when said Old Contract terminates by its own terms. Okie indicates that with the completion of new 138 kv facilities on September 1, 1977, all service delivered to the City will be delivered at the new point of connection, however, the rate charged for the quantity of power sold under the Old Contract will be as provided therein, and the quantity of power delivered in excess of the Old Contract will be sold under the terms of the New Contract.

According to Okie, the increase in the City's demand for power necessitated the new connection to the higher (138 kv) transmission system and the New Contract.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before May 27, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14971 Filed 5-25-77;8:45 am]

[Docket No. ER77-371]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE

Filing of Agreement

MAY 18, 1977.

Take notice that the Public Service Company of New Hampshire (PSNH) on May 10, 1977, tendered for filing as an initial rate schedule a Transmission Contract with Boston Edison Company (the Buyer).

PSNH indicates that under the Contract, PSNH transmitted through its system an entitlement of power which the Buyer will be purchasing from Vermont Electric Power Company, Inc.

PSNH requests that the Commission waive the normal 30-day notice requirement and permit the rate schedule to be effective as of 11:59 p.m. on March 31, 1977.

According to PSNH, a copy of the filing was served upon the Buyer.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before June 1, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14969 Filed 5-25-77;8:45 am]

[Docket No. RP77-95]

TEXAS EASTERN TRANSMISSION CORP.

Proposed Changes in FPC Gas Tariff

MAY 18, 1977.

Take notice that Texas Eastern Transmission Corporation on May 6, 1977, tendered for filing proposed changes in its FPC Gas Tariff, Fourth Revised Volume No. 1, the following sheet:

Revised Second Substitute Thirtieth Revised Sheet No. 14.

On May 4, 1977, Texas Eastern filed Rate Schedule ISS as a part of its FPC Gas Tariff, pursuant to the Commission's directive in its order dated April 21, 1977, in Docket No. CP77-313, and requested an effective date of April 16, 1977, for such rate schedule. Section 10 of Rate Schedule ISS provides for Texas Eastern to revise its rates under ISS coincident with changes in Consolidated Gas Supply Corporation's (Consolidated) Rate Schedule GSS. The above tariff sheet is being issued to reflect the flow through of Consolidated's change in GSS rates effective May 1, 1977, in Consolidated's general rate increase Docket No. RP77-7.

The proposed effective date of the above tariff sheet as May 1, 1977 to coincide with the effective date of the change in Consolidated's GSS rates.

Copies of the filing were served upon Texas Eastern's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-382]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

MAY 19, 1977.

Take notice that on May 16, 1977, Transcontinental Gas Pipe Line Corporation (Applicant), Post Office Box 1396, Houston, Texas 77001, filed in Docket No. CP77-382 an application pursuant to section 7 of the Natural Gas Act, as amended, and the rules and regulations of the Federal Power Commission, for a certificate of public convenience and necessity authorizing Applicant to construct and operate pipeline facilities in the Brazos Area, South Addition, offshore Texas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct and operate approximately 4.06 miles of 20-inch pipeline and appurtenant metering and regulating facilities to connect natural gas production facilities in Brazos Block A-133 to an existing pipeline system in Brazos Block A-105. Applicant states that it will purchase Block A-133 gas production pursuant to advance payments to and/or gas purchase contracts with producers in such block.

The total estimated cost of the proposed facilities is $3,750,000 to be financed initially through short-term loans and available cash.

Applicant states that construction of the proposed facilities is scheduled to commence August 1, 1977.

Any person desiring to be heard or to make any protest with reference to said application, on or before June 10, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14974 Filed 5-25-77;8:45 am]

[Docket No. CP77-375]

UNITED GAS PIPE LINE CO.

Application

MAY 19, 1977.

Take notice that on May 12, 1977, United Gas Pipe Line Company (Applicant), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP77-375 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing an additional delivery point for the delivery of up to 240 Mcf of natural gas per day to Entex, Inc.'s (Entex) Youngsville system, and the installation of a new tap on Applicant's Erath Arnaudville 26-inch line in Lafayette Parish, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that it is presently delivering natural gas to Entex for its various distribution systems in South Louisiana including the City of Youngsville, Louisiana, pursuant to a service agreement dated November 17, 1971 between United Gas, Inc., the predecessor in interest of Entex, and Applicant.

Applicant states that Entex is having capacity problems on the northern part of its Youngsville system and by virtue of a letter agreement dated March 3, 1977, between Entex and Applicant, Applicant proposes to provide Entex with an additional delivery point for Youngsville at approximately Mile Post 18.47 on Applicant's Erath-Arnaudville 36-inch line in Lafayette Parish, Louisiana, and shift 240 Mcf of gas per day from Youngsville's allocation to this new delivery point.

Applicant states that the proposed new delivery point is to be known as Youngsville City Gate No. 2 (City Gate No. 2), and would require Applicant to install, at Entex's expense, a new tap at an estimated cost of $1,678.00. It is stated that no increased deliveries by Applicant would be made.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14972 Filed 5-25-77;8:45 am]

[Docket No. ER77-345]

VERMONT ELECTRIC POWER COMPANY, INC.

Filing of Purchase Agreement

MAY 19, 1977.

Take notice that on May 2, 1977, the Vermont Electric Power Company, Inc. (Velco), tendered for filing the following Rate Schedule:

Purchase Agreement for the sale of thirty-two thousand kilowatts (32,000 KW) and related energy from the Vermont Yankee Nuclear Generating Unit in Vernon, Vermont to the Boston Edison Company (Boston Edison) by the Vermont Electric Company, Inc., dated as of February 25, 1977.

Velco states that service under this Agreement began at 11:59 p.m. on March 31, 1977, and will terminate at 12 midnight on October 31, 1977. Velco indicates that the amount of power to be sold under the Contract is estimated to be sixteen million KwHrs per month, with estimated monthly revenues of $300,000. Velco states that the charges paid to it will be credited to those Vermont utilities which have released portions of their Vermont Yankee purchases from Velco in proportion to the amount of capacity and energy released by them to Velco for this sale, and that therefore there will be no change in the overall rate of return of Velco.

Velco requests a waiver of § 35.3 of the Commission's rules and regulations to allow an effective date of April 1, 1977, citing extended Contract negotiations with Boston Edison.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (1.8 and 1.10). All such petitions or protests should be filed on or before May 25, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-14970 Filed 5-25-77;8:45 am]

[Docket No. RP77-54]

ARKANSAS LOUISIANA GAS CO.

Revised Tariff Sheet

MAY 23, 1977.

Take notice that on April 29, 1977, Arkansas Louisiana Gas Company (Arkla) tendered for filing "Revised Sheet No. 185 issued on May 1, 1977" to its Rate Schedule No. X-26, FPC Gas Tariff Original Volume No. 3, which Arkla states represents the rates as filed in the captioned docket adjusted to reflect its currently effective purchased gas cost of 52.29 cents per Mcf at 14.73 psia and surcharge rate of 11.49 cents per Mcf at 14.65 psia.

Arkla requests the above described tariff sheet be substituted for the "Revised Sheet No. 185 issued on April 15, 1977" in its Notice of Rate Change filed on April 15, 1977 in Docket No. RP77-54 proposed to be effective June 1, 1977.

Arkla also states that copies of its filing were mailed to the jurisdictional customer affected and other interested parties.

Any person desiring to be heard or to protest said filing should file a Petition to Intervene or Protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before May 27, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Revised Report Proposal

On November 11, 1976, the Regulatory Reports Review Staff, GAO, received and accepted a request for clearance of a proposed report intended for use in collecting information from the public. (See 44 U.S.C. 3512 (c) and (d).) GAO published a notice in the FEDERAL REGISTER on November 18, 1976, at 41 FR 50869, announcing that FEA form P124–M–1, entitled Domestic Crude Oil Purchasers Report, had been received and accepted.

On December 21, 1976, we suspended clearance of the proposed FEA form so that FEA would have sufficient time to respond to comments received on this form and GAO could review FEA's response. On December 29, 1976, GAO received an expanded supporting statement which was published in the FEDERAL REGISTER on January 5, 1977, at 42 FR 1072. GAO published this expanded supporting statement in the FEDERAL REGISTER in order to solicit further comments on the form. On the basis of comments received pursuant to the first and second FEDERAL REGISTER notices, FEA has substantially revised the form.

GAO is now requesting written comments from all interested persons, organizations, public interest groups, and affected businesses on the changes to the FEA P124–M–1 which are discussed below. For comments to be considered they must be received on or before June 13, 1977. Comments (in triplicate) must be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information and copies of the revised form and instructions may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff 202–275–3532.

FEDERAL ENERGY ADMINISTRATION

In response to a summary of comments received by GAO the FEA has prepared the following written response.

1. *Financial information.* The issue of burden has been of concern to FEA; thus, 2 schedules have been made annual submissions and one schedule has been eliminated. As to the "why the information is needed" FEA refers to Justification statement published in the FEDERAL REGISTER, January 5, 1977, by the GAO.

2. *Changes to accounting systems.* The instructions for filing the domestic crude oil purchasers reporting period state very plainly that each firm must use its historical method of accounting consistently applied. In addition, the requirements for inventory valuation, runs to stills valuation, and refinery runs has been eliminated.

3. *Need for a correction period.* The normal accounting practice is to estimate volumes each month and to pay producers and bill purchasers based on those estimates; then, in the future when the run tickets or other documents are available, the price is adjusted in that period (not previous periods nor are previous period accounting records changed). Thus, a need for a correction period is not necessary as FEA is tracking financial transactions, not the phyical movement of crude oil.

4. *Relationship of Schedules C and E.* Schedule C has been eliminated.

5. *Computer tapes.* The submission of computer tapes is merely an option available to the reporting firms if they wish, and not a requirement.

6. *Longer lead time.* The FEA has had the policy of allowing on-a case by case basis additional time for respondents to file initial reports. This policy will be in effect for the domestic crude oil purchaser's reporting system.

7. *Stripper well information.* A targeting system would not be effective with ⅔ of the potential target firms deleted from the name and address systems.

8. *Period of time during which information can be used.* The compliance effort for crude oil has up to 7 years to audit a firm, so the requested information has a long potential use time.

9. *Information gathered by State regulatory agencies.* There are vast and radical differences among what various state regulatory agencies require from firms doing business within the state. No state that FEA knows of collects information compatible with that required for national price controls.

In addition, FEA provided the following list of changes which were made to the FEA–P124–M–1 in order to address issues raised during the GAO clearance review process and to reduce compliance burden:

Items eliminated: 1. Inventory valuation; 2. inventory volume reports; 3. runs to still information; 4. any requirement to use other than historical accounting practices; 5. schedule C, summary of state purchases; 6. monthly updates to the name and address file; 7. monthly submissions of other than first purchases.

Modifications: 1. Schedule D made an annual submission based upon a firm's accounting records; 2. schedule F made an annual submission and updated annually.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

NATIONAL ADVISORY COUNCIL ON SERVICES AND FACILITIES FOR THE DEVELOPMENTALLY DISABLED

Notice of Meeting

The National Advisory Council on Services and Facilities for the Developmentally Disabled was established by Section 133(a)(1) of Public Law 91–517, which was signed October 30, 1970, to advise the Secretary with respect to any regulations promulgated or proposed to be promulgated by him in the implementation of the Act and study and evaluate programs authorized by the Act with a view to determining their effectiveness in carrying out the purposes for which they were established.

Notice is hereby given, pursuant to Pub. L. 92–463, that the National Advisory Council on Services and Facilities for the Developmentally Disabled will hold a meeting on June 13, 14, and 15, 1977. The meeting will be held in Room 425–A, South Portal Building, Department of Health, Education, and Welfare, 200 Independence Avenue SW., Washington, D.C., from 9 a.m. to 5 p.m.

Agenda: Consideration and Adoption of Revised Work Plan; Developmental Disabilities Definition Study; Discussion of Guidelines for Developmental Disabilities State Plans; Consultation on National Significance Grants, Special Studies, and Advocacy; and Discussion on the Annual Report to Congress.

This meeting is open for public observation.

Further information on the Council may be obtained from Mr. Francis X. Lynch, Executive Secretary, National Advisory Council on Services and Facilities for the Developmentally Disabled, Room 3070, Mary Switzer Building, 330 C Street SW., Washington, D.C. 20201, telephone 202–245–0335.

FRANCIS X. LYNCH,
Executive Director.

MAY 19, 1977.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Oregon 04759]

OREGON

Order Providing for Opening of Public Lands

MAY 20, 1977.

1. Pursuant to the Act of June 14, 1926 (44 Stat. 741), as amended and supplemented (43 U.S.C. 869 et seq.), the following lands have been voluntarily reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 15 S., R. 12 E.,
Sec. 22, SE¼NE¼.
T. 18 S., R. 12 E.,
Sec. 11, SW¼SW¼.

The areas described aggregate 80 acres in Deschutes County.

2. The subject lands consist of two 40-acre parcels, one located approximately five miles southeast of the City of Bend, and the other approximately six miles west of the City of Redmond. Elevation averages 3,500 feet above sea level, and the topography varies from generally flat to moderately sloping. Vegetation consists primarily of sagebrush and native grasses. In the past, the lands have been used for solid waste disposal purposes, and they will be managed, together with adjoining national resource lands, for multiple use management.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands described in paragraph 1 hereof are hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10:00 a.m. June 27, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[FR Doc.77–14984 Filed 5–25–77;8:45 am]

[OR 7311]

OREGON

Order Providing for Opening of Public Lands

MAY 20, 1977.

1. In an exchange of lands made under the provisions of the Act of July 31, 1939, 53 Stat. 1144, the following lands have been reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 14 S., R. 6 W.,
Sec. 31, lot 4.
T. 14 S., R. 7 W.,
Sec. 36, N½NE¼, SW¼NE¼, E½NW¼, and NW¼SE¼.

The areas described aggregate 280.11 acres in Benton County and are administered under the policy of sustained-yield forest management which governs the administration of the revested Oregon and California Railroad lands.

2. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of law applicable to revested Oregon and California Railroad lands, the lands described in paragraph 1 hereof are hereby open to operation of the public land laws, including the mining law (Ch. 2, Title 30 U.S.C.), and the mineral leasing laws. All valid applications received at or prior to 10:00 a.m. June 27, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[OR 9648 (Wash.)]

WASHINGTON

Order Providing for Opening of Public Land

MAY 20, 1977.

1. In an exchange of lands made under the provisions of section 8 of the Act of June 28, 1934, 48 Stat. 1269, 1272, as amended and supplemented, 43 U.S.C. 315g (1964), the following land has been reconveyed to the United States:

WILLAMETTE MERIDIAN

T. 11N., R. 32 E.,
Sec. 31, lots 3 and 4 and E½SW¼.

The area described contains 153.34 acres in Franklin County.

2. The subject land is located in the area known as the Juniper Forest approximately 13 miles northeast of the city of Pasco. Elevation ranges from 800 to 850 feet above sea level, and the topography is generally rolling and undulating. Vegetation consists primarily of native grasses and some western juniper. In the past, the land has been used for livestock grazing purposes. The land also has outdoor recreational values, and it will be managed, together with adjoining national resource lands, for multiple use.

3. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the land described in paragraph 1 hereof is hereby open to operation of the public land laws, including the mining laws (Ch. 2, Title 30 U.S.C.) and the mineral leasing laws. All valid applications received at or prior to 10:00 a.m. June 27, 1977, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. Inquiries concerning the land should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, P.O. Box 2965, Portland, Oregon 97208.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[NM 30554, 30556, and 30559]

NEW MEXICO

Applications

MAY 18, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for four 4½-inch natural gas pipe-

line rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 18 S., R. 31 E.,
Sec. 20, N½SE¼;
Sec. 21, N½S½;
Sec. 22, N½S½;
Sec. 23, N½S½;
Sec. 24, N½S½.
T. 17 S., R. 32 E.,
Sec. 15, S½SE¼;
Sec. 27, S½SW¼ and SW¼SE¼;
Sec. 28, S½S½;
Sec. 29, S½S½;
Sec. 30, SE¼SW¼ and S½SE¼.
T. 18 S., R. 32 E.,
Sec. 19, lot 3, NE¼SW¼ and S½SE¼;
Sec. 20, N½S½;
Sec. 21, NW¼SW¼.

These pipelines will convey natural gas across 10.256 miles of national resource lands in Eddy and Lea Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.77-15022 Filed 5-25-77;8:45 am]

[NM 30565]

NEW MEXICO

Application

MAY, 19, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for two 4½-inch natural gas pipeline rights-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 21 S., R. 33 E.,
Sec. 12, N½SW¼, SE¼SW¼, and S½SE¼;
Sec. 13, E½E½;
Sec. 24, E½E½E½;
Sec. 25, E½E½E½;
Sec. 36, E½NE¼ and E½NE¼SE¼.

These pipelines will convey natural gas across 4.508 miles of national resource land in Lea County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

FRED E. PADILLA,
Chief, Branch of Lands and Minerals Operations.

[OR 10970]

OREGON

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

MAY 17, 1977.

The Department of Agriculture on behalf of the Forest Service, on June 7 1973, filed application, Serial No. OR 10970, for the withdrawal of the following described lands from location and entry under the mining laws (30 U.S.C., Ch. 2), but not from leasing under the mineral leasing laws, subject to valid existing rights:

WILLIAMETTE MERIDIAN

DESCHUTES NATIONAL FOREST

Sparks-Devils Lakes Recreation Area

T. 18 S., R. 8 E.,

A tract of land in the following subdivisions excepting a strip previously withdrawn for the Cascade Lakes Road Zone by PLO 2751 of August 13, 1962 (27 FR 8277):

Sec. 4, S½SE¼;
Sec. 9, NE¼;
Sec. 10, NW¼ and SE¼;
Sec. 11, NE¼, N½NW¼, SW¼NW¼, NW¼SW¼, S½S½, and NE¼SE¼;
Sec. 12, SW¼SW¼;
Sec. 14;
Sec. 15, E½;
Sec. 22, NE¼NE¼;
Sec. 23, W½.

The area described contains approximately 2,330 acres in Deschutes County.

The applicant desires that the lands be reserved for the Sparks-Devils Lakes Recreation Area.

A notice of the proposed withdrawal was published as FR Doc. 74-11064 which appeared in the May 14, 1974 issue of the FEDERAL REGISTER (Vol. 39, No. 94) at page 17241.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, at the address shown below, on or before June 27, 1977. Upon determination by the State Director that a public hearing will be held, a notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B.

All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before June 27, 1977.

The above described lands are temporarily segregated from location and entry under the mining laws only, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204 (g) of the Federal Land Policy and Management Act of 1976 the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

LELAND D. MORRISON,
Acting Chief, Branch of Lands and Minerals Operations.

[NM 30657 and 30658]

NEW MEXICO

Applications

MAY 18, 1977.

Notice is hereby given that, pursuant to section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), Transwestern Pipeline Company has applied for one 4-inch and one 6-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 16 S., R. 25 E.,
Sec. 22, SW¼SW¼ and W½SE¼;
Sec. 27 NW¼NW¼.
T. 24 S., R. 26 E.,
Sec. 9, NE¼SW¼.

These pipelines will convey natural gas across 0.747 of a mile of national resource lands in Eddy County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 1397, Roswell, New Mexico 88201.

MARINE MAMMAL COMMISSION

MARINE MAMMAL COMMISSION AND COMMITTEE OF SCIENTIFIC ADVISORS ON MARINE MAMMALS

Notice of Meeting

Notice is hereby given that the Marine Mammal Commission and the Committee of Scientific Advisors on Marine Mammals will meet on July 28-30, 1977, in Seattle, Washington. Notice of the specific location, time, and agenda items of the meeting will be published in the near future.

The purpose of this notice is to invite the suggestions of interested persons concerning issues and subjects to be considered at the meeting. Suggestions should be submitted, in writing, to the Marine Mammal Commission, 1625 Eye Street NW., Washington, D.C. 20006, by June 27, 1977.

JOHN R. TWISS, Jr.,
Executive Director, Marine Mammal Commission.

MAY 19, 1977.

[FR Doc.77-15025 Filed 5-25-77;8:45 am]

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

MEETING

MAY 24, 1977.

Pursuant to Sec. 10(a)(2) of the Federal Advisory Committee Act, 5, U.S.C. App I (Supp V, 1975), notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a meeting Monday and Tuesday, June 13-14, 1977. These sessions will be open to the public and will be held in Room 5802 of the U.S. Department of Commerce Building, 14th Street between Constitution Avenue and E Street, N.W., Washington, D.C., beginning at 9:00 a.m. on both days.

The Committee, consisting of 25 non-Federal members appointed by the President from State and local governments, industry, science and other appropriate areas, was established by Congress by Public Law 92-125, on August 16, 1971, as amended. Its duties are to (1) undertake a continuing review of national ocean policy, coastal zone management and the progress of the marine and atmospheric science and service programs of the United States, (2) submit a comprehensive annual report to the President and to the Congress setting forth an overall assessment of the status of the Nation's marine and atmospheric activities on or before 30 June of each year, and (3) advise the Secretary of Commerce with respect to the carrying out of the purpose of the National Oceanic and Atmospheric Administration.

The agenda will include the following topics:

JUNE 13, 1977

0900—Opening remarks.
0915—Review of material for NACOA sixth annual report.
1700—Adjournment.

JUNE 14, 1977

0900—Opening remarks.
0915—Review of material for NACOA sixth annual report (continued).
Adjournment at approximately 1330.

The public is welcome at these sessions and will be admitted to the extent of the seating available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, Department of Commerce Building, Room 5225, Washington, D.C. 20230. The telephone number is 377-3343.

DOUGLAS L. BROOKS,
Executive Director.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (77-39)]

NASA RESEARCH AND TECHNOLOGY ADVISORY COUNCIL COMMITTEE ON SPACE PROPULSION & POWER

Meeting

The NASA Research and Technology Advisory Council Committee on Space Propulsion and Power will meet June 14 and 15, 1977, at NASA Headquarters, 600 Independence Ave., Washington, D.C. The meeting will be held in Room 625. The meeting is open to the public on a first-come, first-served basis, limited by the seating capacity of the meeting room which holds 25 persons. All visitors must sign in prior to attending the meeting.

The NASA Research and Technology Advisory Council Committee on Space Propulsion and Power serves in an advisory capacity only. This Committee provides technical advice on program goals, trends, scope and technical balance in relevant areas of space propulsion and power. It reviews, integrates, assesses and balances technical inputs in all areas of Committee interest and responsibility and reports its recommendations to the Research and Technology Advisory Council. There are 17 members on this Committee. The following list sets forth the approved agenda and schedule for the June 14 and 15, 1977, meeting of the Committee on Space Propulsion and Power. For further information, please contact Mr. James Lazar, Area Code 202, 755-3280 at NASA Headquarters, Washington, D.C. 20546.

JUNE 14, 1977

Time	*Topic*
8:30 a.m.	Opening Remarks (Purpose: To welcome members, report status of Committee actions, and discuss agenda.)
9:00 a.m.	Reports on Power Processing, Extended Performance Solar Electric Propulsion vs. Solar Sail, Research Presentation Proposal, and Research and Technology Assessment (Purpose: To report to Committee members on the NASA power processing program, the status of the extended performance solar electric propulsion and solar sail technology programs, a proposal for a research presentation, and the NASA in-house research and technology assessment.)
10:30 a.m.	NASA Thermionic Research and Technology Program Review (Purpose: To brief Committee members on the NASA thermionics research and technology program and to establish Committee position on the future direction of this program.)
2:30 p.m.	Potential Fiscal Year 1979 Propulsion and Power New Initiatives (Purpose: To brief Committee members on the potential fiscal year 1979 propulsion and power new initiatives.)

JUNE 15, 1977

8:30 a.m.	Discussion of Potential Fiscal Year 1979 Propulsion and Power New Initiatives (Purpose: To establish Committee positions on the potential fiscal year 1979 propulsion and power new initiatives.)
1:00 p.m.	Committee Discussions (Purpose: To discuss general topics and open items, to propose a date and place for the next Committee meeting, and to discuss possible agenda items.)
3:00 p.m.	Adjournment.

KENNETH R. CHAPMAN,
Assistant Administrator for DOD and Interagency Affairs, National Aeronautics and Space Administration.

MAY 20, 1977.

NATIONAL CREDIT UNION ADMINISTRATION

PRIVACY ACT OF 1974

Systems of Records

AGENCY: National Credit Union Administration.

ACTION: Adoption of systems of records pursuant to the Privacy Act of 1974.

SUMMARY: Pursuant to 5 U.S.C. 552a (e)(4) the National Credit Union Administration (NCUA) hereby adopts 10 systems of records.

EFFECTIVE DATE: Effective May 26, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert M. Fenner, Office of General Counsel, National Credit Union Administration, 2025 M Street, NW., Washington, D.C. 20456. Telephone: (202) 254–9810.

SUPPLEMENTARY INFORMATION: These systems of records were published in proposed form at pages 9731 through 9735 of the February 17, 1977, edition of the FEDERAL REGISTER. Concurrent with the publication in proposed form, a report on the systems was filed with the Director of the Office of Management and Budget, the Speaker of the House of Representatives, the President of the Senate and the Privacy Protection Study Commission.

NCUA's previously published systems of records, designated as systems "NCUA–1" through "NCUA–20", were set forth at pages 44982 through 44990 of the October 13, 1976, edition of the FEDERAL REGISTER.

No comments having been received, the National Credit Union Administration adopts, without change and effective May 26, 1977, the "Notice of Systems of Records" as published in proposed form at pages 9731 through 9735, Vol. 42, No. 33 of the February 17, 1977, edition of the FEDERAL REGISTER.

C. AUSTIN MONTGOMERY,
Administrator.

MAY 18, 1977.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for Humanities

ADVISORY COMMITTEE, PLANNING OFFICE PANEL

Meeting

MAY 11, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Planning Office Panel will be held at 806, 15th Street, NW., Washington, D.C. 20506, in room 314, from 9 am. to 5:30 pm. on June 23, and 24, 1977.

The purpose of the meeting is to review Youthgrants in the Humanities applications submitted to the National Endowment for the Humanities for projects beginning after October 1, 1977.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 28, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202–382–8301.

JOHN W. JORDAN,
Advisory Committee Management Officer.

[FR Doc.77–15071 Filed 5–25–77;8:45 am]

ADVISORY COMMITTEE, RESEARCH GRANTS PANEL

Meeting

MAY 17, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Research Grants Panel will be held at 806 15th Street, NW., Washington, D.C. 20506, in room 1130, from 9 am to 5:30 pm on June 17, 1977.

The purpose of the meeting is to review Research Materials applications in the field of linguistics and lexicography submitted to the National Endowment for the Humanities for projects beginning after October 1, 1977.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 28, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202–382–8301.

JOHN W. JORDAN,
Advisory Committee Management Officer.

[FR Doc.77–15072 Filed 5–25–77;8:45 am]

ADVISORY COMMITTEE, RESEARCH GRANTS PANEL

Meeting

MAY 16, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that a meeting of the Research Grants Panel will be held at 806 15th Street, NW., Washington, D.C. 20506, in room 1130, from 9 am to 5:30 pm on June 16, 1977.

The purpose of this meeting is to review applications submitted to the Tools Program of the National Endowment for the Humanities, for projects in History, Social Science, and Philosophy beginning October 1, 1977.

Because the proposed meeting will consider financial information and disclose information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Acting Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 28, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202–382–2031.

JOHN W. JORDAN,
Advisory Committee Management Officer.

NATIONAL STUDY COMMISSION ON RECORDS AND DOCUMENTS OF FEDERAL OFFICIALS

PRIVACY ACT OF 1974

Revocation and Transfer of Systems of Records

Pursuant to the provisions of the Privacy Act of 1974, Pub. L. 93–579, 5 U.S.C. 552a, the National Study Commission on Records and Documents of Federal Officials published in the FEDERAL REGISTER (41 FR 40048) a notice of the following systems of records subject to the Privacy Act: PDC–1, General Financial Records; PDC–2, Payroll Records; PDC–3, Informal Personnel Files. The Commission will terminate operations on May 30, 1977 and the above systems of records are revoked as of that date.

Following is a summary of the disposition of the Commission's systems of records, subsequent to the termination date:

PDC–1, General Financial Records and PDC–2 Payroll Records. To be retained by General Services Administration, Region 3, Payroll Processing Branch, for use in concluding administrative operations of the National Study Commission on Records and Documents of Federal Officials as part of the GSA system of records, Defunct Agency Records GSA/OAD–36.

PDC–3, Informal Personnel Files. Reviewed by the National Archives and Records Service and disposed of in accordance with Comprehensive Records Control Schedule NC 1–220–77–1, as approved by the Archivist of the United States.

DORI DRESSANDER,
General Counsel.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–302]

FLORIDA POWER CORP., ET AL. (CRYSTAL RIVER UNIT 3 NUCLEAR GENERATING PLANT)

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 4 to Facility Operating License No. DPR–72, issued to the Florida Power Corporation, City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach, and Utilities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission, and City of Orlando, Sebring Utilites Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee, which revised Technical Specifications for operation of the Crystal River Unit 3 Nuclear Generating Plant located in Citrus County, Florida.

The Amendment permits an acceptance criteria of 95 percent or greater for the removal efficiency for methyl iodide as demonstrated by a laboratory analysis of a representative carbon sample of the charcoal absorber units of the auxiliary building ventilation exhaust system.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated April 21, 1977, (2) Amendment No. 4 to License No. DPR–72, and (3) the Commission's related Safety Evaluation Supporting Amendment No. 4 to License No. DPR–72. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Crystal River Public Library, Crystal River, Florida 32629. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland, this 12th day of May 1977.

For the Nuclear Regulatory Commission.

JOHN F. STOLZ,
Light Water Reactors Branch No. 1, Division of Project Management.

[FR Doc.77–14795 Filed 5–25–77;8:45 am]

[Docket Nos. 50–335A, 50–250A, and 50–251A]

FLORIDA POWER & LIGHT CO. (ST. LUCIE NO. 1, TURKEY POINT UNITS NOS. 3 AND 4)

Request for Order To Show Cause

Notice is hereby given that by petition dated April 18, 1977, Florida Cities (Fort Pierce Utilities Authority of the City of Fort Pierce, Gainesville-Alachua County Regional Electric Water and Sewer Utilities, Lake Worth Utilities Authority, Utilities Commission of the City of New Smyrna Beach, Orlando Utilities Commission, Sebring Utilities Commission, the Cities of Alachua, Bartow, Daytona Beach, Fort Meade, Key West, Mount Dora, Newberry, Quincy, St. Cloud, and Tallahassee, Florida, and the Florida Municipal Utilities Association) filed a request for an Order to Show Cause why License Nos. DPR–31, DPR–41 and DPR–67 should not be revoked, amended, or modified, due to alleged anticompetitive conduct and conditions under those licenses. The requested order would be issued to the Licensee, Florida Power & Light Company. In accordance with the procedures specified in 10 CFR § 2.206 appropriate action will be taken on this request within a reasonable time.

A copy of the request is available for inspection in the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. 20555, and at the Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450, and Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Dated at Bethesda, Maryland, this 16th day of May 1977.

For the Nuclear Regulatory Commission.

EDSON G. CASE,
Acting Director, Office of Nuclear Reactor Regulation.

[FR Doc.77–14668 Filed 5–25–77;8:45 am]

IOWA ELECTRIC LIGHT AND POWER CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 34 to Facility Operating License No. DPR–49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revised Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications which will modify the method of testing the operability of the relief valves used in the reactor pressure relief subsystem.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 9, 1977, (2) Amendment No. 34 to License No. DPR–49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Cedar Rapids Public Library, 426 Third Avenue SE., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 13th day of May 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[Docket No. STN 50–482]

KANSAS GAS AND ELECTRIC CO. AND KANSAS CITY POWER AND LIGHT CO. (WOLF CREEK GENERATING STATION, UNIT 1)

Issuance of Construction Permit

Notice is hereby given that, pursuant to the Partial Initial Decision and the Initial Decision of the Atomic Safety and Licensing Board, dated January 18, 1977, and May 11, 1977, respectively, the Nuclear Regulatory Commission (the Commission) has issued Construction Permit No. CPPR–147 to the Kansas Gas and Electric Company and the Kansas City Power and Light Company for construction of a pressurized water nuclear reactor at the applicant's site in Coffey County, Kansas. The proposed reactor, known as the Wolf Creek Generating Station, Unit 1 is designed for a rated

power of 3,411 megawatts thermal with a net electrical output of 1,150 megawatts.

The Partial Initial Decision and the Initial Decision are subject to review by an Atomic Safety and Licensing Appeal Board prior to their becoming final. Any decision or action taken by an Atomic Safety and Licensing Appeal Board in connection with these Decisions may be reviewed by the Commission.

The Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations in 10 CFR Chapter 1, which are set forth in the construction permit. The application for the construction permit complies with the standards and requirements of the Act and the Commission's rules and regulations.

The construction permit is effective as of its date of issuance. The earliest date for the completion of the facility is March 1, 1982, and the latest date for completion is March 1, 1984. The permit shall expire on the latest date for completion of the facility.

A copy of (1) the Partial Initial Decision and the Initial Decision, dated January 18, 1977, and May 11, 1977, respectively; (2) Construction Permit No. CPPR–147; (3) the report of the Advisory Committee on Reactor Safeguards, dated October 16, 1975; (4) the Office of Nuclear Reactor Regulation's Safety Evaluation Report dated September 1975, and Supplement Nos. 1, 2, and 3, thereto, dated January 14, 1976, February 10, 1976, and November 29, 1976, respectively; (5) the Preliminary Safety Analysis Report and amendments thereto; (6) the applicants' Environmental Report dated, May 16, 1974, and supplements thereto; (7) the Draft Environmental Statement dated July 1975; and (8) the Final Environmental Statement dated October 1975, are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. 20555, and at the Office of the County Clerk, Coffey County Courthouse, Burlington County, Kansas 66839. A copy of the construction permit may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Project Management.

Copies of the Safety Evaluation Report (Document No. NUREG–75/080) and its supplements (Document Nos. NUREG–0019 for Supplement No. 1 and NUREG–0033 for Supplement Nos. 2 and 3) and the Final Environmental Statement (Document No. NUREG–75/096) may be purchased, at current rates, from the National Technical Information Service, Springfield, Virginia 22161.

Dated at Bethesda, Maryland, this 17th day of May, 1977.

For the Nuclear Regulatory Commission.

OLAN D. PARR,
Chief, Light Water Reactors Branch No. 3, Division of Project Management.

[FR Doc.77–14796 Filed 5–25–77;8:45 am]

[Docket No. 50–289]

METROPOLITAN EDISON CO., ET AL.

Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 30 to Facility Operating License No. DPR–50, issued to Metropolitan Edison Company, Jersey Central Power and Light Company, and Pennsylvania Electric Company (the licensees), which revised Technical Specifications for operation of the Three Mile Island Nuclear Station, Unit No. 1 located in Dauphin County, Pennsylvania. The amendment is effective as of its date of issuance.

This amendment adds provisions to the Technical Specifications to require operability and surveillance of shock suppressors (snubbers) required to protect the primary coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 23, 1975, as supplemented September 15 and October 19, 1976, and March 9, 1977, (2) the Commission's letter dated February 17, 1977 to Metropolitan Edison Company, (3) Amendment No. 30 to License No. DPR–50, and (4) the Commission's related Safety Evaluation issued February 17, 1977. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Government Publications Section, State Library of Pennsylvania, Box 1601 (Education Building), Harrisburg, Pennsylvania.

A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 11th day of May 1977.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.77–14670 Filed 5–25–77;8:45 am]

[Docket No. 50–298]

NEBRASKA PUBLIC POWER DISTRICT

Issuance of Amendment To Facility Operating License and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 37 to Facility Operating License No. DPR–46, issued to the Nebraska Public Power District (the licensee), which revised Technical Specifications for operation of the Cooper Nuclear Station (the facility) located in Nemaha County, Nebraska. The amendment is effective 30 days from its date of issuance.

The amendment incorporated (1) fin fish impingement limits in the facility Technical Specifications and (2) changed the location of an environmental sampling station for poultry eggs, clarified sampling frequency requirements for soil samples, changed the location description of Sample Station No. 1, and corrected administrative errors from previous license amendments.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

In connection with item (1) above, the Commission has prepared an environmental impact appraisal relating to the action and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action. In connection with item (2) above, the Commission has determined that this action will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared.

For further details with respect to this action, see (1) the applications for amendment dated December 16 and 20, 1976, (2) Amendment No. 37 to License No. DPR–46, and (3) the Commission's Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Auburn Public Library, 116, 15th Street, Auburn, Nebraska 68305. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this ninth day of May, 1977.

For the Nuclear Regulatory Commission.

DON K. DAVIS,
Acting Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.77–14672 Filed 5–25–77;8:45 am]

[Docket No. 50–220]

NIAGARA MOHAWK POWER CORP.

Issuance of Facility License Amendment

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 15 to Facility Operating License No. DPR–63 to the Niagara Mohawk Power Corporation (the licensee) which revised Technical Specifications for operation of the Nine Mile Point Nuclear Station, Unit No. 1 (the facility) located in Oswego County, New York. The amendment is effective as of its date of issuance.

The amendment consists of changes to the Technical Specifications to permit the reactor vessel water level to be below the low-low-low level set point for an interval not to exceed twelve weeks. Amendment No. 14, issued March 25, 1977, permitted MNPC to lower the reactor vessel water level below the low-low-low level set point during major maintenance for an interval not to exceed six weeks.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 6, 1977, (2) Amendment No. 15 to License No. DPR–63, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Oswego City Library, 120 E. Second Street, Oswego, New York 13126.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 13th day of May, 1977.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc.77–14673 Filed 5–25–77;8:45 am]

[Docket No. STN 50–484]

NORTHERN STATES POWER CO. (MINNESOTA), NORTHERN STATES POWER COMPANY (WISCONSIN) (TYRONE ENERGY PARK, UNIT 1)

Order and Notice of Continuation of Hearing on Application For Construction Permit

On August 21, 1974 the Commission issued a "Notice of Hearing on Application for Construction Permits," published in 39 FR 31688 (August 30, 1974). The Notice related to the application by Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) for permits to construct Tyrone Energy Park, Nuclear Units 1 and 2, to be located in Dunn County, Wisconsin. Subsequently Northern States Power Companies amended their application to delete Unit 2 of Tyrone Energy Park because of its indefinite postponement. As a result of this amendment, the Atomic Safety and Licensing Board divided the proceedings into two phases. Phase 1 relates to the radiological health and safety aspects under the Atomic Energy Act of 1954, as amended. Phase 2 pertains to environmental issues under the National Environmental Policy Act of 1969.

Sessions of the hearing to receive evidence on radiological health and safety matters were held by an Atomic Safety and Licensing Board in Eau Claire, Wisconsin in September and October 1976 and the Board issued its Partial Initial Decision on these matters on May 3, 1977.

Notice is hereby given that the evidentiary hearing on the application for a construction permit for Nuclear Generating Unit No. 1, Tyrone Energy Park, will resume at 9:30 a.m., June 21, 1977 at Room 101, Hibbard Humanities Hall, University of Wisconsin Campus, Park and Garfield Avenues, Eau Claire, Wisconsin 54701. Evidence will be received with respect to environmental matters under the National Environmental Policy Act; particularly whether in accordance with the requirements of 10 CFR Part 51, the construction permit should be issued as proposed. The hearing is expected to last for several weeks.

The public is invited to attend. Any person may make a written limited appearance statement. Any person who has not already made an oral limited appearance statement may appear and do so. Statements should be limited to environmental considerations. Depending upon time requirements and the number of persons wishing to make oral statements the length of oral statements may be limited. No limitation is presently imposed upon the length of written statements.

Opportunities for limited appearances by members of the public will be afforded at the beginning of the opening session, 9:30 a.m., June 21; 7:00 p.m., June 21; and 1:00 p.m. June 25, 1977.

It is so ordered.

Dated at Bethesda, Maryland this 18th day of May, 1977.

For the Atomic Safety and Licensing Board.

IVAN W. SMITH,
Chairman.

[FR Doc.77–14674 Filed 5–25–77;8:45 am]

REGULATORY GUIDE

Expiration of Initial Public Comment Period

The Nuclear Regulatory Commission staff has, after consideration of the public comments received to date on a guide from its Regulatory Guide Series, determined that there is no need for a revision at this time. Most regulatory guides are revised to reflect additional staff review and public comments received during the initial 60-day comment period following a guide's first issuance. However, in a few cases, a guide may deal with a noncontroversial subject or may be a simple codification of existing practice, and therefore there may be no need for a revision. The guide noticed here is in this category, and for this reason the staff has concluded that no changes are needed at this time. The staff is therefore now using the guide in evaluating applicant and licensee submittals and performance, as noted in the guide's implementation section.

The guide involved is Regulatory Guide 1.116, "Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Equipment and Systems."

The first page of the guide with the words "FOR COMMENT" deleted is being reissued to the distribution list for Division 1. The letter "R" added to the revision number is to indicate that the page has been reissued with no changes in the text. For example, "Revision O–R" indicates that the page as originally issued is being reissued unchanged.

Requests for single copies of the reissued first pages should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control.

Comments and suggestions for improvements in regulatory guides are encouraged at all times, and guides are revised, as appropriate, to accommodate comments and reflect new information or experience. However, newly issued guides have an initial comment period of about two months after issuance. Following the expiration of this period, the staff reviews the comments and revises the guides, as appropriate, to reflect such suggestions

as alternative ways of achieving acceptable levels of safety and safeguards.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 17th day of May 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director,
Office of Standards Development.

[FR Doc.77-14797 Filed 5-25-77;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a new guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 7.8, "Load Combinations for the Structural Analysis of Shipping Casks," presents a set of initial conditions acceptable to the NRC staff for use in the structural analysis of type B packages used to transport irradiated nuclear fuel in the contiguous United States.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 7.8 will, however, be particularly useful in evaluating the need for an early revision if received by July 15, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 11th day of May 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office
of Standards Development.

[FR Doc.77-14677 Filed 5-25-77;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techiques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.63, Revision 1, "Electric Penetration Assemblies in Containment Structures for Light-Water-Cooled Nuclear Power Plants," describes a method acceptable to the NRC staff of complying with mechanical, electrical, and test requirements for the design, qualification, construction, installation, and testing of electric penetration assemblies in containment structures of light-water-cooled nuclear power plants. The original version of this guide endorsed IEEE Std 317-1972, "IEEE Standard for Electric Penetration Assemblies in Containment Structures for Nuclear Power Generating Stations." This issuance reflects the changes necessary to endorse the revision of that standard (IEEE Std 317-1976).

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Public comments on Regulatory Guide 1.63, Revision 1, will, however, be particularly useful in evaluating the need for an early, revision if received by July 20, 1977.

Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides in specific divisions should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Document Control. Telephone requests cannot be accommodated. Regutory guides are not copyrighted, and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a).)

Dated at Rockville, Maryland this 16th day of May 1977.

ROBERT B. MINOGUE,
Director, Office
of Standards Development.

[FR Doc.77-14678 Filed 5-25-77;8:45 am]

[Docket No. 50-280]

VIRGINIA ELECTRIC AND POWER CO. (SURRY POWER STATION, UNIT NO. 1)

Order for Modification of License

Virginia Electric and Power Company (the Licensee), is the holder of Facility Operating License No. DPR-32 which authorizes the operation of the nuclear power reactor known as Surry Power Station, Unit No. 1 (the facility) at steady state reactor power levels not in excess of 2441 thermal megawatts (rated power). The reactor is a pressurized water reactor (PWR) located at the Licensee's site in Surry County, Virginia.

II

On February 8, 1977, the staff issued an Order related to License No. DPR-32 which addressed operation of Surry Power Station Unit No. 1 under conditions in which steam generator tubes have been plugged as a result of the tube denting caused by corrosion of the tube support plate in the annular spaces between tube and the tube support plate. Subsequently on February 11, 1977, we issued a Safety Evaluation supporting the Order. In order to perform an inspection of the steam generators, the February 8, 1977 Order limited operation to CO equivalent days. The licensee ahs since that time submitted inspection and repair programs dated April 15 and 29, 1977[1] and has shutdown to perform the inspection and repairs. The NRC staff has evaluated the results of the inspection and repair program and has assessed whether continued operation of the facility would be safe. This evaluation is set forth in the staff's concurrently issued Safety Evaluation relating to the steam generator tube, integrity.

With respect to the effect of increased stress in the tube support plate as a result of tube support plate growth, the staff has concluded that neither buckling of the tube support plate nor damage to the steam generator shell through the wrapper and channel spacer would develop.

Continued growth of the tube support plate continues to impose stresses on the tubes and may result in the development of stress corrosion cracks in the tubes at denting locations. The staff has considered the effect of the development of stress corrosion cracking during the course of operation of this facility, and has assessed the potential effect of such cracks in conjunction with steam line break and loss of coolant accident events. The staff has concluded that under the additional limitations on tube leakage set forth in this Order, the potential effect of continued denting on the consequences of the steam line break event would not exceed a fraction of Part 100, and any effects of continued denting on LOCA events would not be significant. These events are of extremely low probability, especially for the limited period covered by this Order. The additional limitations set forth in this Order will provide reasonable assurance that the public health and safety will not be endangered.

After discussion with the staff, the licensee proposed in his April 29, 1977, submittal to modify the limitations applicable to this facility. The NRC staff believes that under the circumstances, the limitations proposed by the licensee and the additional ones added by the NRC staff are appropriate and should be confirmed by NRC order.

III

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 50, *It is ordered*, That Facility Operating License No. DPR-32 is hereby amended by deleting the provisions of the NRC Order dated February 8, 1977, as corrected February 11, 1977, and replacing in its entirety existing paragraph 3.E. of the license with the following:

E. Steam Generator Inspection

1. Unit No. 1 shall be brought to the cold shutdown condition in order to perform an inspection of the steam generators within six equivalent months of operation from May 6, 1977. Nuclear Regulatory Commission approval shall be obtained before resuming power operation following this inspection. For the purpose of this requirement, equivalent operation is defined as operation with a primary coolant temperature greater than 350° F.

2. Primary to secondary leakage through the steam generator tubes shall be limited to 0.3 gpm per steam generator, as described in the Safety Evaluation. With any steam generator tube leakage greater than this limit the reactor shall be brought to the cold shutdown condition within 24 hours and Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

3. If leakage from two or more tubes in the plant in any 20-day period is observed or determined, the reactor shall be brought to the cold shutdown condition within 24 hours and Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation or if two leaks are observed after the reactor is in cold shutdown Nuclear Regulatory Commission approval shall be obtained before resuming reactor operation.

4. The concentration of radioiodine in the primary coolant shall be limited to 1 μCi/gram during normal operation and to 10 μCi/gram during power transients as defined in the concurrently issued addition of Appendix A-1 to the Technical Specifications of the license.

Dated in Bethesda, Maryland this 6th day of May 1977.

For the Nuclear Regulatory Commission.

EDSON G. CASE,
Acting Director, Office
of Nuclear Reactor Regulation.

[Docket No. 50-573; License No. XR-119]

WESTINGHOUSE ELECTRIC CORP.

Issuance of Facility Export License

Please take notice that no request for a hearing or a petition for leave to intervene having been filed following publication of notice of proposed action in the FEDERAL REGISTER on December 30, 1976 (41 FR 26894), and the Nuclear Regulatory Commission having found that:

(a) The application filed by Westinghouse Electric Corporation, Docket Number 50-573, complies with the requirements of the Act, and the Commission's regulations set forth in Title 10, Chapter I, Code of Federal Regulations, and

(b) The reactor proposed to be exported is a utilization facility as defined in said Act and regulations,

the Commission has issued License No. XR-119 to Westinghouse Electric Corporation, Pittsburgh, Pennsylvania, authorizing the export of a power reactor with a thermal power level of 1,876 megawatts to Korea Electric Company, Seoul, Republic of Korea.

The export of this reactor to the Republic of Korea is within the purview of the Agreement for Cooperation Between the Government of the United States of America and the Government of the Republic of Korea.

Dated at Bethesda, Maryland this 11th day of May 1977.

For the Nuclear Regulatory Commission.

MICHAEL A. GUHIN,
Assistant Director, Export/Import and International Safeguards, Office of International Programs.

[FR Doc. 77-14676 Filed 5-25-77;8:45 am]

[1] Copies of (1) the Licensee's submittals dated April 15 and 29, 1977, (2) February 8, 1977 Order and Corrective Order dated February 11, 1977, relating to DPR-32, (3) this Order for Modification of License, In the Matter of Virginia Electric and Power Company, Surry Power Station, Unit No. 1, Docket No. 50-280, and (4) the Commission's concurrently issued Safety Evaluation supporting this Order are available for inspection in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Swem Library, College of William and Mary, Williamsburg, Viginia. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

ABNORMAL OCCURRENCE EVENT

Security Incident

Section 208 of the Energy Reorganization Act of 1974, as amended, requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of public health and safety). The following incident was determined to be an abnormal occurrence using the criteria published in the FEDERAL REGISTER on February 24, 1977 (42 FR 10950). Appendix A (Example I, C, 4) of the Policy Statement notes that a substantial breakdown of security that significantly weakens the protection against theft, diversion or sabotage can be considered an abnormal occurrence.

BREACH OF PHYSICAL SECURITY SYSTEM

DATE AND PLACE

On April 18-19, 1977 the security system at the Public Service Company of Colorado (PSCo) Fort St. Vrain Nuclear Generating Station was inspected. This plant is a high temperature gas cooled reactor, located near Platteville, Colorado.

NATURE AND PROBABLE CONSEQUENCE

During a shift change on April 19, 1977, an NRC Region IV (Dallas) inspector, who infrequently visits the facility and was not recognized, gained access to vital areas of the plant without a security challenge, contrary to the facility's existing security program and NRC regulatory requirements in 10 CFR Part 73. The inspector passed through security guard checkpoints unchallenged and arrived at the control room, at which point a reactor operations individual challenged the inspector for not displaying a security badge. The inspector demonstrated the existence of a laxness in the security program in the area of access control. The potential consequences, had this breach been made by a malevolent individual, could have been an act of sabotage.

CAUSE OR CAUSES

The cause of the breach of the security system was the failure of the personnel on duty to comply with security directives for the control of access to the protected and vital areas of the plant.

ACTION TAKEN TO PREVENT RECURRENCE

Licensee—The licensee reviewed the adequacy of the existing security plan. Additional measures were taken to strengthen the security program through personnel instruction, monitoring for enforcement, auditing and increased security staffing at security stations during periods of heavy personnel traffic.

NRC—NRC expresed its concern about the serious nature of this type of security breakdown and identified the actions deemed necessary to correct the situation during the inspection, as well as at a special corporate meeting on April 22 in Denver, Colorado. Enforcement action also included a proposed civil penalty in the amount of eight thousand dollars.

Following completion of a rulemaking proceeding addressed to upgrading of physical security requirements at nuclear facilities, the NRC issued revised security regulations (10 CFR 73.55) in February 1977 which require more stringent security measures to be implemented at this plant and other nuclear facilities covered by 10 CFR 73.55.

For the Nuclear Regulatory Commission.

Dated at Washington, D.C. this 20th day of May, 1977.

SAMUEL J. CHILK,
Secretary of the Commission.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS, SUBCOMMITTEE ON REACTOR SAFETY RESEARCH

Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on Reactor Safety Research will hold an open meeting on June 16, 1977 at the Sheraton Inn-Airport, 3535 Quebec Street, Denver, CO 80207. The purpose of this meeting is to discuss current plans and programs for research associated with advanced reactors.

The agenda for subject meeting shall be as follows:

THURSDAY, JUNE 16, 1977, 8:00 A.M. UNTIL THE CONCLUSION OF BUSINESS

Members of the Subcommittee will hold discussions with representatives of the Energy Research and Development Administration (ERDA) and the NRC regarding current plans and programs for research associated with advanced reactors.

At the conclusion of these discussions, the Subcommittee will caucus to determine whether the matters identified in the session have been adequately covered and whether they are ready for review by the full Committee. During the caucus Subcommittee members will discuss their opinions and recommendations on these matters. The Subcommittee may prepare a report to the full Committee on these matters.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted session from one day to the next.

The Advisory Committee on Reactor Safeguards is an independent group established by Congress to review and report on each application for a construction permit and on each application for an operating license for a reactor facility and on certain other nuclear safety matters. The Committee's reports become a part of the public record. Although ACRS meetings are ordinarily open to the public and provide for oral or written statements to be considered as a part of the Committee's information gathering procedure concerning the health and safety of the public, they are not adjudicatory type hearings such as are conducted by the Nuclear Regulatory Commission's Atomic Safety & Licensing Board as part of the Commission's licensing process. ACRS meetings do not normally treat matters pertaining to environmental impacts outside the safety area.

With respect to public participation in the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comment may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than June 9, 1977 to Mr. Thomas G. McCreless, ACRS, NRC, Washington, DC 20555, will normally be received in time to be considered at this meeting.

(b) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Subcommittee will receive oral statements on topics relevant to its purview at an appropriate time chosen by the Chairman.

(c) Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on June 15, 1977 to the Office of the Executive Director of the Committee (telephone 202-634-1374, Attn.: Mr. Thomas G. McCreless) between 8:15 a.m. and 5 p.m., EDT.

(d) Questions may be propounded only by members of the Subcommittee and their consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session. Recordings will be permitted only during those sessions of the meeting when a transcript is being kept.

(f) A copy of the transcript of the portion(s) of the meeting where factual information is presented will be available for inspection on or after June 23, 1977 at the NRC Public Document Room 1717 H St. NW., Washington, D.C. 20555.

Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 after September 16, 1977.

Copies may be obtained upon payment of appropriate charges.

Dated: May 24, 1977.

JOHN C. HOYLE,
Advisory Committee Management Officer.

[FR Doc.77-15114 Filed 5-25-77;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 77-21]

ACCIDENT REPORTS; SAFETY RECOMMENDATIONS AND RESPONSES

Availability and Receipt

Helicopter Safety Recommendations.—To insure the continued safe operation of the Sikorsky Model S-61L series helicopter, the National Transportation Safety Board on May 18 issued two new recommendations to the Federal Aviation Administration. The recommendations were dispatched within 24 hours of the May 16 accident involving an S-61L helicopter on the Pan American Building Heliport in New York City.

The helicopter toppled as the right main landing gear collapsed; the rotating main rotor blades contacted the heliport surface and disintegrated. Parts of the blades caused fatal injuries to persons in the vicinity waiting to embark on a flight to the John F. Kennedy Airport.

Preliminary examination of the helicopter's landing gear structure disclosed that the gear collapsed as a result of a fatigue fracture of the forward fitting, P/N 6125-50333-2, a part which must be inspected every 9,900 hours. The failed fitting had been in service for 7,000 hours. The Board was not aware of any inspection requirements other than visual during the 9,900-hour period. Because of the similarity in design of the forward and aft fittings on both the right and left sides, the Board believes that inspection should include all landing gear fittings.

Accordingly, the Safety Board recommends that the FAA:

Issue an Airworthiness Directive to require an immediate one-time inspection by an approved method on both the forward and aft main landing gear attachment fittings, right and left, on all Sikorsky Model 61L series helicopters having similar installations. (Recommendation A-77-32) (Class I—Urgent Followup)

Reevaluate the current inspection interval and issue requirements for more frequent periodic inspections if necessary to insure continued safe operation. The inspection interval could be based on a set number of operating cycles instead of an established operating time. (A-77-33) (Class II—Priority Followup)

Railroad Accident Report.—The Safety Board reports that the inability of newly refurbished track to withstand forces generated by the braking of a long, unevenly loaded train caused the derailment of a Union Pacific freight near Hastings, Nebraska, last August 2. Narrative report No. NTSB-RAR-77-1 concerning this accident is now available to the public.

Thirty-nine cars of the 117-car eastbound freight derailed at a grade crossing when the brakes automatically went into emergency after the engineer had braked the train from 52 mph to about 45 mph. There were no injuries in the accident, but damage was estimated at more than $1 million.

The Safety Board determines that the probable cause of this accident was the failure of the previously disturbed track structure to withstand the lateral forces generated by the 42nd, 43rd, and 44th cars of the train. The lateral forces resulted from a run-in of disproportionately heavy cars in the rear portion of the train.

Three preventive recommendations, Nos. R-77-3 through R-77-5, are reprinted in the report. These recommendations were originally issued on April 22 to the Federal Railroad Administration. (See 42 FR 21677, April 28, 1977.) The recommendations seek (1) regulatory action to insure that the locations of heavily loaded freight cars in a train will not adversely affect the train's operation, (2) a requirement that trains operated over unstable track be limited by slow orders, radio instructions or flagging to speeds that will reduce the possibility of track buckling from forces that exceed the restraining ability of the track, and (3) a requirement that locomotive engineers be instructed in train braking for varied circumstances that may develop during the train's operation.

Aircraft and Railroad Accident Reports in Brief Format.—For many years the Safety Board has issued periodically publications containing a random selection of aircraft accidents reported in computerized, brief format. One such publication, "Aircraft Accident Reports, Brief Format, U.S. Civil Aviation, Issue Number 3 of 1976 Accidents," Report No. NTSB-BA-77-1, was made available to the public last week.

The Safety Board has now begun publishing similar compilations of briefs of selected railroad accidents. First in this series, "Railroad Accident Reports, Brief Format, Issue Number 1—1976," Report No. NTSB-RAB-76-1, was also released last week. Both publications present the basic facts, conditions, circumstances, and probable cause(s) concerning each reported accident.

Issue No. 3 (aircraft) reports on 906 general aviation and 18 air carrier accidents. Additional statistical information is tabulated by type of accident, phase of operation, kind of flying, injury index, aircraft damage, conditions of light, pilot certificate, injuries, and casual factors.

Issue No. 1 (railroad) reports on 35 U.S. railroad accidents arranged in chronological order. Selected accident information is tabulated, including (1) types of accidents broken down by carriers, (2) casualties broken down by types of accidents and classes of persons, and (3) causal factors arranged categorically and broken down by types of accidents. This information is compiled from a random selection of accident reports and does not necessarily reflect an accurate long-term statistical distribution.

NOTE.—The brief reports of accidents in both publications contain essential information; more detailed data on these accidents may be obtained from the original factual reports on file in the Washington Office of the Safety Board. Upon request, factual reports will be reproduced commercially at an average cost of 25¢ per page for printed matter, $1.35 per page for black-and-white photographs, and $4.50 per page for color photographs, plus postage. Minimum reproduction charge is $3.00; an additional $4.00 user-service charge will be made for each order. Requests should directed to the Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. The requester must provide this information concerning the accident: (1) Date and place of occurrence, (2) type of aircraft and registration number, and (3) name of pilot. Both publications may be purchased from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

SAFETY RECOMMENDATION RESPONSES

Aviation: A-77-5 through A-77-8.—Federal Aviation Administration letter of May 11 responds to the recommendations issued by the Safety Board last February 15 concerning medical certification procedures for airmen. (See 42 FR 10915, February 24, 1977.)

With reference to A-77-5, FAA reports that, as recommended, the Civil Aeromedical Institute "continuously audits quality control functions in processing applications for medical certification and makes frequent changes to enhance the efficiency of the certification system." FAA anticipates that conversation to a new computer early next year will substantially improve its capabilities for detecting airman physical and Aviation Medical Examiner (AME) performance deficiencies, thereby enabling FAA to be more specific in its correction efforts.

FAA also concurs in A-77-6 which recommended issuance of a *Federal Air Surgeon's Bulletin* to emphasize to the AME the need for quality control and the need for adherence to the provisions of 14 CFR Part 67 and the *Guide for Aviation Medical Examiners*. FAA states that an issue of the *Bulletin* is in preparation, distribution expected before July 1. A notice to the AME's calling attention to the need for close conformity to the provisions of Part 67 and to the *Guide* will be included.

FAA does not concur in either recommendation A-77-7 or recommendation A-77-8. A-77-7 asked FAA to amend Part 67 to require that all applicants for first- and second-class medical certificates be administered periodically an audiometric hearing test. FAA states that, after careful evaluation of all alternatives, institution of such a requirement is not appropriate. FAA states:

The FAA is concerned only with assuring that airmen are capable of safely performing their duties for the validity period of the medical certificate. There is no responsibility for preventive medicine or liability for personnel compensation in cases of progressive hearing loss. Specific diagnosis and treatment of hearing abnormalities likewise are beyond the scope of regulatory concern. Audiometry, indispensable for clinical, hearing conservation, or research applications, is an unnecessarily sensitive and expensive screening procedure for civil airmen. It is unlikely that the greatly increased number of medical flight tests generated by use of a screening audiogram would result in the identification of significant numbers of airmen who should be refused certification.

Also with reference to A-77-7, FAA reports that a project is underway at the Civil Aeromedical Institute for developing a simple screening device to test intelligible speech reception. Pending successful completion of this project, FAA takes the position that the whispered voice test should be retained.

Recommendation A-77-8 asked FAA to require that all medical certificates be annotated appropriately when that certificate is governed by a Statement of Demonstrated Ability (SODA). FAA notes that SODA's (FAA Form 8500-15) are ordinarily issued only to airmen with static medical defects. "They are designed primarily to provide an airman with proof that his or her medical condition has been recognized and evaluated by the agency and that even though specific Part 67 medical standards are not met, eligibility for a medical certificate has been previously established," FAA said.

FAA notes that SODA's are most helpful to the examining AME's in determining whether a certificate may be issued to an applicant with an observable defect. The nature of most conditions that result in issuances of SODA's is such that their presence will be obvious to an AME even if the applicant fails to note the fact or present has FAA Form 8500-15, according to FAA. FAA states, "Rather than having a flight safety impact, the SODA is intended to prevent delays in issuance of medical certificates to airmen due to conditions previously evaluated and cleared by the FAA. AME's are instructed to withhold or deny certification in the presence of significant medical deficiencies unless the applicant can produce a SODA or other satisfactory evidence of clearance."

In view of this, FAA feels that annotating the medical certificates as suggested is unnecessary. FAA states:

However, we will prepare an article for publication in a future issue of the *Federal Air Surgeon's Bulletin* emphasizing the need for examiners to adhere to instructions contained in the *Guide for Aviation Medical Examiners* concerning SODA's. (Examiners are instructed to review the applications for completeness. If the applicant indicates that he or she has been issued a SODA, the AME is asked to review it to determine whether there has been an adverse change in the specified condition, whether there is some other disqualifying condition or history, and whether the SODA covers the class of certificate for which the airman is applying.)

Aviation: A-76-29 and A-76-30.—The Federal Aviation Administration initially

responded to these recommendations last June 7 (41 FR 26079, June 24, 1976). The recommendations were issued after Board review of several fatal general aviation accidents which occurred in instrument flight rules conditions during the period 1969 to 1973; these accidents involved instrument-rated pilots of small airplanes. In its first response FAA indicated that a study was being undertaken to analyze a number of accident reports to see whether a separate source of energy for the rate-of-turn indicator from that used to power the bank and pitch indicator would have prevented accidents.

In FAA's letter of May 2 regarding these recommendations, the agency reports that the study has been completed. FAA reports that the number of single-power source configured aircraft in service was considered, and the potential overall safety benefit versus the economic impact of a requirement for retrofit was weighed. FAA states that the study "did not provide justification for regulatory action at this time, as had been recommended by the Board in A–76–29. The FAA believes that issuance of an advisory circular on this subject is the proper course of action in this instance."

Recommendation A–76–30 called for issuance of an advisory circular to inform pilots of (1) procedures they should use to determine the operability of gyroscopic instruments, (2) the importance of instrument crosschecks during IFR flight, and (3) the importance of staying proficient in partial-panel emergency operation. FAA reports that Advisory Circular 9–46 "Gyroscopic Instruments—Good Operating Practices" was issued February 4, 1977.

Highway: H–76–17 and H–76–18.—Letter of May 10 from the State Department of Highways and Public Transportation, Austin, Texas, concerns recommendations issued following investigation of the April 29, 1975, Surtigas, S.A., tractor-tank-semitrailer accident near Eagle Pass, Texas. Referring to correspondence of last November with reference to these recommendations (41 FR 55002, December 16, 1976), the Department reports that it has completed the maintenance project on U.S. 277 north of Eagle Pass, and has made additional speed zone surveys.

The Department further reports that NO PARKING signs have been erected along the shoulders of U.S. 277 and that the restudy of the speed zoning has resulted in a reduction in posted speed limits from 55 mph to 45 mph from the East City Limit of Eagle Pass to U.S. 57. The Department believes that these changes should reduce the possibility of this type of accident occurring again. However, the Department will continue to monitor this section of roadway to see if additional steps need to be taken to increase the safety along this section of highway.

Railroad: R–77–1 and R–77–2.—Letter of May 2 from the Federal Railroad Administration acknowledges the Safety Board's letter of April 6 (42 FR 20693, April 21, 1977) advising of the revision to recommendation R–77–2 to eliminate reference to P–30–CH locomotive units. The recommendations were issued following investigation of the derailment of an Amtrack train last January 16 near Birmingham, Alabama. FRA refers to its initial response dated February 3, (42 FR 8446, February 10, 1977) which indicated that only the speeds of passenger trains with SDP–40 F locomotives were restricted. FRA believes that its February 3 response is still current and applicable to revised R–77–2.

SAFETY BOARD COMMENTS ON MEDICAL STANDARDS FOR DRIVERS

In commenting on Notice of Proposed Rule Making Docket No. MC–76, Notice 77–3 (42 FR 16452, March 28, 1977), the Safety Board commended the Bureau of Motor Carrier Safety, U.S. Department of Transportation, for its comprehensive review of medical standards for insulin-dependent diabetic drivers.

Referenced in the Board's May 10 letter to BMCS is report No. NTSB–HAR–74–5 concerning the Greyhound bus collision with a concrete overpass support column on I–880 at San Juan Overpass, Sacramento, California, on November 3, 1973. After investigating that accident the Board recommended stricter medical standards for drivers and development of regulations that specify the necessary qualifications of the examining physician. (Recommendation H–74–36)

Since there is no backup system on a bus to take over when a driver becomes incapacitated, the Board said that passenger safety requires that the driver's ability not be impaired by an identifiable medical condition. Also, the weight and size of buses and trucks makes them a substantial threat to others on or near the road if vehicle control is lost. In populated areas the release of hazardous materials cargoes in an accident can increase substantially the number of persons that are affected by the accident.

The Board believes that medical standards should not be changed to permit insulin-dependent diabetics to operate commercial motor vehicles in interstate or foreign commerce.

NOTE.—The above summarizes Safety Board documents made available, and safety recommendation responses received, during the week preceding publication of this notice in the FEDERAL REGISTER. The railroad accident report and the helicopter safety recommendation letter in their entirety are available to the general public; single copies are obtainable without charge. Copies of the full text of responses to recommendations and any Board correspondence may be obtained at a cost of $4.00 for service and 10¢ per page for reproduction. All requests must be in writing, identified by the recommendation number and date of publication of this notice in the FEDERAL REGISTER. Address inquiries to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594.

Multiple copies of the railroad accident report may be purchased by mail from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151.

(Secs. 304(a)(2) and 307 of the Independent Safety Board Act of 1974 (Pub. L. 93–633, 88 Stat. 2169, 2172 (49 U.S.C. 1903, 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 18, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202–395–4529), or from the reviewer listed.

NEW FORMS

UNITED STATES INTERNATIONAL TRADE COMMISSION

Importers' Questionnaire (malleable cast-iron pipe and tube fittings), single time, importers of malleable cast-iron pipe and tube fittings, Evinger, S. K. 395–3710.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service, Epidemiologic Investigation of Brucellosis Reactor Herd VS 4–106 through 4–106C, on occasion, all farms with brucellosis reactor animals Warren Topelius, 395–5872.

DEPARTMENT OF COMMERCE

Economic Development Administration, Local Public Works Application Supplement, ED–101LPW–S, on occasion, Government agencies, National Security Division, Economics and General Government Division, 395–4734.

Bureau of Census, Annual Survey of Manufactures—Unfilled Orders—Shipments Supplement, MA–300, MA–300S, annually, manufacturing companies, C. Louis Kincannon, 395–3211.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service, Survey of Hospital Staff, single time, administrators of short-stay hospitals, Richard Eisinger, 395–6140.

REVISIONS

GENERAL SERVICES ADMINISTRATION

Transfer Order Surplus Personal Property, SF 123, on occasion, State Agencies, Warren Topelius, 395–5872.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service, Declaration of Importation (animals, animal semen, poultry and eggs for hatching), VS 17–29, on occasion, importers, Warren Topelius, 395–5872.

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Food and Drug Administration, Image Receptor Module, FD 2578A, single time, X-Ray equipment operators, Ellett, C. A., 395–5867.

EXTENSIONS

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Alcohol, Drug Abuse and Mental Health Administration, Alcoholic Treatment Center Questionnaire, NIMH1009, on occasion, grantees, Richard Eisinger, 395–6140.

DEPARTMENT OF THE INTERIOR

Bureau of Sport Fisheries and Wildlife, Sandhill Crane Harvest Questionnaire, 3–530, annually, hunters of sandhill cranes, Maria Gonzalez, 395–6132.

PHILLIP D. LARSEN,
Budget and Management Officer.

[FR Doc.77–15166 Filed 5–25–77;8:45 am]

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on May 23, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

NEW FORMS

FEDERAL MEDIATION AND CONCILIATION SERVICE

Arbitrator's report and fee statement, FMCS R–19, on occasion, labor arbitrators, Warren Topelius, 395–5872.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service, Administrative Review Report—Child Care Food Program, FNS–345, FNS 345–1, on occasion, institutions participating in child care food program, human resources division, Warren Topelius, 395–3532.

DEPARTMENT OF COMMERCE

Bureau of Census, 1978 Census of Agriculture, A1(A)–T2, single time, national sample from 1974 census of agriculture, Gaylord Worden, 395–4730.

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Center for Disease Control, Pulmonary Function Standards Study, single time, blue collar workers in North Carolina, Richard Eisinger, Ellett, C. A. 395–6140.

Alcohol, Drug Abuse and Mental Health Administration, Employment Specialist Study, single time, patients and staff in treatment programs, Strasser, A., Richard Eisinger, 395–5867.

Center for Disease Control, Health Effects of Sulfur Oxides and Sulfuric Acids, Nitrogen Oxides and Nitric Acids, single time, industrial workers, Ellett, C. A., 395–5867.

Alcohol, Drug Abuse and Mental Health Administration, National Drug Abuse Treatment Utilization Survey (NDATUS) Validation, single time, drug abuse treatment units, Richard Eisenger, 395–6140.

Center for Disease Control:
- Survey of National Attitudes Toward Immunization, single time, individuals over 18 in U.S. population, Richard Eisinger, 395–6140.
- Immunogenetics of Beryllium Disease in Humans, single time, beryllium workers and sarcoidosis patients, Richard Eisinger, 395–6140.
- Medical Health Surveillance of Grain Handlers, single time, Grain Handlers, Richard Eisinger, Ellett, C. A., 395–6140.

DEPARTMENT OF LABOR

Employment and training Administration:
- Rearranged Work Schedules Study, MT–281, single time, employees of rearranged work weeks, Strasser, A., 395–5867.
- Survey of Employment, Unemployment, and underemployment in the Performing Arts, ETA–5, single time, random sampling from 5 unions covering performing arts, Strasser, A., 395–5867.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation, Project Survey Questionnaire, single time, construction workers on water projects in Western U.S., natural resources division, Raynsford, R., 395–6827.

DEPARTMENT OF THE TREASURY

Departmental and Other United States Coinage Requirements, Survey of State Departments of Revenue, single time, State departments of revenue, Warren Topelius, 395–5872.

REVISIONS

VETERANS ADMINISTRATION

Application for Veterans Group Life Insurance (veteran separated more than 120 days), 29–8714–2, on occasion, veterans separated on or after August 1, 1974, Caywood, D. P., 395–3443.

EXTENSIONS

DEPARTMENT OF HEALTH, EDUCATION AND WELFARE

Food and Drug Administration, New Drug Application (by manufacturers, including research, testing, manufacturing, descriptive data and samples), FD–356H, on occasion, drug manufacturers, Warren Topelius, 395–5872

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Housing Management, Highlights of Loan Provisions and Project Reporting Requirements, HUD 5510, 5511, 5512, 5513, and 5514, annually, owners of senior citizens housing projects, housing, veterans and labor division, 395–3532.

Policy Development and Research:
- Housing Authority Staff Survey Instrument, PH–4, annually, employees of PHA's central office, Larry Haber, 395–5631.
- Project Manager Survey Instrument, PH–3, annually, project managers of PHA housing projects, Larry Haber, 395–5631.
- Board of Commissioners Survey Instrument, PH–6, annually, Chairman, Board of Commissioners of PHA, Larry Haber, 395–5631.
- Household Survey Instrument, PH–1, annually, residents of PHA housing projects, Larry Haber, 395–5631.

REVISIONS

DEPARTMENT OF AGRICULTURE

Statistical Reporting Service, Filbert Objective Yield—Oregon, annually, filbert growers, Gaylord Worden, 395–4730.

DEPARTMENT OF LABOR

Employment and Training Administration, Extended Benefit Data, MA 5–39, weekly, State ES agencies, Warren Topelius, 395–5872.

EXTENSIONS

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service:
- Monthly Distribution of Donated Commodities to Special Groups, FNS–153, monthly, counties, cities and Indian reservations, Gaylord Worden, 395–4730.
- Report of Coupon Issuance for Disaster Relief (food stamp program), FNS–292, on occasion, Lowry, R. L., 395–3772.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration:
- Statement of Investigator (clinical pharmacology), FD–1572, on occasion, clinical investigators, Warren Topelius, 395–5872.
- Statement of Investigator, FD–1573, on occasion, clinical investigators, Warren Topelius, 395–5872.

EXTENSIONS

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Policy Development and Research:
- Project Staff Survey Instrument, PH–2, annually, employees of the PHA's housing projects, Larry Haber, 395–5631.
- Executive Director Survey Instrument, PH–5, annually, executive director of public housing agency, Larry Haber, 395–5631.

DEPARTMENT OF THE INTERIOR

Bureau of Mines:
- Gallium, 6–1551–A, annually, gallium consumers, Warren Topelius, 395–5872.
- Consumption, Receipts, and Stocks of Specified Grades of Asbestos, 6–1211–A, annually, consumers of asbestos, Warren Topelius, 395–5872.
- Producing or Developing Mining Property (Operators Previously Unknown), 6–1175–X, on occasion, new mines or those which have recently become active, Warren Topelius, 395–5872.
- Phosphate Rock Survey (Production, Disposition and Stocks), 6–1250–S, semi-annually, producers of phosphate rock, Warren Topelius, 395–5872.
- Barite (Disposition and Receipts), 6–1227–A, annually, producers of barite, Warren Topelius, 395–5872.
- Sulfur—Suppliers Report of Production, Receipts, Consumption, Shipments, and Stocks, 6–1238–M, monthly, producers of elemental sulfur, Warren Topelius, 395–5872.

Slate, 6-1282-A, annually, producers of slate, Warren Topelius, 395-5872.
Exfoliated Vermiculite (Production and Disposition), 6-1208-A, annually, producers of exfoliated vermiculite, Warren Topelius, 395-5872.
Crude Mica (Production), 6-1289-A, annually, producers of crude mica. Warren Topelius, 395-5872.
Crude Artificial Abrasives (Production and Stocks), 6-1200-A, annually, producers of crude artificial abrasives, Warren Topelius, 395-5872.
Stone Only (Quarriers Report), 6-1220-A, annually, producers of stone, Warren Topelius, 395-5872."

PHILLIP D. LARSEN,
Budget and Management Officer.

RAILROAD RETIREMENT BOARD

RAILROAD RETIREMENT SUPPLEMENTAL ANNUITY PROGRAM

Determination of Quarterly Rate of Excise Tax

In accordance with directions in Section 3221(c) of the Railroad Retirement Tax Act (26 U.S.C. 3221(c)), the Railroad Retirement Board has determined that the excise tax imposed by such Section 3221(c) on every employer, with respect to having individuals in his employ, for each man-hour for which compensation is paid by such employer for services rendered to him during the quarter beginning July 1, 1977, shall be at the rate of twelve and one-half cents.

In accordance with directions in Section 15(a) of the Railroad Retirement Act of 1974, the Railroad Retirement Board has determined that for the quarter beginning July 1, 1977, 14.1 percent of the taxes collected under Sections 3211 (b) and 3221(c) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Account and 85.9 percent of the taxes collected under such Sections 3211(b) and 3221(c) plus one hundred percent of the taxes collected under Section 3221(d) of the Railroad Retirement Tax Act shall be credited to the Railroad Retirement Supplemental Account.

By Authority of the Board.

Dated: May 18, 1977.

R. F. BUTLER,
Secretary of the Board.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #1335]

IOWA

Declaration of Disaster Loan Area

The counties of Lee and Webster and adjacent counties within the State of Iowa, constitute a disaster area because of physical damage caused by high winds, torrential rains, hail, tornadoes and flash flooding which occurred on May 4-5, 1977. Eligible persons, firms and organizations may file applications for loans for physical damage until the close of business on July 18, 1977, and for economic injury until the close of business on February 20, 1978, at:

Small Business Administration, District Office, 210 Walnut Street, Des Moines, Iowa 50309.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

Dated: May 19, 1977.

RICHARD HERNANDEZ,
Acting Administrator.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 77-102]

EQUIPMENT, CONSTRUCTION, AND MATERIALS

Termination of Approval Notice

1. Certain laws and regulations (46 CFR Chapter I) require that various items of lifesaving, firefighting and miscellaneous equipment, construction, and materials used on board vessels subject to Coast Guard inspection, on certain motorboats and other recreational vessels, and on the artificial islands and fixed structures on the outer Continental Snelf be of types approved by the Commandant, U.S. Coast Guard. The purpose of this document is to notify all interested persons that certain approvals have been terminated as herein described during the period from September 3, 1976 to April 3, 1977 (List No. 5-77). These actions were taken in accordance with the procedures set forth in 46 CFR 2.75-1 to 2.75-50.

2. The statutory authority for equipment, construction, and material approvals is generally set forth in sections 367, 375, 390b, 416, 481, 489, 526p, and 1333 of Title 46, United States Code, section 1333 of Title 43, United States Code, and section 198 of Title 50, United States Code. The Secretary of Transportation has delegated authority to the Commandant, U.S. Coast Guard with respect to these approvals (49 CFR 1.46(b)). The specifications prescribed by the Commandant, U.S. Coast Guard for certain types of equipment, construction, and materials are set forth in 46 CFR Parts 160 to 164.

3. Notwithstanding the termination of approval listed in this document, the equipment affected may be used as long as it remains in good and serviceable condition.

BUOYANT CUSHIONS, KAPOK, OR FIBROUS GLASS

The Herter's Inc., Waseca, Minnesota 56093, Approval No. 160.048/206/0 expired and was terminated effective March 3, 1977.

LIFE PRESERVERS, UNICELLULAR PLASTIC FOAM, ADULT AND CHILD FOR MERCHANT VESSELS

The Crawford Manufacturing Company, 3rd & Decatur Streets, Richmond, Virginia 23212, Approval Nos. 160.055/68/0 and 160.055/69/0 expired and were terminated effective March 2, 1977.

MARINE BOUYANT DEVICE

The Carlon Rubber Products Company, 1 New Haven Avenue, Derby, Connecticut 06418, Approval No. 160.064/12/0 expired and was terminated effective March 7, 1977.

The Tuffy Products, Inc., 540 West Third Street, Bloomsburgh, Pennylvania 17815, Approval Nos. 160.064/306/0 and 160.604/307/0 expired and were terminated effective March 23, 1977.

The Sun Down Products, Inc., 99 Willie Street, Lowell, Massachusetts 01854, no longer manufactures certain marine buoyant devices and Approval Nos. 160.064/858/0, 160.064/859/0 and 160.064/860/0 were therefore terminated effective March 8, 1977.

FIRE EXTINGUISHING SYSTEMS, FOAM TYPE

The National Foam System, Inc., Union and Adams Street, West Chester, Pennsylvania 19380, Approval No. 162.033/1/1 expired and was terminated effective September 3, 1976.

INCOMBUSTIBLE MATERIALS FOR MERCHANT VESSELS

The Pittsburgh Corning Corporation, Three Gateway Center, Pittsburgh, Pennsylvania 15222, Approval No. 164.009/104/0 expired and was terminated effective April 3, 1977.

Dated: May 17, 1977.

H. G. LYONS,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

RADIO TECHNICAL COMMISSION FOR AERONAUTICS (RTCA), SPECIAL COMMITTEE 129—FUTURE CIVIL AVIATION FREQUENCY SPECTRUM REQUIREMENTS

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of the RTCA Special Committee 129 on Future Civil Aviation Frequency Spectrum Requirements to be held June 22-23, 1977, Conference Room 8210 Federal Communications Commission, 2025 M Street NW., Washington, D.C., commencing at 9:30 a.m. The Agenda for this meeting is as follows: (1) Chairman's Comments; (2) Approval of Minutes of Tenth Meeting held December 15-16, 1976; (3) Consid-

eration of the Federal Communications Commission Fifth Notice of Inquiry, Docket 20271; (4) Consideration of Inputs from Committee Members; and (5) Preparation of Response to Fifth Notice of Inquiry.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the hearing. Persons wishing to attend and persons wishing to present oral statements should notify, not later than the day before the meeting, and information may be obtained from, RTCA Secretariat, 1717 H Street NW., Washington, D.C. 20006 (202–296–0484). Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on May 19, 1977.

KARL F. BIERACH,
Designated Officer.

National Highway Traffic Safety Administration

[Docket No. IP77-2; Notice 2]

GENERAL MOTORS CORP.

Petition for Exemption From Notice and Remedy for Inconsequential Noncompliance

This notice grants the petition by General Motors Corporation of Warren, Michigan ("GM," herein) to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.101, Motor Vehicle Safety Standard No. 101, Control Location, Identification, and Illumination.

The noncompliance exists on 441 early model 1977 GMC Truck and Coach General, and Chevrolet Bison heavy duty trucks. Standard No. 101 requires identification of any heating and air-conditioning system control, but General Motors inadvertently failed to identify the fan switch. Subsequent models carry the word "FAN" and these vehicles comply with Standard No. 101. The company argued that the noncompliance is inconsequential as all heating/air-conditioning controls including the fan switch are located in a single recessed area in the instrument panel. The operating positions of the fan switch are identified as "hi" and "lo"; and in GM's view "make it obvious to any driver that this switch controls the speed of the fan" and "especially * * * the skilled professional drivers of heavy duty commercial vehicles such and the General and Bison."

No comments were received on the petition.

The fan control modifies performance characteristics of the heating, air-conditioning, and defrost/defogging systems of the vehicles in which it is installed. As such, it is a control that is frequently used by the vehicle operator. GM has failed to identify the fan switch as such, nevertheless, its location and the operating positions of "hi" and "lo" would indicate the presence of a blower and that the switch is intended to operate it. The proximity of the fan control in the recessed area to other heating, air-conditioning, and defrost/defogging controls make it likely that the driver will understand its function at first sight.

Accordingly, petitioner has met its burden of persuasion and it has been determined that the noncompliance is inconsequential as it relates to motor vehicle safety. The petition by General Motors is hereby granted.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8.)

Issued on May 18, 1977.

ROBERT L. CARTER,
Associate Administrator,
Motor Vehicle Programs.

[FR Doc.77-14784 Filed 5-25-77;8:45 am]

[Docket No. IP77-6; Notice 1]

MACK TRUCKS, INC.

Petition for Exemption From Notice and Remedy for Inconsequential Noncompliance

Mack Trucks, Inc. of Allentown, Pa. ("Mack" herein) has petitioned to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1381 et seq.) for an apparent noncompliance with 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, Lamps, Reflective Devices, and Associated Equipment, on the basis that it is inconsequential as it relates to motor vehicle safety.

Standard No. 108 requires each motor vehicle to be equipped with an amber reflex reflector as far to the front of the vehicle as practicable. These reflectors must be mounted on the vehicles not less than 15 inches or more than 60 inches above the road surface. Mack has determined that the front reflex reflectors on approximately 260 DMM Model construction-type truck chassis, manufactured between December 1973 and February 1977, may exceed the 60-inch maximum by up to 5 inches. The company states that construction type vehicles are normally used only in daylight hours and, when not in use, are parked on the owner's premises. It argues that the noncompliance is inconsequentital because of the limited number of vehicles involved, and the general limitations on their use.

This notice of receipt of a petition is published under Section 157 of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1417) and 49 CFR Part 556 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition. Interested persons are invited to submit written data, views and arguments on the petition of Mack Trucks described above. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street SW, Washington, D.C. 20590. It is requested but not required that five copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered. The application and supporting materials, and all comments received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice will be published in the Federal Register pursuant to the authority indicated below.

Comment closing date: July 11, 1977.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417) delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on May 18, 1977.

Associate Administrator,
Motor Vehicle Programs.

[FR Doc.77-14783 Filed 5-25-77;8:45 am]

[Docket No. 77-04; Notice 2]

ELECTRIC AND HYBRID VEHICLES

Meeting and Invitation for Applications for Financial Assistance

The purpose of this notice is to announce that the public meeting on the applicability of Federal motor vehicle safety standards to electric and hybrid vehicles, previously scheduled for July 11, 1977 (42 FR 2863), will instead be held on July 14, 1977.

This change is made due to the fact that the Fifth International Congress on Automotive Safety is scheduled to convene on July 11, 1977. Not only is the Administrator of the National Highway Traffic Safety Administration to deliver an address at the Safety Congress, but a number of the participants in the convention are individuals whose testimony at the electric and hybrid vehicle public meeting is important.

The three day delay in the date of the public meeting will enable the Administrator to be present at both meetings and also permit the full participation in both safety forums of all interested persons.

The deadline for written comments on the subject of the public meeting is also changed by this notice. All such comments must be submitted by July 15, 1977.

The meeting, as now scheduled, will be held on July 14, 1977, in Room 2230 of the Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, beginning at 9:30 a.m. The meeting will continue on July 15, 1977, if additional time is necessary to hear all presentations.

The principal author of this notice is Karen Dyson, Office of Chief Counsel.

(Secs. 103, 119, Pub. L. 89–563, 80 Stat. 718 (15 U.S.C. 1392, 1407); sec. 13, Pub. L. 94–413, 90 Stat. 1260 (15 U.S.C. 2512); delegations of authority at 49 CFR 1.50 and 501.8.)

Issued on May 20, 1977.

INTERSTATE COMMERCE COMMISSION

[Vol. No. 18]

PETITIONS, APPLICATIONS, FINANCE MATTERS (INCLUDING TEMPORARY AUTHORITIES), RAILROAD ABANDONMENTS, ALTERNATE ROUTE DEVIATIONS, AND INTRASTATE APPLICATIONS

PETITIONS FOR MODIFICATION, INTERPRETATION OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

MAY 20, 1977.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission on or before June 27, 1977. Such protest shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) [1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No. MC 45544 (Sub-No. 1) (Notice of filing of petition to modify a certificate), filed May 2, 1977. Petitioner: SILVER LINE, INC., 171 Commerce Road, Carlstadt, N.J. 07072. Petitioner's representative: Edward L. Nehez, P.O. Box 1409, Fairfield, N.J. 07006. Petitioner holds motor *common carrier* Certificate in No. MC 45544 (Sub-No. 1), issued March 4, 1947, authorizing transportation, as pertinent, over irregular routes, of *Wearing apparel* (not including such articles which are transported crated or on hangers), from points in Lebanon and Monroe Counties, Pa., to New York, N.Y. By the instant petition, petitioner seeks to delete the restriction in the authority above:

No. MC 56967 (Sub-No. 4) (Notice of filing a petition to modify territorial description), filed April 28, 1977. Petitioner: GLENN - DOR PRODUCTS CORP., Drawer J, South Fallsburg, N.Y. 12779. Petitioner's representative: Roy D. Pinsky, 345 South Warren Street, Syracuse, N.Y. 13202. Petitioner holds a motor *common carrier* Certificate in No. MC 56967 (Sub-No. 4), issued March 11, 1977, authorizing transportation over irregular routes, of (1) *Dairy products and agricultural commodities*, the transportation of which is otherwise exempt from economic regulation under Section 203(b) of the Interstate Commerce Act, in mixed loads with dairy products, from Friendship, N.Y., to New York, N.Y., and those points in New Jersey in and north of Hunterdon, Somerset, and Middlesex Counties, N.J.; and (2) *paper articles*, as described in Appendix XI to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 290 and 291, from New York, N.Y., and those points in New Jersey in and north of Hunterdon, Somerset, and Middlesex Counties, N.J., to Friendship, N.Y. By the instant petition, petitioner seeks to include Monmouth County, N.J., as an additional origin point in (2).

No. MC 75579 (Notice of filing of petition to modify a certificate), file April 29, 1977. Petitioner: NATIONAL MOVERS CO., INC., Route S–3, East Rutherford, N.J. 07073. Petitioner's representative: Joseph A. Holl (same address as petitioner). Petitioner holds a motor *common carrier* Certificate in No. MC 75579, issued December 17, 1956, authorizing transportation, as pertinent, over irregular routes, *Household goods* as defined by the Commission, (1) Between points in Alabama, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia; (2) Between points in Massachusetts, on the one hand, and, on the other, points in Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Maryland, Michigan, Missouri, North Carolina, Ohio, South Carolina, Tennessee, Virginia, West Virginia, Wisconsin, and the District of Columbia; (3) Between Boston, Mass., and points in Massachusetts, within 65 miles of Boston, on the one hand, and, on the other, points in Alabama, Connecticut, Illinois, Maine, Maryland, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, and Virginia; (4) Between points in the District of Columbia, on the one hand, and, on the other, points in Alabama, Connecticut, Delaware, Maine, Massachusetts, Maryland, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, and West Virginia; (5) Between Chatham, N.J., and points within 25 miles of Chatham, on the one hand, and, on the other, points in Connecticut, Florida, Illinois, Indiana, Maine, Maryland, Massachusetts, Missouri, New Hampshire, New York, North Carolona, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and the District of Columbia; (6) Between points in New York, N.Y., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, points in Alabama, Delaware, Georgia, Mississippi, South Carolina, Tennessee, and Wisconsin; (7) Between points in the New York, N.Y., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, points in Kentucky, and Michigan.

By the instant petition, petitioner seeks to modify the commodity description so as to read: "*Household goods*, as defined by the Commission, and *electronic equipment, parts and supplies* when related to transportation of unusually fragile, delicate and valuable article under Proviso 3 of 49 CFR 1056.1 and return shipments thereof."

No. MC 133146 (Sub-No. 2 and 13) (Notice of filing a petition to modify a commodity description), filed April 25, 1977. Petitioner: INTERNATIONAL TRANSPORTATION SERVICE, INC., Suite 1–M, 3300 Northeast Expressway, N.E., Atlanta, Ga. 30341. Petitioner's representative: J. Michael May, Suite 400, 1447 Peachtree St., N.E., Atlanta, Ga. 30309. Petitioner holds a motor *contract carrier* permit in No. MC 133146 (Sub-No. 2), issued April 8, 1971, authorizing transportation, over irregular routes, of *Inedible waste foodstuffs (except waste meats), and inedible meal*, between points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia. Petitioner holds a motor *contract carrier* permit in No. MC 133146 (Sub-No. 13), issued December 17, 1975, authorizing transportation, over irregular routes, of *Inedible waste foodstuffs (except waste meats), and inedible meal*, between points in Florida and Georgia, Sub-No. 2 and 13, are under a continuing contract, or contracts, with International Bakerage, Inc. By the instant petition, petitioner seeks to modify the commodity descriptions in (Sub-No. 2 and 13) to read: (1) *Surplus and waste foodstuffs (except meats), and bakery products* for further processing or recycling, and (2) *products produced or recycled* from the commodities named in (1) above.

No. MC 134404 (Sub-No. 13) (Notice of filing of petition to modify a permit), filed May 3, 1977. Petitioner: AMERICAN TRANS-FREIGHT, INC., P.O. Box 796, Manville, N.J. 08835. Petitioner's representative: Eugene M. Malkin, Suite 6193, 5 World Trade Center, New York, N.Y. Petitioner holds a motor *contract carrier* Permit in No. MC 134404 (Sub-No. 13), issued March 4, 1975, authorizing transportation as pertinent, over irregular routes, of *Paper and paper products*, from Franklin and Richmond, Va., to points in Massachusetts, Rhode Island, Maine, Vermont, New Hampshire, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, and the District of Columbia, under a continuing contract, or contracts, with Union Camp Corporation. By the instant petition, petitioner seeks to modify the commodity description by the addition of "pulpboard and particleboard".

No. MC 139884 (Sub-No. 3) (Notice of filing of petition to add an additional contract shipper) filed March 29, 1977. Petitioner: KLIMA, INC., 10650 S.W. Wilsonville Rd., Wilsonville, Oreg. 97070. Petitioner's representative: Lawrence V. Smart, Jr., 419 N.W. 23rd Avenue,

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

Portland, Oreg. 97210. Petitioner holds a motor *contract carrier* Permit in No. MC 139884 (Sub-No. 3) issued June 18, 1976, authorizing transportation, as pertinent, over irregular routes, of *candy*, from Skokie, Ill., Des Moines, Iowa, Cambridge, Mass., Newark, N.J., and Bethlehem, Philadelphia, and Reading, Pa., to Portland, Oreg., and Seattle Wash., under a continuing contract, or contracts, with Northwest Brokerage Co. By the instant petition, petitioner seeks to add Luden's, Inc. as an additional contract shipper to the above authority.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such pleading shall comply with Special Rule 247(d) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

No. MC 117503 (Sub-No. 10) (Republication), filed March 30, 1976, published in the FEDERAL REGISTER issue of May 6, 1976, and republished this issue. Applicant: HATFIELD TRUCKING SERVICE, INC., 1625 North C. Street, Sacramento, Calif. 95814. Applicant's representative: Eldon M. Johnson, 650 California Street, Suite 2808, San Francisco, Calif. 94108. An Order of the Commission, Review Board Number 4, dated March 30, 1977, and served April 4, 1977, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over regular routes, in the transportation of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission commodities in bulk, livestock, motor vehicles, and those which require the use of special equipment): (1) between Williams and Sacramento, Calif., over Interstate Highway 5, serving all intermediate points; (2) between Marysville and Modesto, Calif., over California Highway 99, serving all intermediate points; (3) between Marsyville and Roseville, Calif., over California Highway 65, serving all intermediate points; (4) between Williams and Marysville, Calif., over California Highway 20, serving all intermediate points; (5) between Sacramento and Placerville, Calif., over U.S. Highway 50, serving all intermediate points;

(6) between San Francisco and Auburn, Calif., over Interstate Highway 80, serving all intermediate points; (7) between Pinole and Stockton, Calif., over California Highway 4, serving all intermediate points; (8) between San Francisco and Stockton, Calif., serving all intermediate points, from San Francisco over Interstate Highway 580 to junction Interstate Highway 205, thence over Interstate Highway 205, to junction Interstate Highway 5, thence over Interstate Highway 5 to Stockton, and return over the same route; serving as off-route points in connection with routes "(1)" through (8) above, (a) the Sierra Ordnance Depot, at or near Herlong, Calif., (b) points in Alameda, Amador, Contra Costa, Marin, Sacramento, San Joaquin, San Mateo, Solano, Sutter, and Yolo Counties, Calif., (c) the points of Biggs, Palermo, Bangor, and Gridley, in Butte County, Calif., and (d) those points in Santa Clara County, Calif., on and north of California Highway 130, and Interstate Highway 280, and those points in Yuba County, Calif., on and south of an unnumbered State Highway extending from Comptonville through Dobbins and extending to Bangor in Butte County as far as its intersection with Yuba-Butte County boundary line; restricted in "(1)" through (8) above against the transportation of traffic originating at and destined to points in Alameda, Contra Costa, Marin, San Francisco, San Mateo and Santa Clara Counties, Calif.; that applicant is fit, willing, and able properly to perform the service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the modifications made in the exceptions to applicant's commodity description in its grant of authority.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

The following applications are governed by Special Rule 247 of the Commission's *General Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(d)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d)(4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the FEDERAL REGISTER of a notice that the proceeding has been assigned for oral hearing.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 1184 (Sub-No. 23), filed April 22, 1977. Applicant: K & B MOUNTING, INC., 21533 Moumd Road, Warren, Mich. 48091. Applicant's representative: Eugene C. Ewald, 100 West Long Lake Road, Bloomfield Hills, Mich. 48013. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New automobiles, new trucks and new chassis*, in secondary movements, in driveaway service, from railheads at South Bend, Ind., to points in Indiana, restricted to traffic originating at the plantsite of Ford Motor Company located at Lorain, Ohio.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Washington, D.C. or Detroit, Mich.

No. MC 2202 (Sub-No. 533), filed March 24, 1977. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Blvd., P.O. Box 471, Akron, Ohio 44309. Applicant's representative: William O. Turney, 7101 Wisconsin Ave., Suite 1010, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), between Meridian, Miss., on the one hand, and, on the other, points in Louisiana in the area bounded by a line beginning at the Texas-Louisiana State line and drawn along Louisiana Highway 12 to its junction with U.S. Highway 190 located at or near Ragley, La., thence along U.S. Highway 190 to its junction with Louisiana Highway 30 located at or near Baton Rouge, La., thence along Louisiana Highway 30 to its junction with Louisiana Highway 74 located at or near St. Gabriel, La., thence along Louisiana Highway 74 to its junction with Louisiana Highway 75 located at or near St. Gabriel, La., thence along Louisiana Highway 75 to its junction with Louisiana Highway 22 located at or near Darrow, La.

Thence along Louisiana Highway 22 to its junction with Louisiana Highway 44 located at or near Burnside, La., thence along Louisiana Highway 44 to Reserve, La., thence along the Mississippi River to New Orleans, thence along Interstate Highway 10, to the Louisiana-Mississippi State Line, and serving all points located on and south of the described boundary line except Baton Rouge, La., restricted against the provision of service at Baton Rouge, La., and points between Baton Rouge and New Orleans (except New Orleans) that are located east of the west bank of the Mississippi River, and further restricted against the provision of service at points located on the west bank of the Mississippi River and lying within the respective commercial zones of Baton Rouge, Gramercy, Lutcher, Kenner, St. Rose, Norco, and Good Hope, La.

NOTE.—Applicant states it presently holds authority pursuant to MC-F-11991 (certificate not yet issued) authorizing the transportation of general commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), over irregular routes between New Orleans, and points within 10 miles of the corporate limits of New Orleans on the one hand, and, on the other, points in the above-described area in Southern Louisiana. The purpose of this application is to obtain authority to operate through an alternate gateway of Meridian, Miss. Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 2860 (Sub-No. 155), filed April 22, 1977. Applicant: NATIONAL FREIGHT INC., 71 W. Park Avenue, Vineland, N.J. 08360. Applicant's representative: William J. Lippman, Steele Park, 50 South Steele Street, Denver, Colo. 80209. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products and articles distributed by meat packing houses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Denver, Colo. to points in California, Oregon, Utah, Nevada, Washington and Florida.

NOTE.—Applicant requests that hearing on this application be consolidated with MC-113658 (Sub-No. 11), Scott Truck Line, Inc., et al., scheduled for hearing in Denver, Colo., commencing June 21, 1977, through July 1, 1977, at the Court of Appeals, Division 2, U.S. Courthouse, 1961 Stout Street.

MC 4405 (Sub-No. 555), filed April 22, 1977. Applicant: DEALERS TRANSIT, INC., 522 South Boston Avenue, Enterprise Bldg., Tulsa, Oklahoma 74103. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, North Dakota 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in interstate or foreign commerce, transporting: *Pipe, boiler tubing* and *fabricated steel pipe, boilers and boiler parts (valves), coal crusher-feeders and burners, fabricated steel weldments, steel castings, steel plate*, from the plant sites of Riley Stoker Corp., Erie, Pennsylvania and Sapulpa, Oklahoma, to points in the United States, except Alaska and Hawaii.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Boston, Massachusetts, or Washington, D.C.

No. MC 13134 (Sub-No. 45), filed March 28, 1977. Applicant: GRANT TRUCKING, INC., P.O. Box 256, Oak Hill, Ohio 45656. Applicant's representative: David A. Turano, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Refractories and refractory products*, (a) from Oak Hill, Ohio and points in Ohio within fourteen miles of Oak Hill and Elizabeth Township, Lawrence County, Ohio, to points in Arkansas, Colorado, Kansas, Mississippi, Nebraska, North Dakota, Oklahoma, and South Dakota; and (2) *materials, machinery, equipment and supplies* used in the manufacture, processing, and distribution of refractories and refractory products (a) from points in Arkansas, Colorado, Delaware, Florida, Kansas, Louisiana, Mississippi, Nebraska, North Dakota, Oklahoma, South Dakota and the District of Columbia, to Oak Hill, Ohio and points in Ohio within fourteen miles of Oak Hill; and (b) from points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Oklahoma, Pennsylvania, Rhode Island, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia, to points in Elizabeth Township, Lawrence County, Ohio.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Columbus, Ohio or Washington, D.C.

No. MC 16903 (Sub-No. 50), filed April 29, 1977. Applicant: MOON FREIGHT LINES, INC., 120 West Grimes Lane, Bloomington, Ind. 47401. Applicant's representative: Walter F. Jones, Jr., 601 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Urethane foam products, component parts and accessories* moving in the same vehicle, from Charleston, Ill., to all points in West Virginia, Pennsylvania, North Carolina, Virginia, District of Columbia, Maryland, Delaware, New Jersey, New York, Maine, New Hampshire, Massachusetts, Connecticut, Rhode Island, Vermont, Tennes ee, Mississippi, Alabama, Georgia, and South Carolina. Restricted to transportation originating at the plantsite of the Celotex Corporation, Charleston, Ill.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Tampa, Fla., or Washington D.C.

No. MC 25798 (Sub-No. 293), filed April 26, 1977. Applicant: CLAY HYDER TRUCKING LINES, INC., Post Office Box 1186, Auburndale, Fla. 33823. Applicant's representative: Tony G. Russell, Post Office Box 1186, Auburndale, Fla. 33823. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the Report In Descriptions in Motor Carrier Certificates 61 MCC 209 and 766 (except hides and commodities in bulk) from the plant site and storage facilities of Wilson Foods Corporation at Albert Lea, Minn., to points in Florida. Restricted to the transportation of traffic originating at the above named origin, and destined to the named destination.

NOTE.—Common Control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Dallas, Tex., or Kansas City, Mo.

No. MC 28088 (Sub-No. 24), filed April 20, 1977. Applicant: NORTH & SOUTH, INC., 2710 S. Main Street, Harrisonburg, Va. 22801. Applicant's representative: John R. Simms, Jr., 915 Pennsylvania Bldg., 425 13th Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Feed and feed materials*, except in bulk, from points in Alabama, California, Georgia, Florida, Illinois, Indiana, Kansas, Kentucky, Michigan, Nebraska, Nevada, North Carolina, Ohio, South Carolina, South Dakota, Tennessee, Texas, Wisconsin, Wyoming, and points in that part of Pennsylvania south and east of a line along U.S. Highway 11 from the Maryland-Pennsylvania State line to the junction with Pennsylvania State Highway 34, thence along Pennsylvania State Highway 34 to the junction with U.S. Highway 209, thence along U.S. Highway 209 to the Pennsylvania-New York State line to points in Delaware, Pennsylvania, Maryland, and Virginia and those points in West Virginia on and east of U.S. Highway 219.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Harrisonburg, Va.

No. MC 28088 (Sub-No. 25), filed April 20, 1977. Applicant: NORTH & SOUTH, INC., 2710 S. Main Street, Harrisonburg, Va. 22801. Applicant's representative: John R. Simms, Jr., 915 Pennsylvania Bldg., 425 13th Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes

transporting: *Feed supplements*, except in bulk: (1) from Giles County, Tenn., to points in Virginia, Maryland, Delaware, Pennsylvania, and that part of West Virginia on and east of U.S. Highway 220 and (2) from Chicago Heights, Ill., to points in Virginia, Delaware, Maryland, North Carolina, South Carolina, and that part of West Virginia on and east of U.S. Highway 220.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Harrisonburg, Va.

No. MC 29120 (Sub-No. 203), filed April 26, 1977. Applicant: ALL-AMERICAN, INC., 900 West Delaware, P.O. Box 769, Sioux Falls, S. Dak. 57101. Applicant's representative: Ralph H. Jinks (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and, meat by-products and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the plantsite and storage facilities utilized by American Beef Packers, Inc., at or near Oakland, Iowa, to points in Indiana, Kentucky, Michigan, and Ohio, restricted to traffic originating at the named origin and destined to the named destinations.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Omaha, Nebr.

No. MC 33970 (Sub-No. 18), filed April 1, 1977. Applicant: GEORGE HILDEBRANDT, INC., R.D. 2, Hudson, N.Y. 12534. Applicant's representative: Neil D. Breslin, 99 Washington Avenue, Suite 1111, Albany, N.Y. 12210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt and salt products*, from White Marsh, Md., to points in New York.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Albany, N.Y.

No. MC 44639 (Sub-No. 92), filed April 18, 1977. Applicant: L & M EXPRESS CO., INC., 220 Ridge Road, Lyndhurst, N.J. 07071. Applicant's representative: Robert B. Russell, 220 Ridge Road, Lyndhurst, N.J. 07071. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wearing apparel and materials and supplies* used in the manufacture of wearing apparel (except commodities in bulk) between Washington, N.C., and Emporia, Va. Applicant states that it intends to tack at Emporia, Va., with its present authority in MC 44639 (Sub-No. 72), which permits the transportation of wearing apparel and materials and supplies used in the manufacture of wearing apparel (except commodities in bulk) between Emporia, Virginia, on the one hand, and, on the other, New York, N.Y., and points in Bergen, Essex, Hudson, Middlesex, Monmouth, Morris, Passaic, Sussex, and Union Counties, N.J.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Newark, N.J., or New York, N.Y.

No. MC 48221 (Sub-No. 8), filed April 26, 1977. Applicant: W. N. MOREHOUSE TRUCK LINE, INC., 4010 Dahlman Avenue, Omaha, Nebr. 68107. Applicant's representative: Donald L. Stern, 530 Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *meat, meat products, meat by-products and articles distributed by meat packing houses* as described in Sections A and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Denver, Colo., and points in its Commercial Zone to points in Arizona, California, Idaho, Nevada, Oregon, Utah, and Washington.

NOTE.—Hearing: June 21–July 1, 1977, Court of Appeals, Division 2, U.S. Courthouse, 1961 Stout Street, Denver, Colo.

No. MC 52464 (Sub-No. 9), filed April 4, 1977. Applicant: EVANS TRUCKING CO., a corporation, 2773 Darlington Road, Beaver Falls, Pa. 15010. Applicant's representative: Arthur J. Diskin, 806 Frick Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes, transporting: *Seamless Steel tubing and pipe*, from the plantsites of Babcok & Wilcox Co., Tubular Products Division, located at Beaver Falls and Koppel, Pa., to points in New York.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Pittsburgh, Pa., or Washington, D.C.

No. MC 69834 (Sub-No. 13), filed April 15, 1977. Applicant: PRICE TRUCK LINE, INC., 2945 North Market, Wichita, Kans. 67219. Applicants' representative: William H. Shawn, 1730 M Street NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *School, art, and hobbies supplies and commodities used in the manufacturing, packaging, and transporting of school, art, and hobbies supplies* from the facilities of Binney & Smith, Inc., located at Winfield, Kans., to points in Texas and Louisiana; (2) *paper* from points in Texas to the plantsite and facilities of Thermal Shield, Inc., at Hesston, Kans.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Wichita, Kans.

No. MC 78228 (Sub-No. 62), filed April 25, 1977. Applicant: J. MILLER EXPRESS, INC., 962 Greentree Road, Pittsburgh, Pa. 15220. Applicant's representative Henry M. Wick, Jr., 2310 Grant Building, Pittsburgh, Pa. 15219. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Refractories, hot top rings, hot top slabs, hot topping compound, brick, hardware, iron or steel fluxing or purifying compounds*, from the facilities of Foseco Minsep, Inc., Cleveland, Ohio, to points in Michigan.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C., or Cleveland, Ohio.

No. MC 82492 (Sub-No. 154), filed April 25, 1977. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., 2109 Olmstead Road, P.O. Box 2853, Kalamazoo, Mich. 49003. Applicant's representative: William C. Harris (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food, food products and food ingredients*, from the plant site and storage facilities of Archer Daniels Midland Company at or near Decatur, Ill., to points in Indiana, Kentucky, Michigan, Ohio, those points in New York in and west of Allegany, Livingston, and Monroe Counties, and those points in Pennsylvania on and west of U.S. Highway 219.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Chicago, Ill., or St. Louis, Mo.

No. MC 87720 (Sub-No. 165), filed March 31, 1977. Applicant: BASS TRANSPORTATION CO., INC., P.O. Box 391, Old Croton Road, Flemington, N.J. 08822. Applicant's representative: Ronald L. Knorowski (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Animal and pet food, and materials, equipment, and supplies* used in the manufacture, sale, and distribution of animal and pet food, between Atlanta, Ga., and points in Connecticut, Delaware, Illinois, Indiana, Maryland, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 87730 (Sub-No. 27) (correction), filed March 15, 1977, published in the FEDERAL REGISTER issue of May 5, 1977, and republished as corrected this issue. Applicant: R. W. BOZEL TRANSFER, INC., 4500 Hollins Ferry Road, Baltimore, Md. 21227. Applicant's representative: Donald E. Cross, 700 World Center Building, 918 Sixteenth St. NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, packinghouse products, and such commodities as are used by meat packinghouses*, as described in Sections A, B, and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766, and food, foodstuffs, and animal food, in vehicles equipped with mechanical refrigeration, from Baltimore, Md., points in Baltimore, Howard, Prince George's, and Anne Arundel Counties, Md., and the District of Columbia, to points in West Virginia and Virginia (except Arlington, Clarke, Fairfax, Fauquier, Loudoun, Prince William, and Warren Counties, Va.).

NOTE.—The purpose of this republication is to correct applicant's requested authority. If a hearing is deemed necessary, the applicant requests it be held at either Washington, D.C., or Baltimore, Md.

MC 93980 (Sub-No. 71), filed April 22, 1977. Applicant: Vance Trucking Co., Inc., P.O. Box 1119, Henderson, N.C. 27536. Applicant's representative: Edward G. Villalon, 1032 Pennsylvania Building, Pennsylvania Avenue and 13th Street NW., Washington, D.C. 20004. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes transporting: *Iron and steel articles* from Waterford Township, N.J., to points in North Carolina and South Carolina.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Raleigh, N.C., or Washington, D.C.

No. MC 100666 (Sub-No. 345), filed April 4, 1977. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Bldg., 3535 Northwest 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lath*, from the plantsite of the Ceco Corporation, located at or near Broadview, Ill., to points in Florida, Georgia, North Carolina, South Carolina, and Texas.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

MC 103066 (Sub-No. 60), filed April 26, 1977. Applicant: Stone Trucking Co., a corporation, P.O. Box 2014, Tulsa, Okla. 74101. Applicant's representative: Eugene D. Anderson, Suite 428, 910 Seventeenth Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes transporting: *Meat, meat products, meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766, from the plant site and storage facilities of Colorado Beef Processors, Inc., located at or near Denver, Colo., to points in Connecticut, Delaware, District of Columbia, Maryland, Massachusetts, Michigan, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Virginia, and West Virginia.

NOTE.—Hearing: June 21–July 1, 1977, Court of Appeals, Division 2, U.S. Courthouse, 1961 Stout St., Denver, Colo.

No. MC 103926 (Sub-No. 56), filed April 4, 1977. Applicant: W. T. Mayfield Sons Trucking Co., a corporation, P.O. Box 947, Mableton, Ga. 30059. Applicant's representative: K. Edward Wolcott, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (I) *Machinery, equipment, materials*, and *supplies*, used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and *machinery, materials, equipment* and *supplies*, used in, or in connection with the construction, operation, repair, servicing, maintenance and dismantling of pipe lines, including the stringing and picking up thereof; and (II) *earth drilling machinery* and *equipment*, and *machinery, equipment, materials, supplies* and *pipe* incidental to, used in, or in connection with (A) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (B) the completion of holes or wells drilled, (C) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites and (D) the injection or removal of commodities into or from holes or wells, (1) between points in Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, and Virginia; and (2) between points in Connecticut, Delaware, Florida, Georgia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Rhode Island, South Carolina, and Virginia, on the one hand, and, on the other, points in Alabama, Arkansas, Colorado, Illinois, Indiana, Kentucky, Louisiana, Mississippi, New Mexico, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Utah, West Virginia, and Wyoming.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Houston, Tex.

No. MC 103926 (Sub-No. 57), filed April 14, 1977. Applicant: W. T. MAYFIELD SONS TRUCKING CO., a corporation, P.O. Box 947, Mableton, Georgia 30059. Applicant's representative: K. Edward Wolcott, Suite 1600, First Federal Bldg., Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Construction, earthmoving, excavating*, and *material handling machinery* and *equipment*; (2) *attachments, parts*, and *accessories* used for the commodities named in (1) above when moving in mixed shipments with said commodities; and (3) *attachments, parts*, and *accessories* being returned to factory for service, exchange, repair or warranty adjustment, between the plantsite and storage facilities of Clark Equipment Company, located at or near Skyland, North Carolina, on the one hand, and, on the other, points in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, West Virginia and the District of Columbia.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Washington, D.C. or Charlotte, N.C.

No. MC 103993 (Sub-No. 891), filed April 25, 1977. Applicant: MORGAN DRIVE-AWAY, INC., 28641 U.S. 20 West, Elkhart, Indiana 46514. Applicant's representatives: Paul D. Borghesani, 28651 U.S. 20 West, Elkhart, Indiana 46514.
